NEW QUESTION: 1
Users in a cloud-based production application report a chronic performance issue that occurs every day between 2:00 P.M. and 4:00 P.M. AH attempts to reproduce the problem in the Development, QA, and Staging environments have failed.
Which two techniques help you troubleshoot the problem? (Choose Two)
A. Review Performance Alerts and Exceptions in AES.
B. Review a Production Tracer Log using SMA.
C. Review Performance Alerts and Exceptions in PDC.
D. Review Alerts and Exceptions using PLA.
Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 2
You imported a rule-admin-product (RAP) file that contains new features into a user acceptance testing(UAT) environment. Select the option that ensures basic functionality behaves as expected before inviting users to start acceptance testing.
A. Create an integration test suite. Run the test suite using the Execute Test REST service
B. Create a regression test suite. Run the test suite using the automation server.
C. Create a smoke test suite. Run the test suite using the pre-import process.
D. Create an ad hoc test suite. Run the test suite using the post-import process.
Answer: (SHOW ANSWER)

NEW QUESTION: 3
What two recommendations do you provide to the development team to ensure the performance of the Pega application does not degrade over time? (Choose Two)
A. Purge and/or archive records based on the company's record retention policy.
B. Schedule scripts to maintain frequently fragmented tables.

C. Add indexes to all columns.
D. Purge workparty UUI index tables periodically.
Answer: (SHOW ANSWER)

NEW QUESTION: 4
The BigCo quoting application is currently on-premise. BigCo plans to move the application to Pega Cloud What factor do you need to consider for environment setup?
A. Network security configuration
B. System management application configuration
C. Log file access configuration
D. Database access configuration
Answer: C (LEAVE A REPLY)

NEW QUESTION: 5
Using the information shown in the case structure below, which option is always true?

A. The Weather case can be instantiated without a parent Event Booking case.
B. The Parking class must inherit from the Event Booking class.
C. Resolution of the Event Booking case requires the Parking case to be resolved.
D. Parking, Weather, and Hotel cases must be instantiated for the Event case to process correctly.
Answer: (SHOW ANSWER)

NEW QUESTION: 6
A developer has set the Rule security mode on the access group to Deny. Select the reason for this setting.
A. Ensure that all rules with the option of specifying a privilege have a privilege. Only users with the privilege can execute the rules.
B. Disable standard privileges providing administrator access to the application (for example AllFlows and AllFllowActions).
C. Require Access of Role to Object rules be specified for each layer in the class hierarchy and not inherited from parent classes.
D. Deny access to a rule if the privilege of the user is not defined in an Access of Role to Object.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 7
Finco corporation uses pega to perform the majority of the mortgage underwriting tasks.

After gathering the initial data, the mortgage case pauses and waits for the credit report The credit report is a separate case, located in the same class group as the mortgage case, and typically resolves within 24 hours. After the credit report is complete, the application routes the mortgage case to the specialist.
Which of the following options is the optimal solution to route the mortgage case to the specialist when the credit report is complete?
A. Insert a credit report assignment in the mortgage flow with a SLA to check the status of the credit report case and call the ResumeFlow activity when the credit report case completes.
B. Modify the credit report flow to move the mortgage case to the specialist. The application routes the assignment to the specialist with the least amount of work.
C. Add a wait shape to the mortgage flow with a case dependency to advance the mortgage flow to the next assignment when the credit report case is resolved.
D. Include a split join shape in the mortgage flow to include the credit report flow. Use the All option on the split join shape to ensure the credit report is complete before routing to the specialist.
Answer: C (LEAVE A REPLY)

NEW QUESTION: 8
XYZ Corp users are experiencing delays in the application that you suspect is related to the database Which two options do you recommend to isolate the issue? (Choose Two)
A. Increase the threshold for blob-size alerts.
B. Investigate when the database is used most heavily.
C. Lower query-time-related alert thresholds.
D. Write Pega logs to the database server.
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 9
A call center uses Pega Customer Service. Where does Pega Customer Service fit into the enterprise architecture?
A. Pega Customer Service is the new customer onboarding system.
B. Pega Customer Set vice is the customer and account enterprise service bus.
C. Pega Customer Service is the billing and reporting system of record.
D. Pega Customer Service is the customer interaction system of record.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 10
XYZ Corporation wants to perform extensive analysis on work party information across various case types in near real time. At the same time, XYZ wants to minimize the impact this analysis has on case workers using Pega applications.
Choose two options that would contribute to viable solutions. (Choose Two)
A. Use Pega API RCST services to update Case and Work Party data in a reports database.
B. Define additional database indexes for the Class Group and related Work Party tables.
C. Configure a reports database for the Class Group and Index WorkPartyUri Data Admm DB-Table records.

D. Use BIX to export Case and related Work Party data to a data warehouse.
Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 11
The following figure depicts a hierarchy of applications that are built on other applications.
Specifically , the productionapp application is built on applications customerapp and employeeapp. Each of these applications has additional built-on applications, including the duplicated MYEnterpriseApp application, which has two different versions in use. All applications are built on the same version of PegaRUUS.

Answer:

Explanation
ProductionApp 01.01CustomerApp 07.01ServiceApp 01.01EmployeeApp 01.01MyEnterpriseApp 01.02
PegaRULES 07.10

NEW QUESTION: 12
Select the option in which you would define Content Security Policies.
A. To restrict what data a user can view in a case the user can open
B. To configure security for the content management integration
C. To define security for case attachments
D. To prevent the browser to load content from untrusted sources
Answer: (SHOW ANSWER)

NEW QUESTION: 13

Which two tools and/or methods support continuous integration practices? (Choose Two)

A. Configuring pre and post import steps

B. Leveraging release toggles

C. Performing UI regression testing

D. Using an automation server to invoke unit test suites

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 14

One of the important requirements of Pega Web Mashup is to ensure that the same-origin policy is following. From the following options, select two valid configurations. (Choose TWO)

Configuration	Web application page URL	PEGA Gadget URL
A	https://www.pega.com/MyWebApp/home.html	https://www.pega.com/MyWebApp/gadgetA.html
B	https://www.pega.com/MyWebApp/home.html	http://www.pega.com/MyWebApp/gadgetA.html
C	https://www.pega.com/MyWebApp/home.html	https://www.pega.com/MyGadgets/gadgetA.html
D	https://www.pega.com/MyWebApp/home.html	https://www.pega.com:7878/MyWebApp/gadgetA.html

A. Configuration D

B. Configuration A

C. Configuration C

D. Configuration B

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 15

An end user of the application experienced a browser crash while working on a highly available system. Crash recovery is enabled. Does the user to be reauthenticated?

A. Yes, If the authentication cookie was lost.

B. No, if the authentication cookie was lost

C. No, if the user is directed to a different node.

D. Yes, if the user is directed to the same node.

Answer: (SHOW ANSWER)

NEW QUESTION: 16

Review the following classes and properties:

A field group list is defined at the MyCo-Lending-Work work pool level. The find group list name is Loans: the specified data type is MyCo-Data-Loan.
Which three statements are valid? (Choose Three)
A. All pages within the .Loans field group must be the same class, either MyCo-Data-Loan-Aiito or MyCo-Oata-Loan Mortqage
B. At design time, the system issues a warning since it is poor practice to define a field group with an abstract data type ctas%
C. An auto loan application can extend MyCo-Data-LoarvAuto without affecting a sum performed against .Loans C). Amount
D. The pxObjClass of any page in the .Loans field group list can be changed at nm time and does not need to be the same class.
E. A rule In MyCo-DataLoan-Mortgage can only be referenced through -Loans if also defined In MyCo Data-Loan.
Answer: (SHOW ANSWER)

NEW QUESTION: 17
A purchase order application allows users in their work group to read and write purchase request cases. When the total amount exceeds usd10,000 however, only the work group manger can read and write the case. Select two configuration that satisfy the requirement.(choose two)
A. Configure the worklist to only display purchase requests greater than USD10.000 for the work group manager.
B. Configure conditional access in Access Manager to read and write a purchase request case when the amount is less than USD 10.000.
C. Use a reads access control policy with a condition that verifies the amount is less than USD10.000.
D. Add a privilege to the case type class that is conditionally granted when the purchase request amount is less than USD 10.000.
Answer: (SHOW ANSWER)

NEW QUESTION: 18
What are two valid reasons for defining a case type within a case type-specific ruleset? (Choose
A. The case type might be converted to a component application in the future.
B. Each branch ruleset can be associated to case-specific user stories.

C. The ruleset can be added to the ruleset stack for multiple applications.
D. Case-specific rulesets make it easier to rebase ruleset versions.
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 19
What two recommendations do you provide to the development team to ensure the performance of the Pega application does not degrade over tune? (Choose Two)
A. Schedule scripts to maintain frequently fragmented tables.
B. Purge and/or archive records based on the company's record retention policy.
C. Add indexes to all columns.
D. Purge workparty UlU index tables periodically.
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 20
A Pega application locally stores the same set of codes defined by and used within an external system of record. The Page application does not locally store the labels associated to these codes. During case processing, the displayed labels for this set of codes are sourced from the external system of record. On any given day, the label associated to a code may change. You are asked to implement a report definition that displays the current label associated to each code whenever the report is run.
How do you design a Pega application to meet this requirement?
A. Display report definition rows using a custom section. Use a Keyed-access Data Page to source label values.
B. Query the distinct codes that the report would display. Develop an interface to retrieve the associated labels In bulk.
C. Persist the most recently retrieved labels for each code in a local table. Join to that table when running the report.
D. Develop a SQL function that calls a stored procedure to retrieve the currently associated level for each code.
Answer: (SHOW ANSWER)

NEW QUESTION: 21
You manage a 30-person development team with members located across the globe.
Which Pega Cloud environment best supports the needs of your team?
A. Preproduction instance
B. Standard sandbox
C. Large sandbox
D. Large development instance
Answer: D (LEAVE A REPLY)

NEW QUESTION: 22
Which three actions do you recommend to address their performance issue and ensure optimal application performance in the future? (Choose Three.)
A. Dedicated a node to background processing.

B. Review application environment sizing.
C. Remove embedded dashboard reports from the manager portal.
D. Minimize the usage of robotic automations.
E. Review selection criteria of agent activities.
Answer: A,B,E (LEAVE A REPLY)
Explanation
Six weeks after you deliver your application to production, you users report that the application slows down in the afternoon. The application is almost completely unresponsive for some users shortly after 3:00 P.M. Other users do not experience this problem until later in the day.
You do not have access to the Production environment, but you do have access to AES. The production environment has three nodes and a load balancer.
You need to resolve this issue because a new division of the organization will start using the application next month.

NEW QUESTION: 23
You oversee a medium-size development team, and some of the team members are new to pega. What are the most efficient ways to ensure that the rules the team creates adhere to best practices? (choose two)
A. Use Pega Log Analyzer to identify exceptions associated with the new team members.
B. Leverage the rule check-in approval process to review the new team member's changes first.
C. Have new team members create and run Pega automated unit tests against their rules.
D. Run Tracer on each rule the new team members check in to identify an failures in rule execution.
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 24
MyCo.com has instances of SCM-F5, SmartDispute, and CPM-F5 in their Production Environment distributed across multiple Pega instances. A new business requirement states that users working in any one application cart create a case in any other application.
What is your recommendation to implement the new business requirement?
A. Implement Federated Case Management.
B. Synchronize case creation with RFST services.
C. Implement a parent case across multiple products.
D. Leverage database replication to communicate case creation.
Answer: (SHOW ANSWER)

NEW QUESTION: 25
BigCo receives complaints from existing customers and new prospects that BiyCo repi irrelevant offers and products.
Which two Pega solutions do you suggest to help solve this problem? (Choose Two)
A. Pega Customer Service
B. Robotic Process Automation
C. Pega Marketing

D. Customer Decision Hub
Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 26
XYZ Corp users are experiencing delays in the application that you suspect is related to the database.
Which two options do you recommend to isolate the issue? (Choose Two)
A. Write Pega logs to the database server.
B. Investigate when the database is used most heavily.
C. Lower query-time-related alert thresholds.
D. Increase the threshold for blob-size alerts.
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 27
BiyCo has two development projects currently in progress developed by independent teams. One team builds the Quoting application. Another team builds the Policy Administration application. Development takes place on different servers with separate rulebases.
The Quoting application is built on the Policy Administration application.
The Policy Administration application requires enhancements to support other areas of the business.
The Quoting team is notified when the Policy Administration application is versioned. The Quoting team responds by importing a HAP containing the new version.
Select the two best practices to minimize potential development conflicts and work with the most current version of the Policy Administration application. (Choose Two)
A. Switch between applications when modifying rules.
B. Perform branch reviews when merging brandies.
C. Share rulesets between both applications.
D. Periodically rebase the Policy Administration application.
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 28
An application contains cases which transition though different statuses throughout their life cycle which typically lasts 3 months.
Design a reporting strategy to display the number of cases by status at the end of each month for a 12-month period.
A. Configure an activity to generate the data in the clipboard and report using a custom section.
B. Configure a summary report that leverages sub reports for each month.
C. Configure an agent to record monthly case status in a separate table and report on that table.
D. Configure a Declare index to record case data to a separate table.
Answer: A (LEAVE A REPLY)
