Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 29

Words, symbols, logos, designs, or slogans that identify products or services are protected by a:

- A. copyright.
- B. trade secret.
- C. patent.
- D. trademark.

Answer: ([SHOW ANSWER](#))

Words, symbols, logos, designs, or slogans that distinguish and identify products or services are protected by a trademark. Trademarks ensure that a company's brand elements are legally safeguarded against unauthorized use, helping to maintain brand identity and consumer trust. Trademarks are registered with relevant authorities, such as the USPTO in the United States.

ASIS Certified Protection Professional (CPP) References:

* Intellectual Property Protection: CPP guidelines cover various forms of intellectual property, highlighting trademarks as critical for brand protection.

* Legal Compliance: The importance of securing trademarks to avoid infringement and preserve brand integrity is emphasized in CPP training on legal frameworks.

NEW QUESTION: 30

During an emergency evacuation of a facility, special provisions must be made for:

- A. securing vital business information
- B. assisting disabled persons.
- C. a muster point.
- D. command and control.

Answer: B (LEAVE A REPLY)

During an emergency evacuation, special provisions must be made to assist disabled persons. Ensuring the safety of individuals with physical or cognitive impairments is both a legal requirement and a critical element of effective evacuation planning.

* Accessibility:

* Ensure evacuation routes are navigable for individuals with mobility aids.

* Support Systems:

* Designate trained personnel or buddies to assist during evacuations.

* Special Equipment:

* Provide tools like evacuation chairs or ramps where needed.

* A: Securing business information is important but secondary to life safety.

* C: Establishing a muster point is critical but does not specifically address the needs of disabled persons.

* D: Command and control focus on overall management, not specific provisions for individuals.

Key Provisions for Disabled Persons: Why Other Options Are Incorrect: ASIS CPP

References:

* Domain 8: Crisis Management Emphasizes inclusive planning for emergency evacuations.

NEW QUESTION: 31

The storage of records in vaults, safes, or storerooms on the premises rather than in dispersed storage is called:

A. None of the above

B. Dispersion

NEW QUESTION: 34

A strategic approach to managing assets protection programs involves:

- A. planning, controlling, and reviewing.
- B. training, equipping, and reviewing.
- C. guiding, resourcing, and auditing.
- D. planning, managing, and evaluating.

Answer: ([SHOW ANSWER](#))

A strategic approach to managing asset protection programs involves planning, managing, and evaluating.

This ensures that programs are proactive, operationally effective, and continuously improved.

* Planning:

* Identify risks, define objectives, and develop protection strategies aligned with organizational goals.

* Managing:

* Implement the plan by allocating resources, overseeing operations, and ensuring adherence to policies.

* Evaluating:

* Measure the effectiveness of protection programs through audits, metrics, and reviews.

* Adjust strategies based on findings to enhance security continuously.

* Strategic Alignment:

* Ensure that asset protection supports broader organizational objectives, such as business continuity and regulatory compliance.

* A: Planning, controlling, and reviewing are broader management concepts but do not emphasize operational execution.

* B: Training and equipping are operational elements but are not sufficient for strategic management.

* C: Guiding, resourcing, and auditing are tactical, not strategic, elements.

Core Components: Why Other Options Are Incorrect: ASIS CPP References:

* Domain 1: Security Principles and Practices Emphasizes strategic approaches to security management.

* Domain 9: Business Principles and Practices Highlights the importance of evaluation and alignment with corporate objectives.

- C. Doppler, point-to-point, and loop.
- D. loop, point-to-point, and multiplex.

Answer: (SHOW ANSWER)

In electronic protection systems, line transmissions are used to connect various components, such as sensors, alarms, and control panels, ensuring efficient communication and operational integrity. The three types of line transmission methods are:

* **Loop Transmission:** This method involves a continuous circuit of wire where multiple devices, such as sensors or alarms, are connected. A break in the loop, due to tampering or failure, triggers an alarm, making it ideal for intrusion detection systems. It is highly reliable for perimeter security because it ensures constant monitoring of the circuit's integrity.

* **Point-to-Point Transmission:** This method connects each device directly to a control panel via individual lines. While it requires more wiring, it offers precise monitoring, as any disruption can be pinpointed to a specific device. Point-to-point systems are commonly used in high-security applications where detailed monitoring of each sensor or device is critical.

* **Multiplex Transmission:** Multiplex systems transmit multiple signals over a single line or channel by encoding the signals with identifiers. This reduces the amount of wiring required, making it cost-effective for large systems. It is commonly used in modern electronic security systems to manage numerous sensors and alarms efficiently.

ASIS Certified Protection Professional (CPP) References:

* **Intrusion Detection Systems:** CPP materials detail the three transmission types as critical components of electronic protection systems.

* **System Design and Implementation:** Loop, point-to-point, and multiplex systems are discussed for their applications in various security environments.

* **Emerging Technologies:** CPP materials also cover how multiplexing reduces complexity in advanced security installations.

NEW QUESTION: 77

What is considered an advantage of requiring minimum training requirements of security officers?

- A. Promotions are more easily made.
- B. It builds professionalism.
- C. Productivity increases dramatically with proper training.
- D. There is a sales and service advantage if trained guards are provided.
- E. All of the above.
- F. Both A and C.

Answer: E (LEAVE A REPLY)

NEW QUESTION: 78

Overrings should not be corrected by undercharging on other items because this:

- A. Is probably the easiest method of theft by employees
- B. Eliminates interaction by a manager or supervisor
- C. Upsets the customer
- D. None of the above
- E. All of the above
- F. Confuses inventory controls

Answer: A (LEAVE A REPLY)

NEW QUESTION: 79

A major advantage of outsourcing investigative services is the ability to:

- A. expand or reduce the workforce according to actual needs
- B. maintain closer liaison relations with local agencies and internal contacts
- C. increase the control of investigation quality.
- D. easily manage the contractor.

Answer: A (LEAVE A REPLY)

The primary advantage of outsourcing investigative services is the flexibility it provides in scaling resources to match the organization's needs. This approach allows cost control and ensures expertise is available as required.

* Scalability:

* Adjust resources dynamically based on case volume or complexity.

* Cost-Effectiveness:

* Avoids the fixed costs associated with maintaining a full-time investigative team.

* Access to Expertise:

* External providers bring specialized knowledge and skills.

* Focus on Core Operations:

* Allows internal teams to prioritize strategic goals while external providers handle investigations.

* B: Liaison relationships may be harder to maintain with external teams.

* C: Internal teams typically offer greater control over investigation quality.

* D: Managing contractors introduces additional challenges.

Key Benefits of Outsourcing Investigative Services: Why Other Options Are Incorrect: ASIS

CPP References:

* Domain 6: Investigations Discusses the advantages and limitations of outsourcing investigative services.

NEW QUESTION: 80

The civil disorder plan should be:

- A. Restricted only to those responsible for formulating policy in connection with the plan and implementing it
- B. Disseminated only to security personnel
- C. Posted on appropriate bulletin boards
- D. Disseminated widely
- E. None of the above

Answer: (SHOW ANSWER)

NEW QUESTION: 81

Department of Defense regulations indicate that destruction of classified information can be accomplished by:

- A. Mutilation
- B. Chemical decomposition
- C. All of the above
- D. Burning
- E. Melting

Answer: C (LEAVE A REPLY)

NEW QUESTION: 82

Water approaches that extend to 100 feet from the pier should be illuminated to at least:

- A. 2.0 foot-candles
- B. 0.5 foot-candle
- C. 3.0 foot-candles
- D. 1.5 foot-candles
- E. 1.0 foot-candle

Answer: (SHOW ANSWER)

NEW QUESTION: 83

Which of the following is not considered to be an inchoate crime?

- A. Embezzlement
- B. Solicitation
- C. All of the above
- D. Conspiracy
- E. Attempt

Answer: A (LEAVE A REPLY)

NEW QUESTION: 84

The OSHA Act allows states to continue their present safety and health enforcement activities provided that:

- A. The state program is "at least as effective" as the federal program
- B. The Secretary of Labor signs a certificate of authorization

- C. The attorney general after hearing approves
- D. Litigation is pursued in the federal court system
- E. None of the above

Answer: A (LEAVE A REPLY)

Explanation

NEW QUESTION: 85

The executive responsible for the development of the written emergency plan of an organization should be one who possesses which of the following qualifications:

- A. Technical aptitude
- B. Employment as a member of middle or senior management
- C. Complete familiarity with the company's organization
- D. All of the above
- E. None of the above

Answer: D (LEAVE A REPLY)

Explanation

NEW QUESTION: 86

In meeting minimal federal specifications, government security containers must be equipped with a combination lock capable of resisting manipulation and radiological attack for:

- A. 20 man-hours
- B. 45 man-hours
- C. 30 man-hours
- D. 40 man-hours
- E. 10 man-hours

Answer: A (LEAVE A REPLY)

NEW QUESTION: 87

An investigative agency has been storing samples of hazardous materials which were collected as evidence in a recently adjudicated case and are no longer needed. To dispose of the hazardous materials, the agency should:

- A. place the hazardous materials in a metal container and ask an employee to transport them to a local waste disposal facility.
- B. call the local fire department non-emergency number and request that the Fire department take possession of the hazardous materials.
- C. place the hazardous materials in an air-tight, waterproof container and place them in the regular waste bin.
- D. obtain disposition assistance from a qualified contractor who understands local regulations about hazardous waste.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 88

An impelling type of leadership tends to reduce employee dishonesty because:

- A. It increases discipline.
- B. It sets a good example.
- C. All of the above
- D. It improves morale.
- E. It reduces employee frustration

Answer: (SHOW ANSWER)

NEW QUESTION: 89

From a security perspective, what is the first factor to be considered in facility construction?

- A. An architect with knowledge of physical security
- B. The identity of experienced consultants
- C. An effective security plan
- D. The building site itself
- E. None of the above

Answer: D (LEAVE A REPLY)

NEW QUESTION: 90

Underwriters Laboratories does independent testing on security containers that simulate a major fire

where the heat builds up gradually to:

- A. 30000P
- B. 7500P
- C. 10000P
- D. 20000P
- E. 25000p

Answer: D (LEAVE A REPLY)

NEW QUESTION: 91

From a security perspective, what is the first factor to be considered in facility construction?

- A. None of the above
- B. An effective security plan
- C. The identity of experienced consultants
- D. The building site itself
- E. An architect with knowledge of physical security

NEW QUESTION: 92

In order to adequately plan for emergencies, the security manager must make certain that the corporation has access to all necessary resources that will save lives, minimize damage, and ensure the continued operation of rapid restoration of damaged member plants. Most plants ensure access to such resources by:

- A. Providing for a budget that will supply all the resources needed to cope with a major emergency
- B. Contracting with local security companies to provide necessary resources, if needed during an emergency
- C. Establishing appropriate liaison with the police, fire, rescue, and medical forces of the community to provide services as needed
- D. Relying on their own self-help organization and equipment and joining hands with other plants in the community for mutual aid
- E. Establishing appropriate contact with the nearest military base

Answer: D (LEAVE A REPLY)

NEW QUESTION: 93

Which of the following is not considered to be an inchoate crime?

- A. Attempt
- B. Solicitation
- C. Conspiracy
- D. All of the above
- E. Embezzlement

Answer: E (LEAVE A REPLY)

NEW QUESTION: 94

A standard barbed-wire, twisted, double-strand fence has ___ point barbs spaced an equal distance apart.

- A. 1
- B. 4
- C. 5
- D. 3
- E. 2

Answer: B (LEAVE A REPLY)

NEW QUESTION: 95

The investigation's best approach to questioning relies on the following:

- A. Most suspects will lie or circumvent the truth.
- B. None of the above.
- C. A suspect is innocent until proven guilty.
- D. A key suspect is guilty and evidence must be found.
- E. A signed statement in the form of a confession must be obtained.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 96

Flood forecasts and warnings are issued by the:

- A. Agriculture Department
- B. Department of the Interior
- C. National Weather Service
- D. National Oceanic and Atmospheric Administration
- E. Federal Emergency Management Agency

Answer: D (LEAVE A REPLY)

NEW QUESTION: 97

Information that could lead to the compromise of vital national defense plans or complex cryptologic and communications intelligence systems should be classified:

- A. Restricted
- B. Secret
- C. Confidential
- D. Top secret
- E. Cosmic

Answer: D (LEAVE A REPLY)

NEW QUESTION: 98

The age discrimination in the Employment Act of 1967 bans discrimination against workers or applicants who are:

- A. At least 50 but less than 70
- B. At least 40 but less than 65
- C. At least 30 but less than 60
- D. At least 45 but less than 70
- E. At least 35 but less than 60

Answer: B (LEAVE A REPLY)

NEW QUESTION: 99

Many experts agree that the most important deterrent to internal theft is:

- A. The chance of being fired
- B. Threat of prosecution
- C. Guilt
- D. Fear of discovery
- E. Lawsuits

Answer: D (LEAVE A REPLY)

NEW QUESTION: 100

The characteristics of a trade secret as compared with other confidential information are:

- A. Both A and C
- B. Those business secrets that are fully protected in accordance with the Federal Privacy Act
- C. Those business secrets that have been duly registered pursuant to the requirements of law
- D. Continuous or consistent business applications of a secret not known to others, from the use of which some advantage is gained by the user
- E. All of the above

Answer: D (LEAVE A REPLY)

NEW QUESTION: 101

Excitation, increased alertness, euphoria, increased pulse rate and blood pressure, insomnia, and loss of appetite are symptoms of:

- A. Benzodiazepines
- B. Depressants
- C. Hallucinogens
- D. Stimulants
- E. Marijuana

Answer: D (LEAVE A REPLY)

NEW QUESTION: 102

The quality of service rendered by security personnel is determined by which of the following?

- A. Supervision
- B. Training
- C. Personnel selection process
- D. All of the above
- E. Wages

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 103

In order to make the proof of intent easier in proving shoplifting, many stores have a policy that:

- A. Requires apprehension only upon issuance of a warrant
- B. Requires apprehension of the suspect as soon as the theft occurs
- C. None of the above
- D. Requires apprehension of the suspect to be made after the accused leaves the premises
- E. Requires apprehension of the suspect as soon as the material is concealed

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 104

Hallcrest I stated that the major item conspicuously absent from police-based crime prevention programs was:

- A. Manpower dedicated to crime prevention concepts
- B. A comprehensive training program
- C. The use of updated technology
- D. The input of a huge number of persons employed in private security

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 105

Which of the following is not correct with regard to safes?

- A. Insulation in record safes more than 30 years old may negate fire-resistant qualities.
- B. None of the above.
- C. UL classification labels are removed from all safes exposed to fires.
- D. Quality equipment should be purchased only from reputable dealers.
- E. Money safes do not have accredited fire resistance.
- F. Record safes are designed to resist fires only.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 106

It is generally held that a crime cannot be committed by a child under the age of:

- A. 6
- B. 7

- C. 10
- D. 9
- E. 12

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 107

The keys to the success of any emergency organization and plan are training and testing. In designing effective testing procedures, the following are all valid observations except:

- A.** One of the best times to test the plant emergency plan is in coordination with your local government periodic test exercises.
- B.** Records should be maintained so deficiencies can be corrected following the test.
- C.** The testing exercise should be as realistic as possible.
- D.** Plenty of advance notice should be given so all possible preparations can be made.
- E.** Testing of the emergency plan should require the actual operation or simulation of every element of the plan in all possible emergency conditions.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 108

Since 1985, the number of international terrorist incidents occurring each year is closest to:

- A.** 10,000
- B.** 20,000
- C.** 5000
- D.** 1000

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 109

All policies and procedures for drug testing should be:

- A.** require mandatory testing of all managers.
- B.** applied on an "as needed" basis.
- C.** separate from any collective bargaining agreement.

D. administered consistently.

Answer: D (LEAVE A REPLY)

Drug testing policies and procedures must be administered consistently to ensure fairness, legal compliance, and effectiveness. Inconsistent application can lead to accusations of bias, violations of workplace rights, and legal challenges. Consistency builds trust and ensures adherence to organizational and regulatory standards.

ASIS Certified Protection Professional (CPP) References:

* Personnel Security Programs: CPP guidelines stress the importance of consistent administration of workplace policies, including drug testing.

* Legal and Ethical Considerations: Consistency is highlighted as critical to avoiding discrimination claims and ensuring program integrity.

NEW QUESTION: 110

An offense that was not a common-law crime but created by statute is termed a(n):

- A. Mala in se crime
- B. Infraction
- C. Misdemeanor
- D. Felony
- E. Mala prohibitum crime

Answer: E (LEAVE A REPLY)

NEW QUESTION: 111

A restricted area containing a security interest or other sensitive matter, which uncontrolled movement

can permit access to the security interest or sensitive matter, but within which access may be prevented

by security escort and other internal restrictions and controls, is called a(n):

- A. Controlled area
- B. Limited area
- C. Sensitized area
- D. None of the above
- E. Exclusion area

Answer: B (LEAVE A REPLY)

NEW QUESTION: 112

Which of the following is not correct in regard to microwave transmissions?

- A. Microwave signals travel in curved lines.
- B. Microwave signals penetrate fog and snow.
- C. None of the above.
- D. A large number of microwave signals can be transmitted.
- E. Microwave signals are not affected by ordinary man-made noise.

F. Microwave signals are transmitted in short radio waves.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 113

The occupation of a uniformed security officer is psychologically:

- A. High stress
- B. Medium stress
- C. Low stress
- D. Extraordinarily high stress
- E. An easy occupation

Answer: A (LEAVE A REPLY)

NEW QUESTION: 114

The first step in securing sensitive information is to:

- A. prescreen and conduct background checks on all employees.
- B. restrict and control access to file rooms.
- C. identify it and classify it by value.
- D. issue and enforce the use of clearance badges.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 115

The condition whereby the user of a substance develops an attachment to the drug because of the substance's ability to satisfy some emotional or personality need of the user is known as:

- A. Psychosis
- B. Psychological dependence
- C. Tolerance
- D. Physical dependence
- E. Addiction

Answer: B (LEAVE A REPLY)

NEW QUESTION: 116

Which of the following security clearances is not used by the government?

- A. Top secret
- B. Secret
- C. Restricted
- D. Q clearance
- E. Confidential

Answer: C (LEAVE A REPLY)

NEW QUESTION: 117

Which of the following is not a requirement under the Omnibus Crime Control and Safe Streets Act of 1968 before a court may give permission for an electronic surveillance?

- A. Initial approval must be granted by the attorney general of the United States or by a specially designated attorney general.
- B. The identity of the offender should be stated.
- C. The crime must be any felony under federal law.
- D. All of the above.
- E. The place and location of the electronic surveillance must be stated.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 118

The process whereby communications are intercepted or recorded is known as:

- A. None of the above
- B. Black bag operations
- C. Technical surveillance
- D. Surreptitious surveillance
- E. Physical surveillance

Answer: (SHOW ANSWER)

NEW QUESTION: 119

Ideally, background interviews should be conducted:

- A. in person.
- B. in writing.
- C. as quickly as possible.
- D. over the telephone.

Answer: (SHOW ANSWER)

Background interviews are most effective when conducted in person. This method allows for better assessment of nonverbal cues, clarification of ambiguities, and establishing rapport, which can yield more accurate and comprehensive information.

* Observation of Nonverbal Communication:

* Body language and facial expressions provide additional insights.

* Immediate Clarifications:

* Interviewers can seek clarification on incomplete or contradictory answers.

* Building Trust:

* Personal interaction fosters trust, making interviewees more forthcoming.

* B: Written interviews lack immediacy and the ability to probe responses.

* C: Speed is important but should not compromise thoroughness.

* D: Telephone interviews are less effective for detecting nonverbal cues.

Advantages of In-Person Background Interviews: Why Other Options Are Incorrect: ASIS

CPP References:

* Domain 2: Risk Management Highlights best practices for conducting background investigations.

NEW QUESTION: 120

Which of the following would be an argument against the use of nonlethal weapons by the security officer?

- A. None of the above.
- B. Use of nonlethal weapons reduces the risk of death to innocent bystanders.
- C. It might escalate confrontations with security officers because offenders would feel less threatened.
- D. They do not pose a substantial risk of death if used properly.
- E. They provide an alternative to guns where the situation requires less than lethal force.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 121

Having received a bomb threat from a non-credible source, the security manager should immediately:

- A. fully evacuate and then search.
- B. search without evacuating.
- C. partially evacuate and then search.
- D. fully evacuate without searching.

Answer: B (LEAVE A REPLY)

When dealing with a bomb threat from a non-credible source, the recommended action is to search without evacuating unless evidence suggests a real threat. This approach avoids unnecessary disruption while allowing for a thorough investigation. However, the decision must balance safety, operational needs, and threat credibility.

ASIS Certified Protection Professional (CPP) References:

* Emergency Management and Response: CPP guidelines on bomb threats emphasize assessing threat credibility and prioritizing search protocols over evacuation in non-credible cases.

* Threat Analysis: Chapter 9 provides frameworks for determining appropriate actions based on threat severity and reliability of the source.

NEW QUESTION: 122

If the interviewee during an investigation is hostile, it is preferable to conduct the interview at:

- A. The security office
- B. At the office of the interviewee's lawyer
- C. In an automobile
- D. A neutral spot
- E. The home of the interviewee

Answer: (SHOW ANSWER)

NEW QUESTION: 123

All security managers must have a disaster plan to deal with nuclear attack and must be well informed

regarding the disaster propensities of such an explosion. The effects of nuclear weapons differ from those

of conventional weapons in all of the following ways except:

- A. "Thermal radiation" is capable of causing skin burns and of starting fires at considerable distances.
- B. If a nuclear explosion occurs at or near the ground, great quantities of radioactive earth and other materials are drawn upward to high altitudes. When the radioactive particles fall back to earth, the phenomenon is known as "fallout."
- C. An experimental device exploded in the Aleutian Islands in November 1971 had an estimated yield of more than 5 megatons (MT), which means it released more energy than the explosion of 50 million tons of TNT.
- D. A nuclear detonation also produces an electromagnetic pulse (EMP) sometimes called "radio flash."
- E. A fairly large amount of the energy in a nuclear explosion is referred to as "thermal radiation."

Answer: C (LEAVE A REPLY)

NEW QUESTION: 124

In some states it is a crime to begin a criminal case without probable cause in bad faith and with the intent

of harassing or injuring the other party. The crime is:

- A. Felonious harassment
- B. Misprision of a felony
- C. None of the above
- D. Malicious prosecution
- E. Felonious intent

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 125

Which of the following locks has been in use the longest and has no security value?

- A. The pin-tumbler lock
- B. The lever lock
- C. The wafer lock
- D. The warded lock
- E. The disc-tumbler lock

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 126

An employer is responsible for the acts of his or her employee committed within:

- A. The employer's area of primary activity
- B. The employee's area of primary activity
- C. The area of the place of business
- D. The employee's scope of employment
- E. None of the above

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 127

The most important single relationship by a security organization with outside agencies during a strike is with:

- A. The police
- B. The fire department
- C. The hospital
- D. None of the above
- E. A prosecuting attorney

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 128

When not in use, top secret information should be stored in a:

- A. Class E vault
- B. Class D vault
- C. Class C vault

- D. Class B vault
- E. Class A vault

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 129

One of the following is not one of the desired characteristics of a statement obtained during a claim investigation:

- A. It should be written in ink or indelible pencil, or typed.
- B. It must be dated.
- C. It should be in short paragraphs with two spaces between each paragraph.
- D. It must contain the identification of the person making it.
- E. It may be signed or unsigned.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 130

Which of the following should be made part of a proprietary information protection program?

- A. Effective perimeter control system
- B. Execution of patent and secrecy agreement
- C. Pre-employment screening
- D. Paper and data control
- E. Both A and C
- F. All of the above

Answer: F ([LEAVE A REPLY](#))

NEW QUESTION: 131

In meeting minimal federal specifications, noninsulated security containers must satisfactorily pass a drop test of:

- A. 25 feet
- B. 15 feet
- C. 22 feet
- D. 30 feet
- E. 20 feet

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 132

In the event of an earthquake, all of the following are recommended EXCEPT

- A. turning off natural gas sources.
- B. extinguishing all light sources.

- C. remaining clear of all electrical sources.
- D. seeking inside shelter immediately

Answer: B (LEAVE A REPLY)

During an earthquake, extinguishing all light sources is not a recommended action. Lights may be essential for visibility, especially if evacuations or safety checks are required. Instead, actions like turning off gas sources, avoiding electrical hazards, and seeking shelter under sturdy furniture or in safe areas are emphasized for personal safety during seismic events.

ASIS Certified Protection Professional (CPP) References:

- * Crisis Management and Emergency Response: CPP materials provide detailed protocols for earthquake preparedness and safety.
- * Natural Disaster Response Guidelines: Recommended actions prioritize life safety and minimizing hazards, consistent with established safety practices.

NEW QUESTION: 133

The least often used method of sabotage is:

- A. Electronic
- B. Fire
- C. Explosive
- D. Psychological
- E. Mechanical

Answer: (SHOW ANSWER)

NEW QUESTION: 134

According to the motivation-hygiene theory, employee motivation depends on:

- A. security, feedback, and The grievance process.
- B. achievement, growth, and responsibility.
- C. supervision, compensation, and working conditions.
- D. training, promotions, and open communication channels.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 135

Security awareness is motivated by what technique?

- A. Integration into line operations
- B. Use of written material
- C. All of the above
- D. None of the above
- E. Formal security briefings
- F. Both B and C

Answer: A (LEAVE A REPLY)

NEW QUESTION: 136

Marijuana comes from:

- A. The peyote cactus
- B. The cannabis plant
- C. The poppy plant
- D. The coca plant
- E. Mushrooms

Answer: B ([LEAVE A REPLY](#))

Which of the following is an exception to the general rule that a search and seizure requires a warrant?

- A. Movable vehicle
- B. Waiver
- C. All of the above
- D. None of the above
- E. Seizure without a search (plain view)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 138

When managing an investigative unit, the best way to obtain favorable support for budget requests is to:

- A. utilize investigators in roles outside of the unit.
- B. demonstrate restitution and recovery benefits.
- C. provide estimates of overall investigative costs.
- D. cut education and training expenses for the unit

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 139

A major Crime Prevention Through Environmental Design (CPTED) strategy is to:

- A. provide clear border definition of controlled spaces.

- B. eliminate transitional zones between public and private spaces.
- C. replace security personnel and security systems.
- D. install electronic surveillance equipment compatible with the terrain.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 140

Marijuana is known by which of the following names?

- A. Pot
- B. Grass
- C. Acapulco Gold
- D. Reefer
- E. Thai sticks
- F. All of the above

Answer: F ([LEAVE A REPLY](#))

NEW QUESTION: 141

The relationship in which two parties agree that one will act as a representative of the other is known as a (n):

- A. Fiduciary relationship
- B. None of the above
- C. Partnership relationship
- D. Agency relationship
- E. Contractual relationship

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 142

Which of the following officers or employees will always be placed on a staff to develop an emergency evaluation and disaster plan?

- A. The personnel office
- B. The medical office
- C. The finance office
- D. The facility's security director
- E. The corporation's president

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 143

The overall policy guidance for the Defense Industrial Security Program is provided by:

- A. The Assistant Chief of Staff in Intelligence
- B. The Federal Bureau of Investigation
- C. The Defense Intelligence Agency
- D. The Deputy Undersecretary of Defense for Policy

E. None of the above

Answer: D (LEAVE A REPLY)

NEW QUESTION: 144

What is the crime when a person, knowing an object to be false, attempts to pass it off as the real thing?

- A. Uttering
- B. Larceny by trick
- C. Forgery
- D. None of the above
- E. False pretenses

Answer: A (LEAVE A REPLY)

NEW QUESTION: 145

Which of the following statements is correct regarding LSD?

- A. All of the above.
- B. Tolerance develops rapidly
- C. Its popularity declined after the 1960s.
- D. Its psychotomimetic effects were discovered accidentally.
- E. It is produced from lysergic acid, which is a substance derived from the ergot fungus that grows on rye.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 146

Voluntary participation in disaster control activities may be motivated by:

- A. Training in fire fighting
- B. All of the above
- C. An interesting training program
- D. Training in bomb threat searches and related matters
- E. Instruction in safety and fire hazard control

Answer: B (LEAVE A REPLY)

NEW QUESTION: 147

In a chain-link fence with mesh openings for general security purposes, the openings should be no larger than:

- A. 2112 inches
- B. 4 inches
- C. 2 inches
- D. 11/5 inches
- E. 4 . inches

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 148

Which of the following guidelines should organizations adopt when conducting preemployment drug screening?

- A. Providing consistent quotas
- B. Ensuring confidentiality
- C. Specifying legal consequences
- D. Maintaining flexibility

Answer: B ([LEAVE A REPLY](#))

When conducting pre-employment drug screening, ensuring confidentiality is critical. This involves safeguarding the privacy of candidates' test results, limiting access to sensitive information, and complying with legal standards such as the Health Insurance Portability and Accountability Act (HIPAA). Maintaining confidentiality protects the organization's reputation and fosters trust among employees and applicants.

ASIS Certified Protection Professional (CPP) References:

* Personnel Security Management: CPP materials emphasize the importance of confidentiality in pre-employment screening processes to comply with ethical and legal standards.

* Human Resources Security: Protecting personal data during employment screenings is highlighted as a best practice in the CPP chapters on personnel security.

For further details, refer to the ASIS Pre-Employment Screening Guidelines and the CPP Manual on Personnel Security Standards.

NEW QUESTION: 149

The Privacy Act of 1974 provides which of the following safeguards?

- A. Requires federal agencies to be subject to civil suits for any damages that may occur as a result of willful or intentional action that violates an individual's rights under the Privacy Act of 1974
- B. Permits individuals to determine what records pertaining to themselves are collected and maintained by federal agencies
- C. Permits individuals to prevent certain records pertaining to themselves from being used or made available for another purpose without their consent
- D. Permits individuals to gain access to certain information pertaining to themselves in federal agency records
- E. All of the above

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 150

A common misconception about Enterprise Security Risk Management (ESRM) is that it is the same as Enterprise Risk Management (ERM), which covers all risk for the business.

What is the other misconception?

- A. The convergence of IT and physical security programs under single leadership
- B. Built around a security program with numerous sub-programs
- C. Attempts to assign a risk to a specific program
- D. A program or an element of an existing security program

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 151

Although protection of people is without a doubt the first priority in planning for emergencies, shutdown procedures must be thorough and done by those who are trained to do so. Your disaster plan should have such shutdown procedures assigned to:

- A. The security force
- B. The plant manager
- C. The fire brigade
- D. Maintenance employees on each shift who handle these procedures on a regular basis
- E. Supervisors of the plant

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 152

The actual use of force against another, which involves physical touching, is a willful tort called in common law:

- A. Battery
- B. Aggravated assault
- C. Assault
- D. None of the above
- E. Felonious assault

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 153

A homicide committed while attempting to effect an arrest or to prevent an escape can only be justified in:

- A. Atrocious felony cases as an absolute last resort
- B. Effecting the arrest of a fleeing felon
- C. Effecting the arrest of one who has committed a misdemeanor
- D. All of the above
- E. Affecting the arrest of any felon E

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 154

Choosing a security container for a specific software application is largely determined by value and what other characteristic of the item to be stored?

- A. Vulnerability
- B. Commonality
- C. Place of origin
- D. Reproducibility

Answer: ([SHOW ANSWER](#))

When selecting a security container for sensitive software or data storage, vulnerability is a primary consideration alongside the item's value.

* Vulnerability Assessment:

* Examines the likelihood of theft, loss, or tampering.

* Includes factors such as sensitivity, confidentiality, and susceptibility to compromise.

* Security Grade Selection:

* Items with higher vulnerability require enhanced protection (e.g., fireproof safes, tamper-resistant containers).

* Standards like UL (Underwriters Laboratories) certifications guide appropriate container choices.

* Other Factors (Not Primary):

* Commonality or Reproducibility: Refers to ease of replacement but is secondary to vulnerability.

* Place of Origin: Unrelated to container selection unless specific compliance laws dictate otherwise.

* Physical Security Standards: Guidelines on protective measures for high-value or high-vulnerability assets.

* Risk Mitigation Strategies: Evaluating risk exposure to align protective measures effectively.

* Asset Protection Practices: Emphasis on securing critical assets with robust containment solutions tailored to assessed risks.

CPP Context: Each verified answer aligns with ASIS CPP guidance, supporting actionable and accurate interpretations of the topics addressed.

NEW QUESTION: 155

Which of the following is not a correct statement regarding chloral hydrate?

- A. Its popularity decreased after the introduction of barbiturates.
- B. It is a liquid marketed in the form of syrups and soft gelatin capsules.
- C. It is the oldest of the sleep-inducing drugs, also known as hypnotic drugs.
- D. It has a bitter caustic taste and a slightly acrid odor.
- E. Its main abuse is by young adults.

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 156

An alarm system that is monitored by an outside company to provide electric protective services in which

they provide the appropriate actions is known as a(n):

- A. Central station system
- B. Local alarm system
- C. Bell-sound system
- D. Auxiliary system
- E. Proprietary system

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 157

A code of ethics contains all of the following EXCEPT a:

- A. statement from the chief executive describing and supporting the purpose and importance of the code.
- B. statement of the commitment to the code.
- C. statement of the human resources department.
- D. statement of the organization's specific nature of business

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 158

In addition to utilizing state-of-the-art locking devices, electronic surveillance, and spaces designed to maximize effective use by intended users, what other CPTED strategies can be used to enhance a security system?

- A. A focus on policies and activities that encourage observation, reporting, and intervention
- B. The implementation of access control and identification badge programs.
- C. The construction of a perimeter fencing and barriers that deters potential intrusion.
- D. The implementation of vehicular bollards at the dock entrance.

Answer: A ([LEAVE A REPLY](#))

In addition to physical security measures, policies and activities that encourage observation, reporting, and intervention are key strategies in Crime Prevention Through Environmental Design (CPTED). These policies create a culture of vigilance, empower

stakeholders to take action, and enhance the effectiveness of physical security measures by leveraging human engagement.

ASIS Certified Protection Professional (CPP) References:

* CPTED Principles: The CPP manual discusses the integration of behavioral and policy strategies with physical security in Chapter 6.

* Security Awareness Programs: Emphasized in CPP resources as vital to creating a proactive security culture.

NEW QUESTION: 159

An important element of an emergency response plan includes:

- A. recovery operation procedures.
- B. utilizing an incident management system.
- C. designating a hot site.
- D. shift relief procedure for response personnel.

Answer: B (LEAVE A REPLY)

An incident management system (IMS) is a critical component of an emergency response plan, providing a structured framework for managing resources, communication, and decision-making during emergencies.

IMS ensures a coordinated response across different teams and enhances efficiency and safety during crisis situations.

ASIS Certified Protection Professional (CPP) References:

* Emergency Response and Crisis Management: CPP guidelines emphasize the role of IMS in organizing and executing effective emergency responses.

* Incident Command Systems (ICS): CPP materials discuss the importance of ICS frameworks in maintaining operational control during emergencies.

NEW QUESTION: 160

Opium, morphine, and codeine are all classified as:

- A. stimulants.
- B. hallucinogens.
- C. narcotics.
- D. depressants.

Answer: (SHOW ANSWER)

NEW QUESTION: 161

Which of the following identifies the depressant methaqualone?

- A. All of the above.
- B. It is administered orally.
- C. It is also known as Quaalude.
- D. It was once mistakenly thought to be effective as an aphrodisiac.
- E. It is chemically unrelated to the barbiturates.

F. It is a Schedule I drug in the Controlled Substances Act.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 162

The UL symbol "TRTL" indicates:

- A. That the safe is resistant to both torches and tools
- B. The type of locking devices used
- C. That the safe is resistant to torches
- D. None of the above
- E. That the safe is resistant to tools

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 163

The OSHA Act allows states to continue their present safety and health enforcement activities provided that:

- A. The Secretary of Labor signs a certificate of authorization
- B. None of the above
- C. Litigation is pursued in the federal court system
- D. The attorney general after hearing approves
- E. The state program is "at least as effective" as the federal program

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 164

Which of the following is not true regarding electronic eavesdropping?

- A. None of the above.
- B. A listening device installed in a wire will cause a crackling sound, click, or other noise that can be heard on the line.
- C. All wiring should be traced and accounted for.
- D. An effective countermeasure would be to conduct a physical search as well as an electronic search.
- E. An effective countermeasure to detect evidence of electronic eavesdropping in telephone equipment should be conducted by a person who is technically familiar with such equipment.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 165

The main function of the private security agent is to:

- A. Locate stolen goods
- B. Ascertain and report illegal activities
- C. Receive well-rounded investigative experience
- D. Ascertain the state of morale

E. None of the above

Answer: (SHOW ANSWER)

NEW QUESTION: 166

Which of the following is not a correct statement regarding chloral hydrate?

- A. It is a liquid marketed in the form of syrups and soft gelatin capsules.
- B. Its popularity decreased after the introduction of barbiturates.
- C. Its main abuse is by young adults.
- D. It is the oldest of the sleep-inducing drugs, also known as hypnotic drugs.
- E. It has a bitter caustic taste and a slightly acrid odor.

NEW QUESTION: 167

One natural disaster that seems to occur with increasing frequency is the tornado. It is necessary for the security manager to be knowledgeable regarding all aspects of tornados so that adequate disaster plans can be formulated. Which of the following statements is incorrect?

- A. Tornados only occur in the middle plains, southeastern states, and some Middle Atlantic States.
- B. Tornados are violent local storms with whirling winds of tremendous speed that can reach 200-400 mph.
- C. The individual tornado appears as a rotating, funnel-shaped cloud that extends toward the ground from the base of a thundercloud.
- D. The tornado spins like a top, may sound like the roaring of an airplane or locomotive, and varies from gray to black in color.
- E. The width of a tornado path ranges generally from 200 yards to one mile.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 168

The public statute passed to protect personal information in possession of federal agencies is:

- A. None of the above

- B. The Omnibus Crime Control Act
- C. The Unauthorized Disclosure Act
- D. The Privacy Act of 1974
- E. The Espionage Statute

Answer: (SHOW ANSWER)

NEW QUESTION: 169

The attitude or state of mind through which individuals are conscious of the existence of the security

program and are persuaded that it is relevant to their own behavior is a concept known as:

- A. Security consciousness
- B. Security motivation
- C. None of the above
- D. Security awareness

Answer: D (LEAVE A REPLY)

NEW QUESTION: 170

Which of the following should be used to establish annual loss expectancy?

- A. Impact and frequency
- B. Statistics and logic
- C. Vulnerability and risk
- D. Probability and causation

Answer: A (LEAVE A REPLY)

NEW QUESTION: 171

Which of the following is not true in regard to establishing and identifying personnel to control movement?

- A. Procedures should be designed to show employees what to do when an identification card or badge is lost.
- B. The identification card or badge should be designed in a relatively complicated manner to avoid duplication.
- C. The identification card should be designed as simply as possible.
- D. Detailed instructions should be disseminated as to where, when, and how badges should be worn.
- E. Prerequisites should be devised and disseminated for reissue.

Answer: (SHOW ANSWER)

NEW QUESTION: 172

Which of the following methods of duplication of records for emergency planning purposes is the least desirable?

- A. Microfilming
- B. Carbon copies
- C. Photocopying
- D. Handwritten notations
- E. None of the above

Answer: B (LEAVE A REPLY)

NEW QUESTION: 173

Citations issued by an OSHA area director are:

- A. None of the above
- B. All of the above
- C. Written
- D. Required to be posted at or near the place of violation
- E. Mailed by U.S. certified mail

Answer: B (LEAVE A REPLY)

NEW QUESTION: 174

As the security manager of a large corporation located in Southern California, you are charged with

formulating a disaster plan to handle emergencies that arise as a result of earthquakes.

Which of the

following warnings to be issued to employees should not be included in the plan?

- A. If employees are indoors at the time of shaking, they should stay there.
- B. If inside, take cover under sturdy furniture.
- C. If inside, stay near the center of the building.
- D. If employees are outside, proceed to the nearest building and head for the basement promptly.
- E. If inside, stay away from glass windows and doors.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 175

Vital records normally constitute what percentage of the company's total records?

- A. 2 percent
- B. 20 percent
- C. 5 percent
- D. 15 percent
- E. 10 percent

Answer: A (LEAVE A REPLY)

NEW QUESTION: 176

Which of the following is the proper term for an organization's financial commitment?

- A. Liabilities
- B. Assets
- C. Debt
- D. Costs

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 177

A natural hazard that poses a threat to many areas of this country is a hurricane. As soon as the weather forecaster determines a particular section of the coast will feel the full effects of a hurricane, he issues a hurricane warning. Such a warning specifies which of the following?

- A. Coastal areas where inhabitants should listen closely for further advisories and be ready to take precautionary actions
- B. The fact that there are definite indications a hurricane is forming and a name to the storm is given
- C. Coastal areas where winds of 74 mph or higher are expected
- D. Coastal areas where winds are 100 mph or higher are expected
- E. Coastal areas where the eye of the storm will pass

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 178

If the agent commits a tort:

- A. None of the above
- B. The agent is not liable if the agent was working for the principal at the time
- C. The agent is not liable if acting within the scope of employment.
- D. The agent is personally responsible to the injured party.
- E. The agent is not liable if the agent has a written contract with the employer

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 179

A security organization that utilizes a departmental structure may limit opportunities for:

- A. team growth and a strong work ethic.
- B. cross-functional cooperation and coordination.
- C. individual growth.
- D. productivity.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 180

In emergency planning, vital records should be maintained at:

- A. The company headquarters
- B. The National Archives in Washington, D .C .
- C. The Emergency Operating Center (EOC) Record Center
- D. The Federal Emergency Management Agency
- E. The local police department

Answer: C (LEAVE A REPLY)

NEW QUESTION: 181

In meeting minimal federal specifications, noninsulated security containers must satisfactorily pass a drop test of:

- A. 22 feet
- B. 15 feet
- C. 20 feet
- D. 30 feet
- E. 25 feet

Answer: D (LEAVE A REPLY)

NEW QUESTION: 182

In a criminal trial the burden of proof required to find guilt is:

- A. Preponderance of evidence
- B. Beyond a reasonable doubt
- C. None of the above
- D. Amount necessary to convince a majority of jurors
- E. Reasonableness of presentation

Answer: B (LEAVE A REPLY)

NEW QUESTION: 183

The designation that should be applied to information or material showing unauthorized disclosure that could reasonably be expected to cause damage to national security is:

- A. None of the above
- B. Top secret
- C. Restricted

- D. Confidential
- E. Unauthorized disclosure

Answer: D (LEAVE A REPLY)

NEW QUESTION: 184

The federal criminal law is set forth in the following title of the U.S. Code:

- A. Title 5
- B. Title 12
- C. Title 18
- D. Title 28
- E. Title 50

Answer: C (LEAVE A REPLY)

Explanation

NEW QUESTION: 185

A visual indicator that displays several zones or buildings in which an alarm signal has originated from is called a(n):

- A. Zone alarm panel
- B. Trouble signal
- C. Contact alarm panel
- D. Break alarm panel
- E. Annunciator

Answer: E (LEAVE A REPLY)

NEW QUESTION: 186

Which of the following is not a true statement in regard to phencyclidine?

- A. It is also known as angel dust and PCP.
- B. It is a Schedule I substance.
- C. It is unique among popular drugs of abuse in its power to produce psychoses that are indistinguishable from schizophrenia.
- D. Most phencyclidine is produced in clandestine laboratories.
- E. None of the above.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 187

Which of the following methods has not been used in recent year to crack open record and money safes?

- A. Core drilling
- B. Punching
- C. Using a fluoroscope
- D. Torching

E. Using a laser beam

Answer: E (LEAVE A REPLY)

NEW QUESTION: 188

To be considered a trade secret, information must meet all of the following criteria EXCEPT:

- A. the owner must take steps to prevent its unauthorized disclosure.
- B. persons to whom it is disclosed must know that it is secret.
- C. it must not be identifiable-
- D. it must not be available already in the public domain.

Answer: C (LEAVE A REPLY)

For information to qualify as a trade secret, it must meet specific criteria, including being valuable because of its secrecy, not being publicly available, and the owner taking reasonable steps to maintain its confidentiality. However, the criterion "it must not be identifiable" is incorrect. Trade secrets can often be identifiable by their function or value, but they remain protected due to the measures taken to keep their details confidential.

ASIS Certified Protection Professional (CPP) References:

* Intellectual Property Protection: CPP materials discuss the legal frameworks around trade secrets, including the Uniform Trade Secrets Act (UTSA) and its relevance to corporate security practices.

* Confidentiality and Access Control: The protection of proprietary information is a key focus of CPP's chapters on information security.

NEW QUESTION: 189

A top guard must consist of:

- A. Five strands of barbed wire or tape
- B. Three strands of barbed wire or tape
- C. Four strands of barbed wire or tape
- D. Two strands of barbed wire or tape
- E. Six strands of barbed wire or tape

Answer: B (LEAVE A REPLY)

NEW QUESTION: 190

Piers and docks located on an installation should be safeguarded by illuminating both water approaches and the pier area. Decks on open piers should be illuminated to at least:

- A. 0.5 foot-candle
- B. 3.0 foot-candles
- C. 1.0 foot-candle
- D. 2.0 foot-candles
- E. 1.5 foot-candles

Answer: C (LEAVE A REPLY)

NEW QUESTION: 191

The unlawful restraint by one person of the physical liberty of another person is the crime of:

- A. Kidnapping
- B. Abduction
- C. Unlawful restraint
- D. False imprisonment

NEW QUESTION: 198

The intrusion detection system in which a pattern of radio waves is transmitted and partially reflected back

to the antenna is known as a(n):

- A. Electromechanical detection system
- B. Capacitance detection system
- C. Vibration detection system
- D. Ultrasonic detection system
- E. Microwave detection system

Answer: (SHOW ANSWER)

NEW QUESTION: 199

In any well-designed disaster plan, you as security manager have as a primary goal the achievement of

"emergency readiness." Which of the following explanations most adequately defines the term

"emergency readiness?"

- A. It means that the security staff is 100 percent manned.
- B. It means that you are prepared to react promptly to save life and protect property if your plant is threatened or hit by a major emergency or disaster of any type.
- C. It means that the Federal Emergency Management Agency has inspected and approved the company's disaster plans.
- D. It means that all security personnel have met minimum training standards of the state in which the plant is located.
- E. It means that all officials of the security department have successfully passed the Certified Protection Professional. C) examination.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 200

In any strike procedure plan, all security personnel should be briefed by company management regarding:

- A. All of the above
- B. Company policy regarding the strike
- C. None of the above
- D. The importance of taking detailed notes of illegal activities
- E. Property lines

Answer: A (LEAVE A REPLY)

NEW QUESTION: 201

A valid arrest must contain the following elements:

- A. Intent of taking person into physical custody
- B. Physical control by arresting officer
- C. All of the above
- D. Understanding by person who is being arrested
- E. Authority on the part of arresting officer

Answer: C (LEAVE A REPLY)

NEW QUESTION: 202

Which of the following terms best describes when a person's tissue cells have adjusted to the presence of a drug?

- A. Habituation
- B. Physical addiction
- C. Tolerance
- D. Dependence

Answer: C (LEAVE A REPLY)

Tolerance occurs when a person's tissue cells adjust to the presence of a drug, requiring increasing amounts of the substance to achieve the same effect. Tolerance differs from addiction or dependence, as it primarily reflects the body's physiological adaptation rather than psychological or physical craving.

ASIS Certified Protection Professional (CPP) References:

* Behavioral and Substance Abuse Risk Management: CPP materials address the importance of understanding substance-related terms when designing workplace security and safety programs.

* Personnel Security and Risk: Chapter 5 highlights issues related to substance abuse and their implications for workplace risk management.

NEW QUESTION: 203

Which of the following would not be permitted to review a student's record according to the Family Educational Rights and the Privacy Act of 1974?

- A. Other school officials
- B. The school's registrar office
- C. All of the above
- D. None of the above
- E. Law enforcement officials

Answer: E (LEAVE A REPLY)

NEW QUESTION: 204

One who is actually or constructively present, aiding and abetting in the commission of the crime, is generally known as a(n):

- A. Principal in the first degree
- B. Accessory after the fact

- C. Principal in the second degree
- D. None of the above
- E. Accessory before the fact

Answer: C (LEAVE A REPLY)

NEW QUESTION: 205

One step for harmonizing information asset protection (IAP) and general business practices is to:

- A. identity information assets.
- B. communicate IAP issues to all levels of management.
- C. assess threats to information assets.
- D. identify existing and planned security controls and other options for addressing risk.

Answer: (SHOW ANSWER)

Harmonizing Information Asset Protection (IAP) with general business practices requires fostering understanding and collaboration across all management levels. Communication ensures alignment between security goals and business objectives.

* Steps to Harmonize IAP:

- * Raise awareness of IAP importance at executive and operational levels.
- * Incorporate IAP into decision-making and strategic planning.
- * Educate management on the risks and protections surrounding information assets.

CPP Context:

- * Information Security and Governance: Encourages proactive communication to integrate security into business workflows.
- * Strategic Alignment: Demonstrates the value of harmonizing IAP efforts with business priorities.

NEW QUESTION: 206

A homicide committed while attempting to effect an arrest or to prevent an escape can only be justified in:

- A. Affecting the arrest of any felon E
- B. Atrocious felony cases as an absolute last resort
- C. Effecting the arrest of a fleeing felon
- D. All of the above
- E. Effecting the arrest of one who has committed a misdemeanor

Answer: B (LEAVE A REPLY)

NEW QUESTION: 207

What type of glass would be better for a storefront in terms of resistance to breakage, resistance to heat or extreme cold. and resistance to overall deterioration?

- A. Laminated glass

- B. Wired glass
- C. Bullet-resistant glass
- D. Plate glass
- E. Acrylic material

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 208

The main purpose of a grand jury is to:

- A. Determine whether an individual has committed a crime or not
- B. Determine the nature of punishment
- C. Determine whether there is probable cause that a crime has been committed
- D. Give the accused the chance to face his or her accuser
- E. Determine guilt

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 209

Manhole covers _____ inches or more in diameter should be secured to prevent unauthorized openings.

- A. 40
- B. 10
- C. 50
- D. 20
- E. 30

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 210

The percentage of computer security incidents that are annually believed to be attributed to hackers is closest to:

- A. 50 percent
- B. 10 percent
- C. 20 percent
- D. 1 percent

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 211

The basic or "organic" law of the United States is:

- A. Supreme Court decisions
- B. Common law
- C. U.S. statutes at large
- D. U.S. Constitution

E. The Bill of Rights

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 212

The main hurdle to overcome for personality tests is the requirement of the Civil Rights Act of 1964 that

such a test not be discriminatory against protected minorities. This rule used as a test is known as the:

- A. 60 percent rule
- B. 40 percent rule
- C. 80 percent rule
- D. None of the above
- E. 30 percent rule

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 213

The primary federal law that provides the legal foundation for the current federal strategy of reducing the

consumption of illicit drugs is:

- A. The Volstead Act
- B. The Harrison Narcotics Act
- C. Title II, Comprehensive Drug Abuse Prevention and Control Act of 1970
- D. None of the above
- E. The Drug Enforcement Administration Act of 1982

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 214

Which of the following is generally not allowed to be disclosed on an employment questionnaire?

- A. Prior arrests
- B. Current residence
- C. References

- D. Prior employment
- E. None of the above

Answer: A (LEAVE A REPLY)

NEW QUESTION: 215

An employer may reject an applicant on the basis of:

- A. A conviction for a crime against property
- B. An arrest for a crime against property
- C. Unsatisfactory interview
- D. Incomplete data on the personal history search
- E. Unexplained gaps in employment history

Answer: A (LEAVE A REPLY)

NEW QUESTION: 216

Which of the following should be part of an effective information security program?

- A. All of the above
- B. Employee awareness programs
- C. Nondisclosure agreements from employees
- D. Policy and procedural statements on the recognition, classification, and handling of sensitive information
- E. Pre-employment screening

Answer: A (LEAVE A REPLY)

NEW QUESTION: 217

To be within the definition of a trade secret, sensitive information must meet which of the following criteria?

- A. a, c, and d.
- B. There must be some obvious indication that the owner is attempting to prevent its unauthorized disclosure.
- C. It must be identifiable.
- D. It must not be already available in public sources.
- E. Individuals to whom it is disclosed must know it is secret.
- F. All of the above.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 218

According to the motivation-hygiene theory, employee motivation depends on:

- A. supervision, compensation, and working conditions.

- B. achievement, growth, and responsibility.
- C. security, feedback, and The grievance process.
- D. training, promotions, and open communication channels.

Answer: B (LEAVE A REPLY)

According to Herzberg's Motivation-Hygiene Theory, employee motivation is driven by intrinsic factors such as achievement, growth, and responsibility, which provide personal satisfaction and a sense of accomplishment.

* Motivators (Intrinsic Factors):

* Achievement, recognition, growth, and meaningful work enhance job satisfaction and motivation.

* Hygiene Factors (Extrinsic Factors):

* Salary, supervision, and working conditions are necessary to prevent dissatisfaction but do not inherently motivate.

* Application:

* Effective management focuses on providing opportunities for growth and responsibility to foster motivation.

* A: Supervision and working conditions are hygiene factors, not motivators.

* C: Security and feedback prevent dissatisfaction but do not drive motivation.

* D: Training and promotions are important but do not fully align with Herzberg's intrinsic motivators.

Key Concepts of the Motivation-Hygiene Theory: Why Other Options Are Incorrect: ASIS
CPP References:

* Domain 9: Business Principles and Practices Explores motivational theories and their application in organizational management.

NEW QUESTION: 219

The privilege against self-incrimination is found in the following amendment:

- A. Second
- B. Fifth
- C. Tenth
- D. Sixth
- E. Fourteenth

Answer: (SHOW ANSWER)

NEW QUESTION: 220

With regard to civil disorder planning, the responsibility for maintaining law and order rests with:

- A. None of the above
- B. The proprietary security authority
- C. The Army Department
- D. Local authorities

E. The FBI

Answer: (SHOW ANSWER)

NEW QUESTION: 221

The fire detector that responds to a predetermined temperature or to an increase in temperature is known as a(n):

- A. Infrared flame detector
- B. Thermal detector
- C. None of the above
- D. Ionization detector
- E. Photoelectric smoke detector

Answer: B (LEAVE A REPLY)

NEW QUESTION: 222

The agreement prohibiting an employee from disclosing confidential information for a stated period of time after accepting employment with a defined competitor is called a:

- A. competitive agreement.
- B. noncompetitive covenant.
- C. nondisclosure agreement.
- D. disclosure agreement.

Answer: (SHOW ANSWER)

A noncompetitive covenant is an agreement prohibiting an employee from disclosing confidential information or working for competitors for a specified period after leaving their current employment.

* Confidentiality Protection:

* Safeguards proprietary and sensitive information from being shared with competitors.

* Employment Restrictions:

* Limits former employees from joining or assisting competitors in a way that could harm the original employer.

* Legal Enforceability:

* Must comply with local laws to be enforceable, as some jurisdictions limit the scope and duration of these agreements.

* A: Competitive agreement is not a recognized legal term in this context.

* C: Nondisclosure agreements restrict information sharing but do not address employment with competitors.

* D: Disclosure agreements pertain to sharing, not restricting, information.

Key Features of Noncompetitive Covenants: Why Other Options Are Incorrect: ASIS CPP References:

* Domain 7: Legal Aspects Explains employment contracts, including noncompetitive covenants and confidentiality agreements.

NEW QUESTION: 223

In issuing policy statements regarding the handling of disturbed persons, the primary consideration is:

- A. Legal liability to employees and third persons if restraint is not achieved
- B. None of the above
- C. Employee-community public relations
- D. Reducing the disturbed person to a form of benevolent custody and eliminating the immediate danger
- E. Legal liability to the disturbed

Answer: D ([LEAVE A REPLY](#))

- A. Secret
- B. Restricted
- C. Top secret
- D. Unauthorized disclosure
- E. Confidential

Answer: A (LEAVE A REPLY)

NEW QUESTION: 235

If it is necessary to terminate an undercover investigation, one of the following actions should not be done:

- A. Salvage as much of the resultant data as possible
- B. Prepare explanations for those who demand them
- C. Reveal the agent's identity
- D. Withdraw agent immediately
- E. Withdraw agent safely

Answer: C (LEAVE A REPLY)

NEW QUESTION: 236

When planning for emergency situations, the best strategy to ensure adequate record recovery is to:

- A. store a duplicate set of vital records at an off-site location.
- B. maintain duplicate copies of all critical records.
- C. utilize a fire proof enclosure for duplicate records.
- D. prescreen records for business continuity and criticality.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 237

Which type of threat is most frequently overlooked and the most difficult to evaluate regarding information assets protection?

- A. Inadvertent
- B. Natural
- C. Indirect
- D. Cyber

Answer: A (LEAVE A REPLY)

NEW QUESTION: 238

Which of the following is not a requirement for handling preemployment interviews?

- A. Interviews must be unbiased.
- B. Interviews must be voluntary.

- C. The interviewer should not give out information.
- D. For an interview to be effective, it should be conducted with a witness or a friend of the applicant present.
- E. Complete and accurate notes should be taken.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 239

Inquiring about an applicant's age and date of birth on a preemployment form may be prohibited by:

- A. All of the above
- B. The Civil Service Act of 1970
- C. Title VII of the Civil Rights Act of 1964
- D. The Age Discrimination in Employment Act

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 240

The term "hot site" refers to a:

- A. location that has sustained a major amount of radiation.
- B. location where stolen computer components are stored prior to resale.
- C. site where the HVAC system failed, making computer operations unfeasible.
- D. standby alternate site with duplicate hardware and operating software.

Answer: ([SHOW ANSWER](#))

A "hot site" refers to a fully operational alternate site equipped with duplicate hardware, software, and network connectivity, ready to take over operations immediately in case of a primary site failure. Hot sites are integral to business continuity and disaster recovery plans, ensuring minimal downtime and maintaining critical operations during emergencies.

ASIS Certified Protection Professional (CPP) References:

- * Business Continuity and Disaster Recovery: CPP materials define hot sites as a key strategy for ensuring uninterrupted operations.
- * ISO 22301 Business Continuity Standards: Hot sites align with international standards for mitigating operational risks during disasters.

NEW QUESTION: 241

The public statute passed to protect personal information in possession of federal agencies is:

- A. The Unauthorized Disclosure Act
- B. None of the above
- C. The Omnibus Crime Control Act
- D. The Espionage Statute
- E. The Privacy Act of 1974

Answer: E ([LEAVE A REPLY](#))

- E. Documentation of status

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 243

The main objective of private security is:

- A. To protect assets and prevent losses
- B. To assist police in investigation of crimes
- C. To apprehend those who steal property from their firms
- D. To prevent unauthorized persons from entry on firm's property

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 244

Fires involving live electrical equipment such as transformers would be classified as:

- A. Class C
- B. Class D
- C. Class E
- D. Class A
- E. Class B

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 245

What is the basic objective of Crime Prevention Through Environmental Design (CPTED)?

- A. Ensuring budding code compatibility through architectural design
- B. Preventing crime through physical and construction planning

- C. Achieving defensible space in architectural conformity
- D. Improving the accuracy of crime statistics

Answer: B (LEAVE A REPLY)

The basic objective of Crime Prevention Through Environmental Design (CPTED) is to prevent crime by designing physical environments that naturally deter criminal behavior. This includes elements like natural surveillance, territorial reinforcement, and access control to create safer spaces.

ASIS Certified Protection Professional (CPP) References:

* CPTED Principles: CPP materials provide detailed discussions on how environmental design reduces opportunities for crime.

* Physical Security Planning: CPP guidelines stress integrating CPTED into construction and urban planning to enhance security.

NEW QUESTION: 246

Which of the following should be made part of a proprietary information protection program?

- A. Pre-employment screening
- B. Effective perimeter control system
- C. Execution of patent and secrecy agreement
- D. Paper and data control
- E. Both A and C
- F. All of the above

Answer: (SHOW ANSWER)

Explanation

NEW QUESTION: 247

What agency should be consulted before installing protective lighting adjacent to navigable waters?

- A. The U.S. Coast Guard
- B. The Bureau of Customs
- C. Local law enforcement agencies
- D. The Department of Transportation
- E. Both a and b

Answer: A (LEAVE A REPLY)

NEW QUESTION: 248

OSHA is administered by the:

- A. Department of Justice
- B. Department of Commerce
- C. Department of the Interior
- D. Department of Health and Human Resources

E. Department of Labor

Answer: E (LEAVE A REPLY)

NEW QUESTION: 249

Which type of motion detection sensor can penetrate unshielded walls and respond to motion occurring outside the protected premises?

- A. Microwave
- B. Volumetric
- C. Ultrasonic
- D. Infrared

Answer: A (LEAVE A REPLY)

Microwave motion detection sensors can penetrate unshielded walls and respond to motion occurring outside the protected premises. These sensors emit microwave signals that create a detection field, and any motion within this field disrupts the signal pattern, triggering an alarm. Their ability to penetrate walls makes them suitable for large spaces but also poses a risk of false alarms if not properly configured.

ASIS Certified Protection Professional (CPP) References:

- * Physical Security and Intrusion Detection Systems: CPP materials describe microwave sensors as highly effective but requiring careful placement to avoid signal interference and false alarms.
- * Sensor Technology Applications: Detailed discussions in CPP modules on motion detection technologies highlight their operational characteristics and limitations.

NEW QUESTION: 250

A financial decision tool that measures the productivity of assets by computing profits as a percentage of capital invested is known as a/an:

- A. marginal analysis.
- B. investment forecast
- C. return on investment
- D. breakeven analysis

Answer: C (LEAVE A REPLY)

Return on investment (ROI) is a financial decision tool used to measure the productivity of assets by calculating profits as a percentage of the capital invested. This metric helps determine the efficiency of an investment and its contribution to financial goals.

ASIS Certified Protection Professional (CPP) References:

- * Security Budgeting and ROI: The CPP manual emphasizes ROI as a critical tool for justifying expenditures and evaluating the effectiveness of security investments (Chapter 7).

NEW QUESTION: 251

Stores that rely on stapling packages shut with the register tape folded over the top of the bag do this:

- A. To help the loss prevention officer
- B. To show that the customer paid for the package
- C. For the psychological effect
- D. All of the above
- E. On the assumption that employees will not help each other
- F. To keep the customer from adding more items to the bag

Answer: E (LEAVE A REPLY)

NEW QUESTION: 252

In order to measure an applicant's compatibility for a certain position, it is necessary to initiate a/an:

- A. intelligence/aptitude test.
- B. pre-employment/psychological test.
- C. medical/physical test.
- D. personality/integrity test.

Answer: D (LEAVE A REPLY)

To measure an applicant's compatibility for a specific position, a personality/integrity test is used. These tests assess traits like honesty, reliability, and alignment with organizational values, helping employers predict job performance and reduce the risk of insider threats.

ASIS Certified Protection Professional (CPP) References:

* Pre-Employment Scre

NEW QUESTION: 253

What factors should be considered when using the Internet to link organization offices?

- A. Service providers, confidentiality, and hacker attacks
- B. Ease, applications, and overall security
- C. Authentication, service providers, and ease
- D. Confidentiality, integrity, and availability

Answer: D (LEAVE A REPLY)

When using the Internet to link organizational offices, the focus should be on confidentiality, integrity, and availability (CIA), which form the core principles of information security.

* Confidentiality:

* Ensures that sensitive information is accessed only by authorized personnel.

* Use encryption and secure authentication protocols.

* Integrity:

* Protects data from unauthorized alteration during transmission.

* Employ data validation and hashing techniques.

* Availability:

- * Ensures reliable access to information and network services.
 - * Use redundancy and robust network infrastructure to prevent downtime.
 - * A: While important, service providers and hacker attacks are specific risks rather than overarching principles.
 - * B: Ease and applications focus on usability but do not address comprehensive security.
 - * C: Authentication is a component of confidentiality, not a separate principle.
- Key Considerations: Why Other Options Are Incorrect: ASIS CPP References:
- * Domain 4: Information Security Discusses the CIA triad as the foundation of secure information systems.

NEW QUESTION: 254

Legislative enactments establishing arbitrary time periods in which the state must initiate criminal proceedings or not act at all are known as:

- A. Legal defenses
- B. Bills of attainder

Answer: B (LEAVE A REPLY)

NEW QUESTION: 258

Assessing the potential consequences of a disruption within a functions area is known as:

- A. business continuity planning.
- B. business impact analysis.
- C. security survey.
- D. consequence analysis.

Answer: (SHOW ANSWER)

Business impact analysis (BIA) involves assessing the potential consequences of a disruption in a functional area. This process identifies critical business functions, evaluates the impact of their interruption, and prioritizes recovery efforts. A BIA is essential for business continuity planning, ensuring resources are allocated effectively to mitigate disruptions.

ASIS Certified Protection Professional (CPP) References:

- * Business Continuity and Disaster Recovery: The CPP manual emphasizes BIA as a foundational component of business continuity planning.
- * Risk Management Frameworks: Chapter 7 discusses how BIA informs the prioritization of recovery strategies.

NEW QUESTION: 259

A cooperative organization of industrial firms, business firms, and similar organizations within an industrial community that are united by a voluntary agreement to assist each

other by providing materials, equipment, and personnel needed to ensure effective industrial disaster control during emergencies is called a(n):

NEW QUESTION: 279

Questions on an application blank or field investigative inquiries that deal with a union membership or affiliation should be avoided as they may lead to charges that constitute violations of:

- A. The National Labor Relations Act
- B. The Fair Credit Reporting Act
- C. The Civil Rights Act of 1964
- D. The Civil Rights Act of 1976
- E. The Federal Tort Claims Act

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 280

A study by scientists at Yale University (1939) found that theft resulted from:

- A. Lack of religion and moral values
- B. Aggression, low morale, and low anticipation of being caught
- C. Aggression, frustration, and lack of moral values
- D. Aggression, frustration, and low anticipation of being caught
- E. Aggression, frustration, and need

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 281

Which of the following would not be considered in the "trade secret" category?

- A. Salary data
- B. Market surveys
- C. Customer usage evaluations
- D. Personnel matters
- E. All of the above

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 282

According to Hallcrest I, approximately what percentage of proprietary security employees feel the public

police are satisfied with their current level of involvement in problems referred by security personnel?

- A. 60 percent
- B. 20 percent
- C. 40 percent
- D. 10 percent

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 283

In devising proprietary information procedures, which of the following is considered to be a main area of paper or document vulnerability?

- A. All of the above
- B. Comprehensive paper controls
- C. None of the above
- D. Control and issue of notebooks
- E. A technical report system

Answer: (SHOW ANSWER)

NEW QUESTION: 284

A comprehensive personnel security program should include:

- A. Adequate job specifications and performance standards
- B. All of the above
- C. Both a and b
- D. None of the above
- E. Appropriate selection and recruitment criteria
- F. Truth verification standards

Answer: B (LEAVE A REPLY)

NEW QUESTION: 285

One of the greatest hazards that would result from a nuclear attack is radioactive fallout.

A security manager should be well informed concerning the full potential of damage associated with this type of disaster. Which of the following is an incorrect statement?

- A. In an all-out nuclear attack against U.S. military, industrial, and population centers, it is estimated that severe to moderate damage from the blasts and heat effects would occur in about 50 percent of the nation's area.
- B. It is estimated that millions of Americans could survive the radiation effects of a large-scale nuclear attack by seeking protection in fallout shelters.
- C. Gamma radiation is measured in units call roentgens.
- D. Gamma radiation most concerns civil preparedness planners as it cannot be detected by any of the human senses.
- E. Gamma radiation can be detected only with special instruments.

Answer: (SHOW ANSWER)

NEW QUESTION: 286

Which of the following is not correct regarding a security education program?

- A. None of the above.
- B. Security consciousness is an inherent state of mind.
- C. Structural aids to security are valueless without active support of all personnel.
- D. All installation personnel must be made aware of the constant threat of breaches of security.

E. Many people are naive and trusting.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 287

The term used to refer to the body of the crime and all the elements necessary to prove that a crime has been committed is:

- A. Actus rea
- B. None of the above
- C. Mens rea
- D. Corpus delicti
- E. Habeas corpus

Answer: (SHOW ANSWER)

NEW QUESTION: 288

In order to dissipate heat, a records safe must contain insulation and:

- A. moisture.
- B. laminated steel.
- C. vacuum.
- D. carbon.

Answer: (SHOW ANSWER)

A records safe is designed to protect paper records from heat damage during a fire. The critical element in achieving this protection is the dissipation of heat through insulation materials. Moisture is incorporated into the insulation because it serves as a heat-absorbing medium. As the safe's interior temperature rises, the moisture in the insulation turns to steam, which absorbs significant amounts of heat, helping to maintain the interior temperature below the combustion point of paper (approximately 451°F or 233°C).

* Insulation with Moisture:

* Insulation materials in the safe are impregnated with moisture.

* The moisture delays heat transfer by absorbing and utilizing the energy for phase change (water to steam).

* Controlled Internal Environment:

* The steam generated prevents direct exposure of the contents to high temperatures, preserving paper documents.

* Fire Resistance Standards:

* Safes are tested and rated based on their ability to keep the internal temperature below critical levels for a specified duration (e.g., UL 72 Fire Resistance Ratings).

* B: Laminated steel adds structural strength but does not contribute to heat dissipation.

* C: A vacuum would not dissipate heat effectively; it could lead to structural failure due to fire conditions.

* D: Carbon is not relevant in dissipating heat in safes.

Key Design Features of a Records Safe: Why Other Options Are Incorrect: ASIS CPP

References:

* Domain 5: Physical Security Discusses the design and testing of fire-resistant safes and protective storage systems.

NEW QUESTION: 289

A craving for a drug is exhibited often by the following:

A. All of the above

B. Continual itching of arms and legs

C. Frequent yawning or sneezing

D. None of the above

E. Water running from nose or eyes
