NEW QUESTION: 1

RDS accounts can be used to connect with the databases created on a given RDS instance. Each account can be bound with multiple databases. Yet, the read/write permissions of each database can only be assigned to one RDS account

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 2

When using Alibaba Cloud SLB, you can set different weights for backend ECS instances. The higher the weight of a backend ECS instance, the more load will be assigned to it. An SLB instance has 5 ECS instances in the backend server pool, all of which are healthy. Among these 5 ECS instances, the weight of ecs_inst1 is set to 100. Which of the following statements is correct?

- A. Based on request level parameters of external requests, all requests with a request level parameter of 100 will be transferred to ecs_inst1
- B. We do not know the weight settings of the remaining 4 ECS instances, so we cannot tell what would happen
- C. Based on SLB's working mechanism, approximately 20% of loads will be assigned to ecs_inst1
- D. 100% of loads will be assigned to ecs_inst1, and the remaining 4 ECS instances will stay idle

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

Alibaba Cloud Object Storage Service (OSS) provides multiple file uploading modes for different scenarios, which are_____.

(Number of correct answers: 2)

- A. Directly copying to/from OSS using portable disks
- B. Direct upload from the OSS management console no matter how large the file is
- C. Upload using the SDK
- D. Uploading using the API

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 4

Company A constructed a sales management platform using three Elastic Compute Service (ECS) instances. One of the instances runs MySQL, and is used as the database server. The other two instances are used as Web servers After some time, the number of employees in Company A dramatically increases, leading to higher sales volumes At the same time, the platform response speed is gradually decreasing too.

According to the report from CloudMonitor, the average CPU utilization rate of the two Web servers exceeds 70%, and database load reaches 75% Company A can select Alibaba Cloud_____ services.to cope with the issue and optimize the performance. (Number of correct answers: 2)

- A. Use Content Delivery Network (CDN) to enhance content loading speed
- B. Import database data into Object Storage Service (OSS) to share the storage pressure on the platform
- C. Replace the self-built MySQL database with ApsaraDB for RDS to obtain better database performance, and utilize RDS read-only instances to handle read-only requests
- D. Incorporate Server Load Balancer (SLB) and add additional ECS instances to relieve the load on existing ECS instances

Answer: (SHOW ANSWER)

NEW QUESTION: 5

Different Alibaba Cloud VPCs are completely isolated from each other.

By default, the VPCs cannot communicate with each other over Intranet, but you can establish VPN connections via the Internet to achieve interconnection between VPCs.

- A. True
- B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 6

You are using Auto Scaling with one scaling group already created, then you want to execute a task at a specific time such as removing 1 ECS instance every night at 00:00. To achieve this, which of the following operations should be performed'? (Number of correct answers; 2)

- A. Create an event-triggered task.
- B. Create a new scaling group.
- C. Create a scaling rule
- D. Create a scheduled task.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 7

You need to create a new ECS instance for a 10-data test. Which of the following billing methods is most cost-effective?

- A. Pay-As-You-Go
- B. Preemptible
- C. Pay-AS-You-Go with Savings Plan
- D. Subscription

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Which of the following ports does RDS for MySQL listen on by default?

- A. Port 3600
- B. Port 3306
- C. Port 8080
- D. Port 3060

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 9

When a customer uses Alibaba Cloud Object Storage Service (OSS) service and finds there exist an amount of Internet downstream traffic, he/she can use Alibaba Cloud Content Delivery Network (CDN) service to reduce the traffic cost.

Because the Internet traffic cost of CDN is lower than that of OSS, moreover, the back-to-source traffic cost from CDN to OSS is also lower than a user access to OSS directly.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

A startup video streaming company deploys its service on Alibaba Cloud Elastic Compute Service (ECS) Christmas is coming soon and the CEO knows that they need to prepare more computing resources However, they don't want to purchase a large number of Elastic Compute Service (ECS) instances for a long period of time. Instead, they want to buy ECS instances for a short period of time and release them after the event is over. Which of the following billing methods of ECS is the most suitable?

- A. Pay-As-You-Go Only

- B. Subscription with Reserved Instances
- C. Pay-As-You-Go with Savings Plan
- D. Pay-As-You-Go with Reserved Instances

Answer: C (LEAVE A REPLY)

NEW QUESTION: 11

Alibaba Cloud CloudMonitor is a service that monitors Alibaba Cloud resources and Internet functions currently provided by CloudMonitor? (Number of correct answers: 3)

- A. Site monitoring
- B. Customized monitoring
- C. Custom firewall
- D. Operation auditing
- E. Cloud service monitoring

Answer: A,B,E (LEAVE A REPLY)

<https://cloudacademy.com/course/alibaba-security-monitoring-1275/introduction-to-cloud-monitor/#:~:text=Cloud%20Monitor%20is%20a%20service,safeguard%20your%20products%20and%20business.>

NEW QUESTION: 12

Many of Alibaba Cloud services provide highly reliable data storage capacity. For example, Object Storage Service (OSS) promises that its data reliability is no less than 99 99999999%. This high data reliability is solely achieved by RAID 0+1 redundancy technology.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 13

When you create an Alibaba Cloud VPC, a VRouter and a route table will be created automatically. Which of the following statements is NOT correct about the route table?

- A. This route table cannot be deleted
- B. When a VPC is deleted, the corresponding route table is also deleted.
- C. Each VRouter may have multiple route tables.
- D. The routing entries of the route table can not be modified manually.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 14

Which of the following privilege is required to manually install Alibaba Cloud Security Center on the server?

- A. Database Access privilege
- B. FTP service privilege

- C. System administrator privilege
- D. Common user privilege

Answer: D (LEAVE A REPLY)

NEW QUESTION: 15

Recently, response speed of a certain Alibaba Cloud Elastic Compute Service (ECS) instance is unacceptably slow. By using CloudMonitor we discovered that the ECS instance utilizes more than 80% of the assigned bandwidth.

Which of the following approach can address this issue and without the need to reboot the ECS instance?

- A. Upgrade the bandwidth of the ECS instance
- B. Add a disk to the ECS instance
- C. None of the above
- D. Upgrade the CPU and memory of the ECS ins

Answer: (SHOW ANSWER)

NEW QUESTION: 16

You have created two Alibaba Cloud VPCs in two different regions To establish communication between these two VPCs via the Intranet, you can_____.

- A. Create a new access rule through the Security Group to enable the communication
- B. Use the VRouter to create a new route table to enable the communication
- C. Use CEN to establish communication between VPCs
- D. No operation is needed, as VPCs under the same account are connected through the Intranet by default

Answer: C (LEAVE A REPLY)

NEW QUESTION: 17

After activating an Alibaba Cloud Elastic Compute Service (ECS) instance, you want to monitor the status of the ECS instance via Alibaba Cloud console. Therefore: you must activate and purchase Alibaba Cloud CloudMonitor service to meet this demand.

- A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 18

Auto Scaling can automatically adjust the number of ECS instances based on user-defined scaling rules to meet service needs. If a user cannot predict service changes or does not have enough history data, he/she can still use dynamic scaling mode to automatically add/remove ECS instances based on certain CloudMonitor performance metrics (such as the CPU utilization rate)

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 19

You would like to deploy your applications on Alibaba Cloud to meet requirements including cost reduction, improving service availability, fast deployment- and redundant backup Alibaba Cloud_____products can help meet these requirements (Number of correct

answers 3)

A. Utilizing Content Delivery Network (CDN) can meet the demands for redundant backup.

B. Utilizing Server Load Balancer (SLB) and ECS instances can improve data reliability.

C. Elastic Compute Service (ECS) image achieve efficient and convenient deployment.

D. Reasonable selection of Regions/Zones meets the location needs of application deployment as well as the demands for redundantly backup critical business applications and data.

E. Elastic Compute Service (ECS) snapshot satisfies the needs of rapid recovery of applications and data.

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 20

Many websites have suffered DDoS attacks of different volumes. Therefore, accurate understanding of DDoS attacks is critical to website security protection. Which of the following statements about DDoS attacks is the MOST accurate?

A. DDoS attacks primarily target databases.

B. The main purpose of a DDoS attack is to prevent the target server from providing normal services. Currently, the DDoS attack is one of the strongest and most indefensible website attacks.

C. The purpose of a DDoS attack is to steal confidential information.

D. A DDoS attacks crack the server's logon password by means of a massive number of attempts.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

When using Alibaba Cloud SLB, users can enable the health check function. If a backend ECS instance A is running abnormally, SLB will isolate it and forward the requests to other ECS instances, and when the backend ECS instance A is back to normal, SLB will again forward requests to it.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

Alibaba Cloud Server Load Balancer (SLB) provides services for distributing traffic among multiple ECS instances. SLB can expand the application system's service capacity through traffic distribution, and improve the system's availability by eliminating SPoFs (Single Points of Failure). Which of the following statements are correct? (Number of correct answers; 2)

- A. One of SLB's features is the Health Check. If some of the backend ECS instances are down, whereas other backend ECS instances can still provide services, then the system can continue to work normally.
- B. SLB provides a function to automatically synchronize data among backend ECS instances using rsync remote synchronization.
- C. Before using SLB to provide external services, make sure that you have installed and correctly configured the SLB agent on all of the backend ECS instances.
- D. When recreating an SLB instance that has an Internet IP address, a new Internet IP address will be assigned to the SLB instance.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

If an administrator often needs to manage multiple ECS instances in an Alibaba Cloud VPC through the Internet, which of the following solutions can meet this need at low costs and without affecting system security?

- A. Choose an ECS instance from VPC and make it as the bastion host. And then, apply an EIP and bind it to this ECS instance. After that, the administrator can manage other ECS instances through this bastion host.
- B. Bind an EIP to each of the ECS instances, and log on to each of these ECS instances to manage them.
- C. Modify the VPC Security Group policy, to allow access from the Internet.
- D. None of these answers are correct.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

Company A constructed a sales management platform using three Elastic Compute Service (ECS) instances. One of the instances runs MySQL, and is used as the database server. The other two instances are used as Web servers. After some time, the number of employees in Company A dramatically increases, leading to higher sales volumes. At the same time, the platform response speed is gradually decreasing too. According to the report from CloudMonitor, the average CPU utilization rate of the two Web servers exceeds 70%, and database load reaches 75%. Company A can select Alibaba Cloud _____ services to cope with the issue and optimize the performance. (Number of correct answers: 2)

- A. Use Content Delivery Network (CDN) to enhance content loading speed
- B. Replace the self-built MySQL database with ApsaraDB for RDS to obtain better database performance, and utilize RDS read-only instances to handle read-only requests
- C. Incorporate Server Load Balancer (SLB) and add additional ECS instances to relieve the load on existing ECS instances
- D. Import database data into Object Storage Service (OSS) to share the storage pressure on the platform

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 25

For ECS and RDS instances under different Alibaba Cloud accounts but in the same region, which of the following statements is NOT correct for migrating self-built MySQL databases (running on ECS) to RDS?

- A. The data can be imported via the public network.
- B. The data can be imported by running mysqldump.
- C. The data can be imported via the Intranet
- D. The data cannot be migrated.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 26

You are designing a solution for a startup company, the proposed solution is like this. You suggest they use ECS instances to process requests from mobile App clients, and use SLB to distribute data traffic and ensure the load across each backend ECS instance is balanced.

Moreover to deal with volatile fluctuations in business volume (page views are much higher on the weekends), you also suggest they use Auto Scaling to dynamically increase or reduce computing resources.

The company is satisfied with the solution you proposed. However, they have one concern that when removing an idle instance from the scaling group: if Auto Scaling shuts the instance down directly, the service running on that instance will be abruptly terminated, resulting in poor user experience.

In order to eliminate your customer's concern, which of the following solutions should you recommend them?

A. Find the ECS instance that is going to be removed from the backend server pool of the SLB instancer and automatically set the weight of this ECS instance to 0. This instance will not be assigned with new requests, and will be automatically removed from the backend server pool after existing tasks are completed.

B. First, insert a script into the image for creating the ECS instance Second, make the script run automatically when the operating system in this ECS instances is about to shut down. This script contains the processing logic that can ensure the instance finish all the remaining tasks before shutting down.

C. Use the Lifecycle Hook function embedded m Auto Scaling Define a suitable timeout and a web hook to do the necessary work before the instance is removed.

D. Find the ECS instance that is going to be removed from the backend server pool of the SLB instance, and manually remove this instance from the backend server pool Applications running on this ECS instance will normally return results, but this instance will not be assigned with new requests.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 27

A company launched its online service just a year ago. It uses five ECS instances and does not have a full-time system administrator Over the last six months, the company's system has encountered various security problems Several high-risk vulnerabilities were exploited by hackers, leading to leakage of the company's confidential dat

a. Which of the following Alibaba Cloud products can be used to quickly resolve this problem?

A. Cloud Firewall

B. Managed Security Service

C. Security Center

D. Anti-DDoS Pro Service

Answer: A (LEAVE A REPLY)
