NEW QUESTION: 1

Manually rotate the aperture knob on the lens to adjust the aperture size.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 2

Which of the following descriptions of the SDC OS lightweight microservice governance framework is correct?

- A. Realize service registration and discovery through file operations, and maintain inter-service communication
- B. The purpose is to realize the management of third-party apps
- C. The framework is developed based on the Android kernel
- D. Mainly responsible for providing external interface services

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

Which of the following scenarios are suitable for installing target recognition cameras?
(Multiple Choice)

- A. Indoor corridors with sufficient light
- B. Subway turnstile
- C. Park area, large population
- D. Security check channel

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 4

What are the functions of PowerCube 500? (Multiple choice)

- A. Fault alarm
- B. Real-time monitoring data
- C. Provide a transmission network for the camera body
- D. Powering the camera

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which of the following descriptions of video site planning principles are correct?

- A. " Prevention and control circle " refers to the enclosed area based on checkpoints, traffic hubs, and loops that construct access areas
- B. " Prevention and control line " refers to the construction of security areas with grid units such as streets, communities, and parks
- C. " Prevention and control block " refers to the construction of key units, densely populated areas and other units
- D. " Prevention and control points " are main and secondary arterial roads, and key roads that are intertwined horizontally and vertically in the weaving area of traffic hubs.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

The chip of the Huawei HoloSens IVS3800 server adopts the ARM architecture and is based on the container cloud platform. It uses the highly optimized high-performance distributed computing and storage framework to provide users with a high-density, dynamic and flexible shared resource pool, and supports multi-level video management across platforms. Networking and intelligent cross-domain collaboration capabilities, unified management and operation and maintenance, the entire network is a cloud.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

Which of the following are the characteristics of Huawei HoloSens SDC camera? (Multiple choice)

- A. Algorithms can be loaded on demand
- B. Closed and safe operating system
- C. Decoupling of software and hardware
- D. AI chips with high computing power

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 8

After the camera performs the restoration of the default configuration, all the parameters except () are restored to the factory configuration, which should be used with caution.

(Multiple choice)

- A. Focus position of hemisphere and tube machine in manual and semi-automatic mode
- B. Device IP
- C. User upload certificate
- D. Device port

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 9

The face recognition scene has requirements for pedestrian speed, but no requirements for pedestrian walking direction.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

In order to improve the brightness of the camera screen, what is the priority to adjust?

- A. Field of view
- B. Resolution
- C. Focal length
- D. Aperture

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

The "Floating IP" set when installing the IVS 3800 to manage the master node is the IP address used when logging in to the CSP OM Portal.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 12

Regarding the light edge logic network architecture, which of the following description is wrong? (Multiple Choice)

- A. Outer_Service is an external business plane, providing business application interface access or external business data interaction
- B. Inner_Service is the internal business plane, which provides signaling interaction between the internal business modules of the system
- C. Outer-OM is an internal management plane that provides signaling interaction between OM modules within the system

D. Inner-OM is an external management plane that provides CSP OM Portal interface access and operating system SSH access: at the same time, it can also provide video network connection and algorithm warehouse connection according to business needs

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 13

Which of the following functions is not available in IVS1800?

- A. Person and vehicle retrieval
- B. Stacking
- C. Docking with IVS3800
- D. Intelligent behavior analysis

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 14

In order to prevent light reflections, the strobe lights for bayonet cameras are usually installed crosswise, and the strobe lights must be at least 2 meters away from the high camera.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

When performing facial image retrieval tasks on the intelligent vision platform, it can only be performed through the "Face Retrieval" interface. It is not possible to directly intercept and search for faces during the video preview.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 16

For Huawei HoloSens IVS1800 multi-machine deployment network, what is the largest access scale of an iClent client camera?

- A. 128 way
- B. 32 way
- C. 64 way
- D. 256 way

Answer: ([SHOW ANSWER](#))

Valid H12-521_V1.0 Dumps shared by BraindumpsPass.com for Helping Passing H12-521_V1.0 Exam! NEW QUESTION: 17

Which of the following is not a part of the view library standard GA/T1400?

- A. General technical requirements
- B. Video networking technical requirements
- C. Teaching database technical requirements
- D. Application platform technical requirements

Answer: B (LEAVE A REPLY)

NEW QUESTION: 18

Regarding the relationship between smart vision platform equipment and business requirements, which of the following descriptions is correct?

- A. The number of Huawei HoloSens IVS3800S is affected by video networking services
- B. The number of Huawei HoloSens IVS3800R is affected by the volume of video network sharing services
- C. The number of Huawei HoloSens IVS3800C is affected by the volume of video image retrieval services
- D. The number of Huawei HoloSens IVS3800S is affected by the volume of video image analysis services

Answer: A (LEAVE A REPLY)

NEW QUESTION: 19

If the RAID failure and writable function is enabled when configuring the RAID group of the IVS3800, what effect will happen when multiple hard drives fail? (Multiple choice)

- A. When multiple hard disks fail, the level of the RAID group is downgraded from RAID5 to RAID0, the system can still write data to the hard disk and the previous data will not be lost
- B. When multiple hard disks fail, the level of the RAID group is downgraded from RAID5 to RAID0. If the hard disk fails again, the data cannot be recovered
- C. When multiple hard drives fail, the RAID group level is downgraded from RAID5 to RAID0, and the system can still write data to the hard drives, but the previous data will be lost
- D. When multiple hard disks fail, after the RAID group level is downgraded from RAID5 to RAID0, if the hard disk fails again, the data will continue to be restored

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 20

The number of video analysis channels will affect the number of single-check servers.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

When configuring image backup on the IVS3800 platform, you need to configure the clone camera first.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 22

In the process of installing IVS applications, which of the following materials are needed?
(Multiple choice)

A. Process documents

B. VS3000 application software package

C. CSP installation image package

D. Json file

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 23

Execute () operation, all parameters of the equipment (except the focus position of hemisphere and tube machine in manual / semi-automatic mode) are restored to the factory configuration.

A. Device restart

B. Completely restore the default configuration

C. Restore the default configuration

D. Equipment inspection

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 24

Regarding the access method of Huawei cameras, which of the following statements is wrong?

A. Automatic batch mode supports adding offline cameras

B. Support automatic batch addition and manual batch addition

C. When adding a small number of cameras, it supports single addition

D. Manual batch addition supports adding offline cameras

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 25

Regarding the relationship between smart vision platform equipment and business requirements, which of the following description is correct?

- A.** The number of Huawei HoloSens IVS3800R is affected by the volume of video surveillance network sharing services
- B.** The number of Huawei HoloSens IVS3800S and the impact of color video surveillance networking services
- C.** The number of Huawei HoloSens IVS3800S changes to the impact of video image analysis services
- D.** The number of Huawei HoloSens IVS3800C 3. The impact of video image retrieval business volume

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 26

Face recognition is divided into 3 steps in total: face image acquisition and detection, face image preprocessing (correction alignment) and face image matching and recognition

- A.** True
- B.** False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 27

When the bayonet camera is used in conjunction with the radar, the distance for the radar speed measurement to capture is 15m-30m.

- A.** False
- B.** True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 28

At night, the brightness of the camera screen is too high. Which of the following methods can solve the problem?

- A.** Reduce the brightness of the fill light
- B.** Turn on the fog mode
- C.** Increase the brightness of the fill light
- D.** Increase the shutter speed

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 29

IVS3800 multi-level and multi-domain scenarios, management and service switches need to be stacked in groups, and IVS3800 single-domain scenarios, without group stacking.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 30

Which of the following is an image analysis service?

A. License plate recognition

B. View forwarding

C. View access

D. Vehicle search

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 31

The volume of video network sharing services will affect the number of hard disks and thus the number of single servers.

A. False

B. True

Answer: ([SHOW ANSWER](#))

Valid H12-521_V1.0 Dumps shared by BraindumpsPass.com for Helping Passing H12-521_V1.0 Exam! (500 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)

NEW QUESTION: 32

The chips of the intelligent vision platform widely use the ARM architecture. ARM is characterized by a multi-core architecture and a simplified instruction set, but it is not as good as the X86 architecture in terms of achieving computational efficiency optimization.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 33

200 channels of cameras are stored for 1 day according to 1080P4Mbps stream, and the storage space occupied by recording is about () TB.

A. 8

- B. 6
- C. 10
- D. 12

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 34

Under normal circumstances, the video site adopts the wired network access method for better stability, and the wireless transmission method is usually used as a supplement to the wired method.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 35

The WIFI indicator of the Power Cube 500 function module shows a steady red light, indicating that the WIFI function () at this time.

- A. WLAN module failure
- B. The WLAN module is not inserted or the inserted WLAN module cannot be recognized
- C. First access, need to re-function module
- D. The WLAN module has been identified and can work normally

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 36

The temporary list library is generated by the system when the target fortification task is created. Manually adding the " temporary list library " in the " target list library " interface is not supported.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 37

During the camera capture process, the object is moving too fast and the captured object is blurred. Which of the following methods can solve the problem?

- A. Reduce the shutter speed
- B. Wide dynamic
- C. Increase resolution
- D. Increase the shutter speed

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 38

Multi-choice Shengteng AI processor, which uses the cube Da Vinci architecture. Which of the following features does it contain? (Multiple choice)

- A. High computing power
- B. Scalable
- C. Programmable
- D. Multiple models

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 39

Regarding the description of the MPUT and MPUR nodes of the intelligent vision platform, which of the following statements is correct?

- A. Both MPUT and MUPR support platform video storage
- B. Both MPUT and MUPR support camera access
- C. Both MPUT and MUPR support video forwarding
- D. Both MPUT and MUPR support video backup

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 40

Which of the following description about the principle of face alignment is incorrect?

- A. Let the computer automatically generate measured values through the key points found
- B. Face key point detection is to clarify the contours of the face and key parts such as eyebrows, nose, mouth, etc.
- C. The image can be translated, rotated, and zoomed to generate feature values
- D. After detecting the key points of the face, you need to make progress to extract the key points so that the computer can recognize them

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

In the basic construction stage of the video site, civil construction is an important link, which mainly includes site infrastructure construction, hand well construction, power and transmission introduction trench excavation and landfill.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 42

As for the routine inspection of CSP, which of the following parts are mainly included? (Multiple choice)

- A. View the running status of CSP and container
- B. Check CPU and memory usage status
- C. View the running status of the cluster

D. Check the status of the license

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 43

The GB/T28181 protocol supports active registration, using digital digest-based challenge-response security technology for registration, and authentication should be performed during registration.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 44

Which of the following configurations can solve the problem that the live request failed when the live request is requested? (Multiple choice)

A. Modify the protocol parameter to UDP on the camera web page

B. On the camera Web "Preview Configuration" interface, click the lower left corner of the page and select the stream type

C. Modify the protocol parameter to TCP on the camera web page

D. On the camera web interface, select "Advanced Configuration>Audio View>Video Stream Parameters" to select the stream type

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 45

Which of the following descriptions about the micro-edge IVS1800 is correct?

A. The micro-edge IVS1800 does not support the construction of multi-level multi-domain networking

B. The micro-edge IVS1800 does not support in-face intelligent analysis

C. The micro-edge IVS1800 does not support intelligent behavior analysis

D. The micro-edge IVS1800 does not support vehicle intelligent analysis

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

Which two subsystem functions does Huawei's smart vision platform have?

A. Video image analysis system, video image information collection equipment or system

B. Video image information acquisition equipment or system, video image information (comprehensive) application platform

C. Video image analysis system, video image information (comprehensive) application platform

D. Video image information database, video image information (comprehensive) application platform

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 47

Huawei HoloSens IVS1800 multi-machine networking deployment, including multiple IVS1800 device, configure the PC to install iClient client, an iClient client maximum support management of 16 sets of VS1800 supports up access to 256 cameras.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 48

The basic construction of the video site includes nine parts: positioning and laying out, excavation of foundation pit, construction materials entering the site, foundation pit bottoming, grounding parts production and grounding, formwork fixing, concrete construction, exit maintenance, and muck backfilling.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 49

When multiple lens devices are installed in a certain area (exceeding the maximum number of windows supported by the client), and these monitoring points need to be monitored in real time, which of the following functions can be implemented?

A. Cruise

B. Round Robin

C. On the wall

D. Multiple layouts

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 50

Which one of the following configurations can solve the problem of blurring or jamming of the live screen? (Multiple choice)

- A. Modify the protocol parameter to UDP on the camera web page
- B. Modify the protocol parameter to TCP on the camera web page
- C. Modify the stream type as the main stream on the camera web page
- D. Change the stream type to the auxiliary stream on the camera web page

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 51

In light edge networking, the management TOR and business TOR need to be stacked.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 52

The subsystems of the data center infrastructure include (). (Multiple Choice)

- A. Power supply and distribution system
- B. Cabinet system
- C. Management system
- D. Refrigeration system

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 53

Which of the following configurations can solve the problem of live screen flickering or jamming? (Multiple choice)

- A. Modify the protocol parameter to TCP on the camera web page
- B. Change the stream type to the auxiliary stream on the camera web page
- C. Modify the stream type as the main stream on the camera web page
- D. Modify the protocol parameter to UDP on the camera web page

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 54

Regarding the central platform equipment, which of the following description is wrong? (Multiple Choice)

- A. oceanStor 9000 stores video and image data for the business layer
- B. Universal server 2288H v5 provides system disk and data disk resources for management plane and business plane virtual machines
- C. OceanStor 5500 V5 is used to deploy HUAWEI CLOUD Stack to provide computing resources (such as memory, network card, etc.) for users to create virtual machines on physical servers as upper-layer services (CSP, IVS)
- D. FusionServer G5500 GPU hardware physical resources, providing GPU acceleration and hard decoding capabilities for business layer virtual machines

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 55

IVS1800 supports two configuration modes: local man-machine and iClient.

- A. False
- B. True

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 56

The license plate captured by the camera is blurry. Which reason is not included?

- A. The image sharpness is too low
- B. Shutter speed is too high
- C. Shutter speed is too slow
- D. Focus on other places

Answer: **B** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 57

Commonly used camera access protocols include ONVIF, SDK, GB/T28181, etc.

- A. True
- B. False

Answer: **A** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 58

Which is the correct description of the SDC OS lightweight microservice governance framework?

- A. Realize service registration and discovery through file operations, and maintain inter-service communication
- B. The framework is developed based on the Android kernel
- C. The purpose is to realize the management of third-party apps
- D. Mainly responsible for providing external interface services

Answer: **A** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 59

Which of the following operations can adjust the color cast of the screen? (Multiple choice)

- A. In the camera web interface, enter " Advanced Configuration > Audio View > Image Number Bright Light " to adjust the gain parameters
- B. In the camera web interface, enter " Advanced Configuration > Audio View > Image Parameters > Day and Night Conversion " and change the mode to " color packet mode "
- C. In the camera web interface, enter " Advanced Configuration > Audio View Image Parameters Image Adjustment " to adjust the " Chroma " and " Saturation " parameters
- D. In the camera web interface, enter " advanced configuration audio view image dispersion > white balance " to adjust the white balance mode

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 60

After the intelligent vision platform enters the stable operation period, maintenance engineers are also required to perform routine maintenance on the system, the purpose of which is to detect and eliminate the hidden faults in the platform and equipment in time.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 61

Which of the following is not a prerequisite for the intelligent vision platform to perform target capture statistics?

A. The target recognition algorithm plug-in has been installed on the platform

B. Have subscribed to the face metadata generated by the smart camera on the platform

C. Target recognition intelligent analysis task has been created for the camera on the platform

D. A target fortification mission has been created for the camera on the platform

Answer: D ([LEAVE A REPLY](#))

Valid H12-521_V1.0 Dumps shared by BraindumpsPass.com for Helping Passing H12-521_V1.0 Exam! (500 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)

NEW QUESTION: 62

Which of the following reasons will not cause a large number of dropped calls has been registered in the camera platform? (Multiple choice)

A. There is a problem with the power supply line of the camera

B. The account and password for camera access have expired

C. The network connecting the camera to the platform fails

D. The time set by the camera is not synchronized with the time on the platform

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 63

When creating an inter-domain intelligent analysis task on the intelligent vision platform, which of the following descriptions is incorrect?

- A.** Inter-domain intelligent analysis tasks are the same as local intelligent analysis tasks, and also support intelligent analysis of faces and vehicles
- B.** Select " Owned Domain " when selecting the execution domain. If the selected camera belongs to this domain, the intelligent analysis task will be executed in this domain, and if the selected camera belongs to the lower domain, the intelligent analysis will be executed in the lower domain to which it belongs. Task
- C.** If you need to create a deployment control task for the camera in the future, the deployment control domain (that is, the execution domain of the deployment control) needs to be consistent with the execution domain of the intelligent analysis task
- D.** The inter-domain intelligent analysis task also supports the extremely fast analysis function, so it needs to be checked during configuration

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 64

In the process of installing CSP, when "install Mode" is selected as "Include CsP "other Node"", which node is currently being installed?

- A.** Manage the master node
- B.** Stand-alone deployment
- C.** Business node
- D.** Manage slave nodes

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 65

Which of the following descriptions about indoor monitoring selection is correct?

- A.** Indoor monitoring cannot use tube cameras or bolt cameras
- B.** Indoor dome cameras generally adopt vertical pole installation
- C.** Under normal circumstances, the resolution of the selected dome camera is 1920+1080
- D.** The hemispherical ceiling installation has poor aesthetics

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 66

About Huawei HoloSens IVS1800. Which of the following descriptions is correct? (Multiple choice)

- A.** IVS1800 has 8 disks. RAID and RATD1
- B.** IVS1800 adopts Safevideo+ technology, when RAID5 fails. The remaining disk data is 100% readable and writable, ensuring the availability of business data
- C.** The HDNI interface of IVS1800 is used for HDNI video output and supports dual HDMI heterogeneous output. HDM 1, 4 interface output resolution supports up to 1080P: HDNI2.0 interface output resolution supports up to 4K

D. The USB interface of IVS1800 can be used to connect a U disk, connect a USB mouse, and connect a mobile hard disk

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 67

Regarding UPS equipment, which of the following description is wrong? (Multiple choice)

A. UPS5000 is suitable for medium and large data centers, such as dispatch centers, control centers, management centers and other key power supply scenarios

B. UPS2000 is suitable for large data centers, such as large cloud data centers, large enterprise headquarters, etc.

C. Fusion Power is suitable for small data centers such as branches, business outlets, office and other scenarios

D. UPS2000 is suitable for small data centers such as branches, business outlets, office and other scenarios

Answer: **B,C** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 68

If the engineer forgets to enable the " Bayonet Data Storage " and " Metadata Subscription " functions on the HoloSens iClient when configuring the front-end intelligent functions of a certain vehicle recognition camera.

So what are the consequences?

A. Cannot see the live status of the camera on iClient

B. The smart analysis task cannot be configured for the camera on iClient

C. The camera cannot be recorded on iClient

D. When performing vehicle bayonet data detection, the data from the front-end camera cannot be found

Answer: **D** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 69

Regarding UPS equipment, is the following description wrong? (Multiple Choice)

A. UPS2000 is suitable for small data centers, such as branches, business outlets, offices, etc.

B. FusionPower is suitable for small data centers, such as branches, business outlets, offices, etc.

C. UPS2000 is suitable for large data centers, such as large cloud data centers, large enterprise headquarters, etc.

D. UPS5000 is suitable for medium and large data centers, such as dispatch centers, control centers, management centers and other key power supply scenarios

Answer: **B,C** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 70

Which of the following scenarios are suitable for installing target recognition cameras?
(Multiple choice)

- A. Subway gate
- B. Entrance and exit of the park and hall
- C. Indoor corridors with sufficient light
- D. Security Check Channel

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 71

Which of the following descriptions about the license of IVS3800 is incorrect?

- A. When deploying a separate IVS3800F that includes storage, computing and retrieval, there is no need to introduce a license
- B. If the installation environment includes 3800C and 3800R, you need to import the corresponding license
- C. If the server wants to access external cameras, you need to import the corresponding license
- D. If the server is only used for camera access in this domain, no license is required

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 72

On the CS POM Porta1 resource monitoring interface, you can view the running status of nodes and containers.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 73

Regarding the description of IVS3800s, which of the following statements is wrong?

- A. When the server is configured with a 10GE optical port, be sure to use a 10GE optical port for connection, otherwise the service plane network will be blocked
- B. IVS3800s v2 and support GE electrical port or 10GE optical port for service plane
- C. Once the server uses the GE electrical port as the service plane, it cannot be modified to a 10GE optical port in the later period.
- D. The GE electrical port of the server can only be used for the management plane, not for the service plane

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 74

When the application of IVS3800 is redeployed, the ESN of the server will change, but the license does not need to be re-applied.

- A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 75

When installing the VA- type intelligent algorithm plug- in on the intelligent vision platform, which type of algorithm needs to be configured with additional license channels to ensure that the algorithm can be used normally?

- A. Target recognition algorithm of third-party vendors
- B. Huawei target recognition algorithm (target gate scene)
- C. Huawei target recognition algorithm
- D. Huawei vehicle recognition algorithm

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 76

The maintenance inspection table of the intelligent vision system can be divided into inspection categories according to the two dimensions of date and business scope.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 77

Which of the following descriptions about the online video information collection equipment / system of the visual library system is correct? (Multiple choice)

- A. Vehicles automatically collected by cameras such as bayonet and face. Face information belongs to the automatically collected video image information
- B. The video objects collected by the system only include the videos automatically collected by the system and not the video images collected manually
- C. The video image information related to the case is not within the scope of the video image information collected by the video library system
- D. The above options are correct

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 78

The light edge network platform uses Kubernetes as the container scheduling engine.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 79

During the capturing process of the target capture camera, the moving object moves too fast and the target capture is blurred. The focus can be adjusted to enhance the clarity of the capture.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 80

Regarding the access platform docking analysis platform, which of the following statements is incorrect?

- A. If there are IVS3800S, IVS3800C and IVS3800R in the environment, you need to connect the access platform and the analysis platform
- B. If there is only IVS3800F in the environment, there is no need to connect the access platform and the analysis platform
- C. If not successful docking analysis platform, log in iClient the client, the interface will pop up " intelligence account user name or password is empty " warning
- D. If the connection is successful, various smart applications can be viewed in the " Smart Applications " on the homepage of iClient, and if it fails, there is only one application of " Smart Recognition "

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 81

You can view () alarms and () alarms through the CSPOM portal interface, and handle the alarm information according to the corresponding alarm suggestions.

- A. Equipment: Activities
- B. History: Activities
- C. History: current
- D. History: Equipment

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 82

IVS3800 server comprising lmer_Service , Outer_Service , Immer_OM , Outer_OM and Mgmt this . 5 network planes.

Which statement about Igmt is wrong?

- A. Engineers can access the CSP OM Portal interface of the server through the network plane
- B. Engineers can access the iBMC interface of the server through the network plane
- C. Engineers can access the virtual console of the server through the network plane to install CSP
- D. The network plane represents the server management network port

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 83

What are the following types of video sites that need to be surveyed? (Multiple choice)

- A. Indoor monitoring
- B. Face recognition points
- C. Road bayonet, micro bayonet
- D. Outdoor situation monitoring

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 84

How many parts does a standard video library application system consist of? (Multiple choice)

- A. Video image information collection equipment or system
- B. Video image information (comprehensive) application platform
- C. Video image information database
- D. Video image analysis system

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 85

The ONVIF protocol describes the network video model, interface, data type, and data interaction. The goal is to solve the interoperability between IP network-based security products (cameras, VMS, etc.).

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 86

A park intends to add a dome camera to the existing integrated video site, which uses PoE to supply power. Which interface of PowerCube 500 should be accessed?

- A. AC24V
- B. DC12V
- C. PoE++ interface
- D. DC48V

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 87

When configuring the bayonet camera, the smart properties of the bayonet camera configured on the platform must be consistent with the actual smart properties of the camera.

The reason is:

- A.** If the attributes of the bayonet camera configured on the platform are inconsistent with the attributes of the actual camera, the bayonet captured pictures will not be uploaded to the IVS platform for storage
- B.** If the attributes of the bayonet camera configured on the platform are inconsistent with the attributes of the actual camera, the platform cannot view the camera's live status
- C.** If the attributes of the bayonet camera configured on the platform are inconsistent with the attributes of the actual camera, the camera cannot be connected to the platform
- D.** If the attributes of the bayonet camera configured on the platform are inconsistent with the attributes of the actual camera, the platform cannot record the camera

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 88

Which of the following descriptions of the video site planning and design process steps are correct?

- A.** Video site survey - video site selection plan - video site equipment selection plan
- B.** None of the above
- C.** Video site equipment selection plan - video site selection plan - video site survey
- D.** Video site selection planning - video site survey - video site equipment selection plan

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 89

Which of the following is a view library standard?

- A.** GA / T 1400
- B.** GB/T 28181
- C.** SVAC
- D.** GB35114

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 90

Which of the following product forms of IVS3800 need to build RAID5 and RAID1 when configuring data disk RAID?

- A.** IVS3800R V2
- B.** IVS3800S V2
- C.** IVS3800F V2

D. IVS3800C V2

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 91

In the process of cross-line detection, which feature value of the moving object does not need to be obtained?

- A. Movement direction
- B. Exercise time
- C. Movement trends
- D. Movement speed

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 92

Based on which of the following functions of the intelligent vision platform, can real-time capture and statistics of pedestrians, non-motorized vehicles and motor vehicles at a certain intersection?

- A. Human intelligence analysis
- B. Machine inhuman detection
- C. Structured people and vehicles
- D. Intelligent vehicle analysis

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 93

Which of the following descriptions about the view gallery application platform is correct?

- A. Since the upper and lower units of the visual library system are cascaded, the application platforms of different levels are exactly the same
- B. All of the above options are correct
- C. The video gallery application platform does not support user management
- D. During data retrieval, the platform supports online retrieval across multi-level visual galleries

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 94

IVS3800 realizes the entire network fortification and retrieval of key targets through the task coordination function, and improves the efficiency of inter-city collaboration. Which of the following statements about task coordination is correct? (Multiple choice)

- A.** If a two-level collaboration is formed, the versions of the IVS platform at the upper and lower levels are inconsistent, and the functions are subject to the lower version.
- B.** The upper-level domain creates an intelligent analysis task for the lower-level domain, and the data is returned to the upper-level domain for target fortification tasks, so the upper-level domain does not need to install independent fortification services
- C.** Task coordination supports up to three levels of networking
- D.** The user must have the authority of intelligent analysis task query, intelligent analysis task management and inter-domain management in order to use this function

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 95

The user cannot log in to HoloSens iClient or the reason for the lack of smart permissions may be prompted after logging in?

- A.** Permission issues
- B.** Network abnormality
- C.** User account expired
- D.** User is locked

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 96

Which of the following descriptions about the relevant parameters of face recognition camera selection is correct?

- A.** The camera's face capture rate has no direct relationship with the final face recognition accuracy rate
- B.** The installation and debugging effect of the face recognition camera will not affect the face capture rate
- C.** The lower the camera installation height, the better the face capture effect
- D.** Face recognition cameras have high performance requirements and low installation requirements

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 97

The central cloud platform uses cloud computing solutions. Which of the following descriptions of cloud computing is correct?

- A.** Without cloud computing, virtualization has no value

B. In the process of acquiring IT resources, users need to repeatedly negotiate with cloud computing service providers

C. Cloud computing is a technology that can obtain IT resources anytime, anywhere, conveniently, and on demand

D. Various IT resources in cloud computing need to be paid before they can be used

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 98

Huawei's integrated video site is suitable for power supply of various low-power devices, matching the needs of the entire site, and is widely used in smart city highways, highways, parks, scenic spots and other scenarios

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 99

What indicators does the lithium battery module of the video site contain? (Multiple choice)

A. Alarm indicator

B. Location indicator

C. Running indicator

D. Fault indicator

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 100

When the police bayonet camera is used with the radar, the distance for the radar speed measurement to capture is 15m-30m.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 101

Which of the following descriptions about chip functions are correct? (Multiple choice)

A. CPU: suitable for processing control tasks with complex processes

B. GPU: It is a programmable chip, suitable for some scenes that require accelerated calculations

C. NPU: Neural network dedicated chip, which can be customized and developed in combination with applications

D. FPGA: suitable for image processing, often used in fields such as games and images

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 102

Which of the following RAID modes are supported by the IVS1800 business data disk?

(Multiple choice)

A. NON-RAID

B. RAID 6

C. RAID 5

D. RAID 1

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 103

Through statistical analysis of the time and frequency of the target person's appearance in a specific area, the person's residence, activity trajectory, companions and other information can be analyzed.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 104

Regarding Huawei HoloSens IVS3800F, which of the following descriptions is correct?

(Multiple choice)

A. The NVMe disk of IVS3800F is for storing the feature value data

B. The RAID level of the IVS3800F data disk is RAID5, and SafeVideo+ is used for data protection

C. IVS3800F only provides people/vehicle feature analysis and extraction, behavior analysis, video summary, and video search functions

D. The SSD data disks of IVS3800F is for storing structured data

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 105

By supporting the use of PowerCube 500 and the intelligent network management system, fault alarms and real-time monitoring data can be reported to the upper-level network management.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 106

The goal of video networking is to cover the whole domain, be available all the time, share the whole network, and be controllable in the whole process.

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 107

How many levels of collaboration can the upper and lower domain resource collaboration support?

- A. 4
- B. 3
- C. 1
- D. 2

Answer: (SHOW ANSWER)

NEW QUESTION: 108

The intelligent behavior analysis capabilities of the camera and the platform are always consistent.

- A. True
- B. False

Answer: B (LEAVE A REPLY)

NEW QUESTION: 109

If a suspected vehicle needs to be intercepted and checked on a certain road section, control measures can be implemented on the vehicle on the video service platform.

- A. False
- B. True

Answer: A (LEAVE A REPLY)

NEW QUESTION: 110

In the light edge second-level networking scenario, if the second-level domain adopts Huawei HoloSens IVS3800, what forms can the first-level domain adopt? (Multiple choice)

- A. Huawei HoloSens IVS3800
- B. Huawei HoloSens IVS1800
- C. Huawei HoloSens IVS9000
- D. All of the above

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 111

Before logging into the CSP OM Portal, which of the following operations need to be completed? (Multiple choice)

- A.** Complete the CSP installation of the management master node
- B.** The PC needs to be connected to the Outer_OM network of the business management electrical switch
- C.** Complete the OS installation of the business node
- D.** You need to find the Float IP in the LLD and enter "https//Float IP: 31943" in the address bar to log in

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 112

Which of the following functions is not available in IVS 1800?

- A.** Stacking
- B.** Docking with IVS3800
- C.** People and Vehicle Inspection Elements
- D.** Intelligent behavior analysis

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 113

Which of the following are image retrieval services? (Multiple choice)

- A.** View forwarding
- B.** Vehicle retrieval
- C.** Face search
- D.** View access

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 114

Data collaboration meets the needs of cross-regional and cross-system data sharing.

Which of the following statements about data collaboration are correct? (Multiple choice)

- A.** Support data collaboration between peer-level domains
- B.** Support historical data between subscription domains
- C.** Back to support data collaboration between upper and lower levels and cross-level domains
- D.** Supports up to three levels of networking

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 115

What are the improvements of H.265 protocol compared to H.264 protocol? (Multiple Choice)

- A. Lower bandwidth
- B. Lower computational load
- C. Higher definition
- D. Higher compression rate

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 116

Which of the following functions can be achieved by the intelligent face analysis of the intelligent vision platform? (Multiple choice)

- A. It can recognize the facial information that appears in the video or video
- B. You can compare two pictures to give a similarity value to help users judge the probability that the two are the same person
- C. The face search can be performed based on the face image uploaded by the user
- D. It can compare the analyzed facial feature value of the camera with the customer's facial feature database in real time, so as to obtain the corresponding identity information of the person from the customer's facial feature database

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 117

Which of the following types of data cannot be used when the intelligent vision drier performs the intelligent analysis task of face detection?

- A. Video recorded by the camera in the SD card
- B. Historical videos stored on the platform
- C. Live camera
- D. Video files uploaded directly to the platform

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 118

When docking the monitoring platform with the analysis platform, regardless of whether there is a camera connected to the IVS 3800 at this time, the camera synchronization operation needs to be performed.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 119

The architecture of Huawei SDC Os is a set of embedded microservice management architecture developed based on the Linux kernel.

- A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 120

Which of the following descriptions of T-Shot's patented exposure technology is correct?
(Multiple choice)

- A. The technology adopts time-sharing multiplexing mode to realize the output of two-channel images with different exposure times within the frame period to meet the needs of different application forms
- B. When the technology detects that the target is too dark, it will intelligently optimize the target exposure time to achieve the best capture effect
- C. When the technology detects that the vehicle is too dark, it will intelligently optimize the vehicle exposure time to achieve the best capture effect
- D. This technology can only expose once in 1 frame period, so it takes 2 frame periods to complete I-Shot capture

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 121

In the process of video summarization, it is necessary to splice the target movement set and the background image into frames, and then combine the frames into a video.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 122

Regarding the clone camera (also known as the shadow camera) on the intelligent vision platform, which of the following statement is correct? (Multiple Choice)

- A. The shadow camera can also provide live functions for viewing by the backup domain platform
- B. The reason for making a shadow camera is that before using the backup function, you must first clone the camera that needs to back up data to the backup destination server

- C.** The shadow camera can back up and view data, so that users can identify the shadow camera in the backup domain
- D.** The shadow camera will be displayed in the list of settings on the " Device Management ", " Backup Management " and " Video Playback " pages of iClient of the backup domain master

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 123

Which of the following applications does not belong to the scope of target recognition?

- A.** Target 1:1 comparison
- B.** Objective 1: N search
- C.** Hair color comparison
- D.** Age recognition

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 124

About IVS3800 description and analysis platform monitoring platform system, which of the following?

- A.** IVS3800F contains both a monitoring platform and an analysis platform
- B.** The monitoring platform refers to the image management service, which is mainly responsible for the access, storage and forwarding of the view
- C.** One monitoring platform can only be connected to one analysis platform, but one analysis platform can be connected to multiple monitoring platforms
- D.** Analysis platform refers to image analysis service and image retrieval service, mainly responsible for the processing of intelligent business

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 125

Network equipment commonly used in data centers includes (). (Multiple choice)

- A.** Access switch
- B.** Convergence switch
- C.** Core switch
- D.** Safety equipment

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 126

Regarding the Huawei HoloSens IVS1800 interface, which of the following descriptions is correct? (Multiple choice)

- A.** IVS1800 serial port is used for equipment maintenance access
- B.** The USB interface of IVS1800 can be used to connect a U disk, connect a USB mouse, and connect a mobile hard disk

- C.** The HDMI interface of IVS1800 is used for HDMI video output, and does not support dual HDMI heterogeneous output
- D.** IVS1800 alarm interface is used to connect external alarm input equipment and external alarm output equipment

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 127

A city wants to establish a video site along the coast. This area is remote, and the network conditions are poor and there is no wired network coverage. Which network access method is appropriate?

- A.** GPON wired access
- B.** All of the above
- C.** Ethernet wired access
- D.** Microwave wireless access

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 128

A coastal road is 200m away from the coast. Now I need to install a batch of video sites, which of the following pole types should I choose?

- A.** Class C environmental members
- B.** Class B environmental members
- C.** Class D environmental members
- D.** Class A environmental members

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 129

Huawei HoloSens IVS1800 stand-alone deployment networking mode can be directly connected to the display through HDMI cable or HDMI to VGA cable, without a separate PC.

- A.** True
- B.** False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 130

What are the common installation methods of bolt and tube machine? (Multiple choice)

- A.** Wall mount bracket + universal joint
- B.** Embedded installation
- C.** Hoop + universal joint
- D.** Hoop + wall bracket + universal joint

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 131

Which of the following tools can engineers use to obtain project LLD?

- A. Fusion Server Tools electronic label
- B. SCT Configurator
- C. IVS network design tool
- D. PGP Verify verification tool

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 132

Huawei's integrated video site adopts a unified intelligent network management system, which greatly reduces site failure rate and operation and maintenance investment, and improves the online rate of the entire video site.

- A. False
- B. True

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 133

For the routine inspection of CSP, which of the following parts are mainly included?

(Multiple choice)

- A. Check the status of the license
- B. View the running status of CSP and container
- C. View the running status of the cluster
- D. Check CPU and memory usage status

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 134

The electric zoom camera cannot adjust the focal length and focus on the camera Teb preview page.

- A. True
- B. False

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 135

Before configuring camera access on the smart vision platform, you need to check whether the platform has a front-end access plug-in that supports the corresponding camera model. The reason is to ensure that the platform can smoothly access the camera of this model.

- A. True
- B. False

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 136

It is necessary to add some video sites to the urban roads, and the wired transmission pipelines have already covered this area. Considering the project cost and construction difficulty, which network access method is appropriate? (Multiple choice)

- A. LTE wireless access
- B. Ethernet wired access
- C. GPON wired access
- D. Microwave wireless access

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 137

Common open forms of data centers include prismatic data centers and modular data centers.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 138

In front-end intelligence, different modules correspond to different functions.

Which of the following statements is correct?

- A. The third-party application platform can subscribe to the IVS platform for smart data, display data, etc.
- B. The function of the platform analysis module of the IVS platform is to store and retrieve structured data to realize intelligent analysis of image streams and video streams
- C. The main function of the smart camera is to perform target detection and partial recognition, and convert the video stream into basic structured data
- D. The main function of the access platform module of the IVS platform is to support the access of smart cameras, the storage and forwarding of original videos, pictures, and structured data

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 139

If the two intelligent vision platforms are in a superior-subordinate relationship, the subordinate platform actively initiates registration to the superior platform, and then pushes the directory and device information under its jurisdiction after the superior authentication.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 140

The resolution of a camera is 1080P, the code rate is 4Mbps, it needs to be stored for 30 days, and it needs () storage space.

A. 2.15T

B. 1.85T

C. 1.25T

D. 0.75T

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 141

The prerequisite for the edge IVS 3800 to achieve load balancing and fault migration is that the management node has been deployed in a cluster

A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 142

Which of the following options is not included in the routine check performed on HoloSens iClient?

A. Check the running status of the cluster

B. Check the integrity of the video

C. Check that the camera is online

D. Check the statistical status of human faces and vehicle snapshots

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 143

Regarding the method of adjusting the aperture size of the motorized lens camera, which of the following descriptions is correct?

A. In the preview interface of the camera web interface, click the aperture icon to adjust the aperture

B. Set the "Exposure Mode" to "Light Image Priority" in the camera web interface

C. Manually rotate the aperture knob on the lens to adjust the aperture size

D. Set the "Exposure Mode" to "Light Image Priority" in the web interface of the camera, and then click the aperture icon to adjust the aperture

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 144

What links are included in the complete installation process of the video site (Multiple choice)

- A. Long cable installation
- B. Pole installation
- C. Camera installation
- D. PowerCube 500 installation

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 145

Which of the following are regarding the smart vision platform equipment? (Multiple Choice)

- A. Precision air conditioning
- B. Micro-edge
- C. Light edge
- D. UPS

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 146

Software-defined camera SDC "defines security cameras in the intelligent era with professional AI cores, open operating systems, and rich ecosystems."

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 147

Which of the following descriptions about the characteristics of the view library system are correct?

- A. Video gallery cannot solve the problem of video information storage
- B. All equipment that realizes the extraction of " key information " of video content must meet the standards of the video library system
- C. The video library system architecture cannot support big data applications
- D. Visual library system architecture can realize the separation of data and application

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 148

If the user created on iClient has exceeded the " valid time period ", which of the following operations need to be performed to ensure that the user can log in to the iClient client again?

- A.** Check whether the username and password are correct, if they are correct, you can log in again in 5 minutes
- B.** Log in to iClient as the admin user, and modify the user's account usage time in the " User Management > User Maintenance " interface
- C.** Execute the ping command on the PC where the iClient located to check the network connectivity between the PC and the server
- D.** Log in to iClient as the admin user and check whether the access platform and the analysis platform are successfully connected

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 149

Which of the following is not a prerequisite for the smart vision platform to perform face capture statistics?

- A.** The face recognition algorithm plug-in has been installed on the platform
- B.** A face control task has been created for the camera on the platform
- C.** Have subscribed to the face metadata generated by the smart camera on the platform
- D.** A face recognition intelligent analysis task has been created for the camera on the platform

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 150

Which of the following descriptions about the video site network selection is wrong?

- A.** The transmission distance of microwave is not far, usually less than km. Therefore, the microwave method cannot be used in scenarios with long transmission distance.
- B.** The GPON method is suitable for deploying optical fiber areas, and the video sites are covered by large-capacity and high-density
- C.** In the bustling urban area, the network access method of the switch is usually considered
- D.** For some remote areas that cannot be covered by wired networks, consider using wireless methods such as microwave and LTE

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 151

Regarding the source of the intelligent vision platform data, which of the following statements is incorrect?

- A.** The platform cannot subscribe structured data and pictures to cameras without smart attributes
- B.** can directly from the card to obtain data subscription structured data and pictures in the camera
- C.** The platform can continue to create intelligent analysis tasks for the camera on the platform while subscribing to the structured data of the bayonet camera

D. Intelligent analysis tasks can be created on the platform, and structured data and characteristic values can be obtained by analysis

NEW QUESTION: 152

POE adopts IEEE802.3af standard, and its output power consumption does not exceed ().

- A. 50W
- B. 30W
- C. 71W
- D. 15.4W

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 153

The device can be restarted remotely on the camera web surface.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 154

Which of the following descriptions about the low-level design (LLD) of the site is wrong?

- A. According to the general design of the site, it can guide the construction, installation and deployment of the site
- B. The site survey report has no impact on the installation and deployment of the video site
- C. Site layout design includes elements such as site installation location, power lead-in path and optical fiber lead-in path, which are used to guide construction operations
- D. Through the site configuration list, you can get a detailed understanding of the detailed information of the built site, such as site name, site location, new construction / utilization, equipment model, etc.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 155

Which of the following symptoms may be caused by network abnormalities?

- A. Lots of noise in the live video
- B. Live screen freezes
- C. The live screen is gray and white
- D. An area of the live screen is always blocked

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 156

For areas where wired networks are inconvenient to deploy such as mountainous areas, which of the following methods can be used for network access to video sites?

- A. Microwave
- B. GPON
- C. Switch
- D. Router

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 157

The IVS3800 server is based on the AI accelerator card to achieve business analysis and retrieval acceleration.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 158

Video structuring can extract feature information such as the type, brand, and color of the vehicle target in the video.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 159

In the IVS3800 management node cluster deployment scenario, which of the following statements are correct? (Multiple choice)

- A. IVS3800 and IVS3800F can be used as management nodes or business nodes
- B. You can log in to the CSP OM Portal only after the master node is successfully installed
- C. In the cluster scenario, there are 3 servers that contain CSPOM containers. You need to manually specify 1 server as the CSP management master node and the remaining 2 servers are the CSP management slave nodes.
- D. The installation order of the management master node and the management slave node is in no particular order

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 160

A pan/tilt vibration camera is installed in a certain place, and the key position monitoring can be realized by setting ().

- A. Preset position
- B. Round robin
- C. Cruise
- D. Balance

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 161

In the problem of capturing images of the following target, which cannot be optimized by adjusting the parameters, which installation position must be changed?

- A. Motion blur
- B. Shun light target overexposed
- C. The image of the backlit target is dark
- D. Yin and Yang face

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 162

Regarding Huawei HoloSens IVS3800c, which of the following descriptions is correct? (Multiple Choice)

- A. IVS3800c provides structured data and characteristic data retrieval function after intelligent analysis
- B. s3800c maximum matching. 6 block rising AI Accelerator
- C. IVS3800c the SSD data disk, for storing structured data
- D. IVS3800c the NVMe disk, for storing the feature value data

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 163

Which of the following descriptions about the utility scheme is wrong?

- A. Stations powered by mains electricity do not need to be equipped with anal battery modules at all sites
- B. The lithium battery module guarantees the power supply of the site equipment in the event of a power failure
- C. Lithium batteries have a life span, this factor needs to be considered in the planning stage
- D. There is no power outage in a certain area, and the site power supply plan needs to adopt the city power + lithium battery plan

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 164

The commissioning of the video site includes: 1. Energy module commissioning; 2. Function module commissioning, 3. Camera commissioning. Which is the correct debugging sequence?

- A. 2-3-1
- B. 1-3-2
- C. 1-2-3
- D. 3-1-2

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 165

Which of the following statements about IVS 3800 are correct? (Multiple choice)

- A. The management node refers to the server containing the CS POM container
- B. The business node refers to the server that does not contain the CS POM container
- C. The management node only supports cluster deployment, not stand-alone deployment
- D. Support deploying management nodes only, not business nodes

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 166

A certain urban area needs to deploy a batch of video sites for road security, target recognition, vehicle management, etc. Regarding the selection of rods and network equipment for video sites, which of the following selections meet the requirements? (Multiple choice)

- A. Target recognition rods, switch access
- B. Use the old pole, router access
- C. Vehicle bayonet lever GP ON
- D. Use the old traffic station rods and switch access

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 167

Regarding the business nodes of the IVS3800, which of the following statements is incorrect?

- A. On the "Server Node" tab of the LLD report, "Node Type" is "Business Node", then the server is used as a CSP business node
- B. A server system that does not contain a CSPOM container is defined as a business node
- C. Both IVS3800C and IVS3800R can be used as business nodes
- D. When installing business nodes, "install Mode" needs to be selected as "Include CSP"

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 168

Which of the following types of upper and lower domains can be configured with algorithm collaboration functions?

- A. The upper domain is composed of 3 IVS3800s; the lower domain is composed of 1 IVS3800F
- B. upper domain is a table IVS3800s; lower domain is a table IVS3800s composition
- C. upper domain is a table IVS3800S, a table IS3800c and a table IVS3800R thereof; lower domain is a table IVS3800F composition
- D. upper domain is a table IVS3800F thereof; lower domain is a table IVS3800s composition

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 169

If the two intelligent vision platforms are in a superior-subordinate relationship, and the subordinate platform actively initiates registration to the superior platform, this relationship is called cascading.

- A. False
- B. True

Answer: ([SHOW ANSWER](#)**)**
