NEW QUESTION: 1

Which of the following statements is wrong about VPN?

- A. The generation of VPN technology enables employees on business trips to remotely access internal corporate servers.
- B. VPN technology necessarily involves encryption technology
- C. Virtual private network is cheaper than dedicated line
- D. VPN technology is a technology that multiplexes logical channels on actual physical lines.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 2

Digital certificate technology solves the problem that public key owners cannot determine in digital signature technology.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

Which of the following is an action to be taken during the summary phase of the cyber security emergency response? (Multiple Choice)

- A. Evaluation of members of the emergency response organization
- B. Determine the effectiveness of the incident measures
- C. Establish a defense system and specify control measures
- D. Evaluate the implementation of the contingency plan and propose a follow-up improvement plan

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 4

To implement the " anti-virus function " in the security policy, you must perform a License activation

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which of the following are international organizations related to information security standardization? (Multiple Choice)

- A. International Organization for Standardization (ISO)
- B. Wi-Fi Alliance
- C. International Electrotechnical Commission (IEC)
- D. International Telecommunication Union (ITU)

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 6

Which of the following is not the identity of the IPSec SA?

- A. Source address
- B. Security policy
- C. Destination address
- D. SPI

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 7

Which of the following descriptions about the action and security profile of the security policy are correct? (Multiple choice)

- A. The security profile must be applied to the security policy that is allowed to take effect.
- B. If the security policy action is "Allow", the traffic will not match the security profile.
- C. The security profile may not be applied to the security policy that the action is allowed and take effect.
- D. If the action of the security policy is "prohibited", the device will discard this traffic, and then no content security check will be performed.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 8

In the first stage of IKE negotiation, which of the following IKE exchange mode does not provide identity protection features?

- A. Aggressive Mode
- B. Main Mode
- C. quick mode
- D. passive mode

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 9

Which of the following is true about the description of the TCP/IP protocol stack packet decapsulation? (Multiple choice)

- A.** The data packet is first transmitted to the data link layer. After parsing, the data link layer information is stripped, and the network layer information is known according to the parsing information, such as IP.
- B.** After the transport layer (TCP) receives the data packet, the transport layer information is stripped after parsing, and the upper layer processing protocol, such as UDP, is known according to the parsing information.
- C.** After the application layer receives the data packet, the application layer information is stripped after parsing, and the user data displayed at the end is exactly the same as the data sent by the sender host.
- D.** After receiving the data packet, the network layer is stripped after parsing, and the upper layer processing protocol is known according to the parsing information, such as HTTP.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Except built-in Portal authentication, firewall also supports custom Portal authentication, when using a custom Portal authentication, no need to deploy a separate external Portal server.

- A.** False
- B.** True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 11

If the administrator uses the default authentication domain to authenticate a user, you only need to enter a user name when the user logs, if administrators use the newly created authentication domain to authenticate the user, the user will need to enter login "username @ Certified domain name"

- A.** False
- B.** True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 12

Which of the following is the correct order for event response management?

- 1 detection
- 2 report
- 3 relief
- 4 summarizing experience
- 5 repair

6 recovery

7 response

A. 1-3-2-7-6-5-4

B. 1-3-2-7-5-6-4

C. 1-7-3-2-6-5-4

D. 1-2-3-7-6-5-4

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 13

Which of the following descriptions is wrong about the source of electronic evidence?

A. Database operation records, operating system logs are computer-related electronic evidence

B. Movies and TV shows belong to electronic evidence related to network technology.

C. Operating system, e-mail, chat records can be used as a source of electronic evidence

D. Fax data, mobile phone recording is an electronic evidence related to communication technology.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

Which of the following are the basic functions of anti-virus software? (Multiple Choice)

A. Copy virus

B. Find virus

C. Defend virus

D. Clear virus

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 15

VPN tunnel technology refers to through encryption algorithm (such as DES, 3DE5) to achieve data transmitted in the network will not be intercepted.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 16

Which of the following attacks is not a cyber-attack?

A. IP spoofing attack

B. MAC address spoofing attack

C. ICMP attack

D. Smurf attack

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 17

Which of the following are included in the operating system patch violations level of Terminal security system?

(Choose two.)

- A. General
- B. Serious
- C. Important
- D. Low

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 18

Because the server is a kind of computer, we can use our pc in the enterprise as our server,

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 19

Which of the following statements are correct about the business continuity plan? (Multiple Choice)

- A. Business continuity plan does not require high-level participation of the company before forming a formal document
- B. BCP needs flexibility because it cannot predict all possible accidents
- C. Business continuity plan does not require high-level participation of the Company in determining the project scope phase
- D. Not all security incidents must be reported to company executives

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 20

HRP A [USG] display vrrp interface GigabitEthernet 1/0/1
GigabitEthernet1/0/1 | Virtual Router 1
VRRP Group: Active
state: Active
VirtualIP: 202.30.10.1
Virtual MAC: 0000-5e00-0101
Primary IP: 202.38.10.2
PriorityRun: 100
MasterPriority: 100
Preempt: YES Delay Time: 10

Execute the command on the Firewall and display the above information.

Which of the following description is correct? (Choose two.)

- A. If the master device fails, it will not switch
- B. This Firewall VGMP group status is Active
- C. The virtual IP address of the firewall G1/0/1 interface is 202.30.10.2
- D. The priority of the VRRP backup group of the firewall VRID 1 is 100

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Which of the following is true about the description of the TCP/IP protocol stack packet encapsulation?

(Multiple choice)

- A. After the application layer receives the data packet, the application layer information is stripped after parsing, and the user data displayed at the end is exactly the same as the data sent by the sender host.
- B. The data packet is first transmitted to the data link layer. After parsing, the data link layer information is stripped, and the network layer information is known according to the parsing information, such as IP.
- C. After receiving the data packet, the network layer is stripped after parsing, and the upper layer processing protocol is known according to the parsing information, such as HTTP
- D. After the transport layer (TCP) receives the data packet, the transport layer information is stripped after parsing, and the upper layer processing protocol, such as UDP, is known according to the parsing information

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 22

Which of the following descriptions is correct about port mirroring? (Multiple Choice)

- A. The observing port sends the received packet to the monitoring device.

- B. The observing port copies the packet to the mirrored port.
- C. The mirrored port sends the received packet to the monitoring device.
- D. The mirrored port copies the packet to the observing port.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 23

OSPF is more commonly used than RIP because OSPF has device authentication and is more secure

- A. True
- B. False (Right Answers)

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 24

The VRRP advertisement packet of the Huawei USG firewall is a multicast packet. Therefore, each firewall in the backup group must be able to implement direct Layer 2 interworking

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 25

Which of the following options are correct about the control actions permit and deny of the firewall interzone forwarding security policy? (Multiple Choice)

- A. The packet is matched immediately after the inter-domain security policy deny action, and the other interzone security policy will not be executed.
- B. The action of the firewall default security policy is deny.
- C. Whether the message matches the permit action of the security policy or the deny action, the message will be processed by the UTM module.
- D. Even if the packet matches the permit action of the security policy, it will not necessarily be forwarded by the firewall.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 26

ASPF (Application Specific Packet Filter) is a packet filtering technology based on the application layer, and implements a special security mechanism through the server-map table. Which of the following statements about the ASPF and server-map tables are correct? (Multiple Choice)

- A. ASPF monitors messages during communication
- B. ASPF can dynamically create a server-map
- C. ASPF dynamically allows multi-channel protocol data to pass through the server-map table.
- D. The quintuple server-map entry implements a similar function to the session table.

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 27

HTTP packets are carried by UDP. and the HTTPS protocol is based on TCP three-way handshake. Therefore.

HTTPS is relatively secure, and HTTPS is recommended.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 28

Which of the following is the encryption technology used in digital envelopes?

- A. Hash algorithm
- B. Symmetric encryption algorithm
- C. Streaming algorithm
- D. Asymmetric encryption algorithm

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 29

In the firewall, detect ftp command to set in which mode? (Choose two.)

- A. System Model
- B. Domain Model
- C. Interface Mode
- D. Inter-Domain mode

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 30

In the SSL handshake protocol, which of the following message is optional? (Choose two.)

- A. Server Key Exchange
- B. ChangeCipherSpec
- C. Certificate verify
- D. ServerHelloDone

Answer: A,C ([LEAVE A REPLY](#))

Explanation/Reference:

NEW QUESTION: 31

Which of the following are multi-user operating systems? (Multiple choice)

- A. Windows
- B. LINUX
- C. MSDOS
- D. UNIX

Answer: A,B,D ([LEAVE A REPLY](#))

Valid H12-711 Dumps shared by BraindumpsPass.com for Helping Passing H12-711 Exam! NEW QUESTION: 32

Which of the following options can be used in the advanced settings of windows firewall? (Multiple Choices)

- A. Set out inbound rules
- B. Change notification rules
- C. Restore defaults
- D. Set connection security rules

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 33

Which of the following is not the certificate save file format supported by the USG6000 series?

- A. PKCS#
- B. PEM
- C. DER
- D. PKCS#12

Answer: A (LEAVE A REPLY)

NEW QUESTION: 34

The following security policy command, representatives of the meaning:

```
#
security-policy
rule name rule1
source-zone trust
destination-zone untrust
source-address 10.1.0.0 0.0.255.255
service icmp
action deny
#
```

- A. banned from trust region access to untrust region and the destination address is 10.1 0 0/16 segment all hosts ICMP message
- B. banned from trust region access to untrust region and the source address is 10.2.10.10 host to all the hosts ICMP message
- C. banned from trust region access to untrust region and the destination address is 10 1 10 10 host ICMP message
- D. banned from trust region access to untrust region and the source address is 10.1 0 0/16 segment all the hosts ICMP message

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 35

About the default security zones of USG series security firewall, which of the following statement is correct?

- A. The default security zone cannot be deleted, but can modify the security level
- B. There are four default security zones
- C. The security level of the default security zone can be modified
- D. The default security zone can be deleted

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 36

Digital certificates can be divided into local certificates, CA certificates, root certificates and self-signed certificates according to different usage scenarios.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 37

Which of the following statement is wrong about NAT?

- A. Configure a NAT address pool in the source NAT technology. You can configure only one IP address in the address pool.
- B. Some application layer protocols carry IP address information in the data, but also to modify the data in the upper layer of the IP address information when they make NAT
- C. For some non-TCP. UDP protocols (such as ICMP. PPTP), unable to do NAT.
- D. Address Translation can follow the needs of users, providing FTP. WWW, Telnet and other services outside the LAN

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 38

Regarding the comparison between windows and Linux, which of the following statements is wrong?

- A. Getting started with Linux is more difficult and requires some learning and guidance.
- B. Linux is open source code, you can do what you want.
- C. Windows can be compatible with most software playing most games
- D. windows is open source, you can do what you want.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 39

Use ip tables to write a rule that does not allow the network segment of 172.16.0.0/16 to access the device.

Which of the following rules is correct?

- A. iptables -t filter -P INPUT -d 172.16.0.0/16 -p all -j ACCEPT
- B. iptables -t filter -A INPUT -s 172.16.0.0/16 -p all -j DROP
- C. iptables -t filter -P INPUT -s 172.16.0.0/16 -p all -j DROP
- D. iptables -t filter -P INPUT -s 172.16.0.0/16 -p all -j ACCEPT

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

Which of the following descriptions is wrong about IKE SA?

- A. The encryption algorithm used by user data packets is determined by IKE SA.
- B. IKE is a UDP-based application layer protocol
- C. IKE SA for IPsec SA services
- D. IKE SA is two-way

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

Which of the following is not in the quintuple range?

- A. Source IP
- B. Destination port
- C. Source MAC
- D. Destination IP

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 42

Which of the following is the encryption technology used in digital envelopes?

- A. Symmetric encryption algorithm
- B. Asymmetric encryption algorithm

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 43

Which of the following are in the certification area of ISO27001? (Multiple choice)

- A. Access control
- B. Personnel safety
- C. Business continuity management
- D. Vulnerability management

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 44

Information security level protection is the basic system of national information security work

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 45

Which of the following is used to encrypt digital fingerprints in digital signature technology?

- A. Receiver public key
- B. Receiver private key
- C. sender private key
- D. sender public key

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

Which of the following options are supported by VPN technology to encrypt data messages?
(Multiple choice)

- A. L2TP VPN
- B. GRE VPN
- C. SSL VPN

D. IPSec VPN

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 47

When the session authentication mode is used to trigger the firewall's built-in Portal authentication, the user does not actively perform identity authentication, advanced service access, and device push "redirect" to the authentication page? .. ' * '

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 48

Which of the following can be supported by Policy Center access control? (Choose three.)

A. Software SACG (host firewall)

B. 802.1X

C. Hardware SACG (hardware security access control gateway)

D. ARP control

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 49

Which of the following description is correct about the sort of the call setup process for L2TP corridors?

1. L2TP tunnel

2. PPP connection

3. LNS authenticates users

4. Users access intranet resources

5. Establish an L2TP session

A. 1->2->3->5->4

B. 2->1->5->3->4

C. 1->5->3->2->4

D. 2->3->1->5->4

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 50

Which of the following is the port number used by L2TP packets?

- A. 17
- B. 1701
- C. 4500
- D. 500

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 51

Which of the following is true about the description of the firewall?

- A. Adding a firewall to the network will inevitably change the topology of the network.
- B. In order to avoid single point of failure, the firewall only supports side-by-side deployment.
- C. Depending on the usage scenario, the firewall can be deployed in transparent mode or deployed in a three-bedroom mode.
- D. The firewall cannot transparently access the network.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 52

Which of the following options can be used in the advanced settings of Windows Firewall?
(Multiple choice)

- A. Set connection security rules
- B. Restore defaults
- C. Change notification rules
- D. Set out inbound rules

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 53

Data analysis technology is to find and -natch keywords or key ohrases in the acquired data stream or information flow, and analyze: he correlation of time. Which of the following is not an evidence analysis technique?

- A. Document Digital Abstract Analysis Technology
- B. Techniques for discovering the connections between different evidences
- C. Password deciphering, data decryption technology
- D. Spam tracking technology

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 54

About the description of firewall active-standby, which of the following is correct? (Multiple Choice)

- A. The firewall active-standby requires the information such as the session table, MAC table, routing table and so on synchronous backup between primary devices and slave devices.
- B. It requires the state of all the VRRP backup groups in the same VGMP management group on the same firewall should be consistent.
- C. When a plurality of regions on the firewall need to provide dual-machine backup function, you need to configure multiple VRRP backup groups on the firewall.
- D. VGMP is to ensure all VRRP backup groups' consistency of switching

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 55

According to the protection object, the firewall is divided. Windows Firewall belongs to _____.

- A. Stand-alone firewall
- B. Hardware firewall
- C. Software firewall
- D. Network firewall

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 56

According to the protection object, the firewall is divided. Windows Firewall belongs to

- A. Hardware firewall
- B. Network firewall
- C. Software firewall
- D. Stand-alone firewall

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 57

Both A and B communicate data. If an asymmetric encryption algorithm is used for encryption, when A sends data to B, which of the following keys will be used for data encryption?

- A. A private key
- B. B private key
- C. A public key
- D. B public key

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 58

Which of the following statements are correct about Huawei routers and switches? (Multiple Choice)

- A. The main function of the router is to forward data. Sometimes the firewall may be a more suitable choice when the enterprise has security requirements.
- B. The router can implement some security functions, and some routers can implement more security functions by adding security boards.

- C. The switch does not have security features
- D. The switch has some security features, and some switches can implement more security functions by adding security boards.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 59

Which of the following guarantees "should detect and protect spam at critical network nodes and maintain upgrades and updates of the spam protection mechanism" in security 2.0?

- A. Malicious code prevention
- B. Centralized control
- C. Border protection
- D. Communication transmission

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 60

Which of the following descriptions about the action and security profile of the security policy are correct?

(Multiple choice)

- A. The security profile may know: be applied to the security policy that the action is allowed and take effect.
- B. If the security policy action is "Allow", the traffic will not match the security profile.
- C. If the action of the security policy is "prohibited", the device will discard this traffic, and then no content security check will be performed.
- D. The security profile must be applied to the security policy that is allowed to take effect.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 61

When configuring security policy, a security policy can reference an address set or configure multiple destination IP addresses.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

Valid H12-711 Dumps shared by BraindumpsPass.com for Helping Passing H12-711 Exam! NEW QUESTION: 62

Which of the following descriptions is wrong about the source of electronic evidence?

- A. Database operation records, operating system logs are computer-related electronic evidence
- B. Fax data, mobile phone recording is an electronic evidence related to communication technology.
- C. Operating system, e-mail, chat records can be used as a source of electronic evidence
- D. Movies and TV shows belong to electronic evidence related to network technology.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 63

In order to obtain evidence of crime, it is necessary to master the technology of intrusion tracking.

Which of the following descriptions are correct about the tracking technology? (Multiple Choice)

- A. Shallow mail behavior analysis can analyze the information such as sending IP address, sending time, sending frequency, number of recipients, shallow email headers and so on.
- B. Packet tagging technology extracts information from attack sources by recording packets on the router and then using data drilling techniques
- C. Packet Recording Technology marks packets on each passing router by inserting trace data into the tracked IP packets
- D. Link test technology determines the source of the attack by testing the network link between the routers

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 64

Which of the following is the username / password for the first login of the USG series firewall?

- A. User name admin, password admin
- B. Username admin, password Admin@123
- C. User name admin, password admin@123
- D. User name admin, password Admin123

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 65

Which of the following statements is wrong about the firewall gateway's anti-virus response to the HTTP protocol?

- A. Blocking means that the device disconnects from the HTTP server and blocks file transfer.
- B. Response methods include announcement and blocking
- C. When the gateway device blocks the HTTP connection, push the web page to the client and generate a log.

D. Alarm mode device only generates logs and sends them out without processing the files transmitted by the HTTP protocol.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 66

In the VRRP (Virtual Router Redundancy Protocol) group, the primary firewall periodically sends advertisement packets to the backup firewall. The backup firewall is only responsible for monitoring advertisement packets and will not respond.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 67

Which of the following belongs to Layer 2 VPN technology?

A. L2TP VPN

B. SSL VPN

C. IPSec VPN

D. GRE VPN

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 68

Which of the following belongs to multi-channel protocol?

A. Telnet

B. SMTP

C. HTTP

D. FTP

Answer: (SHOW ANSWER)

NEW QUESTION: 69

The content of intrusion detection covers authorized and unauthorized intrusions. Which of the following is not in the scope of intrusion detection?

A. Leaking data information

B. Planting worms and Trojans

C. Administrator mistakenly delete configuration

D. Pretending to be another user

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 70

In the environment of GRE configuration, which of the following statements are true? (Choose three.)

- A. In order to make the ends of the tunnel forward data packets normally, the devices of both ends are configured routing which through the Tunnel interface
- B. When the local device send data packets, by identifying the protocol field value of IP header for GRE to determine whether send the data packet to GRE module for processing
- C. When the opposite end receives data packets, by identifying the protocol field value of IP header for GRE to determine whether send the data packet to GRE module for processing
- D. If both ends enable the configuration of keyword verification, the keyword must be the same

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 71

The administrator wants to know the current session table. Which of the following commands is correct?

- A. reset firewall session table
- B. clear firewall session table
- C. display firewall session table
- D. display session table

Answer: (SHOW ANSWER)

NEW QUESTION: 72

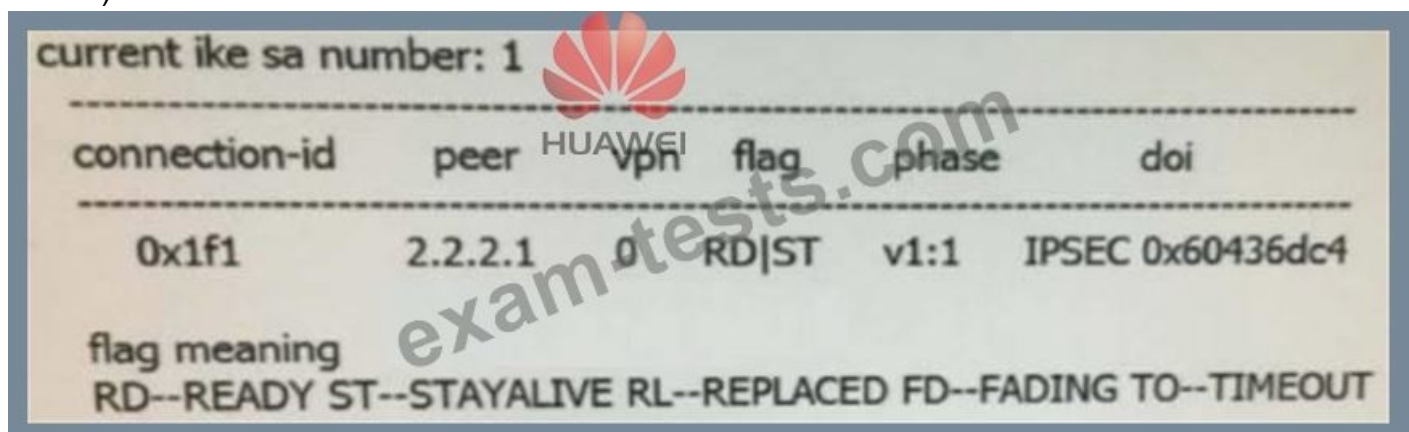

In L2TP configuration for command Tunnel Name, which statements are correct? (Multiple choice)

- A. Used to specify the name of the peer tunnel
- B. Used to specify the name of the end of the tunnel
- C. If do not configure the Tunnel Name, the tunnel name is the name of the local system
- D. Must be consistent with Tunnel Name peer configuration

Answer: (SHOW ANSWER)

NEW QUESTION: 73

Through display ike sa to see the result as follows, which statements are correct? (Multiple choice)

- A. The second stage ipsec sa has been successfully established
- B. ike is using version v1

C. The first stage ike sa has been successfully established

D. ike is using version v2

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 74

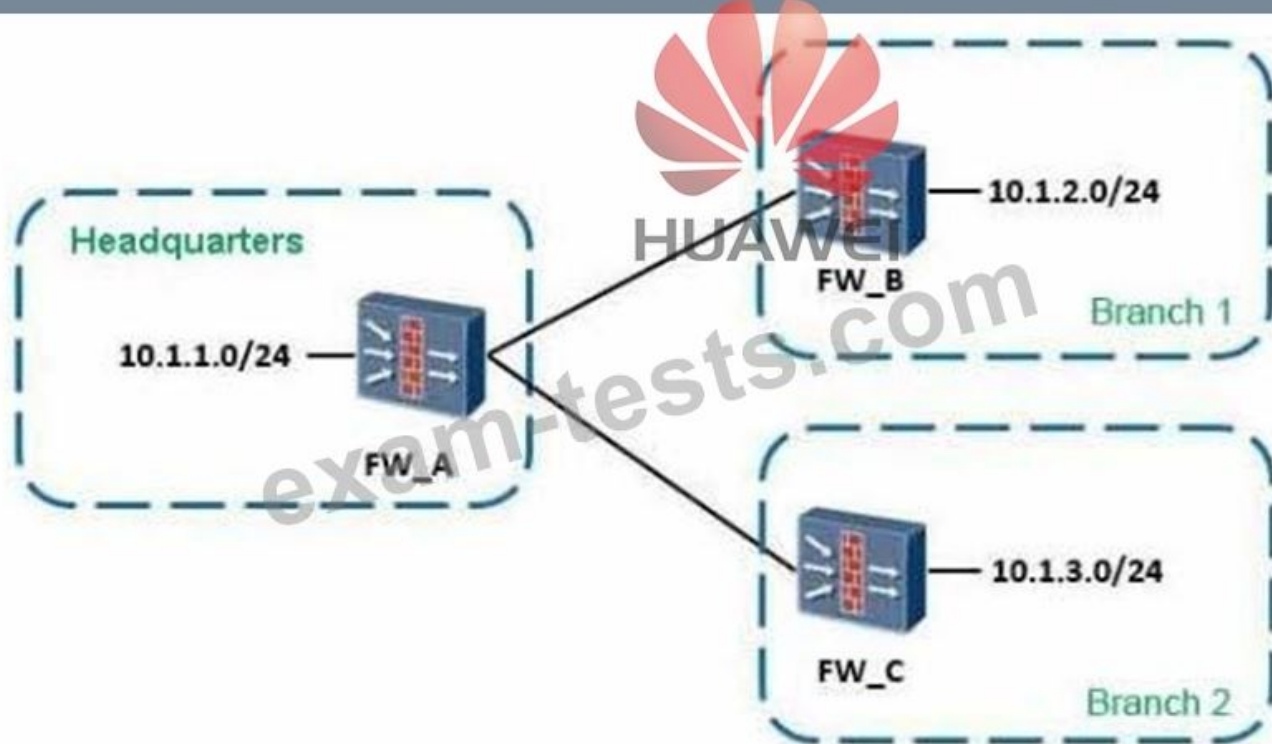

As shown, when configuring the point-to-multipoint scenarios, the headquarters network segment is

10.1.1.0/24, the segment of branch 1 is 10.1.2.0/24, of branch 2 is 10.1.3.0/24.

About the protected data flow configuration which defined by headquarters and branch offices, which of the following combinations can be the full matched requirements?

1. [FW_A-acl-3000] rule permit ip source 10.1.1.0 0.0.0.255 destination 10.1.2.0 0.0.0.255
2. [FW_A-acl-3001] rule permit ip source 10.1.1.0 0.0.0.255 destination 10.1.3.0 0.0.0.255
3. [FW_B-acl-3000] rule permit ip source 10.1.2.0 0.0.0.255 destination 10.1.1.0 0.0.0.255
4. [FW_B-acl-3001] rule permit ip source 10.1.2.0 0.0.0.255 destination 10.1.3.0 0.0.0.255
5. [FW_C-acl-3000] rule permit ip source 10.1.3.0 0.0.0.255 destination 10.1.1.0 0.0.0.255
6. [FW_C-acl-3001] rule permit ip source 10.1.3.0 0.0.0.255 destination 10.1.2.0 0.0.0.255

HUAWEI

A. 1 2 4 6

B. 1 2 3 5

C. 1 2

Which of the following is the analysis layer device in the Huawei SDSec solution? r a.

- A. switch
- B. cis
- C. Firehunter
- D. Agile Controller

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 78

In the GRE configuration environment, which of the following interface or IP address is the local GRE device configuration of the end private network route required to point to? (Choose two.)

- A. External networks (Internet) Interface
- B. Tunnel Interface
- C. External network (Internet) interface IP address
- D. Tunnel interface IP address

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 79

Which of the following is the correct order for event response management?

1. detection
2. report

3. relief
4. summarizing experience
5. repair
6. recovery
7. response

- A. 1-2-3-7-5-54
- B. 1-3-2-7-5-54
- C. 1-3-2-7-5-64
- D. 1-7-3-2-5-54

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 80

The single-point login function of the online user, the user authenticates directly to the AD server, and the device does not interfere with the user authentication process. The AD monitoring service needs to be deployed on the USG device to monitor the authentication information of the AD server.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 81

Which of the following is wrong about the management of Internet users?

- A. Each user group can belong to multiple user groups
- B. Each user group can include multiple users and user groups
- C. Each user belongs to at least one user group, also can belong to multiple user groups
- D. The system has a default user group by default, which is also the system default authentication domain.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 82

Which of the following attacks does not belong to special packet attack?

- A. ICMP unreachable packet attack
- B. Large ICMP packet attack
- C. IP address scanning attack
- D. ICMP redirect packet attack

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 83

Caesar Code is primarily used to encrypt data by using a stick of a specific specification

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 84

Which of the following are the key features of the state inspection firewall include?

- A. The processing speed is slow
- B. Can only detect network layer
- C. Do the packet filtering detection to each packet
- D. Follow-up packet processing performance is excellent

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 85

Which of the following description about the VGMP protocol is wrong?

- A. By default, when three HELLO packet cycle of Standby end does not receive HELLO packets which are sent from the opposite end, the opposite end will be considered a failure, which will switch itself to the Active state
- B. State of VGMP group is active, which will periodically send HELLO packets to the opposite end.
Standby end only monitors the HELLO packets, which will not respond
- C. VGMP ensure that all VRRP backup groups state are the same through a unified control of the switching of each VRRP backup group state
- D. VGMP add multiple VRRP backup groups on the same firewall to a management group, uniformly manage all the VRRP group by management group.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 86

In the construction of information security system, the security model is needed to accurately describe the relationship between important aspects of security and system behavior.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 87

Based on the GRE encapsulation and de-encapsulation, which description is error?

- A. De-encapsulation Process: After the destination receives GRE packets, transmitting the data packets through looking up the routing to the Tunnel interfaces to trigger GRE encapsulation.
- B. Encapsulation Process: The original data packets transmit the data packets through looking up routing to the Tunnel interface to trigger GRE encapsulation.
- C. De-encapsulation Process: After GRE module de-encapsulation, the data packets will enter the IP module for further processing.
- D. Encapsulation Process: After GRE module packaging, the data packet will enter the IP module for further processing

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 88

Which of the following addresses can be used for web management address of USG product?
(Choose three.)

- A. Sub-interface address
- B. Interface Address
- C. Slave IP address of the interface
- D. AUX interface address

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 89

In the USG system firewall, the _____ function can be used to provide well-known application services for non-known ports.

- A. Port mapping
- B. MAC and IP address binding
- C. Packet filtering
- D. Long connection

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 90

On the USG series firewalls, the default security policy does not support modification

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 91

IPSec VPN technology does not support NAT traversal when encapsulating with ESP security protocol, because ESP encrypts the packet header

- A. True
- B. False

IPSec VPN uses an asymmetric encryption algorithm to encrypt the transmitted data

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 97

The administrator PC and the USG firewall management interface directly connected using the web the way initialization, which of the following statements are true? (Multiple choice)

- A. IP address of the management PC is manually set to 192.168.0.2-192.168.0.254
- B. Manage PC browser access http://192.168.0.1
- C. Set the NIC of the management PC to automatically obtain the IP address.
- D. Manage PC browser access http://192.168.1.1

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 98

What are common hash algorithms? (Choose two.)

- A. AES
- B. DES
- C. MD5
- D. SHA-1

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 99

Which of the following option does not belong to symmetric encryption algorithm?

- A. RSA
- B. DES
- C. 3DES
- D. AES

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 100

Which of the following belongs to the devices at the execution layer in the Huawei SDSec solution? (Multiple Choice)

- A. Router
- B. Fierhunter
- C. AntiDDoS
- D. cis

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 101

Regarding the firewall security policy, which of the following options are wrong?

- A. Adjust the order of security policies without saving the configuration file.
- B. The number of security policy entries of Huawei USG series firewalls cannot exceed 128.
- C. When configuring the security policy name, you cannot reuse the samename.
- D. If the security policy is permit, the discarded message will not accumulate the number of hits.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 102

Which of the following statements about IPSec SA is true?

- A. IPSec SA is one-way
- B. IPSec SA is two-way
- C. Used to generate a secret algorithm
- D. used to generate an encryption key

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 103

Which of the following are the response actions after the gateway antivirus detects the mail virus?

(Multiple choice)

- A. Alarm
- B. Delete attachments
- C. Blocking
- D. Announcement

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 104

Which of the following is not a requirement for firewall double hot standby?

- A. The firewall hardware model is consistent
- B. The firewall interface has the same IP address.
- C. The firewall software version is consistent
- D. The type and number of the interface used are the same.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 105

In information security prevention, commonly used security products are firewalls, Anti-DDoS devices and IPS/IDS devices.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 106

Which of the following descriptions of firewall hot standby is correct? (multiple choice)

- A. The status of all VRRP backup groups in the same VGMP management group on the same firewall is the same
- B. The hot standby of the firewall needs to synchronize the backup between the master device and the slave device by using the session table, MAC table, and routing table.
- C. When multiple areas of the firewall need to provide dual-system backup, you need to configure multiple VRRP backup groups on the firewall.

D. VCMPI3 to ensure the consistency of all VRRPbackup group switching

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 107

Which of the following is not a rating in the network security incident?

- A. Larger network security incidents
- B. Major network security incidents
- C. Special network security incidents
- D. General network security incidents

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 108

OSPF is more commonly used than RIP because OSPF has device authentication and is more secure.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 109

Which of the following is not the main form of computer crime?

- A. Use scanning tools to collect network information without permission
- B. Using a computer for personal surveys
- C. Implant a Trojan to the target host
- D. Hacking the target host

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 110

Which of the following statements about Client-Initiated VPN is correct? (Multiple choice)

- A. Each tunnel carries multiple L2TP sessions and one PPP connection.
- B. Each tunnel carries multiple L2TP sessions and PPP connections.
- C. A tunnel is established between each access user and the LNS.
- D. Only one L2TP session and PPP connection are carried in each tunnel.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 111

Which of the following is the encryption technology used by digital envelopes?

- A. Hash algorithm
- B. Symmetric encryption algorithm
- C. Stream encryption algorithm
- D. Asymmetric encryption algorithm

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 112

Which of the following are the standard port numbers for the FTP protocol? (Multiple choice)

- A. 20
- B. 23
- C. 80
- D. 21

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 113

Which of the following descriptions of the firewall fragment cache function are correct? (Multiple choice)

- A. By default, the firewall caches fragmented packets.
- B. By default, the number of large fragment caches of an IPV4 packet is 32, and the number of large fragmentation buffers of an IPV6 packet is 255.
- C. After the fragmented packet is directly forwarded, the firewall forwards the fragment according to the interzone security policy if it is not the fragmented packet of the first packet.
- D. For fragmented packets, NAT ALG does not support the processing of SIP fragmented packets.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 114

For the occurrence of network security incidents, the remote emergency response is generally adopted first. If the problem cannot be solved for the customer through remote access, after the customer confirms, it is transferred to the local emergency response process.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 115

ASPF (Application Specific Packet Filter) is a packet filtering technology based on the application layer, and implements a special security mechanism through the server-map table.

Which of the following statements about the ASPF and server-map tables are correct? (Multiple Choice)

- A. ASPF monitors messages during communication
- B. ASPF dynamically allows multi-channel protocol data to pass through the server-map table.
- C. ASPF can dynamically create a server-map
- D. The quintuple server-map entry implements a similar function to the session table.

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 116

Which of the following is incorrect about firewall IPSec policy?

- A. By default, IPSec policy can control unicast packets, broadcast packets, and multicast packets.
- B. By default, IPSec policy can control unicast packets and broadcast packets.
- C. By default, IPSec policy only controls unicast packets.
- D. By default, IPSec policy can control multicast.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 117

What is the nature of information security in "Implementation of security monitoring and management of information and information systems to prevent the illegal use of information and information systems"?

- A. Non-repudiation
- B. Integrity
- C. Controllability
- D. Confidentiality

Answer: C (LEAVE A REPLY)

NEW QUESTION: 118

The scene of internal users access the internet as shown, the subscriber line processes are:

1. After authentication, USG allow the connection
2. The user input http://1.1.1.1 to access Internet
3. USG push authentication interface. User =? Password =?
4. The user successfully accessed http://1.1.1.1, equipment create Session table.
5. User input User = Password = *** which the following procedure is correct?

- A. 2-3-1-5-4
- B. 2-1-3-5-4
- C. 2-5-3-1-4
- D. 2-3-5-1-4

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 119

Which of the following protection levels are included in the TCSEC standard? (Multiple Choice)

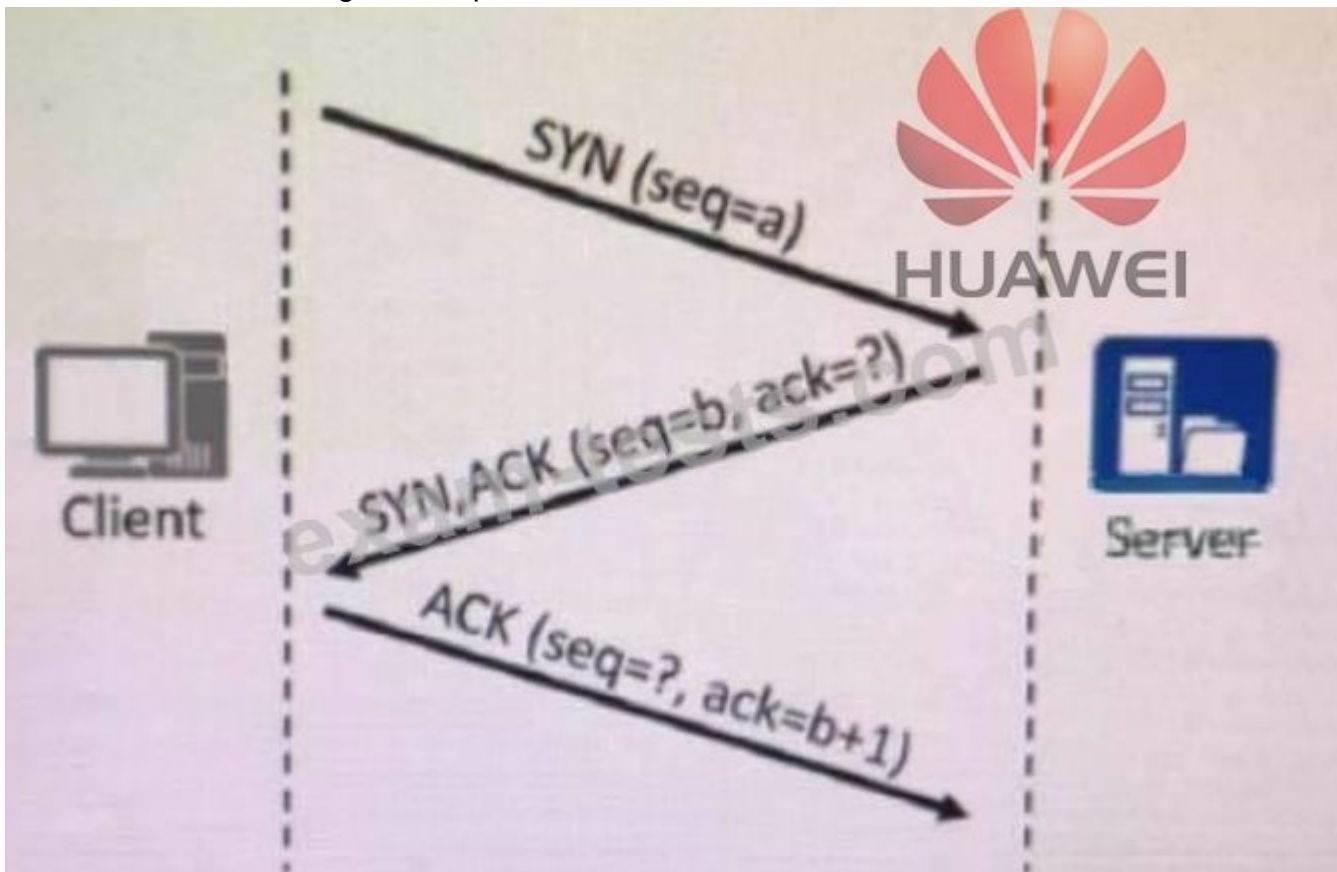

- A. Independent protection level
- B. Passive protection level
- C. Forced protection level
- D. Verify protection level

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 120

As shown in the figure, a TCP connection is established between client A and server B.

Which of the following two "?" packet numbers should be?

- A. a+1: a+1
- B. a: a+1
- C. a+1: a
- D. b+1: b

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 121

Which of the following are part of the SSL VPN function? (Multiple choice)

- A. User authentication
- B. Port scanning
- C. WEB rewriting
- D. File sharing

NEW QUESTION: 125

Intrusion Prevention System (IPS) is a defense system that can block in real time when an intrusion is discovered.

- A. True
- B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 126

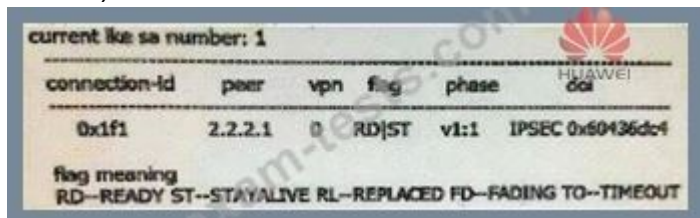

Regarding the description of the packet in the iptables transmission process, which of the following option is wrong?

- A. If the destination address of the packet is local, the packet will be sent to the INPUT chain.
- B. When a packet enters the network card, it first matches the PREROUTING chain.
- C. If the destination address of the packet is not local, the system sends the packet to the FORWARD chain.
- D. If the destination address of the packet is not local, the system sends the packet to the OUTPUT chain.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 127

Through display ike sa to see the result as follows, which statements are correct? (Multiple choice)

- A. The second stage ipsec sa has been successfully established
- B. ike is using version v1
- C. The first stage ike sa has been successfully established
- D. ike is using version v2

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 128

Classify servers based on the shape, what types of the following can be divided into? (Multiple choice)

- A. Tower server
- B. Rack server
- C. Blade server
- D. X86 server

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 129

In order to obtain evidence of crime, it is necessary to master the technology of intrusion tracking. Which of the following descriptions are correct about the tracking technology? (Multiple Choice)

- A.** Analysis of shallow mail behavior can analyze the information such as sending IP address, sending time, sending frequency, number of recipients, shallow email headers, etc.
- B.** Packet Recording Technology marks packets on each router that has been spoken by inserting trace data into the tracked IP packets.
- C.** Packet tagging technology extracts information from attack sources by recording packets on the router and then using data drilling techniques
- D.** Link detection technology determines the source of the attack by testing the network connection between the routers.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 130

Which of the following options are supported by VPN technology to encrypt data messages? (Multiple choice)

- A.** SSL VPN
- B.** IPSec VPN
- C.** GRE VPN

NEW QUESTION: 137

Fire Trust domain FTP client wants to access an Um.rust server FTP service has allowed the client: to access the server TCP 21 port, the client in the Windows command line window can log

into the FTP server, but can not download the file, what are the following solutions? (Multiple choice)

- A. The ^TP works with the port mode modify the Untru3t Trust domain to allow the inbound direction between the default access strategy
- B. Take the Trust between Un:rust domain to allow two-way default access strategy
- C. FTP works with Passive mode modify the domain inbound direction betv/een the Untrust Trust default access policy to allow
- D. Trust Untrust domain configuration is enabled detect ftp

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 138

```
HRP A [USG] display vrrp interface GigabitEthernet 1/0/1
GigabitEthernet1/0/1 Virtual Router 1
VRRP Group: Active
state: Active
VirtualIP: 202.30.10.1
Virtual MAC: 0000-5e00-0101
Primary IP: 202.38.10.2
PriorityRun: 100
MasterPriority: 100
Preempt: YES Delay Time: 10
```

Execute the command on the Firewall and display the above information.

Which of the following description is correct? (Choose two.)

- A. If the master device fails, it will not switch
- B. This Firewall VGMP group status is Active
- C. The priority of the VRRP backup group of the firewall VRID 1 is 100
- D. The virtual IP address of the firewall G1/0/1 interface is 202.30.10.2

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 139

Which of the following is the correct description of windows log event type? (Multiple Choice)

- A. When the disk space is insufficient, it will be recorded as an "information event"
- B. A warning event is a successful operation event of an application, driver, or service.
- C. Failure audit event refers to a failed audit security login attempt, such as a failure when the user view accesses the network drive is logged as a failed audit event.
- D. Error events usually refer to the loss of function and data. For example, if a service cannot be loaded as a system boot, an error event will be generated.

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 140

Which of the following is not part of the method used in the Detection section of the P2DR model?

- A. Testing
- B. Alarm

- C. Real-time monitoring
- D. Shut down the service

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 141

In a Firewall hot standby configuration, HRP key configuration includes which of the following?
(Choose three.)

- A. Enable HRP backup
hrp enable
- B. Specifies the heartbeat port
hrp interface interface-type interface-number
- C. Preemption delay
hrp preempt [delay interval]
- D. Enabling fast backup session summary
hrp mirror session enable

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 142

Which of the following description is wrong about the Internet users and VPN access user authentication?

- A. After the VPN access user passes the authentication, it will be online on the user online list.
- B. The Internet user and the VPN access user share data, and the users attribute check (user status, account expiration time, etc.) also takes effect on the VPN access.
- C. The local authentication or server authentication process is basically the same for the Internet users. The authentication is performed on the user through the authentication domain.
- D. After the VPN user accesses the network, it can access the network resources of the enterprise headquarters. The firewall can control the accessible network resources based on the user name.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 143

Which of the following is not a hash algorithm?

- A. SHA1
- B. SHA2
- C. SM1
- D. MD5

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 144

Which of the following information will be encrypted during the use of digital envelopes? (Multiple Choice)

- A. Receiver public key
- B. User data
- C. Symmetric key
- D. Receiver private key

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 145

NAPT technology can implement a public network IP address for multiple private network hosts.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 146

When the user single sign-on is configured, the receiving PC message mode is adopted. The authentication process has the following steps: 1 The visitor PC executes the login script and sends the user login information to the AD monitor. 2 The firewall extracts the correspondence between the user and the IP from the login information. Add to the online user table 3 AD monitor connects to the AD server to query the login user information, and forwards the queried user information to the firewall. 4 The visitor logs in to the AD domain. The AD server returns the login success message to the user and delivers the login script. which of the following order is correct?

- A. 1-4-3-2
- B. 3-2-1-4
- C. 4-1-3-2
- D. 1-2-3-4

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 147

Which of the following descriptions about windows logs is wrong?

- A. Windows server 2008 system logs stored in the Application.evtx
- B. The system log is used to record the events generated by the operating system components, including the crash of the driver, system components and application software, and data
- C. Windows seiver 2008 security lug is sluiid in security.evtx
