## NEW QUESTION: 1

If automatic account lockout function is enabled on Agile Controller-Campus and the account IP/MAC address is bound, if the number of wrong passwords entered during the end user authentication exceeds the limit within limited time, which of the following descriptions are correct? (Multiple choices)

- A. After the lockout time expires, the account lockout is automatically released.
- B. If you want to unlock the account, only the administrator can delete the account from the list.
- C. When the account is locked, only the account can't be authenticated on the bound terminal device. Normal authentication can be performed on other terminal devices.
- D. This account is locked on all terminal devices and can't be authenticated.

**Answer:** ([SHOW ANSWER](#))

## NEW QUESTION: 2

Which of the following is correct of the accompanying logical architecture of the business?

- A. The business management plane focuses on administrators, authentication servers and policy servers.
- B. The free-to-play logical architecture include management subsystem, authentication and authorization subsystem and business strategy subsystem.
- C. Points of concern for the network device plane include user terminals and static resources.
- D. The user plane focuses on the authentication point and the policy enforcement point.

**Answer:** A ([LEAVE A REPLY](#))

### NEW QUESTION: 3

Which of the following options is correct for the security policy?

- A.** The monitoring policy is mainly used to monitor the events occurring in the system in real time. For example, whether anti-virus software is installed or whether you use PPPOE to access the network through dial-up. Once the events are detected, you can take some control.
- B.** The check class policy is mainly used to check some static settings of the terminal, such as whether the screen saver is set, whether the anti-virus software is installed, whether there is illegal outreach, and so on.
- C.** End-host security management is mainly implemented by check-type policy. End-user behavior management is mainly implemented by monitoring policies.
- D.** The security check policy includes only two types: the end-host check class policy and the end-user behavior check type policy.

**Answer:** ([SHOW ANSWER](#))

### NEW QUESTION: 4

The following is the 802.1X access control switch configuration:

```
[S5720]dot1x authentication-method eap
[S5720-GigabitEthernet0/0/1] port link-type access
[S5720-GigabitEthernet0/0/1] port default vlan 11
[S5720-GigabitEthernet0/0/1] authentication dot1x
```

Assuming that GE0/0/1 is connected to user 1 and user 2 through the HUB, which of the following options is correct?

- A.** After user 1 is authenticated, user 2 can access network resources without authentication
- B.** User 1 and User 2 must be individually authenticated before they can access network resources
- C.** Neither user 1 nor user 2 can pass the authentication and access network resources.
- D.** GE0/0/1 does not need to enable dot1X

**Answer:** **A** ([LEAVE A REPLY](#))

### NEW QUESTION: 5

Which of the following options is not a scenario supported by Free Mobility?

- A.** Work as a team.
- B.** Realize mutual communication between devices.
- C.** When traveling users access intranet resources, traveling users pass VPN Access to the intranet.
- D.** Intranet users access the data center/Internet.

**Answer:** **B** ([LEAVE A REPLY](#))

### NEW QUESTION: 6

Agile Controller-Campus As RADIUS When the server performs authentication, how many ends need to be configured for authentication on the admission control device?

- A. 8080
- B. 1812
- C. 8443
- D. 1813

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 7**

If you are deploying BYOD When the system is installed, use a stand-alone installation SM, Dual-machine installation SC, Stand-alone hardware deployment AE, Which of the following descriptions are correct?

(Multiple choice)

- A. host SC After the server is restored, AE Server will not switch back to master SC The server handles the business.
- B. If the Lord SC After the server fails, AE The server will use the backup SC server.
- C. Install AE When the server, you need to configure the main and standby SC Server IP address.
- D. AE Server priority use)SC server.

**Answer: B,C (LEAVE A REPLY)**

#### **NEW QUESTION: 8**

The XMPP protocol has three roles: server, gateway and client. Corresponding to the free mobility solution, Agile Controller-Campus as the server, Huawei USG6000 firewall acts as the gateway, and the agile switch serves as the client.

- A. True
- B. False

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 9**

After the enterprise network administrator deploys Agile Controller-Campus and SACG, the authentication succeeds but the authentication domain can't be accessed. This may be due to which reasons? (Multiple choices)

- A. Serious violations will prevent access to the post-authentication domain.
- B. The access control list of post-authentication domain is not delivered to SACG.
- C. Wrong post-authentication domain resources are configured on Agile Controller-Campus.
- D. ALC rules are issued in large quantities and require a lot of time to match, causing interruption of access services.

**Answer: (SHOW ANSWER)**

**NEW QUESTION: 10**

In Portal authentication, which of the following parameters must be configured on the switch? (Multiple choice)

- A. Portal page URL
- B. shared-key
- C. Portal Protocol version
- D. Portal server IP

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 11**

Typical application scenarios of terminal security include: Desktop management, illegal outreach and computer peripheral management.

- A. right
- B. wrong

**Answer: A ([LEAVE A REPLY](#))**

**NEW QUESTION: 12**

Which of the following behaviors IPS can not detect?

- A. DOS
- B. Spam
- C. Worm
- D. Virus

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 13**

Agile Controller-Campus All components are supported Windows System and Linux system.

- A. right
- B. wrong

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 14**

Portal The second-level authentication method of authentication refers to the direct connection between the client and the access device(Or only layer devices exist in between),The device can learn the user's MAC Address and can be used IP with MAC Address to identify the user.

- A. wrong
- B. right

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 15**

Which device is usually used as the hardware SACG in Agile Controller-Campus solution?

- A. Firewall
- B. Router
- C. IPS
- D. Switch

**Answer: A (LEAVE A REPLY)**

#### NEW QUESTION: 16

According to different reliability requirements, centralized networking can provide different reliability networking solutions. Regarding these solutions, which of the following descriptions are correct? (Multiple choice)

- A. Basic networking includes deploying one SM Server, one SC Server, one DB and a AE server.
- B. DB In addition to the deployment of basic networking components, the reliability of the network also requires the deployment of an additional backup DB..
- C. AE In addition to the deployment of basic networking components, the reliability of the network also requires the deployment of an additional backup SC server.
- D. SC In addition to the deployment of basic networking components, the reliability of the network also requires the deployment of an additional backup SM server.

**Answer: A,B (LEAVE A REPLY)**

**Valid H12-723 Dumps** shared by BraindumpsPass.com for Helping Passing H12-723 Exam! BraindumpsPass.com now offer the **newest H12-723 exam dumps**, the BraindumpsPass.com H12-723 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H12-723 dumps with Test Engine here: <https://www.braindumpspass.com/Huawei/H12-723-practice-exam-dumps.html> (200 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

#### NEW QUESTION: 17

When all services are allocated according to the user group, account number and terminal IP address range, if the same service is assigned to the user group, account number and terminal IP address range (except the announcement service), the business assigned by the highest priority will take effect.

About the order of priorities, which of the following is correct?

- A. User Group> Terminal IP Address Range> Account
- B. Account> Terminal IP Address Range> User Group
- C. Terminal IP Address Range> Account> User Group
- D. Account> User Group> Terminal IP Address Range

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 18**

Regarding the way SACG devices connect to the network, which of the following descriptions are correct?

(multiple choice)

- A. SACG Equipment requirements and Agile Controller-Campus Interoperability on the second floor.
- B. SACG The equipment requires Layer 3 intercommunication with the terminal.
- C. SACG Support hanging on non-Huawei devices.
- D. SACG It is usually connected to the core switch equipment and uses policy routing to divert traffic.

**Answer: C,D (LEAVE A REPLY)**

**NEW QUESTION: 19**

Traditional access control policy are implemented through ACI or VLAN and can't be resolved with IP address. Maintenance workload is large when the IP address changes. Because the agile network introduces the concept of security groups, it can achieve decoupling from IP addresses.

- A. True
- B. False

**Answer: A (LEAVE A REPLY)**

**NEW QUESTION: 20**

Which of the following correct for MAC authentication and MAC bypass authentication?

(Multiple choices)

- A. MAC address is not used as the user name and password to automatically access the network during MAC bypass authentication.
- B. During the MAC authentication process, the user needs to manually enter the user name or password.
- C. MAC authentication is an authentication method that controls the user's network access rights based on the interface and MAC address. It does not require the user to install any client software.
- D. MAC bypass authentication first 802.1X authentication is performed on the device that accesses the device. If the device does not respond to 802.1X authentication, the device uses MAC to authenticate the device.

**Answer: C,D (LEAVE A REPLY)**

**NEW QUESTION: 21**

Which of the statement is not correct according to following configuration?

```
[USG] pattern-group 6t type url
```

```
[USG-pattern-group-url-bt] pattern any bt.com
```

[USG] url-filter policy urlpolicy3  
[USG-urlfilter-policy-urlpolicy3] blacklist enable  
[USG-urlfilter-policy-urlpolicy3] whitelist enable  
[USG-urlfilter-policy-urlpolicy3] blacklist group 6t  
[USG] web-filter policy webpolicy3  
[USG-web-filter-policy-webpolicy3] policy url-filter urlpolicy3  
[USG-policy-interzone-trust-untrust-outbound] policy 3  
[USG-policy-interzone-trust-untrust-outbound-3] action permit  
[USG-policy-interzone-trust-untrust-outbound-3] policy source range 10.10.10.101  
10.10.10.200  
[USG-policy-interzone-trust-untrust-outbound-3] policy web-filter webpolicy3  
A. users of IP address 10.10.10.120 can access bt.com website  
B. users of IP address 10.10.10.220 can access bt.com website  
C. users of IP address 10.10.10.199 cannot access bt.com website  
D. users of IP address 10.10.10.100 can access bt.com website

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 22**

Use Agile Controller-Campus for guest management. Users can obtain the application account in multiple ways, but does not include which of the following?

- A. SMS
- B. E-mail
- C. Web printing
- D. Voicemail

**Answer: D (LEAVE A REPLY)**

#### **NEW QUESTION: 23**

When the -aa command is used on the access control device to test the connectivity with the Radius server, the running result shows success, but the user cannot Normal access, the possible reason does not include which of the following options?

- A. The user account or password is incorrectly configured.
- B. wireless 02K In the scenario, the access control device is not equipped with a security board
- C. The access layer switch does not start EAP Transparent transmission function.
- D. AD The service controller is not added in the authentication scenario AD area.

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 24**

Regarding the description of the security zone in the Agile Controller-Campus, which of the following options are correct? (multiple choice)

- A.** The service domain is the area that provides security services for the corporate intranet. This area is generally composed of systems that provide security services such as antivirus servers, patch management servers, and terminal security servers.
- B.** The user domain is generally composed of various terminal users. The terminals in this area have the characteristics of large numbers, wide distribution, and strong mobility.
- C.** The business domain is a platform for the heavy load of business flows. According to the needs of the enterprise, security technology is used to logically divide the business to realize the security of the network.
- D.** The network domain is the most concerned security protection area of various enterprises, and it carries the important and core information assets of the enterprise.

**Answer:** [\(SHOW ANSWER\)](#)

#### **NEW QUESTION: 25**

In Agile Controller-Campus admission control technology framework, which of the following is correct for RADIUS?

- A.** PADIUS is used to deliver security policies to SACG devices by the server.
- B.** PADIUS is used to pass user name, password and other information between 802.1X switch and AAA server.
- C.** PADIUS is used to pass user name, password and other information between the client and 802.1X switch.
- D.** PADIUS is used to push web pages to users by Portal Server.

**Answer:** **B** [\(LEAVE A REPLY\)](#)

#### **NEW QUESTION: 26**

When visitor needs to access the network through an account, which of the following methods can be used to access it? (Multiple choices)

- A.** No certification, no account required
- B.** Create new account
- C.** Use existing social media accounts
- D.** Scan public QR code

**Answer:** **A,B,C,D** [\(LEAVE A REPLY\)](#)

#### **NEW QUESTION: 27**

In a WLAN network, intra-group isolation and inter-group isolation can be used at the same time.

- A.** wrong
- B.** right

**Answer:** **B** [\(LEAVE A REPLY\)](#)

#### **NEW QUESTION: 28**

The access control server is the implementer of the corporate security policy, responsible for implementing the corresponding access control in accordance with the security policy formulated by the customer's network(Allow, deny, leave or restrict).

A. wrong

B. right

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 29**

The user access security solution is an "end-to-end" security architecture. The user access security framework includes three key components: terminal equipment, network admission equipment and admission server.

A. False

B. True

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 30**

Check the policy delivered by the Agile Controller-Campus server on the switch as follows:

```
<SW>display acl all
```

```
Total nonempty ACL number is 3
```

```
Advanced ACL Auto_PGM_OPEN_POLICY_3999 , 0 rule
```

```
Acl's step is 5
```

```
Ucl-group ACL Auto_PGM_U2 9996 , 1 rule
```

```
Acl's step is 5
```

```
rule 1 permit ip source ucl-group name Common_user destination ucl-group name
```

```
Mail_Server(match-counter 0) Ucl-group ACL Auto_PGM_U1 9997 , 2 rules Acl's step is 5
```

```
rule 1 permit ip source ucl-group name VIP destination ucl-group name Mail_Server
```

```
(match-counter 0) rule 2 permit ip source ucl-group name VIP destination ucl-group name
```

```
Internet_WWW (match-counter 0) Ucl-group ACL Auto_PGM 9998 , 1 rule Acl's step is 5
```

```
rule 1 deny ip source ucl-group 0 (match-counter 0) Lid-group ACL
```

```
Auto_PGM_PREFER_POLICY 9999 , 0 rule Acl's step is 5
```

Which of the following are correct for this strategy? (Multiple choices)

A. VIP users can access Internet\_WWW resources.

B. VIP can access Mail\_Server resources.

C. Common\_user users can access Internet\_WWW resources.

D. Common\_user users can access Mail\_Server resources.

**Answer: A,B,D (LEAVE A REPLY)**

#### **NEW QUESTION: 31**

The traditional campus network is based on IP As the core network, if there are mobile office users, which of the following options is not the problem that mobile office users face when deploying access authentication?

- A. User experience technology
- B. The deployment of the access control strategy is significant.
- C. The user distribution range is large, and the access control requirements are high.
- D. Access rights are difficult to control.

**Answer: C (LEAVE A REPLY)**

**Valid H12-723 Dumps** shared by BraindumpsPass.com for Helping Passing H12-723 Exam! BraindumpsPass.com now offer the **newest H12-723 exam dumps**, the BraindumpsPass.com H12-723 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H12-723 dumps with Test Engine here: <https://www.braindumpsPASS.com/Huawei/H12-723-practice-exam-dumps.html> (200 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

#### **NEW QUESTION: 32**

Sort all services according to user group and account: By the end IP The address range is time-sharing, if it is a user group, a small terminal with an account IP Address range allocation for the same business(Chen Gongji outside business) | The business assigned to the one with the highest priority will take effect.

Which of the following is correct regarding the order of priority?

- A. By the end P Address range>account number>user group
- B. account>Terminal protection address range>user group
- C. account>user group>terminal IP Address range
- D. user group>terminal P Address range>Account

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 33**

Traditional network single--The strategy is difficult to cope with the current complex situations such as diversified users, diversified locations, diversified terminals, diversified applications, and insecure experience.

- A. right
- B. wrong

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 34**

If you use a normal account for authentication, which of the following descriptions is wrong?

- A. User can't use web Way to authenticate.
- B. Users can use their own 802. 1X The client authenticates.
- C. Users can use Any Office Perform authentication.

D. Users can use Web Agent Perform authentication.

**Answer: A ([LEAVE A REPLY](#))**

**NEW QUESTION: 35**

Regarding the application scenarios of Agile Controller-Campus centralized deployment and distributed deployment, which of the following options are correct? (Multiple select)

- A. If most end users work in one area and a few end users work in branch offices, centralized deployment is recommended.
- B. If end users are scattered in different regions, a centralized deployment solution is recommended.
- C. If most end users are concentrated on--Offices in several regions, and a small number of end users work in branches. Distributed deployment is recommended.
- D. If end users are scattered in different geographical locations, a distributed deployment solution is recommended.

**Answer: A,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 36**

If deploy BYOD system, use stand-alone install SM, dual-system install SC, single-machine hardware deploy AE, which of the following description is correct? (Multiple choices)

- A. When install AE server, configure the IP addresses of the primary and secondary SC servers.
- B. After the primary SC server is restored, AE server will not switch back to the primary SC server for processing services.
- C. If primary SC server fails, AE server will use the secondary SC server.
- D. AE server preferentially use the standby SC server.

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 37**

The traditional network single strategy is difficult to deal with complex situations such as diverse users, diversified locations, diversified terminals, diversified applications and inexperienced experiences.

- A. False
- B. True

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 38**

In the Agile Controller-Campus admission control scenario, regarding the role description of the RADIUS server I client, which of the following is positive True?

- A. Agile Controller-Campus Integrated RADIUS All functions of server and client."

**B.** Agile Controller-Campus As RADIUS On the server side, the user terminal acts as RADIUS Client.

**C.** Certified equipment(like 802. 1X switch)As RADIUS On the server side, the user terminal acts as RADIUS Client.

**D.** Agile Controller-Campus As RADIUS Server side, authentication device(like 802.1X switch)As RADIUS Client.

**Answer:** [\(SHOW ANSWER\)](#)

#### **NEW QUESTION: 39**

MAC Certification refers to 802.1x In the protocol authentication environment, the terminal does not respond to the connection control device after accessing the network 802.1x When protocol authentication is requested, the access control does not automatically obtain the terminal's MAC The address is sent as a credential to access the network RADIUS The server performs verification.

**A.** right

**B.** wrong

**Answer:** **B** [\(LEAVE A REPLY\)](#)

#### **NEW QUESTION: 40**

Regarding the use of MAC authentication to access the network in the WLAN networking environment, which of the following statements is wrong en.

**A.** The user name format used by MAC authentication is only one of MAC address user name format.

**B.** MAC authentication does not require users to install any client software.

**C.** MAC authentication actually uses 802 1X authentication method.

**D.** MAC bypass authentication solves the situation of both 802.1x client authentication and MAC authentication in the same network environment.

**Answer:** **A** [\(LEAVE A REPLY\)](#)

#### **NEW QUESTION: 41**

Regarding MAC authentication and MAC bypass authentication, which of the following descriptions are correct? (multiple choice)

**A.** The biggest difference between the two is MAC Bypass authentication belongs to 802 1X Certification, while MAC Certification does not belong to 802 1X Certification.

**B.** If a network can connect to dumb terminals(printer,IP telephone), The text may be connected to a portable computer, please use MAC Bypass authentication:First try 802 1X Authentication, try again if authentication fails MAC Certification

**C.** MAC Authentication MAC One more bypass authentication 802 In the instrument certification process, the open time is longer than MAC The bypass authentication time is long.

D. If a network will only connect to dumb terminals(printer,IP telephone),please use MAC Certification in order to shorten the certification time.

**Answer: A,B,D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 42**

In the process of establishing CAPWAP channel between AP and AC, AP and AC negotiate to establish CAPWAP tunnel. In this process, CAPWAP tunnel is established. Use DTLS to encrypt and transmit UDP packets. What are the encryption methods supported by DTLS?

(multiple choice)

- A. AES encryption
- B. Certificate encryption
- C. PSK encryption
- D. Plaintext encryption

**Answer: B,C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 43**

In the Agile Controller-Campus solution, which device is usually used as the hardware SACG?

- A. IPS
- B. Firewall
- C. switch
- D. router

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 44**

Mobile smart phone and tablet users establish IPSec encryption tunnel with AE through Any Office client. After passing authentication and compliance checks, they access enterprise services.

- A. True
- B. False

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 45**

After the Agile Controller-Campus is installed successfully, how can you check whether SM and SC components start normally? (Multiple choices)

- A. Open <https://SM> server IP:8943 in browser and enter the account admin and the default password Changeme123. If the login succeeds, the SM component is normal.
- B. Open <https://SC> server IP:8443 in browser and enter the account admin and the default password Changeme123. If the login succeeds, the SC component is normal.

**C.** After logging in SC, choose Resources> Users> User Management and create a new common account. Open the https://SM server IP:8447/newauth in browser. If the account created in the previous step can be successfully logged in, the SM component is normal.

**D.** After logging in SM, choose Resources> Users> User Management and create a new common account. Open the https://SC server IP:8447/newauth in browser and use the account created in the previous step. If the login succeeds, the SC component is normal.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 46**

When manage guest accounts, you need to create guest account policy and set account creation method. Which of the following descriptions is incorrect for account creation?

**A.** If the number of users is large, you can create them in batches.

**B.** Self-registration can be used to facilitate management and enhance the user experience.

**C.** If the number of users is large, you can choose database synchronization.

**D.** When you add accounts individually, you can select individual creation.

**Answer:** **C** ([LEAVE A REPLY](#))

**Valid H12-723 Dumps** shared by BraindumpsPass.com for Helping Passing H12-723 Exam! BraindumpsPass.com now offer the **newest H12-723 exam dumps**, the BraindumpsPass.com H12-723 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H12-723 dumps with Test Engine here: <https://www.braindumpspass.com/Huawei/H12-723-practice-exam-dumps.html> (200 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

#### **NEW QUESTION: 47**

Traditional access control policy passed ACL or VLAN Can not be achieved with IP Address decoupling, in IP The maintenance workload is heavy when the address changes. And because the agile network introduces the concept of security group, it can achieve the same IP Address decoupling.

**A.** right

**B.** wrong

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 48**

A network adopts 802.1X to authenticate access users. The admission control device is deployed at the convergence layer. After the deployment is complete, the test-aaa command is used successfully on the admission control device, but the user can't access the network.

Which of the following may be the cause of the fault? (Multiple choices)

- A. RADIUS authentication template is not configured on the aggregation layer device.
- B. The switch is not added to Agile Controller-Campus as NAS device.
- C. The 802.1X function is not enabled on the port on the access device.
- D. Layer 2 links are used between access devices and aggregation devices. The 802.1X transparent transmission function is not enabled.

**Answer: C,D (LEAVE A REPLY)**

#### **NEW QUESTION: 49**

An enterprise has a large number of mobile office employees, and a mobile office system needs to be deployed to manage the employees. The number of employees in this enterprise exceeds 2000 People, and the employees' working areas are distributed all over the country. In order to facilitate management, which deployment method is adopted?

- A. Both centralized deployment and distributed deployment are possible
- B. Distributed deployment
- C. Hierarchical deployment
- D. Centralized deployment

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 50**

Which of the following descriptions is correct regarding the strategy for checking screen saver settings?

- A. You can check whether the terminal has screen saver enabled.
- B. You can check whether the screen saver password is enabled
- C. Only Windows operating systems are supported.
- D. Screensaver settings do not automatically repair

**Answer: A,B (LEAVE A REPLY)**

#### **NEW QUESTION: 51**

Which of the following options is Agile Controller-Campus middle SC The main function of the component?

- A. Integrated with standards RADIUS server,Porta Server, etc., responsible for linking with network access equipment to realize user-based network access control Strategy.
- B. As Agile Controller-Campus The management interface is used to configure and monitor the system.
- C. As Agile Controller-Campus 'S security assistance server, responsible for iRadar Analysis and calculation of reported security incidents.
- D. As Agile Controller-Campus The management center is responsible for formulating the overall strategy.

**Answer: A (LEAVE A REPLY)**

**NEW QUESTION: 52**

The Agile Controller-Campus is deployed on Windows platform and use SQL Server database.

Which of the following is true about HA function of Agile Controller-Campus? (Multiple choices)

- A. When deploying the service manager SM, HA is supported and HA active/standby switchover based on Keepalived technology is provided.
- B. When the database DB is deployed, HA is supported. Use SQL Server database mirroring technology, you need to deploy the primary DB + mirror DB + witness DB.
- C. When deploying the service controller SC, HA is supported and backup scheme for resource pool mode is provided. N+1 SC need to be deployed.
- D. When deploying the management center MC, HA is supported and HA active/standby switchover based on Keepalived technology is provided.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 53**

When using local guest account authentication, usually use(Portal The authentication method pushes the authentication page to the visitor. Before the user is authenticated, when the admission control device receives the HTTP The requested resource is not Portal Server authentication URL When, how to deal with the access control equipment.

- A. Send authentication information to authentication server
- B. URL Address redirected to Portal Authentication page
- C. Discard message
- D. Direct travel

**Answer:** B ([LEAVE A REPLY](#))

**NEW QUESTION: 54**

Which of the following is wrong about SACG online process?

- A. After the security check is passed, Agile Controller-Campus server notifies SACG to switch the IP address of end user to the isolation domain.
- B. Authentication fails. End users only can access resources in the pre-authentication domain.
- C. Agile Controller-Campus server contains domain parameters in SACG Messages
- D. The terminal communicates with Agile Controller-Campus server use SSL encryption

**Answer:** A ([LEAVE A REPLY](#))

**NEW QUESTION: 55**

After configuring the announcement,Agile Controller-Campus The system cannot assign this announcement to which of the following objects?

- A. Assign to user
- B. Assigned to places

- C. Assign to terminal IP Address range
- D. Assigned to account

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 56**

IPS custom signature in UTM supports you to set direction and protocol type.

- A. FALSE
- B. TRUE

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 57**

Portal page push rules have priority, and the rules with higher priority are matched with the user's authentication information first. If none of the configured rules match, The default rules are used.

- A. wrong
- B. right

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 58**

MAC authentication means that in 802.1X authentication environment, when the terminal does not respond to 802.1X authentication request from the access control device after accessing the network, the access control device automatically obtains MAC address of the terminal and sends it to RADIUS server as a certificate for accessing the network.

- A. True
- B. False

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 59**

After the user authentication succeeds, which of the following actions can be performed on the user on Agile Controller-Campus?

- A. Disable/disable the move certificate account and assign roles.
- B. Remote assistance for users access the Any Office.
- C. Force users to go offline.
- D. Audit users' online and offline records.

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 60**

Regarding the policy for checking account security, which of the following descriptions are correct? (Multiple choice)

- A. It is not possible to check whether the password length meets the requirements.
- B. You can check whether there is a weak password.

- C. You can check whether the account has joined a specific group.
- D. It cannot be repaired automatically.\_

**Answer: B,C (LEAVE A REPLY)**

#### **NEW QUESTION: 61**

URL filtering configure exact match www.test.com/news field, then not meet the URL of the filtering strategy include:

- A. www.test.com/news.aspx
- B. WWW.TEST.COM/news
- C. http://www.test.com/news
- D. www.test.com/news/

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 62**

A company has a large number of mobile office employees who need to deploy a mobile office system to manage employees. The company employs more than 2,000 people and its work areas are distributed throughout the country. What kind of deployment method is used to facilitate management?

- A. Centralized deployment
- B. Distributed deployment
- C. Both centralized and distributed deployments
- D. Hierarchical deployment

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 63**

The admission control server is the implementer of the enterprise security policy and is responsible for implementing the corresponding admission control (allow, deny, quarantine, or restrict) according to the security policy formulated by the customer network.

- A. True
- B. False

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 64**

Use on access control equipment test-aaa Command test and Radius When the server is connected, the running result shows a timeout, which may be caused by incorrect account or password configuration.

- A. right
- B. wrong

**Answer: (SHOW ANSWER)**

**NEW QUESTION: 65**

There are two types of accounts on the Agile Controller-Campus: one is a local account and the other is an external account.

Which of the following is not a local account?

- A. Mobile certificate account
- B. Anonymous account
- C. Guest account
- D. Ordinary account

**Answer: A (LEAVE A REPLY)**

**NEW QUESTION: 66**

Which of the following descriptions is wrong about the principle of MAC authentication?

- A. MAC authentication is configured on NAS device, MAC address of the endpoint is automatically used as the username and password.
- B. MAC authentication requires Portal server cooperation.
- C. MAC authentication is implemented through 802.1X protocol.
- D. MAC authentication requires that the terminal MAC address stored in advance on AAA server.

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 67**

Visitor management can authorize visitors based on their account number, time, location, terminal type and access method, also can push personalized pages to visitors based on time, location and terminal type.

- A. False
- B. True

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 68**

Perform the UTM upgrade in the process of operation, appeared the following information:  
Error: Executing the update, please wait.

USG may be executed (choose 3 answers)

- A. local upgrade

- B. there are business flow being processed
- C. online upgrade
- D. install the factory default version

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 69**

About WEB URL filtering technology audit function, which of the following description is correct? (Choose 3 answers)

- A. URL audit function is used to record the user's HTTP Internet behavior as the basis for the audit.
- B. The user can configure the web type to be audited, WEB types to distinguish with file extensions, including html, jsp, aspx, etc.
- C. internal users access to the specified type of WEB resource, the firewall will be logged and sent to log server.
- D. can audit user HTTP access in the specific content of the Post, as a user Internet censorship

**Answer:** A,B,C ([LEAVE A REPLY](#))

**NEW QUESTION: 70**

Enterprise Intranet users access to the Internet, what may cause the UFL filtering function failure? (Select 3 answers)

- A. the URL filtering strategy in the corresponding filter sub-function switch did not open
- B. no Web filtering strategy applied in the corresponding direction in inter-domain
- C. no reference URL filtering strategy in Web filtering policy
- D. Web content filtering is not enabled

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 71**

The administrator issues notices to users through the form of announcements, such as the latest software and patch installation notices, etc. Which of the following options is wrong?

- A. You can issue an announcement by account number.
- B. The endpoint must have proxy client installed to receive announcements.
- C. You can issue an announcement by department.
- D. If the system issues an announcement and the proxy client is not online, it will not receive the announcement information after going online.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 72**

The greater Virus Scan rating value, the higher the virus detection rate, but the smaller the probability of false positives.

- A. FALSE

**B. TRUE**

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 73**

Deploying on Windows platform, using SQL Server database About the HA function of Agile Cotoller-Campus, which of the following descriptions Is it correct? (multiple choice)

- A.** Deployment Management Center MC Time, support HA, Provide based on Keepalived Technical HA Active/standby switchover.
- B.** Deploy Business Manager SM Time, support HA, Provide based on Keepalived Technical HA Active/standby switchover.
- C.** Deploy the database DB Time, support HA use SQL Server Database mirroring technology requires the deployment of master DB+Mirroring DB+witness DB.
- D.** Deploy business controller 3SC Time, support HA, Provide a backup solution in resource pool mode, which needs to be deployed N+1 indivual SC

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 74**

Which of the following series of devices does not support the free mobility feature?

- A.** USG6000 Series Firewalls
- B.** SVN5600 series
- C.** S5720HI Series Switches
- D.** AR Series Routers

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 75**

Which of the following options is right PKI The sequence description of the work process is correct?

1. PKI Entity direction CA ask CA Certificate. .
2. PKI Entity received CA After the certificate, install CA Certificate.
3. CA receive PKI Entity CA When requesting a certificate, add your own CA Certificate reply to PKI entity.
4. PKI Entity direction CA Send a certificate registration request message.
5. PKI When the entities communicate with each other, they need to obtain and install the local certificate of the opposite entity.
6. PKI Entity received CA The certificate information sent.
7. PKI After the entity installs the local certificate of the opposite entity,Verify the validity of the local certificate of the peer entity. When the certificate is valid,PC The public key of the certificate is used for encrypted communication between entities.
8. CA receive PKI The entity's certificate registration request message.

**A.** 1-3-5-6-7-4-8-2

**B.** 1-3-5-4-2-6-7-8

C. 1-3-2-4-8-6-5-7

D. 1-3-2-7-6-4-5-8

**Answer: C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 76**

The standard 802.1X client that is provided by the Web client and operating system only has the identity authentication function. It does not support the implementation of inspection class policies and monitoring class policies. The Any Office client supports all inspection class policies and monitoring class policies.

A. True

B. False

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 77**

According to the user's access5W1H Conditions determine access rights andQoS Strategy for5W1Ho[Which of the following descriptions are correct? (Multiple choice)

A. How Determine the access method(Wired, wireless, etc.)

B. WhatTo determine the access device(PC,iOS Wait)

C. WhoTo determine the ownership of the access device(Company standard,BYOD Wait)

D. WhoseTo determine the identity of the access person(member I, Visitors, etc.)

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 78**

Portal page push rule has priority. The high precedence rule matches the user's authentication information first. If none of the configured rules match, the default rule is used.

A. False

B. True

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 79**

When test-aaa command is used to test the connectivity to the Radius server on the access control device, the running result display timeout. This may be caused by wrong account or password configuration.

- A. True
- B. False

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 80**

Regarding the file source set in the software management, which of the following descriptions is correct?

- A. External data sources cannot distribute files from FTP-type file servers.
- B. The Microsoft Windows file sharing server uses the UNC (Universal Naming Conversion) path (beginning with "\\") to provide waiting. The path to distribute the software.
- C. When the file source is an internal data source, when distributing software, the business manager will only send the path of the data source of the software to be distributed to Any Office
- D. When the file source is an external data source, Any Ofce will obtain the software to be distributed.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 81**

Policy template is collection of several policy. To audit the security status of different terminal hosts and the behavior of end users, administrators need to customize different policy templates for protecting and managing terminal hosts.

Which of the following are correct regarding the policy template? (Multiple choices)

- A. You can assign policy template to a network segment.
- B. When configure policy template, you can inherit the parent template and modify the parent template policy.
- C. If different policy templates are applied to departments and accounts, the policy template assigned to the highest priority will take effect. The priority relationship of departments and accounts is: account > department.
- D. Only policy in the policy template can be used. Administrators can't customize the policy.

**Answer: A,C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 82**

Identity authentication determines whether to allow access by identifying the identity of the access device or user.

- A. wrong
- B. right

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 83**

When hardware SACG is used for authentication, after SACG configuration is complete, you can see that the association between SACG and Agile Controller-Campus succeeds, but the user authentication fails. This phenomenon may be caused by which of the following reasons? (Multi-selection)

- A. User traffic is not released on SACG.
- B. The key configuration error on Agile Controller-Campus is related to SACG.
- C. User traffic did not pass SACG.
- D. There is no shutdown state detection on SACG.

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 84**

Regarding WLAN, which of the following descriptions is correct?

- A. WLAN There are two basic architectures: FAT AP with AC+FIT AP
- B. AC+FITAP Autonomous network architecture
- C. AC+FATAP The architecture is suitable for medium and large use scenarios
- D. WLAN Is to adopt 80211 Technical WiFi

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 85**

The visitor management process includes page customization, account application, user authentication, auditing and logout. After the user successfully applies for an account, the user needs to distribute the account to the user. Which stage of the account distribution?

- A. User authentication stage
- B. Page customization phase
- C. Account application stage
- D. Audit and cancellation stages

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 86**

Agile Controller-Campus Which deployment mode is not supported?

- A. Distributed deployment
- B. Two-machine deployment
- C. Centralized deployment
- D. Hierarchical deployment

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 87**

For the convenience of visitors, different authentication and registration pages can be pushed for different visitors. When configuring push page policy, you need to define different matching conditions. Which of the following can be used as qualified matching conditions? (Multiple selection)

- A. Terminal IP address
- B. Guest account priority
- C. Access device location information
- D. SSID of access network

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 88**

Which of the following descriptions are correct regarding the strategy of checking account security? (Multiple choices)

- A. Can't repaired automatically.
- B. You can check if there is a weak password.
- C. Can't check whether the password length meets the requirements.
- D. You can check whether the account has joined a specific group.

**Answer:** B,D ([LEAVE A REPLY](#))

#### **NEW QUESTION: 89**

The user accesses the network through network access device. The third-party RADIUS server authenticates and authorizes the user.

Which of the following is incorrect about this certification process?

- A. Configure RADIUS authentication and accounting on the device.
- B. Configure RADIUS authentication and authorization on Agile Controller-Campus.
- C. Configure Agile Controller-Campus as local data source authentication, receive the packets which sent by the device, and perform authentication.
- D. Configure RADIUS authentication and accounting on RADIUS server.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 90**

In the centralized networking, the database, SM server, SC server and AE server are all installed at the headquarters of the enterprise. This networking mode is applicable to enterprises with a wide geographical distribution of users and a large number of users.

- A. True
- B. False

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 91**

A Layer 3 forwarding device exists between the authentication client and the admission control device. In this case, if the Layer 3 authentication mode of Portal authentication is

adopted, the device can also obtain the MAC address of the authentication client. Therefore, the IP address and MAC address can be used as the same to identify the user's information.

A. False

B. True

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 92**

Which of the following options is about Portal The description of the certification process is correct?

A. Server for a terminal Portal Certification will only give one Portal Device sends authentication message

B. Portal The authentication message will not carry the result of the security check

C. Switch received Portal Online message, will give Radius Server send Radius Certification request

D. Portal The certification process is only used in Web Certification

**Answer: C (LEAVE A REPLY)**

#### **NEW QUESTION: 93**

The service will determine the access right and QoS policy according to 5W1H condition of user access. Which of the following statements is correct for 5W1H? (Multiple choices)

A. Whose, determine the identity of the access person (employees, visitors, etc.)

B. What, determine the access device (PC, iOS, etc.)

C. How to determine the access method (wired, wireless, etc.).

D. Who, determine the attribution of access equipment (company standard, BYOD, etc.)

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 94**

Create CAPWAP between AP and AC, establish CAPWAP tunnel negotiates with AP and AC. In this process, CAPWAP tunnel use DTLS to encrypt and transmit UDP packets.

Which encryption methods are supported by DTLS?

A. PSK encryption

- B. Plaintext encryption
- C. AES encryption
- D. Certificate Encryption

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 95**

Guest management is Agile Controller-Campus Important function of, regarding visitor management, which of the following statements are correct? (Multiple choice)

- A. Visitors can use their mobile phone number to quickly register an account
- B. There is a violation of the guest account, and the administrator cannot retrospectively
- C. Reception staff cannot create guest accounts
- D. The administrator can assign different permissions to each visitor

**Answer:** A,D ([LEAVE A REPLY](#))

**NEW QUESTION: 96**

About the hardware SACG Certification deployment scenarios, which of the following descriptions are correct? (Multiple choice)

- A. SACG Essentially through 802.1X Technology controls access users.
- B. SACG It is generally deployed in a bypass mode without changing the original network topology.
- C. SACG Authentication is generally used in scenarios where new networks are used for wireless admission control.
- D. SACG Authentication is generally used in scenarios where a stable network performs wired admission control.

**Answer:** B,D ([LEAVE A REPLY](#))

**NEW QUESTION: 97**

Which of the following is true about uninstall Agile Controller-Campus on Windows and Linux systems?

- A. Windows platform, select Start> All Programs> Huawei> Agile Controller> Server Startup config.
- B. Windows platform, select Start> All Programs> Huawei> Agile Controller> Uninstall.
- C. Run sh uninstall.sh to start uninstall program use the common account in Agile Controller/Uninstall directory.
- D. Run sh uninstall.sh to start uninstall process use the root account in Agile Controller directory.

**Answer:** B ([LEAVE A REPLY](#))

**NEW QUESTION: 98**

Deployed by an enterprise network manager Agile Controller-Campus with SACG Later; Identity authentication is successful but cannot access the post-authentication domain, This phenomenon may be caused by any reason? (Multiple choice)

- A. ALC The number of rules issued is too many, and a lot of time is required to match, causing interruption of access services.
- B. A serious violation will prohibit access to the post-authentication domain.
- C. The access control list of the post-authentication domain has not been delivered SACG.
- D. Agile Controller-Campus Wrong post-authentication domain resources are configured on the server.

**Answer: B,C,D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 99**

Which of the following series of devices does not support the function of accompanying business?

- A. SVN5600 series
- B. AR Series router
- C. S5720HI Series Switch:
- D. USG6000 Series firewall

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 100**

In Layer 2 authentication based on Portal authentication, the client is directly connected to the access device (or only the Layer 2 device exists). The device can learn MAC address of the user and use IP and MAC addresses to identify the user.

- A. False
- B. True

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 101**

Which of the following is true about WLAN?

- A. WLAN is WiFi use 802.11 technology
- B. AC + FAT AP architecture for medium and large-scale use scenarios
- C. AC + Fit AP is also called autonomous network architecture
- D. WLAN has two basic architectures: Fat AP and AC+FIT AP

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 102**

Security authentication mainly implements security checks on access users through security policy. Terminal host security management is mainly implemented by check-type policy. End-user behavior management is mainly implemented by monitoring policy. If the user needs to formulate strategy according to his own custom strategy.

A. False

B. True

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 103**

802.1X During the authentication, if the authentication point is at the aggregation switch, in addition to RADIUS,AAA,802.1X In addition to the conventional configuration, what special configuration is needed?

A. The aggregation switch needs to be configured 802 1X Transparent transmission of messages.

B. Both the aggregation layer and the access layer switches need to be turned on 802.1X Function.

C. No special configuration required

D. Access layer switch needs to be configured 802. 1X Transparent transmission of messages.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 104**

Regarding CAPWAP encryption, which of the following statements is wrong?

A. DTLS Encryption can guarantee AC The issued control messages will not be eavesdropped on.

B. Use the certificate method to carry out DTLS Negotiation, the certificate is only used to generate the key, not right AP Perform authentication.

C. CAPWAP The data tunnel can be used DTLS Encrypted.

D. DTLS Support two authentication methods:Certificate authentication(out AC,AP Already brought)with PSK Password authentication.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 105**

When performing terminal admission control, which of the following are not include when use the authentication technology?

A. SACG certification

B. Portal authentication

C. Bypass certification

D. 802.1X authentication

**Answer: C ([LEAVE A REPLY](#))**
