NEW QUESTION: 1

Which of the following storage descriptions are correct:

- A. LUNs that use SAN storage can only create virtualized data storage
- B. Virtualized data storage that can only be created by using SAN storage LUNs, providing allocation functions
- C. The server local disk group raid is used as data storage method to virtualize data storage
- D. The way that distributed storage provides data storage capabilities is virtualized data storage

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 2

In FusionCompute, the port group type can be modified after the port group is created, but the VLAN ID of the port group cannot be modified.

- A. FALSE
- B. TRUE

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

In the Huawei desktop cloud solution, in order to enable infrastructure VMs to connect to the business plane and management plane at the same time, it is necessary to connect the business level Network card and management Each plane network card is configured with a gateway.

- A. Wrong
- B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which scenario is recommended to use disk raw device mapping

- A. Virtual Machine Management (VRM)
- B. Virtual Desktop
- C. oracle RAC
- D. Web application service

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which of the following operations can FusionCompute not perform on the data disks mounted on the running virtual machine?

- A. Modify the disk IO mode
- B. Increase disk capacity
- C. Modify the disk name
- D. Unbind the disk

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

After restoring the system disk, what data does the linked clone virtual machine retain only?

- A. Data disk data
- B. Desktop data
- C. Favorites data
- D. System disk data

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 7

In FusionCompute, what operations cannot be performed on a stopped virtual machine?

- A. Restart
- B. Create a consistent snapshot
- C. Move
- D. Migration

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 8

Which of the following statements about linked clone virtual machines in Huawei desktop cloud is correct?

- A. Fast creation speed and small space occupation
- B. The creation speed is slow and it takes up little space
- C. The creation speed is slow and takes up a lot of space

D. The creation speed is fast and takes up a lot of space

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 9

Is the description of fusioncompute using NAS storage correct?

A. NFS or CIFS type shared folders can be used

B. It is recommended to use a 10 Gigabit Ethernet switch to connect

C. It is recommended to use fiber optic switch connection

D. It is recommended to use domain control to manage the permissions of shared folders

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 10

Regarding the Huawei desktop cloud clock synchronization solution, which of the following descriptions is incorrect?

A. The customer cannot provide an external clock source. When Huawei provides AD, it is recommended to use the solution that AD synchronizes time from the host where the main VRM is located through the management plane

B. The customer provides an external clock source, and when the clock source server is also used as AD, FusionAccess infrastructure virtual machines and user virtual machines synchronize time from the AD clock source through the business plane

C. Customers cannot provide an external clock source. When Huawei provides AD, AD acts as a secondary clock source, and synchronizes time to infrastructure virtual machines and user virtual machines through the management plane.

D. The customer provides an external clock source. When Huawei provides AD, AD synchronizes time through the service plane, and VRM synchronizes time through the management plane

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which of the following options is not a component of the bare metal service system architecture

A. ironic-conductor

B. ironic-api

C. nova-compute-ironic

D. ironic-dhcp

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

In FusionCompute, which is wrong description of the virtual machine network card?

A. Virtual machines with memory reuse (not 100% memory reservation) cannot be configured with pass-through devices

B. The virtual machine configured with the pass-through device must monopolize the memory. After monopolizing the memory, the virtual machine's memory will not be swapped to the swap space

C. SR-IOV pass-through mode network card supports online addition

D. There is a limit to the number of network cards that can be added to each virtual machine

Answer: C (LEAVE A REPLY)

NEW QUESTION: 13

In FusionSphere cloud DC scenarios and server virtualization scenarios, the physical networking for storage devices to connect to the CNA host is One To.

A. Error

B. Correct

Answer: (SHOW ANSWER)

NEW QUESTION: 14

In FusionCompute, what are the binding modes of aggregated network ports? (Multiple Choice)

A. DPDK-driven active/standby mode

B. Active and standby

C. Load sharing based on polling

D. Load sharing based on source and destination IP and port

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 15

In the Huawei desktop cloud solution, SVN includes vLB and vAG functions.

A. Wrong

B. Yes

Answer: B (LEAVE A REPLY)

NEW QUESTION: 16

In fusioncompute, the two virtual machines in the unified cluster are running normally, but they cannot communicate with each other. The possible reasons are:

A. The administrator adjusted the memory size of one of the VMs

B. The administrator adjusted the port group of one of the VMs

C. The administrator adjusted the disk capacity of one of the VMs

D. The administrator adjusted the description of one of the VMs

Answer: (SHOW ANSWER)

Valid H13-527-ENU Dumps shared by BraindumpsPass.com for Helping Passing H13-527-ENU Exam! BraindumpsPass.com now offer the **newest H13-527-ENU exam dumps**, the BraindumpsPass.com H13-527-ENU exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-527-ENU dumps with Test Engine here: <https://www.braindumps.com/Huawei/H13-527-ENU-practice-exam-dumps.html> (385 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 17

Which of the following descriptions about bare metal deployment in FusionSphere OpenStack is wrong?

- A. It is necessary to ensure the interoperability between the BMC network and the bare metal BMC network (Layer 2 or Layer 3 interoperability is acceptable)
- B. The storage free zone name must be the same as that set in ServiceCenter
- C. After the bare metal configuration is completed, you need to configure the IP address of the bare metal console proxy before you can use the bare metal console Features
- D. When configuring Provision network information, you can select "vlan" or "vxlan". When used with the Agile Controller, please Fixed selection of "vlan"

Answer: D (LEAVE A REPLY)

NEW QUESTION: 18

Which of the following descriptions in the FusionCompute system is incorrect?

- A. Support virtual machine migration across clusters
- B. Virtual machine HA is a kind of virtual machine hot migration
- C. If it is bound to a USB device, the virtual machine cannot be migrated to another host
- D. If the option "Bind with selected host" is not checked, the virtual machine will not be able to add pass-through devices

Answer: B (LEAVE A REPLY)

NEW QUESTION: 19

Which of the following statements about cloud hosting is correct:

- A. Cloud hosting includes general cloud hosting and main cloud hosting
- B. If the connected virtual machine environment is the VMWare environment, you must choose a general cloud host when applying for cloud host services
- C. When applying for a cloud host, you can apply for only the cloud host first. After the application is completed, you can apply for the network as needed.
- D. Currently only supports advanced functions such as custom hostname and password of Windows system

Answer: B (LEAVE A REPLY)

NEW QUESTION: 20

Which of the following statement is correct?

- A. The WI component in FusionAccess belongs to the virtual desktop management layer
- B. Input access layer of ITA component in FusionAccess
- C. FusionAccess only supports thin terminal access
- D. The desktop protocol used by FusionAccess is HDP protocol

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

When OpenStack adopts 2+1 deployment, what services must be deployed on the third node?

- A. swift
- B. image
- C. compute
- D. zookeeper

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

When the data in FusionCompute is sent from vm and passes through the port group of the virtual switch, it will be processed according to the settings. What specific processing are included? (Multiple choice)

- A. Add the corresponding VLAN tag to the data frame
- B. Change the source MAC address in the data
- C. Determine whether to forward according to the existing VLAN tag of the data frame
- D. Replace the destination MAC address in the data

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 23

Which of the following is a concept introduced by Huawei during the FusionSphere installation process, combining components of the same nature or similar functions, Put together Department?

- A. Service
- B. Module
- C. Role
- D. Components

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

When the Hua Desktop Cloud system is quickly released, which of the following descriptions are correct regarding the disk configuration mode of the virtual machine system disk? (Multiple choice)

- A. When the virtual machine template is a linked clone template, the configuration mode must be simplified
- B. When the virtual machine template is a full copy template, the configuration mode must be normal
- C. When the virtual machine template is a fast packaging template, the configuration mode must be simplified
- D. When the storage resource type is FusionStorage, the configuration mode must be simplified

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 25

The complete replication virtual machine issuance process, which is correct?

- a, check whether the virtual machine IP is reachable
- b, create a virtual machine
- c, add users to the desktop group
- d, the virtual machine joins the domain

- A. bdca
- B. bacd
- C. badc
- D. bcda

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 26

In HUAWEI Desktop Cloud, the local account in the template is completely copied and has the permissions of the local Administrators group. This account Secrets are generally not needed It must be modified, otherwise it will cause the ITA and VM messages to fail.

- A. Yes
- B. Wrong

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 27

The storage types that can be used to create virtualized data storage in fusioncompute are: (multiple choice)

- A. NAS
- B. IP SAN
- C. FC SAN
- D. Fusionstorage

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

Which of the following description of FusionSphere in the Huawei Desktop Cloud Solution is incorrect?

- A. Provide the management function of user desktop virtual resources and physical resources
- B. FusionCompute's main VRM and CNA components
- C. FusionCompute provides basic computing, storage, and network virtualization functions
- D. In addition to FusionSphere, the underlying virtualization platform of Huawei's desktop cloud solution can also use vSphere

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 29

When the FusionAccess product has a business distribution problem, you can check the cause of the problem by looking at the error message, the alarm, and the log.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 30

What is the correct description of the data storage in FusionCompute?

- A. Each host uses independent data storage
- B. Every storage device must create a data store before it can be used
- C. With the help of storage thin provisioning technology, data storage can be larger than storage device capacity
- D. Virtual machine files and snapshots are stored in data storage

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 31

Which of the following descriptions of computing virtualization features are wrong?

- A. Support GPU virtualization, GPU pass-through
- B. To be compatible with a new operating system, the manufacturer needs to provide supporting PV drivers. Huawei has PV driver development capabilities. In addition to being compatible with mainstream Windows and Linux operating systems, FusionCompute is also compatible with domestic bid-winning operating systems (specific versions may require customized drivers)
- C. Have a flexible management structure
- D. Online adjustment of CPU and memory technology can adjust the CPU and memory specifications when the virtual machine supported by the platform is still running. At this time, the virtual machine needs to be restarted to take effect

Answer: D ([LEAVE A REPLY](#))

Valid H13-527-ENU Dumps shared by BraindumpsPass.com for Helping Passing H13-527-ENU Exam! BraindumpsPass.com now offer the **newest H13-527-ENU exam dumps**, the BraindumpsPass.com H13-527-ENU exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-527-ENU dumps with Test Engine here: <https://www.braindumps.com/Huawei/H13-527-ENU-practice-exam-dumps.html> (385 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 32

If a group policy is set for the organizational unit UserOU, the user configuration in this group policy will be applied to all users in this organizational unit.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 33

What are the characteristics of the best performance of the FusionSphere virtualization suite? (Multiple choice)

- A. GPU enhancement
- B. High-performance virtual energy
- C. Large-scale virtual
- D. High performance network

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 34

Which of the following statements about distributed switches is correct?

- A. Virtual machine-block network card can be added to multiple security groups
- B. One port group can only correspond to one distributed switch, and one distributed switch can correspond to multiple port groups.
- C. When the port type is normal, multiple VLANs are allowed to pass
- D. When the uplink is an SR-IOV device, the port type should be normal mode

Answer: B (LEAVE A REPLY)

NEW QUESTION: 35

The resource allocation and load scheduling of OpenStack are mainly reflected in that it can adjust the resources in the resource pool according to the needs of users Minute Rationing different rents Users, carrying different applications.

- A. Wrong
- B. Correct

Answer: (SHOW ANSWER)

NEW QUESTION: 36

FusionAccess backup server only saves the backup data within 10 days.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 37

During the daily operation and maintenance of Huawei Desktop Cloud, what operations cannot the administrator perform during the day? (Multiple choice)

- A. Manually back up the software of the desktop cloud system
- B. Modify group policies, add and delete accounts, etc. on the AD domain
- C. Modify the synchronization clock source
- D. Perform batch creation and mass association operations on ITA

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 38

When ManageOne ServiceCenter is deployed on the FusionSphere OpenStack virtualization environment, which of the following is the statement correct?

- A. ServiceCenter active/standby deployment needs to specify external-api and external-om network segment floating IP;
- B. ServiceCenter active/standby deployment needs to specify the external-api network segment floating IP; there is no need to specify the external-om network Duan Fu Moving IP;
- C. ServiceCenter active/standby deployment does not need to specify external-api and external-om network segment floating IP;
- D. ServiceCenter active/standby deployment needs to specify the external-om network segment floating IP; there is no need to specify the external-api network Duan Fu Moving IP;

Answer: A (LEAVE A REPLY)

NEW QUESTION: 39

Which of the following situations require network virtualization (multiple choice)

- A. The physical machine needs to communicate with the outside world
- B. Frequent migration of virtual machines across physical servers
- C. Multiple virtual machines share one physical network port
- D. Traditional networks dominated by north-south traffic can no longer meet current needs

Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 40

In the cloud desktop solution, compared to the fast packaging template, using a complete copy template to issue virtual machines is faster and more efficient.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

ManageOne Servicenter can create big data usage accounts for tenants, associate big data service permissions, and specify quota.

- A. Correct
- B. Error

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 42

What information does not need to be collected when FusionAccess fails?

- A. Time of failure
- B. Customer live network information
- C. System version number
- D. FusionCompute build time

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 43

Which operations can the virtual machine on FusionCompute do in the hibernation state?

- A. Normal deletion
- B. Clone as a virtual machine
- C. Restart
- D. Convert to template

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 44

Each Cell in OpenStack contains an independent Message Broker and Database, of which API Cell mainly contain nova-api service, Used to receive user requests and send user requests to the specified Cell in the form of message.

- A. Correct
- B. Error

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 45

A VM on FusionCompute fails to migrate, which of the following options will not cause the failure?

- A. Binding the virtual machine and the host

- B. The destination host is unavailable
- C. The source host is in maintenance mode
- D. DPM is not turned on

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

Fusionsphere can realize the horizontal integration of heterogeneous computing, storage, and network resources of multiple manufacturers, and provide open IT service interfaces to the outside world

- A. Yes
- B. Wrong

Answer: A ([LEAVE A REPLY](#))

Valid H13-527-ENU Dumps shared by BraindumpsPass.com for Helping Passing H13-527-ENU Exam! BraindumpsPass.com now offer the **newest H13-527-ENU exam dumps**, the BraindumpsPass.com H13-527-ENU exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-527-ENU dumps with Test Engine here: <https://www.braindumpspass.com/Huawei/H13-527-ENU-practice-exam-dumps.html> (385 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 47

What are the necessary network planes in Huawei desktop cloud? (Multiple choice)

- A. Storage plane
- B. HDP plane
- C. Management plane
- D. Business plane

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 48

Which of the following statements about disk performance is correct?

- A. Normal delay zero setting>Simplified>Normal
- B. Simplified>Normal delay zero setting>Normal
- C. Normal delay zero setting> Normal> Simplified
- D. Normal>Normal delay zero setting>Simplified

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 49

In FusionCompute, the disk bus type created on the data storage mapped by the raw device can only be vito or DE.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 50

ManageOne ServiceCenter can create big data trial accounts for tenants, associate big data service permissions, and refer to Set quotas.

- A. Correct
- B. Error

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

Which of the following is not a step to configure a Huawei Desktop Cloud Linux infrastructure virtual machine?

- A. Set virtual machine mutual exclusion
- B. Install the operating system
- C. Set virtual machine self-recovery properties
- D. Install HAD

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 52

The permissions of the VPC administrator include: service application, resource usage, VPC management, user viewing, and alarm viewing.

- A. Correct
- B. Error

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 53

What are the correct operations during the desktop cloud installation process?

- A. Basic component virtual machines and user desktop virtual machines compete fairly for resources
- B. Need to separately create data storage for the basic component virtual machine
- C. Set two ITA virtual machines as mutually exclusive virtual machines
- D. Create a corresponding port group for the business network

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 54

Which of the following is not a feature of FusionCube desktop cloud all-in-one?

- A. Built-in Oceanstor high-performance storage

- B. Pre-installation of the whole machine
- C. Automated application deployment
- D. High-performance graphics processing

Answer: A (LEAVE A REPLY)

NEW QUESTION: 55

Fusionsphere can have multiple storage pools, but each storage pool can only be used by one fusioncompute computing cluster

- A. Wrong
- B. Yes

Answer: B (LEAVE A REPLY)

NEW QUESTION: 56

In the Huawei desktop cloud, which of the following scenarios has the highest bandwidth requirements?

- A. GPU image desktop
- B. pdf reading
- C. Video playback
- D. Office application

Answer: C (LEAVE A REPLY)

NEW QUESTION: 57

In the FusionAccess system, each virtual machine group can only have virtual machines issued by the same type of template.

- A. True
- B. False

Answer: B (LEAVE A REPLY)

NEW QUESTION: 58

Which conditions are not included in the VPC that needs to be met to bind an elastic IP to a virtual machine?

- A. NAT is configured
- B. Existing external network
- C. A router already exists
- D. Routing network has been created

Answer: A (LEAVE A REPLY)

NEW QUESTION: 59

What kind of traffic can exist on the FusionCompute service network plane? (Multiple choice)

- A. Virtual machine hot migration traffic

- B. CNA and VRM communication
- C. VIMS distributed lock flow
- D. Virtualized SAN heartbeat detection traffic

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 60

What services can ManageOne 3.0 provide for tenants? (Multiple choice)

- A. RDS
- B. Physical machine
- C. Cloud hosting
- D. Cloud hard drive

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 61

In the Huawei desktop cloud, the following are wrong about the characteristics of complete replication of virtual machines:

- A. Does not support shutdown restore and one-key restore functions
- B. The user can change and save the data on the virtual machine
- C. The virtual machines issued from the same complete copy template are exactly the same
- D. The administrator needs to perform maintenance (upgrade software, update software virus database) operations on each virtual machine separately

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 62

W provides users with access to virtual desktops, where users can connect, start, and restart virtual desktops.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 63

Which of the following descriptions about FusionCompute virtualized antivirus is incorrect?

- A.** FusionCompute's virtualized anti-virus function performs virus detection and real-time monitoring through physical memory exchange of the host.
- B.** It does not occupy the user's virtual machine network resources when running virus checking and killing functions.
- C.** It does not occupy the computing resources of the user's virtual machine when running virus checking and killing functions.
- D.** FusionCompute virtualized anti-virus function does not need to install complete anti-virus software on user virtual machines.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 64

Compared with ordinary desktops, what are the advantages of VIP desktops? (Multiple choice)

- A.** Compared with ordinary desktops, VIP desktop has the functions of automatic data sharing and quick recovery, ensuring the security of VIP desktop data.
- B.** When users access VIP desktops, larger bandwidth brings better user experience.
- C.** Real-time care of virtual machine status to ensure stable operation of VIP desktop virtual machines.
- D.** CPU. Priority protection of memory resources, when resources are tight, priority is given to the VIP desktop

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 65

When using a thin terminal to access a virtual desktop, you need to configure the IP address of the cloud server, which is the IP of the following component Ground site?

- A.** WI
- B.** HDC
- C.** HDA
- D.** ITA

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 66

During application virtualization planning, it is necessary to calculate the storage IOPS required by the application. Which of the following parameters does not affect the storage IOPS Calculation?

- A.** IOPS of APS server operating system
- B.** The total IOPS that a single application can provide
- C.** IOPS required by a single user
- D.** Number of application users

Answer: A (LEAVE A REPLY)

NEW QUESTION: 67

In the physical networking of the Huawei desktop cloud solution, which of the following network plane problems will cause users to be unable to use desktop virtual machines?

- A. Storage network
- B. BMC network
- C. Business network
- D. Management network

Answer: C (LEAVE A REPLY)

NEW QUESTION: 68

In the overall deployment box of the OpenStack single-machine room module, the number of the following components is correct:

(Multiple choice)

- A. The relationship between Fabric and Spine/Leaf is 1;1
- B. The relationship between AC and OpenStack is 1; N
- C. The relationship between gateway group and gateway switch is 1; N
- D. AC and Fabric are 1; the relationship between N

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 69

When creating a bundled disk for a virtual machine on a virtualized storage in FusionCompute, which of the following descriptions is incorrect?

- A. When the disk type is shared, the configuration mode can be normal
- B. When the disk is normal, the configuration mode can be simplified
- C. When the disk type is shared, the configuration mode can be independent-non-persistent
- D. When the disk type is normal, the configuration disk mode can be slave

Answer: C (LEAVE A REPLY)

NEW QUESTION: 70

When planning Huawei's high-definition graphics desktop, the desktop packages that need to be considered include:

- A. Matching TC
- B. GPU model
- C. Internet broadband
- D. Server

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 71

Add an IP-SAN storage to FusionCompute and create data storage based on it. Which is the correct procedure?

- A. Add storage resources>>Add host storage interface>>Scan storage devices>>Add data storage.
- B. Add host storage interface>>Add storage resource>>Add data storage>>Scan storage device
- C. Add data storage>>Add host storage interface>>Add storage resources>>Scan storage devices
- D. Add host storage interface>>Add storage resources>>Scan storage devices>>Add data storage

Answer: D (LEAVE A REPLY)

NEW QUESTION: 72

The USB pass-through implemented by Huawei's computing virtualization has a cost relative to the use of separate USBHub and USB over IP technologies. . . .

- A. Wrong
- B. Yes

Answer: A (LEAVE A REPLY)

NEW QUESTION: 73

In the HUAWEI Desktop Cloud system, which of the following description of the desktop distribution during the quick release is correct? (Multiple choice)

- A. "Virtual Group Type" is "Complete Copy", "Set Assignment Type", "Add User" and "Set Permission Group" need to be configured
- B. If "Virtual Machine Type" is "Linked Clone", you need to configure "Number of Virtual Machines" and "Add User Group"
- C. "virtual machine type" to "complete copy" need to configure "virtual machine several", "add a user (group) "
- D. "Virtual Group Type" is "Linked Clone", you need to configure "Set Assignment Type", "Add User", "Set Permission Group"

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 74

Which components of the HUAWEI CLOUD desktop do not need a network card to belong to the business plane?

- A. AD/DHCP/DNS
- B. vAG/vLB
- C. ITA/HDC/WI
- D. VRM

Answer: A (LEAVE A REPLY)

NEW QUESTION: 75

Regarding the memory sharing used by Huawei's computing virtualization and memory reuse feature, which of the following statements are correct?

- A. When the virtual machine needs to write to the memory, it needs to open up another memory space and modify the mapping
- B. The virtual machine sharing memory should be the same OS
- C. The virtual machine performs read-only operations on shared memory
- D. All the above statements are wrong

Answer: B (LEAVE A REPLY)

NEW QUESTION: 76

Which of the following descriptions of Huawei application virtualization and application scenarios are correct?

- A. In a simple office scenario, when no user needs an independent desktop, application virtualization cannot be used
- B. It is not recommended to use application virtualization in the safe surfing scene
- C. Application virtualization is recommended for mobile office scenarios to support multiple smart phone terminals to access the same application across platforms
- D. Soft terminals cannot use application virtualization. Xu Yaoh uses application virtualization in the scenario of using thin terminals

Answer: C (LEAVE A REPLY)

NEW QUESTION: 77

In the Huawei desktop cloud, which is not the networking point of the GSLB+NAS remote replication disaster recovery solution?

- A. The primary and secondary DNS addresses of the user virtual machine are respectively configured as the GSLB IP addresses of the two data centers
- B. GSLB is responsible for monitoring the operating status of the data center. Under normal circumstances, the domain name will be resolved to the user's production data center.

Port IP address, only

Only after the production data center is abnormal, the domain name is resolved to the IP in the disaster recovery data

C. The virtual machine uses the user AD policy to mount the data disk when the user logs in

D. The default desktop service portal domain name is set on the TC, and its primary and secondary DNS addresses are those of the two data centers.

GSLB

IP address by

GSLB is responsible for domain name resolution

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 78

Which of the following statements about Huawei desktop cloud components is wrong?

A. HDC records the relationship between the virtual desktop (domain name) and the user (domain account), and synchronizes the usage status of the virtual desktop in real time.

Status and connection status

B. ITA completes the business management of the desktop cloud, including the creation, association, disassociation, and deletion of virtual machines

C. gauss DB Huawei self-developed database, users save virtual machine and virtual machine management related information

D. WI is used to provide functions such as end user access interface entrance and virtual machine login authentication

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 79

Which of the following are the main defects of enterprises using traditional PC for office work? (Multiple choice)

A. High operating and maintenance expenses

B. Poor data security

C. Low resource utilization

D. Low data reliability

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 80

The thin terminal does not contain an operating system, but is just a hardware device used to present remote virtual desktop display content and intervene peripherals.

Prepare

A. Wrong

B. Yes

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 81

Which of the following descriptions about the memory reuse characteristics of FusionCompute is wrong?

- A.** After the host memory reuse is enabled, the specific memory reuse degree of the virtual machine can be controlled by the virtual machine memory QoS setting
- B.** After the host memory reuse is turned off, the sum of the memory sizes of all virtual machines running on each host shall not be greater than the sum of the actual available physical memory used by the virtual machines
- C.** Turning off host memory reuse requires that the memory reuse rate of all hosts in the cluster is less than or equal to 150%
- D.** After setting the host memory reuse, the total number of virtual machine memory created on the host can exceed the physical memory to increase the density of virtual machines

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 82

The difference between the internal network and the routing network in a VPC is mainly whether there is an associated virtual router.

- A.** Correct
- B.** Error

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 83

If the user accidentally disables the virtual machine's network, the virtual machine will not be able to log in through the HDP protocol, but it can be VNC Log in to this VM, Then enable the network

- A.** Yes
- B.** Wrong

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 84

IDV can only use special terminals, mobile devices cannot support

- A.** False
- B.** True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 85

The Huawei desktop cloud solution supports process login on mobile terminals using Android, ios and other operating systems

- A.** Yes
- B.** Wrong

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 86

Which of the full memory desktop descriptions is correct? (Multiple choices)

- A. Always online deduplication system data to maximize storage space utilization
- B. IO Tailor's deduplication compression solution is specifically optimized for VDI and memory media
- C. There is no problem of performance aging, all system disk data is always in the memory
- D. Provide emergency disk protection mechanism

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 87

After the shared storage device is associated with the FusionCompute cluster, you need to

- A. No need to scan storage devices
- B. Scan for storage devices on all nodes in the cluster
- C. Scan storage devices on any host
- D. Scan storage devices on all nodes of fusioncompute

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 88

What is wrong about the correspondence between the storage model and the physical presentation in FusionSphere ():

Answer:

Shared folders are data storage

NEW QUESTION: 89

What types of Huawei desktop cloud user licenses are included? (Multiple choice)

- A. Number of concurrent users
- B. Use time
- C. Number of users
- D. Feature number

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 90

Cloud computing has gradually become the preferred solution for IT infrastructure construction

- A. Yes
- B. Wrong

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 91

Huawei's computing virtualization memory reuse technology does not allow the total memory of virtual machines on the server to be greater than the physical memory on the server

- A. Yes
- B. Wrong

Answer: B (LEAVE A REPLY)

Valid H13-527-ENU Dumps shared by BraindumpsPass.com for Helping Passing H13-527-ENU Exam! NEW QUESTION: 92

When there is a problem with the cloud desktop, which of the following portal of products can the administrator view the alarm? (Multiple choice)

- A. FusionAccess
- B. FusionInsight
- C. FusionCompute
- D. FusionCare

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 93

In the Huawei desktop cloud system, which is impossible about the correspondence between virtual machine groups and desktop groups?

- A. Virtual group (linked clone)-desktop group type (static pool)
- B. Virtual group (full copy)-desktop group type (proprietary)
- C. Virtual group (linked clone)-desktop group type (proprietary)
- D. Virtual group (full copy)-desktop group type (dynamic pool)

Answer: C (LEAVE A REPLY)

NEW QUESTION: 94

The Nova modules deployed in load balancing mode include: (multiple choice)

- A. nova-scheduler
- B. nova-conductor
- C. nova-api
- D. nova-compute

Answer: (SHOW ANSWER)

NEW QUESTION: 95

Under the same conditions, the fast package type virtual machine is issued faster than the full copy type virtual machine.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 96

When adding DNS to FusionSphere OpenStack OM service, which of the following statements is correct?

- A. The domain name format is: local-oam.domainname.com
- B. Single node deployment, the IP address is the FusionSphere OpenStack OM management IP address
- C. For single-node deployment, the IP address is the floating IP address of FusionSphere OpenStack OM on the External_API plane.
- D. For single-node deployment, the IP address is FusionSphere OpenStack OM floating IP on the External_OM plane address

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 97

When the Huawei desktop cloud system is quickly released, which of the following descriptions are correct regarding the configuration mode of the virtual machine user disk? (Multiple choice)

- A. When the virtual machine template is a linked clone template, the configuration mode is recommended to be simplified.
- B. When the virtual machine template is a full copy template, the recommended configuration mode is normal delay zero setting.
- C. When the virtual machine template is a linked clone template, the configuration mode must be simplified.
- D. When the virtual machine template is a full copy template, the configuration mode must be normal delay zero setting.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 98

What are the scenarios where the virtual machine in FusionCompute cannot perform hot migration? (Multiple choice)

- A. The virtual machine has a snapshot
- B. USB is mounted

- C. The virtual machine state is dormant
- D. The optical drive is mounted

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 99

What is the function of FusionSphere OpenStack OM?

(Multiple choice)

- A. Resource management
- B. Resource allocation
- C. Business release
- D. Backup management

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 100

What are the common fault location methods? (Multiple choice)

- A. Check device status
- B. View alarm
- C. View monitoring information
- D. Check configuration data
- E. Query operation log

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 101

In the FusionAccess management interface, the "service type" and "type" of the application virtualized APS virtual machine template are selected correctly. The options are:

- A. Select "SBC" for business type and "Desktop full copy template" for template type
- B. Select "APS" for business type and "Desktop link clone template" for template type
- C. Select "VDI" for business type and "Desktop full copy template" for template type.
- D. Select "VDI" for the business type and "Desktop link cloning template" for the template type.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 102

Among the following responsibilities in the ManageOne OperationCenter, the contents of the supervisor's work are:

- A. Tracking the process of closed-loop problem handling
- B. System management
- C. Quickly deal with problems
- D. Find problems quickly and in time

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 103

When the user cannot successfully log in to the WI after entering the user name and password, what we mainly need to analyze?

- A. HDP
- B. ITA
- C. WI
- D. HDC

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 104

FusionSphere OpenStack () provides a graphical interface to simplify OpenStack installation and improve efficiency.

- A. Keystone
- B. Horizon
- C. OM
- D. GPS

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 105

A physical machine has one CPU in total. The CPU has 4 cores and 8 threads. Fusioncompute creates virtual machines on the host, and each virtual machine is allocated A vcpu, may I have several such virtual machines running on the physical host at the same time:

- A. Insufficient conditions to calculate
- B. 4
- C. 32
- D. 8

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 106

What are the bonding modes of converged NICs in FusionCompute? (Multiple choice)

- A. Active and standby
- B. Load sharing based on round-robin
- C. Load sharing based on source and destination IP and port
- D. DPDK-driven active and standby mode

Answer: A,B,C,D ([LEAVE A REPLY](#))

dumps, the BraindumpsPass.com H13-527-ENU exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-527-ENU dumps with Test Engine here: <https://www.braindumps.com/Huawei/H13-527-ENU-practice-exam-dumps.html> (385 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 107

In computing virtualization, which of the following description of memory usage is correct?
(Multiple choice)

- A. On the same physical host, all Guest PhysicalMemory must be less than or equal to the Host PhysicalMemory of the physical host.
- B. In a virtual machine, the Guest Virtual Memory corresponding to all applications must be less than or equal to the GuestPhysicalMemory of the virtual machine.
- C. On the same physical host, all Guest PhysicalMemory can be greater than the ost PhysicalMemory of the physical host.
- D. In a virtual machine, the Guest VirtualMemory corresponding to all applications can be larger than the GuestPhysical Memory of the virtual machine.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 108

The components for managing cloud disks on the FusionSphere OpenStack side are ()

- A. Glance
- B. Cinder
- C. Swift
- D. Image

Answer: B (LEAVE A REPLY)

NEW QUESTION: 109

The ways of data storage expansion in FusionCompute are ():

- A. Expansion of the original storage device
- B. Add a new storage device to the original data store
- C. Expand original storage resources

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 110

When deploying FusionAccess, terminal users must use thin terminals to access.

- A. True
- B. False

Answer: B (LEAVE A REPLY)

NEW QUESTION: 111

Huawei computing virtualization supports the borrowing of memory pages between different virtual machines, and releases idle virtual machines to virtual machines with higher memory usage, thereby improving memory utilization:

- A. Memory replacement
- B. Memory sharing
- C. All of the above
- D. Memory bubbles

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 112

In the FusionSphere cloud DC scenario, what are the uses of the external network?

- A. The network on which the internal network depends
- B. Network on which Elastic IP depends
- C. VPC routing exit
- D. Shared network between tenants

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 113

The Huawei desktop cloud system can manually or automatically monitor resource load conditions and shut down virtual machines that are not in use.

- A. FALSE
- B. TRUE

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 114

What are the features supported by FusionCompute? (Multiple choice)

- A. Support the hot migration of CPU from AMD to INTEL virtual machine.
- B. Dynamic resource scheduling
- C. CPU QoS
- D. Virtual machine HA

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 115

After FusionCompute sets A resource reservation, when the cluster resources are extremely tight, the reserved resources will be preferentially allocated to virtual machines to ensure normal business operation.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 116

Log in to a Windows virtual machine and find that there is a C drive and D drive in the resource manager, then it means that the virtual machine's disk files are two VHD file

A. Wrong

B. Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 117

What types of storage resources does Huawei FusionCompute support? (Multiple choice)

A. NAS

B. SAN

C. Local hard disk

D. Ceph

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 118

The virtual machine VHD format file exported from Hyper-V can be directly imported to fusioncompute for use:

A. Wrong

B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 119

The specifications of user virtual machines can be modified on FusionAccess or on FusionCompute.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 120

HUAWEI cloud computing environment, the virtual machine migration process must require terminal virtual machine services

A. Wrong

B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 121

Failed to encapsulate the complete copy of the virtual machine template. The possible cause is that the virtual machine has not joined the AD domain.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

Valid H13-527-ENU Dumps shared by BraindumpsPass.com for Helping Passing H13-527-ENU Exam! NEW QUESTION: 122

FusionCompute is a basic component in FusionSphere, which is mainly responsible for the virtualization of hardware resources and the centralized management of virtual resources, business resources, and user resources.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 123

Heat can use the local template format to orchestrate multiple comprehensive cloud applications. AWS CloudFormation is not currently supported Template format.

- A. Error
- B. Correct

Answer: A (LEAVE A REPLY)

NEW QUESTION: 124

Which of the following descriptions about FusionCompute is correct?

- A. VRM can manage virtualized resources and physical resources.
- B. The CNA virtualization system uses sojourn virtualization.
- C. VRM supports both virtual deployment and physical deployment. Single node deployment is recommended to reduce the resource occupation of the cluster.
- D. FusionCompute includes two functional modules, CNA and VRM. CNA is a virtualized operating system that provides virtualization capabilities for computing, storage and network resources. VRM is used for virtual resource management.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 125

Recycling single-user desktops only needs to deallocate single-user desktop virtual machines.

- A. FALSE

B. TRUE

Answer: (SHOW ANSWER)

NEW QUESTION: 126

What is the correct sequence of the virtual machine registration process?

- a. The virtual machine asks AD to initiate a request to verify the validity of the DC domain name;
- b. The virtual machine selects a DC to initiate a registration request;
- c. HAD process starts
- d. HDC issues license version information and desktop group information to virtual machines

A. cbad

B. cabd

C. Abcd

D. bacd

Answer: B (LEAVE A REPLY)

NEW QUESTION: 127

What are the required components of the FusionCompute system? (Multiple choices)

A. ITA

B. HDC

C. LIC

D. TCM

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 128

What are the main functions implemented by the FusionAccess component WI?

A. Protocol gateway for desktop access, isolation of internal and external networks, and transmission encryption

B. Provide access to the end user interface

C. virtual machine HDA interact collected HDA virtual machine state and the state reported by the access

D. Desktop access login load balancing

Answer: B (LEAVE A REPLY)

NEW QUESTION: 129

In the FusionSphere architecture, which of the following options are optional components? (Multiple Choice)

A. eBackup

B. FusionCompute

C. FusionManager

D. UltraVR

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 130

One network card of a virtual machine in FusionCompute can only be added to one security group.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 131

In all-media editing application scenarios, the recommended high-definition graphics desktop technology for desktops running 25m-level expression editing tasks is

A. GPU pass-through

B. CPU hardware virtualization

C. CPU sharing

D. GPU hardware virtualization

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 132

Which of the following options does not belong to the virtualization environment supported by FusionSphere OpenStack 6.0?

A. Hyper-V

B. FusionCompute

C. VMware vSphere

D. KVM

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 133

Compared with the complete copy of the desktop, the advantage of the linked clone desktop is (multiple choice)

A. Improve management and maintenance efficiency

B. Issuance is faster

C. Take up less storage space

D. Desktop performance is higher

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 134

What CPU types are not supported by IMC policy? (Multiple choice)

A. INTEL

B. AMD

C. Kunpeng

D. Hisilicon

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 135

In the full-memory desktop solution architecture using shared storage, the disks stored in the shared data storage are (multiple choice)

A. Desktop template

B. Desktop Emergency Disk

C. Desktop ID Disk

D. Desktop Data Disk

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 136

In FusionCompute, which of the following is not included in the startup method of a virtual machine?

A. Hard disk startup

B. CD drive startup

C. Local startup

D. Network startup

Answer: ([SHOW ANSWER](#))

Valid H13-527-ENU Dumps shared by BraindumpsPass.com for Helping Passing H13-527-ENU Exam! NEW QUESTION: 137

What network planes need to be planned for the FusionCompute system? (Multiple choice)

A. BMC network plane

B. Business plane

C. Management plane

D. Storage plane

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 138

In the FusionAccess system, which of the following description about fixed TC access is incorrect?

- A. Support manual entry and batch import when configuring TC binding
- B. The administrator can enable the TC binding function through the ITA interface and enter the binding relationship between the TC MAC and the user
- C. TC binding information is stored in the AD server, and binding matching and authentication are performed in the AD server
- D. Desktop users who are bound to a fixed TC can only log in to the WI from the bound TC , and cannot use other TCs to log in to the desktop

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 139

Virtual image management system support features include thin allocation, snapshots, and storage hot migration

- A. Yes
- B. Wrong

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 140

Which of the following is included in the Layer 2 network security strategy? (Multiple Choice)

- A. Prevent counterfeiting of user virtual machine DHCP Server
- B. Prevent counterfeiting of user virtual machine IP and MAC addresses
- C. Use VLAN to isolate LAN services from each other

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 141

What products are included in the FusionSphere virtualization suite? (Multiple choice)

- A. FusionManager
- B. eBackup
- C. UltraVR
- D. FusionCompute

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 142

Which of the following options belong to the services included in the role of sys-server in Huawei FusionSphere OpenStack?

- A. haproxy
- B. apacheproxy
- C. ntp
- D. cps

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 143

In the introduction of host memory over-allocation, it is mentioned that there is one-to-one correspondence between Host Memory and Guest Memory.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 144

In FusionCompute, the adjustment of memory QOS includes memory reservation and memory share.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 145

Compared with OVS DVS Neutron, the following statement is wrong:

- A. OVS is an open source virtual switch
- B. Neutron is a virtual switch in OpenStack
- C. DVS is an implementation of OVS, which can span multiple physical servers
- D. DVS is a distribution or a virtual switch

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 146

In FusionAccess R6 version, which of the following infrastructure component virtual machine words should use the linux operating system (multiple choice)

- A. ITA
- B. HDC
- C. DB
- D. WI

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 147

Only when the status of the virtual machine in FusionCompute is "Running", you can mount"the opt"cal drive.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 148

In the Huawei desktop cloud, the inquiry in the linked clone virtual machine group can share a system disk, which has a fast virtual machine creation speed.

Fast component update

Features of Jie

A. Wrong

B. Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 149

Which of the following statements about domains is incorrect?

A. Users in a domain can only log in on their own machine, not on other computers in the domain

B. The domain controller is the computer that stores the directory database

C. The Active Directory database needs to be synchronized between multiple domain controllers

D. A domain requires at least one domain controller

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 150

Regarding the operation of adding a virtual machine, which of the following descriptions is incorrect?

A. First, you need to add a virtual machine in the virtual group to create a virtual machine.

B. When assigning a virtual machine, there is no need to configure the user and permission information of the virtual machine.

C. After the virtual machine is created, the virtual machine needs to be allocated in the desktop group to allow users to use the virtual machine.

D. When adding a virtual machine to a complete copy of a virtual machine group, you can adjust the parameters of the virtual machine; while a linked-clone virtual machine group can only add virtual machines that have exactly the same specifications and parameters as the original virtual machine.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 151

What types of volumes does the virtual desktop put in the memory in the full memory?

(Multiple Choice)

A. Differential volume

B. Optical drive volume

C. System parent volume.

D. Data volume

Answer: ([SHOW ANSWER](#))

Valid H13-527-ENU Dumps shared by BraindumpsPass.com for Helping Passing H13-527-ENU Exam! NEW QUESTION: 152

In the deployment scheme of FusionAccess gateway and load balancer active and standby, the virtual machine where the VAGMLB component is located has four network cards: eth0. eth1. eth2. eth3. Use the tool "startTools" to configure the vAGML BHA floating address. Which network card the floating address will be configured on on?

- A. eth0
- B. eth2
- C. eth1
- D. eth3

Answer: A (LEAVE A REPLY)

NEW QUESTION: 153

The virtual machine in the KVM virtualization platform consists of at least two files. One is the virtual machine configuration file, and the other is the virtual machine speed disk file.

- A. False
- B. True

Answer: A (LEAVE A REPLY)

NEW QUESTION: 154

In Huawei Desktop Cloud, when configuring the DHCP service after installing DHCP, which of the following items need to be configured? (Multiple Choice)

- A. Default gateway
- B. IP address range
- C. Domain name
- D. AD server service plane address

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 155

Deploying VMs based on templates in FusionCompute is not inherited from templates and can be customized ().

- A. Virtual machine disk number, capacity and bus type

- B. The memory size of the virtual machine
- C. Virtual machine disk capacity
- D. The number of network cards of the virtual machine

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 156

Which of the following is not a major FusionAccess accident?

- A. System time failure
- B. FusionAccess architecture virtual machine failure
- C. User virtual machine failure
- D. User operation is delayed

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 157

What types of volumes does the full memory virtual desktop put in the memory? (Multiple choice)

- A. Differential volume
- B. Data volume
- C. System parent roll
- D. Optical drive volume

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 158

When configuring vLB, you need to configure the WI address and the floating IP address. Which components does this floating IP address belong to?

- A. ITA
- B. vLB
- C. HDC
- D. WI

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 159

In the FusionSphere cloud DC scenario, the following must exist before creating a routing network:

- A. Internet network
- B. VxLAN network
- C. Internal network
- D. External network

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 160

Long-term operation of the Windows operating system may have problems such as insufficient memory and high CPU resources occupied by the process. It is recommended that the system administrator restart the user virtual machines in batches every 3-5 days.

- A. True
- B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 161

FusionCompute supports distributed virtual switching and can provide independent network planes for virtual machines. Like physical switches, different network planes are isolated by VLANs.

- A. True
- B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 162

When creating a Huawei Desktop Cloud Linux infrastructure virtual machine, which of the following descriptions is incorrect?

- A. When selecting storage resources, it is recommended to use high-performance storage instead of low-performance storage such as NL-SAS or SATA
- B. When selecting storage resources, you can choose to map data storage resources through SSD cards, U disks, etc.
- C. If virtual machines are deployed in active and standby mode, it is recommended that the two virtual machines be deployed on different CNA nodes in the management cluster
- D. It is recommended to select "virtio" for the network card type

Answer: B (LEAVE A REPLY)

NEW QUESTION: 163

Fusionsphere's management nodes are all deployed in the main, which improves the reliability of the management nodes without the need to purchase additional databases and OS.

license, unless the customer has special requirements

- A. Wrong
- B. Yes

Answer: B (LEAVE A REPLY)

NEW QUESTION: 164

Which of the following statements about the concept of management components is wrong?

- A. License server is the license management and issuance system, responsible for HDC license management and issuance

- B. GaussDB provides databases for ITA and HDC to store data and information
- C. ITA can handle virtual machine login requests
- D. TCM is a desktop management system of Shengteng Xifan. The administrator conducts daily management of TC through TCM

Answer: C (LEAVE A REPLY)

NEW QUESTION: 165

Regarding the description of the Huawei Desktop Cloud solution, which of the following descriptions is incorrect?

- A. The virtualization platform used by Huawei's desktop cloud solution is compatible with hardware equipment from other manufacturers.
- B. Huawei desktop management system is completely deployed based on Linu, and the management system needs to add domains.
- C. Huawei desktop cloud solution can simplify operation and maintenance. Improve operation and maintenance efficiency, users can solve most of the operation and maintenance problems.
- D. The security of Huawei's desktop cloud solutions is aimed at meeting the security standards of various countries. In addition to corporate security solutions, it supports the security requirements of many high-security industries.

Answer: (SHOW ANSWER)

NEW QUESTION: 166

Which of the following description about the daily operation and maintenance specifications of Huawei Desktop Cloud is incorrect?

- A. If the license is about to expire, you need to process it in time and apply for a new license.
- B. Pay attention to the number of unregistered users. If there is a large area of unregistered users, analyze the reasons and deal with it urgently.
- C. After the storage resource and computing resource utilization rate exceeds 100%, start the expansion task.
- D. Emergency alarms such as abnormal server heartbeat, restart, and abnormal data service need to be handled in time.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 167

Which operation cannot be listed by FusionCompute administrator through the task center?

- A. View the log path of task execution.
- B. View the progress of task execution.
- C. Before a task is completed, the task can be cancelled.
- D. For tasks with tasks, you can view the success or failure of subtasks.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 168

If the user accidentally disables the network of the virtual machine, the virtual machine will not be able to log in through the HDP protocol, but it can be Log in to this VM, and After enabling the network.

- A. Wrong
- B. Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 169

Which of the following is not included in the main functions of OpenStack?

- A. Human interaction
- B. Application lifecycle management
- C. Resource abstraction
- D. Virtualization software function

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 170

The recovery methods for the machine unable to connect include (multiple choice)

- A. Restart ITA components
- B. Restart the user virtual machine
- C. Use the desktop cloud link maintenance tool to repair
- D. Use the virtual machine self-service maintenance platform to repair

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 171

Huawei cloud computing environment supports hot migration of virtual machines in the scenario where the source host and the destination host are heterogeneous CPUs

- A. Wrong
- B. Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 172

Which of the following batch operations cannot be performed on FusionCompute?

- A. Migrate virtual machines in batches
- B. Add hosts in batches
- C. Associate storage resources in batches
- D. Binding network ports in batches

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 173

After creating a virtual machine with the A image, you can delete the A image without affecting the use of the virtual machine.

- A. Correct
- B. Error

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 174

When installing the FusionAccess management component, after creating a Linux infrastructure virtual machine, which description about the operation of setting the virtual machine self-recovery attribute is incorrect?

- A. After restarting the VRM process, you need to log in to FusionAccess again
- B. The VRM process needs to be restarted after setting the virtual machine self-recovery attribute operation
- C. Only need to set the virtual machine self-recovery attribute operation for the virtual machine where the ITA component is located
- D. After setting the self-recovery properties of the virtual machine, the virtual machine needs to be "forced off" and then "powered on".

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 175

In HUAWEI Desktop Cloud, the possible reasons for the desktop virtual machine registration failure include?

(Multiple choice)

- A. The network status between the virtual machine and HDC is abnormal
- B. The time between the two HDC servers is not synchronized, the difference is more than 3 minutes
- C. HDC's fqdn is not configured or configured incorrectly
- D. HDC server time jumps

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 176

When the user logs in to the virtual machine, the FusionAccess infrastructure virtual machine (including HDC, WI.DB, and ITA components) is shut down.

Logged in user

Can still work normally

A. Wrong

B. Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 177

Which of the following descriptions of domains is incorrect?

A. The AD database is stored in the domain controller

B. Users in a domain can only log in on a certain computer, not on other computers in the domain

C. A domain requires at least one domain controller

D. AD database needs to be synchronized between multiple domain controllers

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 178

With the development of cloud computing, the pace of cloud data center construction has not been accelerated, and the traditional data center construction model is not affected by cloud computing technology.

ring:

A. Wrong

B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 179

In the HUAWEI Desktop Cloud system, which of the following are the reasons of the failure of desktop virtual machine registration? (Multiple choice)

A. The DHCP component is abnormal.

B. The configuration information of the forward lookup zone in the DNS server is modified.

C. The time between the two HDC servers is not synchronized.

D. The network status between the virtual machine and HDC is abnormal.

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 180

The main functions of ManageOne ServiceCenter are:

(Multiple choice)

A. Resource monitoring

B. Cloud service application

- C. Cloud service approval
- D. Resource access

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 181

What functions does the Swift role provide in FusionSphere OpenStack?

- A. Provide image management
- B. Provide authentication
- C. Provide block storage services
- D. Provide object storage services

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 182

Which of the following descriptions about the FusionCompute storage model is correct?

- A. There is a one-to-one correspondence between data storage and storage devices.
- B. One storage resource can create multiple storage devices.
- C. The storage device can create multiple data stores.
- D. Multiple storage resources can jointly create a storage device.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 183

Potential system problems can be discovered by monitoring the usage status information of user virtual machines. Which indicators of the virtual machine need to be monitored?

(Multiple choice)

- A. Distribution status
- B. Normal number of registrations
- C. Running status
- D. Performance information

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 184

FusionSphere's management nodes are all deployed in active and standby mode, which improves the reliability of management nodes without the need to purchase additional databases and OS.

License, unless the customer requires special requirements ().

A. Yes

B. Wrong

Answer: (SHOW ANSWER)

NEW QUESTION: 185

When creating a desktop group in the FusionAccess system, when the desktop group is proprietary, the optional virtual type can only be a complete copy.

A. FALSE

B. TRUE

Answer: B (LEAVE A REPLY)

NEW QUESTION: 186

After creating a virtual machine with the A image, you can delete the image without affecting the use of the virtual machine.

A. Error

B. Correct

Answer: B (LEAVE A REPLY)

NEW QUESTION: 187

Which component of vLB cannot be deployed on the same virtual machine?

A. vAG

B. WI

C. HDC

D. ITA

Answer: (SHOW ANSWER)

NEW QUESTION: 188

In fusioncompute, CPU resources are displayed in GHz:

A. Yes

B. Wrong

Answer: B (LEAVE A REPLY)

NEW QUESTION: 189

Huawei's distributed virtual switching supports the function of pure software virtual switching based on open source Open vSwch, and provides virtual switching of smart network cards that support complete virtual switching offloading.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 190

Which of the following descriptions about virtual machines are correct? (Multiple choice)

A. A virtual machine is a virtual computer running an operating system and applications.

B. When creating a virtual machine, the creation location can be selected as a host or a cluster.

C. The CPU resources of the virtual machine can come from two different hosts.

D. After the virtual machine is created, you can migrate the virtual machine.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 191

Provides an interface for back-end storage devices, and different fast-device service vendors provide drivers to convert Open operations into storage.

A. Error

B. Correct

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 192

Cloud data center is equivalent to virtualized data center ().

A. Wrong

B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 193

The goal of CPU virtualization is to enable the instructions on the virtual machine to be executed normally, but it does not require the efficiency to be close to that of the physical machine.

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 194

Before creating a FusionCare collection task, you must ensure that the client time, FusionCare server time and the machine time of the collected node are consistent, otherwise, abnormal information collection may occur.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 195

For computing virtualization, which of the following descriptions is correct (multiple choice)

- A. With virtualization, physical machines are no longer needed
- B. Computing virtualization can realize the reuse of computing resources
- C. Virtual machines can run operating systems and applications like physical machines
- D. With virtualization technology, one physical machine can run multiple virtual machines at the same time

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 196

Which of the following descriptions of CPS in FusionSphere OpenStack is correct?
(Multiple choice)

- A. SWH is responsible for package management
- B. NPC is responsible for Host information collection and reporting
- C. MPS is responsible for Host management and service deployment management
- D. DS is responsible for Host OS configuration loading

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 197

Deploying VMs based on templates in FusionCompute does not inherit from templates and can be customized ().

- A. The number of network cards of the virtual machine
- B. Virtual machine disk number, capacity and bus type
- C. Virtual machine disk capacity
- D. The memory size of the virtual machine

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 198

Which of the following are the key technologies of EVS? (Multiple Choice)

- A. DPDK high-speed data channel
- B. Use large page memory

- C. vhost-user technology
- D. Polling and forwarding, reducing scheduling overhead

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 199

The following description of the Cinder ship storage volume process is wrong:

- A. cinder-scheduler consumes and creates storage volume messages from its own message queue, and reports regularly according to each volume Ability and volume letter Information, select a host to create a storage volume
- B. cinder-volume consumes and creates storage volume messages from its own message queue, and calls the driver interface to create storage volume, latest update
- C. After the user issues a storage volume creation request, Cinder directly returns the volume information (production volume id)
- D. After cinder-scheduler is scheduled to the host, the message is delivered to the corresponding volume queue

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 200

The differential disk of the linked clone virtual machine saves the temporary system data of the user's work. As long as the virtual machine is closed, the differential disk can be automatically cleared.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 201

OpenStack's northbound API is a SOAP type interface

- A. Error
- B. Correct

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 202

In FusionSphere OpenStack, what does "physical network" define?

- A. The binding relationship between the physical network and the switch
- B. Mapping relationship between virtual network and physical network
- C. Mapping relationship between virtual network and physical network port
- D. The binding relationship between the virtual network and the external network

Answer: B ([LEAVE A REPLY](#))
