NEW QUESTION: 1

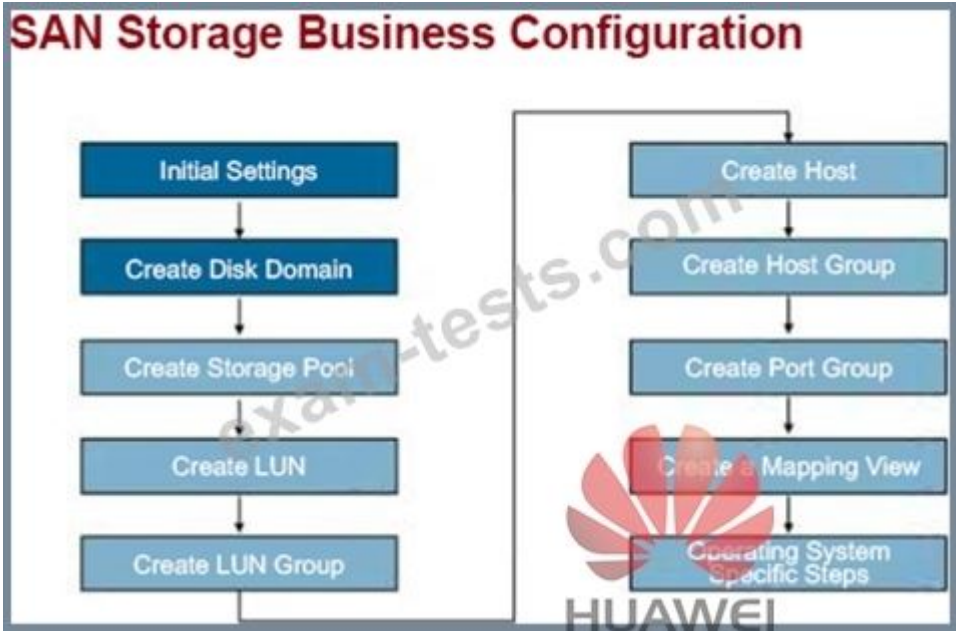

When the RPO time requirement is at the minute level, the traditional tape backup method can be used.

- A. False
- B. True

Answer: (SHOW ANSWER)

NEW QUESTION: 2

Which one of the following options is in the correct order of the basic business configuration process for data center block storage?

1. Create a mapping view.
2. Create a storage pool.
3. Create a hard disk domain.
4. Create LUNs and create LUN groups.
5. Create a host group.
6. Log in to Device Manager

- A. 4->5->2->3->1->6
- B. 6->3->2->4->5->1
- C. 3->2->4->5->1->6
- D. 6->2->3->4->5->1

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 3

Which three data centers refers to 3DC in the disaster recovery solution? (Multiple choice)

- A. Data Center
- B. Remote disaster recovery center
- C. Production Center
- D. City Disaster Recovery Center

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which of the following storage system architectures has its own file system?

- A. FC SAN
- B. IPS AN
- C. DAS
- D. NAS

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

The QoS of the file system supports IO priority configuration and also supports policy configuration.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 6

Regarding the four disaster recovery modes of active-active, hot standby, warm standby, and cold standby, which of the following statements is wrong?

- A. The biggest feature of Multi Live is that it will not cause waste of data center resources, and data centers all carry application services.
- B. Active-active technology can realize that both the active and standby data centers provide external services. During normal operation, the services of the two data centers can be load-shared based on weights. There is no distinction between active and standby. They respond to some users separately. The weights can be divided by region, data center service capacity or external bandwidth
- C. The hot standby service is responded by the main data center. When the service is unavailable due to a data center failure, the service can be automatically switched to the backup data center within the specified RTO time
- D. Warm backup technology, when a data center failure causes the service to be unavailable, the service can be automatically switched to the backup data center within the specified RTO time

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 7

LAN Free and Server Free are the backup networking modes that have little impact on host performance.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Which is the correct description of the FTP file transfer protocol?

- A. Port 21 create control information by default
- B. Cannot be used in Linux scenarios
- C. Transmission based on TCP protocol
- D. Port 21 transmits data by default

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

In the Huawei OceanStor V3 storage system, what kind of protocol is used for the mirroring channel between the controllers?

- A. IB
- B. PCI-E
- C. F COE
- D. iSCSI

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Which of the following are the business models of cloud computing? (Multiple choice)

- A. SaaS
- B. IaaS
- C. MaaS
- D. PaaS

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 11

If a company's business is to write large-scale data randomly into LUNs, which initial capacity allocation strategy and which data migration strategy are recommended?

- A. Priority allocation from the high-performance tier: migration to the low-performance tier
- B. Automatic allocation: migration to low-performance tier
- C. Priority allocation from the low-performance tier: migration to the high-performance tier
- D. Priority allocation from the capacity tier: automatic migration

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

There are two statements about backups as follows:

Statement 1: The data backed up on the tape can be used for data recovery at any time, but only the historical data at the time of the backup can be recovered, not the data at the time of the failure.

Statement 2: Using tape as the backup medium is the highest RTO backup method.

A. Statement 1 is correct, Statement 2 is wrong

B. Statement 1 is wrong, Statement 2 is wrong

C. Statement 1 is wrong, Statement 2 is correct

D. Statement 1 is correct, Statement 2 is correct

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

Data management is the process of using computer hardware and software technology to effectively collect, store, process and apply data. In chronological order, what phases can data management be divided into? (Multiple Choice)

A. Manual management

B. File system management

C. Big data management

D. Traditional database system management

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 14

In the Huawei OceanStor V3 storage system, which of the following statement of Smart Thin LUN is correct?

A. When creating a thin LUN, it cannot be allocated a capacity larger than the free space available in the storage pool.

B. You can create a Thin LUN without specifying the initial capacity allocation

C. The types of LUNs in a storage pool must be the same, either all thin LUNs or thick LUNs

D. Thin LUN cannot be converted to Thick LUN

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

Which of the following description about CIFS and NFS sharing is incorrect? (Multiple choice)

* If the file system has been set as a CIFS share and then an NFS share is added, the NFS share can only be set as read-only.

* If the file system has been set as an NFS share and then a CIFS share is added, the CIFS share can only be set as read-only.

Protocol	Transfer Protocol	Client	Failure Effect	Efficient	Supported operating system
CIFS	TCP/IP	Operating system integration does not require other softwares	Big	High	Windows
NFS	TCP or UDP	Need other softwares	Small: The connection can be automatically restored when the interactive process is interrupted.	Low	Linux

- * CIFS is a network-based sharing protocol, which requires high reliability of network transmission, so it usually uses TCP/IP. NFS is used for independent transmission, so it uses TCP or UDP.
 - * One disadvantage of NFS is that the client must be equipped with dedicated software. CIFS is integrated into the operating system and no additional software is required.
 - * NFS is a stateless protocol. And CIFS is a stateful protocol. After NFS connection fails, the connection can be automatically restored, but CIFS cannot. CIFS only sends a little redundant information, so it has a higher transmission efficiency than NFS.
- A.** Regardless of CIFS or NFS protocol, the client is required to perform file format conversion.
- B.** NFS is a stateless protocol, while CIFS is a stateful protocol. NFS can automatically recover from link failures, while CIFS cannot
- C.** One disadvantage of CIFS is that Windows clients must install professional software
- D.** CIFS is a protocol based on network sharing, which has high requirements on the reliability of network transmission, so TCP protocol is usually used for transmission

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 16

HA (High Availability) refers to the ability to continue to access applications in the event of a single component failure of the local system. In a data center, the downtime is one hour in a year. What is the HA of this data center?

- A.** 0.9998858
- B.** 0.999999
- C.** 0.99999
- D.** 0.998934

Answer: A ([LEAVE A REPLY](#))

Valid H13-611_V4.5 Dumps shared by BraindumpsPass.com for Helping Passing H13-611_V4.5 Exam! BraindumpsPass.com now offer the **newest H13-611_V4.5 exam dumps**, the BraindumpsPass.com H13-611_V4.5 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-611_V4.5 dumps with Test Engine here:
https://www.braindumpsPass.com/Huawei/H13-611_V4.5-practice-exam-dumps.html (538 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)

NEW QUESTION: 17

Which one of the following operations is a daily maintenance item in the data center storage?

- A.** Check the room environment
- B.** Inspect storage devices
- C.** View and handle alarms
- D.** Check the internal environment of the rack

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 18

Software RAID realizes unified management of disks through RAID card.

- A.** True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 19

Which of the following statements about RAID write penalties are correct? (Multiple Choice)

A. For RAID 5, compared with RAID 1, the write penalty is worse than RAID 5's read performance

B. RAID 6 has two parity bits. Compared with RAID 5, it will suffer a greater write penalty

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 20

Which of the following descriptions about DAS is wrong?

A. External DAS can be connected to the server that accesses them through FC protocol or SCSI protocol.

B. DAS is a designated storage device directly connected to the server that uses them.

C. DAS is divided into internal DAS and external DAS

D. The hard disk inside the server is not DAS

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 21

The earliest form of external storage is to connect some independent disks in series. Only increasing the capacity cannot provide security. Which of the following description is correct?

A. FAS

B. SAN

C. JBOD

D. NAS

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 22

IP drift supports drifting between different types of interface modules.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

Double write means that two storages are written at the same time, and the completion of the writing is signaled to the host separately. One storage terminal fails and cannot be restored to the host, and the business is interrupted.

A. TRUE

B. FALSE

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 24

Which of the following about the Thin LUN reading data process is correct?

- A. Direct-on-read
- B. Capacity-on-write
- C. Direct-on-time
- D. Capacity-on-read

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 25

With the advent of the era of big data, storage technology is also undergoing changes. Which of the following is correct about the changes in storage technology? (Multiple Choice)

- A. The file system has evolved from a local system to a cluster file system and a distributed file system
- B. Traditional NAS faces PB-level data, and complex volume management leads to uneven capacity allocation
- C. Large-scale expansion capability is a characteristic of mass storage
- D. Mass storage is characterized by more complex file systems and more complex management

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 26

Huawei's all-flash storage system uses the SmartMatrix architecture to achieve full interconnection between the front and back ends, and the failure of any one controller does not affect the normal operation of the business.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 27

The data compression feature refers to the reduction of the transmission processing and storage efficiency of the system by reorganizing the data and deleting duplicate data blocks without losing information.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

The server installed Linux operating system accesses the disk array based on the RAID 5 strategy, and the access path sequence is:

- A. Application System->File System->Volume->I/O Subsystem->RAID Controller->Disk
- B. File System->Application System->Volume->I/O Subsystem->RAID Controller->Disk
- C. Application System->File System->Volume->RAID Controller->I/O Subsystem->Disk
- D. Application System -> File System -> I/O Subsystem -> Volume -> RAID Controller -> Disk

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 29

Statement 1: The file system of SAN storage is deployed on the storage side, and the file system of NAS storage is on the host side.

Statement 2: Dynamic hierarchical storage can realize data migration between storage media with different performance

- A. Statement 1 is wrong, Statement 2 is correct

- B. Statement 1 is correct, Statement 2 is wrong
- C. Statement 1 is correct, Statement 2 is correct
- D. Statement 1 is wrong, Statement 2 is wrong

Answer: (SHOW ANSWER)

NEW QUESTION: 30

When the disk is read and written, the sector is the smallest addressing unit. You can write a piece of data to the first half of a sector, and then write a piece of data to another sector.

- A. False
- B. True

Answer: A (LEAVE A REPLY)

NEW QUESTION: 31

The same source LUN can form multiple different Hyper Clone Pairs with different target LUNs. Only one target LUN can be added to the Hyper Clone Pair.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

Valid H13-611_V4.5 Dumps shared by BraindumpsPass.com for Helping Passing H13-611_V4.5 Exam! NEW QUESTION: 32

Comparing NAS storage system and file server, what are the advantages of NAS storage system? (Multiple Choice)

- A. Large storage space
- B. High data security
- C. High stability and high reliability
- D. Diversified services and powerful functions

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 33

Unstructured data is a two-dimensional table structure to logically express the realized data.

- A. True
- B. False

Answer: (SHOW ANSWER)

NEW QUESTION: 34

After a design company purchases a NAS file storage system and configures CIFS sharing services, which of the following is implemented by this device? (Multiple Choice)

- A. Unified management of business storage of various departments
- B. Support file sharing with project staff
- C. Help the designer to back up data materials
- D. Assign different access rights to employees in different positions

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 35

Which of the following descriptions about Huawei RAID 2.0+ technology is correct? (Multiple choice)

- A. The user can set the "RAID strategy" for each storage tier in the storage pool.
- B. The hard disk types of each storage layer in the hard disk domain are the same
- C. Grain is the smallest granularity of data migration and the basic unit that constitutes Thin LUN
- D. The hard disk space is divided into fixed-size blocks

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 36

The capacity and volume of computer hard disks are constantly changing during the development of computer hard disks. Which of the following is the size of the mechanical hard disk used in Huawei storage products?

- A. 1.8 inches
- B. 3.5 inches
- C. 5.25 inches
- D. 8 inches

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 37

What is the measurement index of a storage system's performance? (Multiple choice)

- A. Delay
- B. IOPS
- C. Capacity
- D. Bandwidth

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 38

Common backup topologies include Lan-Base, Lan-Free, and Server-Base.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 39

If the disaster recovery center in the same city fails, the production center in the cascade networking mode will lose all the backup sites.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

Xiao Wang, an employee of a small company, uses the CIFS protocol to access shared files on the Linux application server supported by his company's storage system.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

Among the following storage functions, which of the following can provide customers with data disaster recovery functions? (Multiple choice)

A. Hierarchical storage

B. Cache prefetch

C. Remote replication

D. Snapshot

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 42

Which of the following statement of Quota tree is correct?

A. Quota tree can be renamed and deleted when shared by agreement

B. Ordinary users can perform quota management on the number or capacity of files under Quota Tree

C. Quota tree is a first-level directory under the file system,

D. Can only be created, deleted, and renamed by the administrator through the command line or GUI management interface, ordinary users can delete the empty Quota tree

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 43

The management IP address of a storage device is 192.168.5.12. Which of the following needs to be entered by Engineer A in the browser to log in correctly?

A. 192.168.5.12

B. http://192.168.5.12

C. https://192.168.5.12

D. https://192.168.5.12:8088

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 44

Incremental backups must rely on the last full backup and the last incremental backup to fully restore the data during data restoration. Data reconstruction during restoration is slower than a full backup, and the restoration window is larger.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 45

Taking Huawei OceanStor all-flash memory as an example, which of the following understandings about a certain structure of all-flash storage software are correct? (Multiple Choice)

A. Able to realize basic data storage and reading and writing functions through basic function control software

B. Able to realize the management function of the storage system through the management function control software

C. Able to support hot and cold data, intelligently able to classify data into different storage tiers

D. Able to realize various advanced functions such as backup, disaster recovery and performance tuning through value-added function control software

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 46

Database data belongs to structured data, and audio and video data belong to unstructured data. At present, the growth of storage space mainly comes from the rapid growth of unstructured data.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 47

When using the NFS protocol, adding a client and setting read and write permissions will have an impact on performance.

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 48

Regarding the common protocols used by the storage, which of the following statement is correct?

A. SCSI protocol does not support hot plug.

B. FC protocol compatibility is good, long transmission distance.

- C. ATA protocol uses parallel interface, which can only be used internally, and there are requirements for cable length.
- D. A SAS domain can connect 15 devices.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 49

Which of the following are the characteristics of big data? (Multiple choice)

- A. Write once, modify many times
- B. The value of data is uncertain
- C. Large capacity and fast growth
- D. Long storage time

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 50

In a database, all small IO requests, the engineer should configure

- A. raid 0
- B. raid 3
- C. raid 5
- D. raid 6

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

What steps did the high-end storage architecture go through? (Multiple Choice)

- A. Hi-star architecture
- B. Direct connection
- C. Virtual matrix
- D. Bus structure

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 52

Some file types in the computer file system, such as XML, HTML, and Json, can be classified as semi-structured data according to the data type.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 53

A media company purchased storage equipment from multiple manufacturers during the construction of its data center. The chief technology officer hopes to centrally manage these storage devices through storage virtualization. Which of the following is not a function of storage virtualization?

- A. Hide the complexity of the physical device from the user
- B. Support unified deployment management functions

- C. Reducing the limitation of storage physical capacity
- D. Enable the server to directly access the storage hardware

Answer: (SHOW ANSWER)

NEW QUESTION: 54

Which of the following has the highest performance?

TABLE 2. Data Access Priorities for SCSI Addresses

Priority	SCSI Address	SCSI Device Name
Highest	7	SCSI-2 Fast/Wide PCI Adapter / Ultra SCSI Fast/Wide PCI Adapter
	6	
	5	
	4	
	3	
	2	
	1	
	0	
	15	
	14	
	13	
	12	
	11	
	10	
	9	
Lowest	8	

- A. MLC
- B. QLC
- C. SLC
- D. TLC

Answer: (SHOW ANSWER)

NEW QUESTION: 55

The data of a certain company is archived data and online business data. If the cost of using SSD solid state drives is high, and the use of NL-SAS hard drives cannot meet the performance requirements, what are the following technologies that cannot meet user needs? (Multiple Choice)

- A. Smart Clone
- B. Smart Tier
- C. Smart Metro
- D. Smart Cache

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 56

SmartKit contains all kinds of tools required for IT equipment deployment, maintenance, upgrades, etc., which can help product users, service engineers and maintenance engineers to accurately operate the equipment in the above process, reduce the difficulty of operation, and improve work efficient.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 57

According to the storage access rate, which types of storage devices can be divided into? (Multiple Choice)

- A. Unified storage
- B. Offline storage
- C. Online storage
- D. Nearline storage

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 58

In the Huawei OceanStor V3 storage system, a customer plans to deploy a business system. The database uses Oracle data. The average data block size is 16KB. When using the Smart Tier feature, which of the following data migration granularity is the best?

- A. 512KB
- B. 4MB
- C. 32MB
- D. 64MB

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 59

What are the authentication methods of CIFS? (Multiple Choice)

- A. Local authentication
- B. Global authentication
- C. Username and password
- D. AD domain authentication

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 60

Which of the following are commonly used management software? (Multiple Choice)

- A. Smartkit
- B. eService
- C. Device Manager
- D. eSight

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 61

Semi-structured data is generally self-describing, and the structure and content of the data are mixed, and there is no obvious distinction.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 62

A company uses the CIFS protocol for file sharing, and uses the Homedir sharing method in accordance with the security policy to provide all users with space for accessing folders and writing.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 63

What are the data protection methods of RAID? (Multiple Choice)

- A. Parity check algorithm
- B. Data striping method
- C. Mirror
- D. JBOD

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 64

①Scale-out, horizontal expansion, can improve capacity and performance at the same time

②Scale-up, horizontal expansion, cannot improve capacity and performance at the same time (Multiple Choice)

- A. Description 1 is correct
- B. Description 2 is correct
- C. Description 1 is wrong

D. Description 2 is wrong

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 65

Which one of the following statements is correct?

A. S2200V 3 can support SSD, SAS, SATA hard drives

B. NLS AS/SATA hard disks are suitable for data protection using RAID 6 and SAS hard disks are suitable for data protection using RAID 5

C. The available space of 6 200G hard disks as RAID 5 is 1200G

D. OceanStor V3 series products support RAID0/RAID 1/RAID 5/RAID 10, but not RAID 6

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 66

A certain bank will launch a set of business systems, which have very high performance and security requirements. The database uses an Oracle database and plans to deploy the Oracle database to a storage system. Then, when creating a RAID group for the Oracle database, the optimal RAID strategy should be:

A. RAID 1

B. RAID 10

C. RAID 5

D. RAID 6

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 67

Which statements are correct about consistency group? (Multiple Choice)

A. Consistency group is just to facilitate the management of the replication relationship of multiple LUNs

B. A member failure of the consistency group will cause all members of the consistency group to be unavailable

C. Multiple LUNs with write dependency on the primary end must be configured with a replication consistency group to ensure that the secondary LUN also meets the write dependency

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 68

The CoE protocol means to encapsulate the FC protocol into TCP/IP protocol package and transmit it on the Ethernet.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 69

The system construction of enterprise A is the main and backup centers. Recently, an upgrade is planned. When the business is not busy next week and Saturday, the business will be switched from the primary site to the secondary site, and then the primary site will be upgraded. During the switchover process, Which of the following are correct? (Multiple Choice)

A. Restart the slave device

- B. Set the slave LUN to read-write status
- C. Perform master-slave switching operation
- D. Split remote replication pair

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 70

The SCSI protocol can be used not only for the communication between the host and the disk, but also for the communication between hosts, physical tape libraries, and optical disks, etc.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 71

Which of the following is not an IP SAN component?

- A. Storage devices with iSCSI interface
- B. FC switch
- C. NIC
- D. Twisted pair

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 72

Which of the following options are not the constituent elements of the SAN architecture?

- A. Server
- B. Back-end storage system
- C. Router
- D. Switch

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 73

Regarding data-level, application-level, and business-level disaster recovery, which of the following statements is correct?

- A. Regarding TCO, data-level < application-level < business-level
- B. Regarding RTO, data-level < business-level < application-level
- C. Regarding RTO, data-level < application-level < business-level
- D. Regarding TCO, business-level < data-level < application-level

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 74

Regarding the description of the hard disk domain in Huawei RAID 2.0+ technology, which of the following statement is incorrect?

- A. In a disk domain, disks of the same type must be of the same size and rotational speed
- B. A hard disk can only belong to one hard disk domain
- C. OceanStor V3 storage system can create one or more disk domains

D. A hard disk domain is a group of hard disks

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 75

Regarding the NFS write mode in the Huawei OceanStor V3 storage system, which of the following is correct?

A. The system defaults to asynchronous write mode

B. The system defaults to synchronous write mode

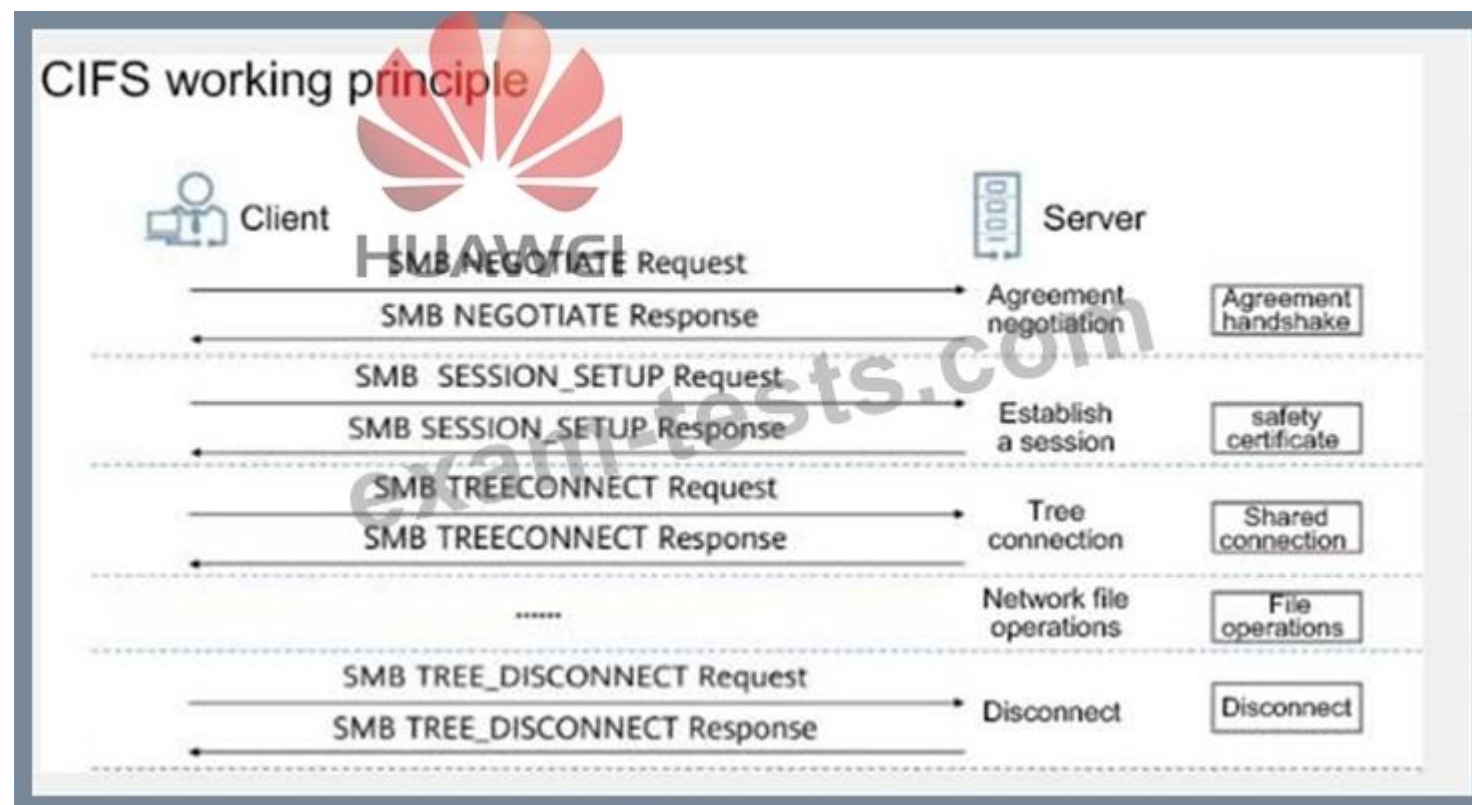

C. Synchronous mode is to write the shared data to the cache, and then write it to the disk

D. Asynchronous mode is to write shared data to the hard disk immediately

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 76

The engineer believes that the storage engine writes locally, that is, after the data is issued by I/O, the engine writes directly to the local hard disk.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

Valid H13-611_V4.5 Dumps shared by BraindumpsPass.com for Helping Passing H13-611_V4.5 Exam! BraindumpsPass.com now offer the **newest H13-611_V4.5 exam dumps**, the BraindumpsPass.com H13-611_V4.5 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-611_V4.5 dumps with Test Engine here:

NEW QUESTION: 77

LUN and the file system will not be in the same storage pool, nor in the same hard disk

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 78

The failure of any one hard disk in the RAID 10 level RAID will not affect data access.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 79

Engineer C maps the storage to the file server for storing various files of the enterprise. One day, the file system was attacked by a virus and the file could not be opened normally. In order to allow the files to be accessed normally, storage engineer C performs a snapshot rollback operation. Which of the following descriptions is wrong?

- A. Snapshot rollback can quickly restore data
- B. Snapshot rollback may cause some data loss
- C. When there is no host to read or write, the data in the snapshot is rolled back to the source volume in turn
- D. During the snapshot rollback process, if data is written to the source LUN, perform the write source LUN operation first, and then perform the rollback operation

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 80

What technology is used to realize the conversion between Thick LUN and Thin LUN?

- A. LUN migration
- B. LUN copy
- C. Clone
- D. Volume mirroring

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 81

Which of the following is wrong about the features of OceanStor V3?

- A. Cloning provides physical full copy, incremental copy
- B. Cloning does not support cross-engine LUN cloning. The master and slave LUNs must be under the same engine
- C. LUN copy supports incremental LUN copy, and LUN copy should be done offline
- D. LUN copy can support data backup and migration within and between arrays (including homogeneous and heterogeneous)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 82

In Huawei storage (such as Huawei OceanStor hybrid flash memory), which of the following measures is taken by the asynchronous remote replication function to ensure data consistency? (Multiple Choice)

- A. Production of DCI
- B. The primary LUN generates a snapshot
- C. Generate snapshot from LUN
- D. Multiple connections between master and slave storage

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 83

Statement 1: NAS file system is managed by storage or server that provides resources.

Statement 2: The file system of the SAN is managed by the host itself.

- A. Statement 1 is correct, Statement 2 is correct
- B. Statement 1 is correct, Statement 2 is wrong
- C. Statement 1 is wrong, Statement 2 is correct
- D. Statement 1 is wrong, Statement 2 is wrong

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 84

Which of the following storage services does Huawei distributed storage (such as Huawei OceanStor100D) support? (Multiple Choice)

- A. HDFS storage
- B. File storage
- C. Chain storage
- D. Object storage
- E. Block storage

Answer: A,B,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 85

CIFS share permissions from large to small are as follows: 1. "Prohibit", 2 "Read and Write" 3 "Full Control" 4 "Read Only"

- A. 3->4->2->1
- B. 2->1->4->3
- C. 1->2->3->4
- D. 1->3->2->4

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 86

Distributed storage uses system storage on the cloud and only provides object storage. If you need file storage, you need to purchase NAS equipment separately.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 87

The full name of RPO used in disaster recovery backup is:

- A. Recover Plan Objective
- B. Restore Point Objective
- C. Recovery Point Objective
- D. Return Purchase Order

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 88

Regarding Huawei's OceanStor V3 storage dynamic tiered storage technology, which of the following descriptions is wrong?

- A. Smart Tier automatically and dynamically moves data to storage media of different performance according to the different activity levels of the data
- B. Smart Tier data movement based on configuration data migration strategy
- C. Data statistics, analysis and data migration of Smart Tier features will affect business continuity and data availability
- D. Smart Tier calculates and analyzes the activity of the data to determine the activity level of the data

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 89

Which of the following descriptions of RAID 5 is correct? (Multiple choice)

- A. RAID 5 uses X OR algorithm to check
- B. RAID 5 allows up to two member disks to fail at the same time without data loss
- C. RAID 5 uses striping to write data
- D. RAID 5 has a fixed check disk

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 90

According to the changes in the amount of backup data, the types of backups can be divided into _____. (Multiple choice)

- A. Differential backup
- B. Real-time backup
- C. Full backup
- D. Incremental backup

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 91

Huawei OceanStor V3 SmartTier feature can be used to place data on the specified disk type.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

Valid H13-611_V4.5 Dumps shared by BraindumpsPass.com for Helping Passing H13-611_V4.5 Exam! NEW QUESTION: 92

When deploying random small IO-based database services on storage, which RAID type should be more appropriate? Why?

- A. RAID 5, no write penalty
- B. RAID 5, no read penalty
- C. RAID 10, no read penalty
- D. RAID 10, no write penalty

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 93

What conditions should be considered for the device backup bandwidth? (Multiple choice)

- A. Daily quantity increase
- B. Backup staff
- C. The size of the initial data
- D. Backup cycle

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 94

The NAS engine and the storage unit are interconnected by an Ethernet switch.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 95

Development trend of cloud data center:

1. Business-driven distributed cloud data center
2. Distributed cloud data center
3. Enterprise chimney
4. Cloud data center

- A. 3412
- B. 1234
- C. 3214
- D. 2413

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 96

Which of the following descriptions of NAS is correct?

Description 1: NAS is always based on file sharing.

Description 2: The distance of the network connection affects the performance of the NAS.

- A. Both description 1 and description 2 are correct.
- B. Both description 1 and description 2 are wrong
- C. Description 1 is wrong, description 2 is correct
- D. Description 1 is correct, description 2 is wrong

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 97

A company has a variety of services such as mail and online storage, and has limited storage space. It plans to use Smart Thin technology to optimize storage space.

Regarding Smart Thin, which of the following statements are correct? (Multiple Choice)

- A. Smart Thin virtualizes storage resources
- B. Smart Thin does not support the creation of LUNs larger than the maximum physical free space of the storage pool
- C. Smart Thin does not allocate all the space in advance, but presents the capacity form larger than the physical storage space to the customer
- D. The implementation of Smart Thin is to allocate on demand

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 98

Which of the following descriptions are correct about SAN and NAS? (Multiple Choice)

- A. Now NAS is geared towards unstructured data storage, such as many department employees for office files and centralized storage
- B. NAS is characterized by putting the server file system in the storage so that the server needs to share data through the network
- C. SAN is more used in data scenarios to store structured
- D. DAS, NAS, SAN are all external storage, so storage resource sharing can be easily realized

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 99

Which of the following statements of RAID 1 is incorrect?

- A. RAID 1 uses X OR algorithm to check
- B. When the data of some member disks is damaged, RAID 1 allows it to quickly recover data from other member disks
- C. RAID 1 writes data to each member disk, and the data on each member disk is the same
- D. Normally, RAID 1 reads data from the data disk and the mirror disk

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 100

When CIFS share permissions are assigned, if a user lives in a different user group, and for a share, the CIFS share grants different permissions to the user group and the user, and the user's permissions are the maximum authority of the user group and user permissions of the user.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 101

Which of the following operating systems can access CIFS shares without installing additional software?

A. AIX

B. FreeBSD

C. Solaris

D. Win 7

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 102

Huawei ocnstor can only be expanded through PCI and Scale-out.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 103

Which of the following RAID levels requires at least 4 hard drives?

A. 5

B. 3

C. 1

D. 6

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 104

If the GE network uses the required bandwidth calculation formula to get <100M/s, which backup network should be selected?

A. LAN-Base

B. LAN-Free

C. NDMP

D. Server-Free

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 105

Converged storage nas and san combine to provide block storage and object storage services, which greatly increases management costs.

A. FALSE

B. TRUE

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 106

Integrated edge storage is mainly used in edge branch application scenarios, such as gas stations and power grids.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

Valid H13-611_V4.5 Dumps shared by BraindumpsPass.com for Helping Passing H13-611_V4.5 Exam! BraindumpsPass.com now offer the **newest H13-611_V4.5 exam dumps**, the BraindumpsPass.com H13-611_V4.5 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-611_V4.5 dumps with Test Engine here: https://www.braindumpsPASS.com/Huawei/H13-611_V4.5-practice-exam-dumps.html (538 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)

NEW QUESTION: 107

The data compression feature saves space by deleting data.

A. TRUE

B. FALSE

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 108

The advantages of SAN for NAS unified storage do not include:

A. Users do not need to care about the capacity utilization issues related to data block and file storage support

B. Users do not need to separately plan SAN and NAS storage capacity

C. Users can freely allocate storage to meet the needs of the application environment

D. Users can realize the functions of NAS by buying a set of SAN

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 109

In a 30 TB storage resource pool, an enterprise created three 10 TB Thin LUN for the online transaction system, mail system and backup system. Since the company has just started, there is very little data on the online transaction system and mail system. The amount of old data that the backup system needs to import is about 20 TB, and the amount of data exceeds the size of the Thin LUN, causing write failure.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 110

The RTO in the metrics for disaster recovery systems refers to the point in time target requirements at which the system and data must be restored after a disaster occurs.

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 111

Regarding the description of the NFS protocol, which is wrong?

A. It is very convenient for users to share through the CZFS protocol to read, write, author and operate files stored in the storage system just like using this machine.

B. Also known as SMB (server message Block) has been released in multiple versions, such as SMB 1.0, SMB 2.0, SMB 3.0, so it needs version matching when using

C. The supported authentication methods are NILMKberos

D. CIFS adopts the B/S architecture model, so the administrator needs to confirm the browsing version when performing attachments.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 112

Which of the following snapshots are correct? (Multiple Choice)

A. Can detect business volume in real time

B. Snapshot recovery technology can be used to detect the business volume of the last month

C. You can use snapshot recovery data to recover data lost by physical problems

D. Can use snapshot technology to test and develop software

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 113

When configuring the hyper metro feature in Huawei storage, the arbitration server can only be deployed on the physical server, not on the virtual machine.

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 114

Regarding the advantages of Huawei RAID 2.0+, which of the following is correct? (Multiple choice)

A. The data is automatically and evenly distributed on the hard disks in the storage pool, avoiding unevenness of the hard disks, thereby reducing the overall failure rate of the storage system

B. The data on a single LUN is distributed to many different hard disks, avoiding hard disk hot spots and greatly improving the performance and capacity of a single LUN.

C. There is no write penalty in RAID 2.0+, which overcomes the impact of write penalty in RAID 5 and RAID 6 levels in traditional RAID technology on LUN write performance, and greatly improves LUN performance

D. Overcoming the performance bottleneck of the target disk (hot spare disk) of traditional RAID reconstruction, so that the write bandwidth of the reconstructed data stream no longer becomes the bottleneck of the reconstruction speed, which greatly improves the reconstruction speed and reduces the failure of double disks. Probability, which improves the reliability of the storage system.

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 115

Which of the following descriptions of the working principle of NFS are wrong? (Multiple Choice)

- A.** In the NFS working process, the request of the client program can be directly sent to the server without RPC.
- B.** RPC service can uniformly manage NFS port commands
- C.** RPC can provide services for sharing data during NFS work.
- D.** The NFS service must be started on the RPC service, otherwise NFS will not be able to register port information with RPC

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 116

When the RTO requirement is within 10 minutes, the traditional tape backup method is not recommended.

- A.** False
- B.** True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 117

How is the information life cycle affected? (Multiple Choice)

- A.** Storage media used
- B.** Business requirements of the enterprise
- C.** Industry regulations
- D.** Government policy

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 118

Which of the following descriptions of distributed storage are correct? (Multiple Choice)

- A.** Realize storage resource pooling and virtualization
- B.** Can support large-scale horizontal expansion
- C.** Expansion in units of nodes, increasing computing power and storage space simultaneously
- D.** Does not support elastic EC data redundancy protection

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 119

A device can only have one WWPN, but there can be multiple WWNNs.

- A.** False
- B.** True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 120

Which of the following statements about storage are correct? (Multiple Choice)

- A. Storage refers to the hard disk
- B. File storage is generally used to save data in data applications such as databases
- C. Storage types include block storage, file storage, and object storage
- D. Storage system includes storage hardware, storage software, and storage solutions

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 121

Smart Tier cannot be enabled for a storage pool composed of a single hard disk type.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 122

The business needs to provide block services and file services. Which of the following is correct? (Multiple Choice)

- A. Support AD domain environment
- B. Both CIFS and NFS are C/S
- C. Support non-domain environment
- D. Support CIFS/NFS server in the same network

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 123

The data backed up by the differential backup is relative to the data added and modified after the last full backup.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 124

Which of the following are Huawei storage solutions? (Multiple Choice)

- A. Archiving solutions
- B. Disaster recovery solution
- C. Copy solution

D. Backup solution

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 125

In the Huawei OceanStor V3 storage system, which one of the following statements about mapping snapshot LUNs is correct?

- A. The snapshot LUN mapped to the host can only be read but not written
- B. All statements above are correct
- C. The activated snapshot LUN can be mapped to the host for reading and writing
- D. Snapshot LUN can only be mapped to the same host as the original LUN

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 126

Which of the following descriptions of NAS solutions are correct? (Multiple choice)

- A. Sharing can be provided externally through the FC network
- B. NAS provides storage resources through file-level data access and sharing
- C. IP network interconnection is adopted between NAS client and NAS storage device
- D. Mainly use CIFS and NFS protocols

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 127

Which of the following descriptions of SAN and NAS are correct? (Multiple choice)

- A. Now NAS is a storage for unstructured data, such as shared file servers used by employees in many departments for key office document sharing and centralized storage.
- B. The characteristic of NAS is to put the file system of the server in the storage, so that the server can share data through the network.
- C. DAS, NAS and SAN are all external storage, so storage resource sharing can be easily realized.
- D. SAN is more used in the database scenario to store this structured data

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 128

Which of the following are the characteristics of cloud storage? (Multiple Choice)

- A. Flexibility
- B. Integration
- C. Open
- D. Vertical expansion

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 129

On which of the following storages the NV ME interface protocol is applied?

- A. SAS
- B. SATA
- C. NL-SAS

D. SSD

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 130

What scenarios can RDMA technology be applied to? (Multiple Choice)

- A.** Data center servers are interconnected through ROCE
- B.** Data center servers are interconnected through Infiniband
- C.** Server and storage are interconnected through Infiniband
- D.** The storage disk enclosure is connected to the hard disk through ROCE

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 131

Statement 1: FC protocol and FCoE protocol have different operating environments, different operating channels, and the same protocol stack.

Statement 2: FCoE can only run on 10GE, which solves the problem of short FC transmission distance and packet drop in IP network.

- A.** Statement 1 is wrong, Statement 2 is wrong
- B.** Statement 1 is correct, Statement 2 is wrong.
- C.** Statement 1 is correct, Statement 2 is correct.
- D.** Statement 1 is wrong, Statement 2 is correct.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 132

Which of the following statements about eservice are correct? (Multiple Choice)

- A.** The management process on the eservice system gathers to maintain the functions of automatic order creation, prediction and prevention.
- B.** The eservice cloud system uses Huawei Cloud to identify faults in advance and reduce the difficulty of remote maintenance.
- C.** The front-end system of eservice is deployed on the client side
- D.** eservice then Huawei Technical Support Center.

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 133

Which of the following statement about the three iSCSI connection methods is correct?

- A.** The connection method of Ethernet card+initiator software does not occupy host resources at all
- B.** TOE network card completes the conversion of iSCSI packets to TCP/IP packets
- C.** The connection method of hardware TOE network card+initiator software reduces the pressure on host resources
- D.** The iSCSI HBA card completes the TCP/IP protocol conversion without occupying host resources at all

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 134

A bank enabled the Smart Tier feature for the storage space of the bill transaction system. During the I/O monitoring process, it was found that the data access written by the business was very high. What are the following configurations that can optimize performance? (Multiple Choice)

- A. Migrate to the low-performance tier
- B. Prioritize capacity allocation from the capacity tier
- C. Migrate to the high-performance tier
- D. Prioritize capacity allocation from the high-performance tier

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 135

The Internet of Things (IoT) is an important part of a new generation of information technology and an important development stage in the "informatization" era.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 136

The advantages and disadvantages of disaster recovery technology at the host layer, network layer and array layer. Which of the following statements is correct? (Multiple choice)

- A. Disaster recovery at the array layer, the arrays at both ends must be products of the same manufacturer, which cannot solve the heterogeneous problem
- B. For host-level disaster recovery, host-level replication will occupy a certain amount of host resources, which will affect the application system
- C. The initial construction cost of network layer disaster recovery is relatively low, and there are more vendors that can provide solutions
- D. Disaster recovery at the host layer is implemented on the host side without considering the compatibility between the underlying devices

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 137

Take Huawei Ocean Stor flash storage products as an example. Which of the following descriptions of indicator lights are correct? (Multiple Choice)

- A. The locating indicator in the control box is steady blue, indicating that the control board is locating
- B. In the control box, the positioning indicator is off, indicating that the control board is not positioned

- C. The warning light in the control phase is amber, indicating that the control has an alarm
- D. The battery button and battery indicator must be separated

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 138

A company belongs to the fields of banking and finance, with a large amount of business data and high security requirements. Which RAID level is suitable for this company?

- A. RAID 1
- B. RAID 10
- C. RAID 5
- D. RAID0

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 139

Which version is used to check RHEL 5 operating system?

- A. find version
- B. c at version
- C. uname -a
- D. show version

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 140

Which of the following descriptions about the technical characteristics of pre-copy are correct? (Multiple Choice)

- A. Pre-copy needs to suspend RAID group business access in advance.
- B. Improve RAID reliability.
- C. Reduce the occurrence of refactoring.
- D. When the number of errors of the suspicious failed disk exceeds the preset threshold, immediately migrate and copy the data on the suspicious failed disk and import it to the hot spare disk.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 141

Which of the following options does the distributed storage network include? (Multiple Choice)

- A. Front-end business network
- B. Back-end storage network
- C. Front-end storage network
- D. Management network

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 142

Which technology's the basic unit is Extent of RAID 2.0+ technology in the storage pool? (Multiple choice)

- A. Statistics

- B. Apply for space
- C. Free up space
- D. Data migration

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 143

A bank needs to ensure data security and use it to transfer large databases.

Which storage network architecture is suitable for this bank?

- A. DAS
- B. IP SAN
- C. NAS
- D. FC SAN

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 144

Regarding the advantages of DAS, which of the following descriptions is correct? (Multiple choice)

- A. The deployment is simple
- B. Large initial investment
- C. The configuration is more complicated
- D. Small network complexity

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 145

RAID 2.0+, which of the following is correct?

- A. It is the largest unit that applies for and releases space in the storage pool.
- B. The size of the chunk and SAS/SSD is a fixed size of 256MB
- C. The size of the chunk and SATA/NL-SAS is a fixed size of 64MB
- D. The extent size of different storage pools can be different, but the extent size in the same storage pool is the same.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 146

Which of the following are not required components in the FC SAN environment? (Multiple choice)

- A. FC HBA
- B. Windows operating system
- C. FC switch
- D. Storage equipment

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 147

The address of the sector is also called the CHS address, and the addressing sequence is?

- A. Cylinder-sector-head

- B. Cylinder-head-sector
- C. head-cylinder-sector
- D. Sector-head-cylinder

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 148

What value does the streamlined configuration technology bring to customers? (Multiple choice)

- A. Reduce the overall TCO of the storage system
- B. Reduce the storage space occupied by data
- C. Improve storage resource utilization
- D. Reduce initial purchase cost

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 149

A company purchased a set of Huawei storage (such as Huawei OceanStor hybrid flash memory) equipment, using SAS interface hard drives.

In addition to SAS hard drives, what types of hard drives can the storage support? (Multiple Choice)

- A. SCSI hard disk
- B. FC hard disk
- C. NLS AS hard disk
- D. SSD hard disk

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 150

In the LAN-Base networking, both business flow and data flow go through the LAN network, which occupies a large bandwidth.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 151

What scenarios are supported by Huawei's full storage devices, such as OceanStor100D? (Multiple Choice)

- A. Private Cloud
- B. Virtualization
- C. Big data analysis
- D. Distributed database

Answer: A,B,C ([LEAVE A REPLY](#))

answers have been corrected get the **newest** BraindumpsPass.com H13-611_V4.5 dumps with Test Engine here:

https://www.braindumpsPass.com/Huawei/H13-611_V4.5-practice-exam-dumps.html (538 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)

NEW QUESTION: 152

A company's applications and data have high security requirements. During the inspection, it was found that two NL-SAS hard disks were offline and the data was lost. In order to avoid this situation, it is necessary to complete the RAID configuration and require the utilization of the hard disk. To be greater than 60%, which of the following are eligible? (Multiple Choice)

- A. Use 6+2P hard drives to create RAID 6
- B. Use 4+2P hard drives to create RAID 6
- C. Use 2+2P hard drives to create RAID 6
- D. Use 4+P hard disk to create RIAD 5

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 153

hich of the following options are correct regarding the advantages of NVMe? (Multiple Choice)

- A. Low latency
- B. High bandwidth
- C. Low energy consumption
- D. High IOPS

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 154

Backup is concerned with data recoverability, and disaster recovery is concerned with business continuity.

- A. True
- B. False

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 155

Two-dimensional table database belongs to structured data.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 156

The RPO in the disaster recovery system measurement indicators is used to measure the business recovery capability of the disaster recovery system

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 157

Based on Huawei OceanStor distributed storage, which of the following statements about network plane division is correct?

- A. The management plane is used for customer application docking to provide an interface for management and maintenance
- B. The BMC plane is used to access the management node and find the MGM1 interface of the storage node to provide transport equipment management functions
- C. The arbitration plane is used to communicate with the double arbitration reflexive. The real plane will only be planned when both parties are in the service plan.
- D. The replication plane connects the storage node with the disaster recovery site for data synchronization and replication

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 158

FC relies on a dedicated FC network, which is easy to form storage islands.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 159

Which of the following can be achieved by storage snapshots? (Multiple Choice)

- A. Use snapshot LUNs for development and testing of new business versions
- B. Take a regular snapshot of the storage at 12 o'clock every evening, and the snapshot data is used for backup
- C. Obtain real-time data analysis business status through snapshot data
- D. Snapshot the business LUN at the end of the month, and analyze the business data of the next month through the snapshot

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 160

The smart data grading feature of Smart Tier requires three types of hard disks in the storage pool.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 161

What are not common backup types? (Multiple Choice)

- A. Extended backup
- B. Incremental backup
- C. Full backup
- D. Flexible backup

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 162

A device has only one WWNN number, but it can have multiple WWPN numbers.

- A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 163

Compared with traditional RAID, what are the characteristics of RAID 2.0+ technology? (Multiple Choice)

- A.** When the hard disk fails, RAID 2.0+ can further shorten the reconstruction time through streamlined reconstruction
- B.** Support many-to-many reconstruction, and the reconstructed data stream is written to multiple hard disks in parallel
- C.** Through block virtualization, the automatic and balanced distribution of data on the hard disks in the storage pool is realized, avoiding the uneven hot and cold hard disks
- D.** Need to manually configure a separate global or local hot spare hard drive

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 164

Which of the following descriptions of cloud computing are correct? (Multiple choices)

- A.** Cloud computing is usually used in business systems that require high performance and high response speed
- B.** Cloud computing is dynamically scalable
- C.** End users of cloud computing need to understand how cloud computing works
- D.** Cloud computing can provide virtual disk space

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 165

Which of the following options belong to the form of data? (Multiple Choice)

- A.** Sound
- B.** Image
- C.** Video
- D.** Text

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 166

Regarding database-level disaster recovery, which of the following statement is wrong?

- A.** Database-level disaster recovery technology is a disaster recovery solution designed for fixed databases.
- B.** Database-level disaster recovery, more data will be lost in asynchronous mode, at least one log file will be lost.
- C.** Database-level disaster recovery is mainly achieved by transmitting data logs and replaying them at the disaster recovery site.
- D.** Database-level disaster recovery supports WAN, but requires separate hardware support.

Answer: D ([LEAVE A REPLY](#))

Valid H13-611_V4.5 Dumps shared by BraindumpsPass.com for Helping Passing H13-611_V4.5 Exam! BraindumpsPass.com now offer the **newest H13-611_V4.5 exam dumps**, the BraindumpsPass.com H13-611_V4.5 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com H13-611_V4.5 dumps with Test Engine here:

NEW QUESTION: 167

Which one of the following methods can achieve the RTO optimization?

- A. Remote replication
- B. Disk-disk
- C. Virtual tape library
- D. Disk-disk-tape

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 168

What are the synchronization types of asynchronous remote replication? (Multiple Choice)

- A. Automatic
- B. Wait regularly after synchronization is completed
- C. Manual
- D. Wait regularly after synchronization starts

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 169

In Huawei OceanStor V3 based on RAID 2.0+, when a user creates a file system, the system will first automatically create a corresponding LUN and generate a file system on the LUN.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 170

What are the implementation methods of RAID? (Multiple Choice)

- A. Parity
- B. Hardware RAID
- C. XOR operation
- D. Software RAID

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 171

The following are two statements about cloud computing:

Statement 1: A deployment model of cloud computing is to divide a large physical server into multiple small virtual machines.

Statement 2: A deployment model of cloud computing is to aggregate multiple small physical servers into one large host.

- A. Both Statement 1 and Statement 2 are correct
- B. Statement 1 is wrong, Statement 2 is correct
- C. Both Statement 1 and Statement 2 are wrong

D. Statement 1 is correct, Statement 2 is wrong

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 172

Regarding the characteristics of the LAN-FREE backup method, which of the following is incorrect?

- A. The backup data stream does not occupy LAN resources
- B. Backup performance is usually higher than that of LAN-BASED
- C. Does not affect user network performance
- D. The backup proxy does not affect the performance of the application server

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 173

Which of the following VLANs are correct? (Multiple Choice)

- A. VLAN is a communication technology that logically divides a physical LAN into multiple broadcast domains
- B. Different services can be configured in different VLANs in the storage system
- C. In Huawei OceanStor hybrid flash memory, multiple Ethernet ports can be added to multiple independent VLANs
- D. In the storage system, different VLANs can be assigned the same ID

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 174

Which of the following scenarios use the SCSI protocol? (Multiple Choice)

- A. Configure iSCSI storage for the newly added host.
- B. Replace the power supply for the server.
- C. Expand the storage capacity and add SAS hard disks
- D. Install a hard drive for the laptop. The SSD hard drive interface is SATA

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 175

Which of the following statements about Thin LUN are correct? (Multiple Choice)

- A. Thin LUN cannot be directly converted to Thick LUN
- B. After the Smart Thin feature is enabled, users can create Thin LUNs larger than the maximum physical free space of the storage pool
- C. When Thin LUN is created, it consumes little storage capacity
- D. All LUNs in a storage pool need to enable the Smart Thin function

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 176

Regarding the description of eSight, which of the following statements are correct? (Multiple Choice)

- A. eSight adopts a componentized architecture, customers can choose the required components according to their own situation
- B. eSight only supports the management of Huawei devices
- C. eSight adopts B/S architecture
- D. eSight supports unified management of Huawei servers, storage, virtualization, switches, routers, WLAN, firewalls, etc.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 177

For Huawei Ocean Stor all-flash storage devices, which of the following descriptions about LUN and LUN groups are correct? (Multiple Choice)

- A. All Huawei Ocean Stor all-flash storage devices can create thick LUNs
- B. Using Device Manager, you can create multiple LUNs at once
- C. A LUN group can contain only one LUN
- D. Using Device Manager, when creating a LUN, you can select the application type corresponding to the LUN

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 178

Which of the sequence of the overall reconstruction process is correct?

1. Query all CKG with CK falling on the faulty disk
2. Allocate hot spare CK to all these CKG
3. Update the CKG information to release the reconstructed CK
4. Write the reconstructed data to the hot standby CK
5. Through the RAID algorithm,
Calculate the data on the failed disk based on the data on the normal disk and the check disk

- A. 1->2->3->5->4
- B. 5->1->2->3->4
- C. 1->2->5->4->3
- D. 5->2->1->4->3

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 179

IP scale-out is the scale-out that constructs the pcie protocol and is generally used in high-end industrial storage business scenarios.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))
