## NEW QUESTION: 1

You have an Azure Virtual Desktop Deployment that contains a workspace named Workspace1 and a user named User1. Workspace1 contains a Desktop application group named Pool1Desktop.

At 09:00, you create a conditional access policy that has the following settings:

Assignments:

- Users and groups: User1
- Cloud apps or actions: Azure Virtual Desktop
- Conditions: 0 conditions selected

Access controls

- Grant: Grant access, Require multi-factor authentication
- Sessions: Sign-in frequency 1 hour

User1 performs the actions shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

### Answer:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-mfa>

## NEW QUESTION: 2

Your company has 60,000 users.

You plan to deploy Azure Virtual Desktop.

You need to recommend a storage solution for the FSLogix profile containers. The solution must provide the highest possible IOPS and the lowest latency desktop experience. What should you recommend?

- A.** Azure Files Standard
- B.** Azure Blob storage Premium

C. AzureNetAppFiles

D. Azure Data Lake Storage

**Answer: C (LEAVE A REPLY)**

### NEW QUESTION: 3

You have a Windows Virtual Desktop host pool that contains 20 Windows 10 Enterprise multi-session hosts.

Users connect to the Windows Virtual Desktop deployment from computers that run Windows 10. You plan to implement FSLogix Application Masking.

You need to deploy Application Masking rule sets. The solution must minimize administrative effort.

To where should you copy the rule sets?

A. the FSLogix profile container of each user

B. C:\Program Files\FSLogix\Apps\Rules on every Windows 10 computer

C. C:\Program Files\FSLogix\Apps\Rules on every session host

**Answer: C (LEAVE A REPLY)**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/fslogix-office-app-rule-editor>

### NEW QUESTION: 4

You have an Azure Virtual Desktop deployment that contains a host pool. The pool has the following settings:

\* Resource group: RG1

\* Host pool name: Pool1

\* Location: East US

\* Host pool type: Pooled

The deployment contains the workspaces shown in the following table.

For Pool1, you plan to create a RemoteApp application group named AppGroup1.

In which workspaces can you register AppGroup1?

A. Workspace1 only

B. Workspace1, Workspace2, Workspace3, and Workspace4

C. Workspace1 and Workspace2 only

D. Workspace1 and Workspace3 only

**Answer: D (LEAVE A REPLY)**

### NEW QUESTION: 5

-

You have an Azure subscription.

You plan to deploy an Azure Virtual Desktop solution that will contain Windows 10 multi-session hosts in a single host pool. The solution has the requirements shown in the following table.

You need to configure the session host for the host pool. The solution must minimize costs.

How many session hosts should the host pool contain, and how many vCPUs should each session host have? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

### **NEW QUESTION: 6**

Your network contains an on-premises Active Directory domain named contoso.com that syncs to an Azure Active Directory (Azure AD) tenant.

You have an Azure subscription that contains an Azure Virtual Desktop host pool.

You create an Azure Storage account named storage1.

You need to use FSLogix profile containers in storage1 to store user profiles for a group named Group1. The solution must use the principle of least privilege.

What should you include in the solution? To answer, select the appropriate options in the answer area.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/storage/files/storage-files-identity-ad-ds-enable>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-file-share>

### **NEW QUESTION: 7**

You have two Azure subscriptions that are linked to an Azure Active Directory (Azure AD) tenant named contoso.com and contain an Azure Virtual Desktop deployment. The tenant contains a user named User1.

When User1 signs in to Azure Security Center, the user receives the message shown in the following exhibit.

You need to ensure that User1 can manage security information for the tenant. The solution must use the principle of least privilege.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

Explanation

Graphical user interface, text, application Description automatically generated

### **NEW QUESTION: 8**

You create an Azure Virtual Desktop host pool as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

Explanation

Graphical user interface, text, application Description automatically generated

### **NEW QUESTION: 9**

You have an Azure Virtual Desktop Deployment that contains a workspace named Workspace1 and a user named User1. Workspace1 contains a Desktop application group named Pool1Desktop.

At 09:00, you create a conditional access policy that has the following settings:

Assignments:

- Users and groups: User1
- Cloud apps or actions: Azure Virtual Desktop
- Conditions: 0 conditions selected

Access controls

- Grant: Grant access, Require multi-factor authentication
- Sessions: Sign-in frequency 1 hour

User1 performs the actions shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-mfa>

### **NEW QUESTION: 10**

You have an Azure Virtual Desktop host pool. The pool contains session hosts that run Windows 10 Enterprise multi-session.

You connect to a Remote Desktop session on Pool1 and discover an issue with the frequency of screen updates.

You need to identify whether the issue related to insufficient server, network, or client resources.

The solution must minimize how long it takes to identify the resource type.

What should you do?

**A.** From within the current session, use Performance Monitor to display the values of all the RemoteFX Graphics(\*)\Frames Skipped/Second counters.

**B.** From Azure Cloud Shell, run the Get-AzWvdUserSession cmdlet and specify the UserSessionId parameter.

**C.** From Azure Cloud Shell, run the Get-AzOperationalInsightsWorkspaceUsage cmdlet and specify the DefaultProfile parameter.

**D.** From within the current session, use the Azure Virtual Desktop Experience Estimator.

**Answer: A (LEAVE A REPLY)**

**NEW QUESTION: 11**

You need to configure a conditional access policy to meet the authentication requirements. What should you include in the policy configuration? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 12**

You have a Windows Virtual Desktop deployment.

Many users have iOS devices that have the Remote Desktop Mobile app installed.

You need to ensure that the users can connect to the feed URL by using email discovery instead of entering the feed URL manually.

How should you configure the \_msradc DNS record? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 13**

You have an Azure Virtual Desktop deployment.

You need to monitor the deployment by using the Azure Virtual Desktop Insights solution in Azure Monitor.

What should you use as the Diagnostic settings destination for the host pool?

- A. Storage account
- B. Event hub
- C. Log Analytics workspace

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 14**

You have an on-premises network.

All users have computers that run Windows 10 Pro.

You plan to deploy Azure Virtual Desktop to meet the department requirements shown in the following table.

You need to recommend licenses for the departments. The solution must minimize costs.

Which license should you recommend for each department? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/windows-10-multisession-faq>

<https://azure.microsoft.com/en-us/pricing/details/virtual-desktop/#pricing>

### NEW QUESTION: 15

You have a Windows Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

You need to recommend the virtual machine size for each host pool. The solution must minimize costs.

Which size should you recommend for each pool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/sizes>

<https://docs.microsoft.com/en-us/azure/virtual-machines/nv3-series>

<https://docs.microsoft.com/en-us/azure/virtual-machines/dv4-dsv4-series>

### NEW QUESTION: 16

-

You have an Azure Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

You need to recommend the virtual machine size for each host pool to meet the session host requirements.

#### Answer:

Explanation

Table Description automatically generated

### NEW QUESTION: 17

You have a shared image gallery that contains the Windows 10 images shown in the following table.

You create a Windows Virtual Desktop deployment that has the following settings:

\* Host pool name: Pool1

\* Location: West US

\* Host pool type: Personal

Which images can you use for the session hosts?

A. Image1 only

B. Image1, Image2, Image3, and Image4

C. Image2 only

D. Image1 and Image2 only

E. Image1 and Image3 only

**Answer: E (LEAVE A REPLY)**

Explanation/Reference:

<https://azure.microsoft.com/en-in/blog/vm-image-blog-post/>

### NEW QUESTION: 18

You have an Azure Virtual Desktop deployment.

You plan to use a Conditional Access policy to enforce multi-factor authentication (MFA) when users connect to the deployment. The solution must meet the following requirements:

\* Enforce MFA when a user connects to Azure Virtual Desktop by using a subscription feed.

\* Enforce MFA when a user authenticates to a session host that has single sign-on (SSO) enabled.

You need to identify which cloud apps to use for the Conditional Access policy.

Which app should you use for each requirement? To answer, drag the appropriate apps to the correct requirements. Each app may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION: 19

-

You have an Azure Virtual Desktop host pool that contains 10 session hosts.

You plan to configure each session host to use an FSLogix profile container that will exclude specific folders in the user profile.

You need to perform the following configurations:

\* Create a configuration file to list the excluded profile folders.

\* Identify which registry setting will distribute the file to each session host automatically.

What should you name the configuration file, and which registry setting should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

### NEW QUESTION: 20

-

You have an Azure Virtual Desktop deployment and two Azure Active Directory groups named Group1 and Group2.

You create two Conditional Access policies named Policy1 and Policy2. Policy1 is assigned to Group1.

Policy2 is assigned to Group2. Both policies include Azure Virtual Desktop as a cloud app.

You need to meet the following requirements:

- \* The users in Group1 must be prompted for multi-factor authentication (MFA) when they connect to Azure Virtual Desktop.

- \* The users in Group2 must reauthenticate every eight hours while they are connected to Azure Virtual Desktop.

Which settings should you configure in Policy1 and Policy2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

### **NEW QUESTION: 21**

You have an Azure Virtual Desktop deployment.

You plan to use FSLogix profile containers.

You need to recommend a solution that will be used to store the containers. The solution must meet the following requirements:

- \* The containers must be stored on solid-state drives (SSDs)

- \* Minimize administrative effort

- \* Minimize cost

What should you recommend?

**A.** Azure NetApp Files

**B.** Azure Files Standard

**C.** Azure Blob Storage Premium

**D.** Azure Files Premium

**Answer: (SHOW ANSWER)**

Explanation

"Use Azure Files for FSLogix user profile data with Azure Virtual Desktop Azure Files provides multiple tiers that you can select based on your cost and performance needs."

- <https://azure.microsoft.com/en-us/services/storage/files/#security>

"Premium file shares enable highly I/O-intensive workloads, with high throughput and low latency. Premium file shares are offered on high-performance solid-state drive (SSD) based storage."

- <https://azure.microsoft.com/en-us/pricing/details/storage/files/>

**NEW QUESTION: 22**

You network contains an on-premises Active Directory domain. The domain contains a universal security group named WVDusers.

You have a hybrid Azure Active Directory (Azure AD) tenant. WVDusers syncs to Azure AD.

You have a Windows Virtual Desktop host pool that contains four Windows 10 Enterprise multi-session hosts.

You need to ensure that only the members of WVDusers can establish Windows Virtual Desktop sessions to the host pool.

What should you do?

- A. Assign WVDusers to an Azure role scoped to each host pool.
- B. On each session host, add WVDusers to the local Remote Desktop Users group.
- C. Assign WVDusers to an Azure role scoped to the session hosts.
- D. Assign WVDusers to an application group.

**Answer: D** ([LEAVE A REPLY](#))

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/manage-app-groups>

**NEW QUESTION: 23**

You have an Azure Virtual Desktop deployment that contains the resources shown in the following table.

You need to enable just-in-time (JIT) VM access for all the session hosts.

What should you do first?

- A. Configure Access control (IAM) for HostPool1.
- B. Deploy Azure Bastion to VNET1.
- C. Assign network security groups (NSGs) to the network interfaces of the five session hosts.
- D. Assign a network security group (NSG) to Subnet1.

**Answer: C** ([LEAVE A REPLY](#))

**NEW QUESTION: 24**

HOTSPOT

You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

Explanation/Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-enable-azure-mfa>

**NEW QUESTION: 25**

You have an Azure Virtual Desktop deployment.

You deploy and configure Azure Virtual Desktop in a secondary location.

You plan to perform a test failover to the secondary location, but discover existing user sessions to the primary location.

You need to sign out users from the session hosts in the primary location.

Which PowerShell cmdlet should you run?

- A. Invoke-RdsUserSessionLogoff
- B. Remove-AzWvdUserSession
- C. Invoke-RestMethod
- D. Remove-Alias

**Answer: B** ([LEAVE A REPLY](#))

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/disaster-recovery>

**NEW QUESTION: 26**

You have a Windows Virtual Desktop host pool that has a max session limit of 15. Disconnected sessions are signed out immediately.

The session hosts for the host pool are shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-scaling-script>

**NEW QUESTION: 27**

Your network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant. The domain contains the users shown in the following table.

You have a Windows Virtual Desktop deployment that contains the application groups shown in the following table.

You have the workspaces shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/environment-setup>

## NEW QUESTION: 28

You have an Azure Active Directory (Azure AD) tenant named contoso.com.

You use a user account named Admin1 to deploy an Azure Active Directory Domain Services (Azure AD DS) managed domain named aaddscontoso.com to a virtual network named VNET1.

You plan to deploy an Azure Virtual Desktop host pool named Pool1 to VNET1.

You need to ensure that you can use the Admin1 user account to deploy Windows 10 Enterprise session hosts to Pool1.

What should you do first?

- A. Add Admin1 to the AA Change Host pool type to Pooled and specify Load D DC Administrators group of contoso.com.
- B. Assign the Cloud device administrator role to Admin1.
- C. Assign a Microsoft 365 Enterprise E3 license to Admin1.
- D. Change the password of Admin1.

**Answer: (SHOW ANSWER)**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-host-pools-azure-marketplace?tabs=azure-portal>

Topic 2, Contoso. Ltd

Existing Infrastructure

Active Directory

The network contains an on-premises Active Directory domain named contoso.com and an Azure Active Directory (Azure AD) tenant. One of the domain controllers runs as an Azure virtual machine and connects to a virtual network named VNET1. All internal name resolution is provided by DNS server that run on the domain controllers.

The on-premises Active Directory domain contains the organizational units (OUs) shown in the following table.

The on-premises Active Directory domain contains the users shown in the following table.

The Azure AD tenant contains the cloud-only users shown in the following table.

Existing Infrastructure. Network Infrastructure

All the Azure virtual networks are peered. The on-premises network connects to the virtual networks.

All servers run Windows Server 2019. All laptops and desktop computers run Windows 10 Enterprise.

Since users often work on confidential documents, all the users use their computer as a client for connecting to Remote Desktop Services (RDS).

In the West US Azure region, you have the storage accounts shown in the following table.

Existing Infrastructure. Remote Desktop Infrastructure

Contoso has a Remote Desktop infrastructure shown in the following table.

Requirements

Planned Changes

Contoso plans to implement the following changes:

Implement FSLogix profile containers for the Paris offices.

Deploy a Windows Virtual Desktop host pool named Pool4.

Migrate the RDS deployment in the Seattle office to Windows Virtual Desktop in the West US Azure region.

Requirements. Pool4 Configuration

Pool4 will have the following settings:

Host pool type: Pooled

Max session limit: 7

Load balancing algorithm: Depth-first

Images: Windows 10 Enterprise multi-session

Virtual machine size: Standard D2s v3

Name prefix: Pool4

Number of VMs: 5

Virtual network: VNET4

Requirements. Technical Requirements

Contoso identifies the following technical requirements:

Before migrating the RDS deployment in the Seattle office, obtain the recommended deployment configuration based on the current RDS utilization.

For the Windows Virtual Desktop deployment in the Montreal office, disable audio output in the device redirection settings.

For the Windows Virtual Desktop deployment in the Seattle office, store the FSLogix profile containers in Azure Storage.

Enable Operator2 to modify the RDP Properties of the Windows Virtual Desktop deployment in the Montreal office.

From a server named Server1, convert the user profile clicks to the FSLogix profile containers.

Ensure that the Pool1 virtual machines only run during business hours.

Use the principle of least privilege.

### **NEW QUESTION: 29**

Your network contains an on-premises Active Directory domain named contoso.com that syncs to an Azure Active Directory (Azure AD) tenant.

You have an Azure subscription that contains an Azure Virtual Desktop host pool.

You create an Azure Storage account named storage1.

You need to use FSLogix profile containers in storage1 to store user profiles for a group named Group1. The solution must use the principle of least privilege.

What should you include in the solution? To answer, select the appropriate options in the answer area.

#### **Answer:**

Explanation

Text Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-file-share>

### NEW QUESTION: 30

You have a Windows Virtual Desktop host pool.

You need to install Microsoft Antimalware for Azure on the session hosts.

What should you do?

- A. Add an extension to each session host.
- B. From a Group Policy Object (GPO), enable Windows 10 security features.
- C. Configure the RDP Properties of the host pool.
- D. Sign in to each session host and install a Windows feature.

**Answer:** ([SHOW ANSWER](#))

Explanation/Reference:

<https://docs.microsoft.com/en-us/azure/security/fundamentals/antimalware>

### NEW QUESTION: 31

You need to evaluate the RDS deployment in the Seattle office. The solution must meet the technical requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/cloud-adoption-framework/migrate/azure-best-practices/contoso-migratio>

### NEW QUESTION: 32

You have a shared image gallery that contains the Windows 10 images shown in the following table.

You create a Windows Virtual Desktop deployment that has the following settings:

\* Host pool name: Pool1

\* Location: West US

\* Host pool type: Personal

Which images can you use for the session hosts?

- A. Image1 only
- B. Image1, Image2, Image3, and Image4
- C. Image2 only
- D. Image1 and Image2 only
- E. Image1 and Image3 only

**Answer:** ([SHOW ANSWER](#))

Reference:

<https://azure.microsoft.com/en-in/blog/vm-image-blog-post/>

### **NEW QUESTION: 33**

-

You have an Azure Virtual Desktop deployment that contains the resources shown in the following table.

You need to perform the following configurations:

- \* Enable a managed identity for App1.
- \* Enable Clipboard redirection for App1.

On which resources should you perform the configurations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

### **NEW QUESTION: 34**

You have an Azure subscription that contains the virtual machines shown in the following table. You create an Azure Compute Gallery as shown in the Azure compute gallery exhibit. (Click the Azure compute gallery tab.)

You create a virtual machine image definition as shown in the VM image definition exhibit. (Click the VM image definition tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**Answer:**

### **NEW QUESTION: 35**

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains two session hosts.

Pool1 is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 36**

-

You have an Azure Virtual Desktop deployment that contains the resources shown in the following table.

You need to perform the following configurations:

- \* Enable a managed identity for App1.
- \* Enable Clipboard redirection for App1.

On which resources should you perform the configurations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 37**

Your on-premises network contains an Active Directory domain named contoso.com that syncs with Azure AD.

You deploy an Azure Virtual Desktop pooled host pool named HostPool1 that contains five hybrid-joined session hosts.

You need to ensure that all the user sessions of HostPool1 meet the following requirements:

- \* Users must use roaming user profiles.
- \* Users must use Folder Redirection.

The solution must minimize administrative effort.

What should you use to meet each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 38**

Your company has a main office and two branch offices. Each office connects directly to the internet. The router in each branch office is configured as an endpoint for the following VPNs:

- \* A VPN connection to the main office
- \* A site-to-site VPN to Azure

The routers in each branch office have the Quality of Service (QoS) rules shown in the following table.

Users in the branch office report slow responses and connection errors when they attempt to connect to Windows Virtual Desktop resources.

You need to modify the QoS rules on the branch office routers to improve Windows Virtual Desktop performance.

For which rule should you increase the bandwidth allocation?

**A. Rule2**

- B. Rule3
- C. Rule4
- D. Rule1

**Answer: B (LEAVE A REPLY)**

Explanation

<https://docs.microsoft.com/en-us/azure/virtual-desktop/safe-url-list>

Any Remote Desktop clients you use must have access to the following URLs:

Remote Desktop clients

Address Outbound TCP port

\*.wvd.microsoft.com 443

\*.servicebus.windows.net 443

go.microsoft.com 443

aka.ms 443

docs.microsoft.com 443

privacy.microsoft.com 443

query.prod.cms.rt.microsoft.com 443

### **NEW QUESTION: 39**

You have a Windows Virtual Desktop deployment.

You need to provide external users with access to the deployment. The external users have computers that run Windows 10 Pro and Windows 10 Enterprise. The users do not have the ability to install applications.

What should you recommend that the users use to connect to the deployment?

- A. Microsoft Edge
- B. RemoteApp and Desktop Connection
- C. Remote Desktop Manager
- D. Remote Desktop Connection

**Answer: A (LEAVE A REPLY)**

Explanation/Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/governance/entitlement-management-external-users>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-web>

### **NEW QUESTION: 40**

You have a Azure Virtual Desktop deployment.

You need to monitor the deployment of using the Azure Virtual Desktop Insights solution in Azure Monitor.

What should you use as the Diagnostic settings destination for the host pool?

- A. Log Analytics workspace
- B. Event hub
- C. Storage account

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 41**

DRAG DROP

You plan to deploy Windows Virtual Desktop.

You need to create Azure NetApp Files storage to store FSLogix profile containers.

Which four actions should you perform in sequence after you register the NetApp Resource Provider? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Select and Place:

**Answer:**

Explanation/Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-fslogix-profile-container#make-sure-userscan-access-the-azure-netapp-file-share>

<https://docs.microsoft.com/en-us/azure/azure-netapp-files/azure-netapp-files-quickstart-set-up-account-create-volumes?tabs=azure-portal>

**NEW QUESTION: 42**

You have an Azure subscription. The subscription contains a virtual machine named Server1 that runs Windows Server and is deployed to the West US Azure region.

You deploy a new Azure Virtual Desktop host pool named HostPool1 to the East US Azure region.

You need to ensure that all the traffic between HostPool1 and Server1 is routed via the Microsoft backbone network.

What should you use?

- A. service endpoints
- B. virtual network peering
- C. routing tables
- D. Azure Traffic Manager

**Answer: A ([LEAVE A REPLY](#))**

"Virtual Network (VNet) service endpoint provides secure and direct connectivity to Azure services over an optimized route over the Azure backbone network."

<https://learn.microsoft.com/en-us/azure/virtual-network/virtual-network-service-endpoints-overview>

**NEW QUESTION: 43**

You have a Windows Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

You need to recommend the virtual machine size for each host pool. The solution must minimize costs.

Which size should you recommend for each pool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/sizes>

<https://docs.microsoft.com/en-us/azure/virtual-machines/nvv3-series>

<https://docs.microsoft.com/en-us/azure/virtual-machines/dv4-dsv4-series>

**NEW QUESTION: 44**

You have an Azure Virtual Desktop host pool.

You add a French language pack to each session host in the host pool.

Several days later, users report that English displays when they connect to Azure Virtual Desktop. After an investigation, you discover that the French language pack was removed, and the session hosts reverted to English.

You need to ensure that the French language pack is always available on the session hosts.

What should you do?

- A. Configure the international settings on each host.
- B. Apply a Group Policy setting to disable the Time & language settings.
- C. Apply a Group Policy setting that blocks the cleanup of unused language packs.
- D. Assign a default time zone on each host.

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 45**

You have a Windows Virtual Desktop host pool named Pool1 that runs Windows 10 Enterprise multi-session hosts.

You need to use Performance Monitor to troubleshoot a low frame quality issue that is affecting a current use session to Pool1.

What should you run to retrieve the user session ID?

- A. Get-ComputerInfo
- B. qwinsta
- C. whoami
- D. Get-LocalUser

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 46**

Your company has the offices shown in the following table.

The company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1.

Users connect to a Windows Virtual Desktop deployment named WVD1. WVD1 contains session hosts that have public IP addresses from the 52.166.253.0/24 subnet.

Contoso.com has a conditional access policy that has the following settings:

Name: Policy1

Assignments:

Users and groups: User1

Cloud apps or actions: Windows Virtual Desktop

Access controls:

Grant: Grant access, Require multi-factor authentication

Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 47**

You have an Azure subscription that contains the resources shown in the following table.

You have a virtual machine named Server1 that runs Windows Server and is connected to VNet3.

You need to deploy the Azure Virtual Desktop host pools shown in the following table.

The solution must meet the following requirements:

\* The session hosts in Pool1 must access Server1 via the Microsoft backbone network.

\* The session hosts in Pool2 must access storage1 via the Microsoft backbone network.

What should you configure on the virtual networks? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

**NEW QUESTION: 48**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Windows Virtual Desktop host pool named Pool1 that is integrated with an Azure Active Directory Domain Services (Azure AD DS) managed domain.

You need to configure idle session timeout settings for users that connect to the session hosts in Pool1.

Solution: From an Azure AD DS-joined computer, you modify the AADDC Computers GPO settings.

Does that meet the goal?

A. No

B. Yes

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 49**

You have a Windows Virtual Desktop host pool that has a max session limit of 15. Disconnected sessions are signed out immediately.

The session hosts for the host pool are shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-scaling-script>

#### **NEW QUESTION: 50**

You have an Azure subscription that contains the resources shown in the following table.

You have a virtual machine named Sever 1 that runs Windows Server and is connected to VNet3.

**Answer:**

Explanation

#### **NEW QUESTION: 51**

You have an on-premises network.

All users have computers that run Windows 10 Pro.

You plan to deploy Azure Virtual Desktop to meet the department requirements shown in the following table.

You need to recommend licenses for the departments. The solution must minimize costs.

Which license should you recommend for each department? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/windows-10-multisession-faq>

<https://azure.microsoft.com/en-us/pricing/details/virtual-desktop/#pricing>

### **NEW QUESTION: 52**

You have a hybrid Azure Active Directory (Azure AD) tenant.

You plan to deploy an Azure Virtual Desktop personal host pool. The host pool will contain 15 virtual machines that run Windows 10 Enterprise. The virtual machines will be joined to the on-premises Active Directory domain and used by the members of a domain group named Department1.

You need to ensure that each user is added automatically to the local Administrators group on the virtual machine to which the user signs in.

What should you configure?

- A. a role assignment for the host pool
- B. a role assignment for each virtual machine
- C. a policy preference in a Group Policy Object (GPO)
- D. a device setting in Azure AD

**Answer: A ([LEAVE A REPLY](#))**

Explanation

<https://microsoftlearning.github.io/AZ-140-Configuring-and-Operating-Microsoft-Azure-Virtual-Desktop/Instruc>

### **NEW QUESTION: 53**

You have a hybrid Azure Active Directory (Azure AD) tenant.

You plan to deploy an Azure Virtual Desktop personal host pool. The host pool will contain 15 virtual machines that run Windows 10 Enterprise. The virtual machines will be joined to the on-premises Active Directory domain and used by the members of a domain group named Department1.

You need to ensure that each user is added automatically to the local Administrators group on the virtual machine to which the user signs in.

What should you configure?

- A. a role assignment for the host pool
- B. a role assignment for each virtual machine
- C. a policy preference in a Group Policy Object (GPO)
- D. a device setting in Azure AD

### **NEW QUESTION: 54**

You plan to deploy Windows Virtual Desktop.

You need to create Azure NetApp Files storage to store FSLogix profile containers.

Which four actions should you perform in sequence after you register the NetApp Resource Provider? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

#### **Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/azure-netapp-files/azure-netapp-files-quickstart-set-up-account-create-vo>

### **NEW QUESTION: 55**

You have an Azure Virtual Desktop host pool named HostPool1. HostPool1 contains Windows 10 session hosts and the application groups shown in the following table.

You need to assign an instance of a Windows 11 Desktop application group to users.

What should you do first?

- A. Create a scaling plan.
- B. Create a new workspace.
- C. Add a session host to HostPool1.
- D. Create a new host pool

#### **Answer: D (LEAVE A REPLY)**

The current hostpool has Windows 10 hosts, If you add an Windows 11 host in the current hostpool you cant force a desktop to use Windows 11. If you want to use Windows 11, ether delete the current session hosts and add Windows 11 Hosts. or create a new Hostpool.

### **NEW QUESTION: 56**

Which users can create Pool4, and which users can join session hosts to the domain? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### **Answer:**

### **NEW QUESTION: 57**

You have the devices shown in the following table.

You plan to deploy Azure Virtual Desktop for client access to remote virtualized apps.

Which devices support the Remote Desktop client?

- A. Device1, Device2, and Device3
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1 only

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 58**

You have a Windows Virtual Desktop deployment.

You have a session host named Host1 that has the disk layout shown in the exhibit. (Click the Exhibit tab.)

You plan to deploy an app that must be installed on D. The app requires 500 GB of disk space. You need to add a new data disk that will be assigned the drive letter D. The solution must maintain the current performance of Host1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

- 1 - Move the page file to drive C.
- 2 - Change the drive letter of Temporary Storage (D:).
- 3 - Add the new disk and assign drive D.
- 4 - Move the page file to Temporary Storage.

**NEW QUESTION: 65**

You have an Azure subscription that contains an Azure Virtual Desktop deployment. The deployment contains 25 session hosts.

You create two storage accounts as shown in the following table.

The storage accounts store Azure Virtual Desktop user profile data.

You plan to deploy FSLogix user Profile Containers that will use Cloud Cache.

You need to configure the FSLogix registry settings for each session host.

How should you complete the registry settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 66**

You have an Azure Virtual Desktop deployment.

You are configuring the outbound firewall settings for the host pool.

Which outbound URL and outbound port should you configure to ensure that the host machines maintain Windows activation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/safe-url-list>

**NEW QUESTION: 67**

Your network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant. The domain contains the users shown in the following table.

You have a Windows Virtual Desktop deployment that contains the application groups shown in the following table.

You have the workspaces shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/environment-setup>

**NEW QUESTION: 68**

You have an Azure Virtual Desktop deployment that contains the host pools shown in the following table.

You need to create a disaster recovery environment in the West US region. The solution must minimize costs and administrative effort.

What should you do?

- A. Create two new host pools in the West US region.
- B. Create an Azure Site Recovery plan.
- C. Regenerate the token and reregister the virtual machines in the host pools.
- D. Run the Invoke-RdsUserSessionLogoff cmdlet.

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 69**

You have an Azure subscription that contains the resources shown in the following table.

You have a virtual machine named Sever 1 that runs Windows Server and is connected to VNet3.

**Answer:**

#### **NEW QUESTION: 70**

You need to recommend an authentication solution that meets the performance requirements.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Join all the session hosts to Azure AD.
- B. In each Azure region that will contain the Windows Virtual Desktop session hosts, create an Azure Active Directory Domain Service (Azure AD DS) managed domain.
- C. Deploy domain controllers for the on-premises Active Directory domain on Azure virtual machines.
- D. Deploy read-only domain controllers (RODCs) on Azure virtual machines.
- E. In each Azure region that will contain the Windows Virtual Desktop session hosts, create an Active Directory site.

**NEW QUESTION: 80**

HOTSPOT -

You have an Azure subscription named Subscription1 that contains the users shown in the following table.

Subscription1 contains the Azure Virtual Desktop host pools shown in the following table.

Subscription1 contains the Azure Virtual Desktop application groups shown in the following table.

You perform the role assignments shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Yes, No, Yes

**NEW QUESTION: 81**

-

You have an Azure Virtual Desktop deployment that contains two users named User1 and User2 and the storage accounts shown in the following table.

The File share settings for storage1 are configured as shown in the following exhibit.

The File share settings for storage2 are configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

**NEW QUESTION: 82**

You have a Windows Virtual Desktop deployment.

You have a session host named Host1 that has the disk layout shown in the exhibit. (Click the Exhibit tab.)

You plan to deploy an app that must be installed on D.

The app requires 500 GB of disk space.

You need to add a new data disk that will be assigned the drive letter D.

The solution must maintain the current performance of Host1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

- 1 - Move the page file to drive C.
- 2 - Change the drive letter of Temporary Storage(D:).
- 3 - Add the new disk and assign drive D.
- 4 - Move the page file to Temporary Storage.

Reference:

<https://www.azurecorner.com/change-temporary-drive-azure-vm-use-d-persistent-data-disks/>

**NEW QUESTION: 83**

You have an Azure Virtual Desktop deployment that contains a host pool. The host pool contains 10 session hosts. The session hosts are configured by using a custom image and ephemeral disks.

You need to deploy Microsoft OneDrive for Business.

Which two actions should you perform for each session host? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Install FSLogix.
- B. Install the OneDrive sync app by using the per-machine installation option.
- C. Implement Application Masking.
- D. Install the OneDrive sync app by using the per-user installation option.
- E. Deploy an MSIX app attach package.

**Answer: ([SHOW ANSWER](#))**

Explanation

The two actions you should perform for each session host in order to deploy Microsoft OneDrive for Business are:

A: Install FSLogix - FSLogix provides a single-user solution for running multiple OneDrive for Business clients simultaneously on the same session host.

B: Install the OneDrive sync app by using the per-machine installation option - according to the Microsoft AZ-140 Official Guide, "OneDrive for Business supports per-machine installation, which is required for a multi-user VDI environment." This means that the OneDrive sync app must be installed on each session host using the per-machine installation option.

**NEW QUESTION: 84**

You have a Windows Virtual Desktop host pool named Pool1. Pool1 contains session hosts that use FSLogix profile containers hosted in Azure NetApp Files volumes.

You need to back up profile files by using snapshots.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/azure-netapp-files/azure-netapp-files-manage-snapshots>

### NEW QUESTION: 85

You have a Azure Virtual Desktop host pool in the East US region.

You need to implement a disaster recovery solution that meets the following requirements:

- \* If users cannot connect to the Azure Virtual Desktop resources in the East US region, the users must be able to connect to the equivalent resources in the West US region.
- \* Users must connect to the Azure Virtual Desktop resources in either the East US or the West US region by selecting a single icon in the Remote Desktop client
- \* In the event of a disaster, failover between the Azure regions must be initiated manually by an administrator.
- \* Failover times must be minimized.

What should you do?

- A.** Create new session hosts in the West US region and add the session hosts to an existing host pool.
- B.** Enable Azure Backup to a Recovery Services vault in the West US region.
- C.** Configure a shared image gallery that has replicas in the East US and West US regions.
- D.** Create an additional host pool in the West US region.
- E.** Enable Azure Site Recovery replication of the virtual machines to the West US region.

**Answer:** ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/disaster-recovery>

### NEW QUESTION: 86

You have an Azure Virtual Desktop deployment.

You are configuring the outbound firewall settings for the host pool.

Which outbound URL and outbound port should you configure to ensure that the host machines maintain Windows activation? To answer, select the appropriate options In the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/safe-url-list>

### NEW QUESTION: 87

You have the Azure Virtual Desktop deployment shown in the following table.

You plan to deploy a new host pool as shown in the following table.

You need to ensure that you can deploy the host pool.

What should you do?

- A.** Stop and deallocate one of the currently deployed virtual machines.
- B.** Submit a support request for service and subscription limits.

C. Change the proposed virtual machine size for the session hosts to D4s\_v3.

D. Add a lock to the existing host pool.

**Answer: B (LEAVE A REPLY)**

### **NEW QUESTION: 88**

You plan to deploy Windows Virtual Desktop.

Users have the devices shown in the following table.

From which device types can the users connect to Windows Virtual Desktop resources by using the Remote Desktop client app and the Remote Desktop web client? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-macos>

### **NEW QUESTION: 89**

You have a Windows Virtual Desktop host pool that has a max session limit of 15. Disconnected sessions are signed out immediately.

The session hosts for the host pool are shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-scaling-script>

### **NEW QUESTION: 90**

You have two Azure subscriptions that are linked to an Azure Active Directory (Azure AD) tenant named contoso.com and contain an Azure Virtual Desktop deployment. The tenant contains a user named User1.

When User1 signs in to Azure Security Center, the user receives the message shown in the following exhibit.

You need to ensure that User1 can manage security information for the tenant. The solution must use the principle of least privilege.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

### NEW QUESTION: 91

-

You plan to deploy two Azure file shares named Share1 and Share2 that will be used with Azure Virtual Desktop. Share1 will contain at least 100 GB of data and must be stored on SSDs. Share2 must be able to switch between Transaction optimized and Cool storage tiers and must be stored on HDDs.

You need to recommend which type of storage accounts to use for the shares. The solution must minimize costs.

What should you recommend for each share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

<https://learn.microsoft.com/en-us/azure/storage/files/storage-how-to-create-file-share?tabs=azure-portal>

**Valid AZ-140 Dumps** shared by BraindumpsPass.com for Helping Passing AZ-140 Exam! ### NEW QUESTION: 92

You are designing an Azure Virtual Desktop deployment.

You identify the network latency between the locations where users reside and the planned deployment.

What should you use to identify the best Azure region to deploy the host pool?

- A. Azure Traffic Manager
- B. Azure Virtual Desktop Experience Estimator
- C. Azure Monitor for Azure Virtual Desktop
- D. Azure Advisor

Answer: ([SHOW ANSWER](#))

Reference:

<https://azure.microsoft.com/en-gb/services/virtual-desktop/assessment/>

### NEW QUESTION: 93

You have an Azure Virtual Desktop Deployment that contains a workspace named Workspace1 and a user named User1. Workspace1 contains a Desktop application group named Pool1Desktop.

At 09:00, you create a conditional access policy that has the following settings:

Assignments:

- Users and groups: User1
- Cloud apps or actions: Azure Virtual Desktop
- Conditions: 0 conditions selected

Access controls

- Grant: Grant access, Require multi-factor authentication
- Sessions: Sign-in frequency 1 hour

User1 performs the actions shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-mfa>

#### **NEW QUESTION: 94**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following:

- \* A Microsoft 365 E5 tenant
- \* An on-premises Active Directory domain
- \* A hybrid Azure Active Directory (Azure AD) tenant
- \* An Azure Active Directory Domain Services (Azure AD DS) managed domain
- \* An Azure Virtual Desktop deployment

The Azure Virtual Desktop deployment contains personal desktops that are hybrid joined to the on-premises domain and enrolled in Microsoft Intune.

You need to configure the security settings for the Microsoft Edge browsers on the personal desktops.

Solution: You configure a compliance policy in Intune.

Does this meet the goal?

**A.** Yes

**B.** No

**Answer: B (LEAVE A REPLY)**

Explanation

You need to configure a Configuration Profile in Intune or use Group Policy.

**NEW QUESTION: 95**

You have an Azure Virtual Desktop deployment.

You plan to deploy Update Management to manage automated updates for server-based session hosts.

You need to configure the prerequisites for Update Management.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a Log Analytics workspace.
- B. Create an Azure Automation account.
- C. Create an Azure Service Health alert rule.
- D. Enable the Application Insights Agent.
- E. Configure Azure Network Watcher.

**Answer:** ([SHOW ANSWER](#))

Explanation

<https://learn.microsoft.com/en-us/azure/architecture/hybrid/azure-update-mgmt>

**NEW QUESTION: 96**

You have an Azure Virtual Desktop host pool named HostPool1 that must support 60 sessions.

The session hosts for HostPool1 are configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 97**

You have an Azure Virtual Desktop host pool named Pool1 and an Azure Storage account named storage1. Pool1 and storage1 are in the same Azure region.

The current network utilization of the session hosts during peak hours is 95%.

You plan to use FSLogix profile containers stored in storage1 for users that connect to Pool1.

You need to configure the session hosts and storage1 to minimize network latency when loading and updating profiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/architecture/example-scenario/wvd/windows-virtual-desktop-fslogix>

**NEW QUESTION: 98**

Which setting should you modify for VNET4 before you can deploy Pool4?

- A. Service endpoints
- B. Address space
- C. DNS servers
- D. Access control (IAM)
- E. Peerings

**Answer: C (LEAVE A REPLY)**

Explanation

DNS should be configured to use an Active Directory Domain Controller.

### NEW QUESTION: 99

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following:

A Microsoft 365 E5 tenant

An on-premises Active Directory domain

A hybrid Azure Active Directory (Azure AD) tenant

An Azure Active Directory Domain Services (Azure AD DS) managed domain

An Azure Virtual Desktop deployment

The Azure Virtual Desktop deployment contains personal desktops that are hybrid joined to the on-premises domain and enrolled in Microsoft Intune.

You need to configure the security settings for the Microsoft Edge browsers on the personal desktops.

Solution: You create and configure a Group Policy Object (GPO) in the on-premises domain.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A (LEAVE A REPLY)**

Reference:

<https://www.compete366.com/blog-posts/eight-tips-on-how-to-manage-azure-virtual-desktop-avd/>

### NEW QUESTION: 100

-

You have an Azure Virtual Desktop deployment that contains the session hosts shown in the following table.

You have the users shown in the following table.

Users connect to Azure from the locations shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Text, letter Description automatically generated

**NEW QUESTION: 101**

You have an Azure virtual machine named VM1 that runs Windows 10 Enterprise multi-session. You plan to add language packs to VM1 and create a custom image of VM1 for a Windows Virtual Desktop host pool.

You need to ensure that modern apps can use the additional language packs when you deploy session hosts by using the custom image.

Which command should you run first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/deployment/issues-appx-cleanup-maintenance-task>

<https://docs.microsoft.com/en-us/powershell/module/scheduledtasks/disable-scheduledtask?view=windowsserver2019-ps>

**NEW QUESTION: 102**

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains two session hosts. Pool1 is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE- Each correct selection is worth one point.

**Answer:****NEW QUESTION: 103**

You have an Azure Virtual Desktop host pool named HostPool1. HostPool1 contains Windows 10 session hosts and the application groups shown in the following table.

You need to assign an instance of a Windows 11 Desktop application group to users.

What should you do first?

- A. Create a scaling plan.
- B. Create a new workspace.
- C. Add a session host to HostPool1.
- D. Create a new host pool

**Answer: D (LEAVE A REPLY)**

Explanation

The current hostpool has Windows 10 hosts, If you add an Windows 11 host in the current hostpool you cant force a desktop to use Windows 11. If you want to use Windows 11, ether delete the current session hosts and add Windows 11 Hosts. or create a new Hostpool.

#### **NEW QUESTION: 104**

You have a Windows Virtual Desktop deployment.

You have a session host named Host1 that has the disk layout shown in the exhibit. (Click the Exhibit tab.)

You plan to deploy an app that must be installed on D.

The app requires 500 GB of disk space.

You need to add a new data disk that will be assigned the drive letter D.

The solution must maintain the current performance of Host1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### **Answer:**

Explanation

Reference:

<https://www.azurecorner.com/change-temporary-drive-azure-vm-use-d-persistent-data-disks/>

#### **NEW QUESTION: 105**

You plan to deploy Windows Virtual Desktop.

You need to create Azure NetApp Files storage to store FSLogix profile containers.

Which four actions should you perform in sequence after you register the NetApp Resource Provider? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

#### **Answer:**

Explanation:

1. Set up Azure NetApp Files account
2. Create capacity pool
3. Join Active Directory connection
4. Create new volume

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-fslogix-profile-container>

#### **NEW QUESTION: 106**

You have an Azure subscription that contains a hybrid Azure Active Directory (Azure AD) tenant and two domain-joined Azure virtual machines. The virtual machines run Windows Server 2019 and contain managed disks.

You plan to deploy an Azure Virtual Desktop host pool that will use a Storage Spaces Direct Scale-Out File Server to host user profiles.

You need to ensure that the virtual machines can host the Storage Spaces Direct deployment.

The solution must meet the following requirements:

- \* Ensure that the user profiles are available if a single server falls.
- \* Minimize administrative effort.

What should you do? To answer, select the appropriate options In the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-server/storage/storage-spaces/deploy-storage-spaces-direct>

**NEW QUESTION: 107**

You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-enable-azure-mfa>

**NEW QUESTION: 108**

You have the devices shown in the following table.

You plan to deploy Windows Virtual Desktop for client access to remove virtualized apps.

Which devices support the Remote Desktop client?

- A. Device1 and Device2 only
- B. Device1 and Device3 only

C. Device1, Device2, and Device3

D. Device1 only

**Answer: B (LEAVE A REPLY)**

Reference:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-desktop-services/clients/windowsdesktop>

### NEW QUESTION: 109

You have an Azure Virtual Desktop host pool named Pool1. Pool1 contains session hosts that have a third-party application named App1. App1 is published by using a RemoteApp group. A new MSI-based version of App1 is installed each month to each host. The name of the executable file is different for each version of App1.

You need to automate the process of making a new version of App1 available via RemoteApp. The process must ensure that the user experience remains the same when launching the application from the Windows Desktop client.

Which two cmdlets should you run? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Remove-AzWvdApplication

B. New-AzWvdApplication

C. New-AzWvdApplicationGroup

D. New-AzWvdMsixPackage

E. New-AzRoleAssignment

F. Remove-AzWvdMsixPackage

**Answer: B,D (LEAVE A REPLY)**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/what-is-app-attach>

<https://docs.microsoft.com/en-us/powershell/module/az.desktopvirtualization/new-azwvdapplication?view=azps->

### NEW QUESTION: 110

Which setting should you modify for VNET4 before you can deploy Pool4?

A. Service endpoints

B. Address space

C. DNS servers

D. Access control (1AM)

E. Peerings

**Answer: C (LEAVE A REPLY)**

DNS should be configured to use an Active Directory Domain Controller.

### NEW QUESTION: 111

You have an Azure Virtual Desktop deployment.

You are configuring the outbound firewall settings for the host pool.

Which outbound URL and outbound port should you configure to ensure that the host machines maintain Windows activation? To answer, select the appropriate options In the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/safe-url-list>

### **NEW QUESTION: 112**

Which users can create Pool4, and which users can join session hosts to the domain? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

### **NEW QUESTION: 113**

Your company has the offices shown in the following table.

The company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1.

Users connect to a Windows Virtual Desktop deployment named WVD1. WVD1 contains session hosts that have public IP addresses from the 52.166.253.0/24 subnet.

Contoso.com has a conditional access policy that has the following settings:

Name: Policy1

Assignments:

Users and groups: User1

Cloud apps or actions: Windows Virtual Desktop

Access controls:

Grant: Grant access, Require multi-factor authentication

Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-enable-azure-mfa>

### **NEW QUESTION: 114**

You are automating the deployment of an Azure Virtual Desktop host pool.

You deploy the Azure Resource Manager (ARM) template shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the Dockerfile.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/virtual-desktop-fall-2019/configure-host-pool-personal-de>

**NEW QUESTION: 115**

You have a Windows Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

You need to recommend the virtual machine size for each host pool. The solution must minimize costs.

Which size should you recommend for each pool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/sizes>

<https://docs.microsoft.com/en-us/azure/virtual-machines/nvv3-series>

<https://docs.microsoft.com/en-us/azure/virtual-machines/dv4-dsv4-series>

**NEW QUESTION: 116**

Your network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant. The domain contains the users shown in the following table.

You have a Windows Virtual Desktop deployment that contains the application groups shown in the following table.

You have the workspaces shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/environment-setup>

**NEW QUESTION: 117**

You have a Azure Virtual Desktop deployment.

In Azure Advisor, you discover the following recommendation related to Azure Virtual Desktop:

\* Impact Medium

- \* Description: No validation environment enabled
- \* Potential Benefit Ensure business continuity through AVD service deployments
- \* Impacted Resource: Host Pool

What can you validate by implementing the recommendations?

- A. Capacity requirements of the session hosts
- B. Security settings of Azure Virtual Desktop
- C. Preview features for Azure Virtual Desktop
- D. Azure Site Recovery failover of the session hosts

**Answer: D (LEAVE A REPLY)**

Validation environments are used to test and validate Azure Virtual Desktop deployments before they are made available to users. This can include testing the capacity of the session hosts, the performance of the deployment, and the configuration of security settings. By implementing a validation environment, you can ensure that the Azure Virtual Desktop deployment is working correctly and that there are no issues that could impact business continuity. This can help to ensure a smooth user experience and minimize downtime.

#### **NEW QUESTION: 118**

You need to recommend a DNS infrastructure that meet the performance requirements. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### **NEW QUESTION: 119**

-

Your on-premises network contains an Active Directory domain that syncs with an Azure AD tenant.

You have an Azure Virtual Desktop host pool that contains Windows 11 session hosts joined to the domain.

You need to configure Azure NetApp Files to store user profile containers.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer:**

Explanation

A picture containing text Description automatically generated

#### **NEW QUESTION: 120**

Your company has a single office and has 40 employees.

You are planning a Azure Virtual Desktop deployment. The estimated user workloads are shown in the following table.

Half the users of each workload type work from home. All the users who work from home do NOT establish a VPN connection to the office. Approximately how much bandwidth is needed between the office and Azure to support the planned workloads?

- A. 220 Mbps
- B. 55 Mbps
- C. 110 Mbps
- D. 9.5 Mbps

**Answer: B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 121**

You have a Azure Virtual Desktop host pool named Pool1 that contains three session hosts. The session hosts are configured to use FSLogix profile containers. You need to configure Cloud Cache on the session hosts.

What should you do?

- A. Remove VHDlocations entries from the Windows registry.
- B. Configure FSLogix Office Container.
- C. Add VHDlocations entries to the Windows registry.
- D. Uninstall the FSLogix agent

**Answer: A ([LEAVE A REPLY](#))**

Reference:

<https://docs.microsoft.com/en-us/fslogix/configure-cloud-cache-tutorial>

**Valid AZ-140 Dumps** shared by BraindumpsPass.com for Helping Passing AZ-140 Exam! #### **NEW QUESTION: 122**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Windows Virtual Desktop host pool that contains five session hosts. The session hosts run Windows 10 Enterprise multi-session.

You need to prevent users from accessing the internet from Windows Virtual Desktop sessions. The session hosts must be allowed to access all the required Microsoft services.

Solution: You configure rules in the network security group (NSG) linked to the subnet of the session hosts.

Does that meet the goal?

A. Yes

B. No

**Answer: A (LEAVE A REPLY)**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-network/tutorial-filter-network-traffic>

### NEW QUESTION: 123

You have an Azure subscription that contains the resources shown in the following table.

You create a recovery services vault named Vault1.

Which resources can you back up using Azure Backup to Vault1?

A. AVDVM-0 only

B. AVDVM-0 and share1 only

C. AVDVM-0, Image1 and Image2 only

D. AVDVM-0, share1 and Image1 only

E. AVDVM-0, share1, Image1 and Image2

**Answer: E (LEAVE A REPLY)**

Reference:

<https://www.techrepublic.com/article/how-to-create-a-backup-recovery-service-with-microsoft-azure/>

### NEW QUESTION: 124

You have an Azure subscription that contains the resources shown in the following table.

You need to ensure that users can restore files saved to their FSLogix profile.

What should you do?

A. From the CPool1 blade in the Azure portal, create a new volume.

B. From the Azure portal, create an Azure Backup vault and a backup policy.

C. From the Volume1 blade in the Azure portal, create a snapshot policy.

D. From the Azure portal, create a Recovery Services vault and a backup policy.

**Answer: D (LEAVE A REPLY)**

From the docs: Azure Files Premium tier integrates with Azure Backup and is supported in conjunction with FSLogix. Azure NetApp Files offers a similar snapshot mechanism to make copies of your FSLogix profile containers. <https://learn.microsoft.com/en-us/azure/architecture/example-scenario/wvd/windows-virtual-desktop-fslogix#backup-and-restore>

### NEW QUESTION: 125

You plan to deploy Windows Virtual Desktop.

Users have the devices shown in the following table.

From which device types can the users connect to Windows Virtual Desktop resources by using the Remote Desktop client app and the Remote Desktop web client? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-web>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-android>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-macos>

### **NEW QUESTION: 126**

**Answer:**

### **NEW QUESTION: 127**

You plan to deploy Windows Virtual Desktop.

Users have the devices shown in the following table.

From which device types can the users connect to Windows Virtual Desktop resources by using the Remote Desktop client app and the Remote Desktop web client? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-web>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-android>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/connect-macos>

### **NEW QUESTION: 128**

Your network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant. The domain contains the users shown in the following table.

You have a Windows Virtual Desktop deployment that contains the application groups shown in the following table.

You have the workspaces shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/environment-setup>

### NEW QUESTION: 129

You have an on-premises network and an Azure subscription. The subscription contains the following virtual network:

- \* Name: VNet1
- \* Address space: 10.10.0.0/16
- \* Subnet name: Subnet1
- \* Subnet1 address range: 10.10.0.0/16

You deploy an Azure Virtual Desktop host pool that contains 10 session hosts to Subnets.

You plan to deploy a VPN gateway to VNet1 and provide the session hosts with access to the on-premises network.

You need to ensure that you can deploy the VPN gateway.

What should you do first?

- A. Modify the address range of Subnet1. Most Voted
- B. Add a subnet named GatewaySubnet to VNet1.
- C. Modify the address space of VNet1. Most Voted
- D. Associate a network security group (NSG) to Subnet1.

**Answer:** ([SHOW ANSWER](#))

In order to deploy a VPN gateway to VNet1, you should first add a subnet named GatewaySubnet to VNet1. According to the Microsoft Official Guide AZ-140, "You must create a gateway subnet for the virtual network that you plan to use for the gateway. The subnet must be named GatewaySubnet and it must use an address range that is large enough to accommodate the number of IP addresses that you plan to use for the gateway and its supporting resources." Therefore, the first step to ensure that you can deploy the VPN gateway is to add a subnet named GatewaySubnet to VNet1.

### NEW QUESTION: 130

You have an Azure virtual machine named VM1 that runs Windows 10 Enterprise multi-session.

You plan to add language packs to VM1 and create a custom image of VM1 for a Windows Virtual Desktop host pool.

You need to ensure that modern apps can use the additional language packs when you deploy session hosts by using the custom image.

Which command should you run first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Testlet 2

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide

more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a law firm that has a main office in Montreal and branch offices in Paris and Seattle. The Seattle branch office opened recently.

Contoso has an Azure subscription and uses Microsoft 365.

Existing Infrastructure. Active Directory

The network contains an on-premises Active Directory domain named contoso.com and an Azure Active Directory (Azure AD) tenant. One of the domain controllers runs as an Azure virtual machine and connects to a virtual network named VNET1. All internal name resolution is provided by DNS server that run on the domain controllers.

The on-premises Active Directory domain contains the organizational units (OUs) shown in the following table.

The on-premises Active Directory domain contains the users shown in the following table.

The Azure AD tenant contains the cloud-only users shown in the following table.

Existing Infrastructure. Network Infrastructure

All the Azure virtual networks are peered. The on-premises network connects to the virtual networks.

All servers run Windows Server 2019. All laptops and desktop computers run Windows 10 Enterprise.

Since users often work on confidential documents, all the users use their computer as a client for connecting to Remote Desktop Services (RDS).

In the West US Azure region, you have the storage accounts shown in the following table.

Existing Infrastructure. Remote Desktop Infrastructure

Contoso has a Remote Desktop infrastructure shown in the following table.

Requirements. Planned Changes

Contoso plans to implement the following changes:

- \* Implement FSLogix profile containers for the Paris offices.
- \* Deploy a Windows Virtual Desktop host pool named Pool4.
- \* Migrate the RDS deployment in the Seattle office to Windows Virtual Desktop in the West US Azure region.

## Requirements. Pool4 Configuration

Pool4 will have the following settings:

- \* Host pool type: Pooled
- \* Max session limit: 7
- \* Load balancing algorithm: Depth-first
- \* Images: Windows 10 Enterprise multi-session
- \* Virtual machine size: Standard D2s v3
- \* Name prefix: Pool4
- \* Number of VMs: 5
- \* Virtual network: VNET4

## Requirements. Technical Requirements

Contoso identifies the following technical requirements:

- \* Before migrating the RDS deployment in the Seattle office, obtain the recommended deployment configuration based on the current RDS utilization.
- \* For the Windows Virtual Desktop deployment in the Montreal office, disable audio output in the device redirection settings.
- \* For the Windows Virtual Desktop deployment in the Seattle office, store the FSLogix profile containers in Azure Storage.
- \* Enable Operator2 to modify the RDP Properties of the Windows Virtual Desktop deployment in the Montreal office.
- \* From a server named Server1, convert the user profile clicks to the FSLogix profile containers.
- \* Ensure that the Pool1 virtual machines only run during business hours.
- \* Use the principle of least privilege.

## **NEW QUESTION: 133**

### HOTSPOT

Your company has the offices shown in the following table.

The company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1.

Users connect to a Windows Virtual Desktop deployment named WVD1. WVD1 contains session hosts that have public IP addresses from the 52.166.253.0/24 subnet.

Contoso.com has a conditional access policy that has the following settings:

- \* Name: Policy1
- \* Assignments:
  - Users and groups: User1
  - Cloud apps or actions: Windows Virtual Desktop
- \* Access controls:
  - Grant: Grant access, Require multi-factor authentication
- \* Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

Explanation/Reference:

**NEW QUESTION: 134**

You have a hybrid Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

You have an Azure Virtual Desktop host pool. All the session hosts have a folder named C:\Folder1.

You create an FSLogix Application Masking rule as shown in the following exhibit.

You create assignments for the Application Masking rule as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true, Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

**NEW QUESTION: 135**

You have an Azure subscription that contains the resources shown in the following table.

Which resources can you back up by using Azure Backup?

- A. WVDVM-0 and share1 only
- B. WVDVM-0 only
- C. WVDVM-0, Image1, and Image2 only
- D. WVDVM-0, share1, and Image1 only
- E. WVDVM-0, share1, Image1, and Image2

**Answer: A (LEAVE A REPLY)**

Reference:

<https://docs.microsoft.com/en-us/azure/backup/backup-afs>

<https://docs.microsoft.com/en-us/azure/backup/backup-azure-vms-introduction>

**NEW QUESTION: 136**

You have an Azure Virtual Desktop deployment that contains two users named User1 and User2 and the storage accounts shown in the following table.

The File share settings for storage1 are configured as shown in the following exhibit.

The File share settings for storage2 are configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

**Valid AZ-140 Dumps** shared by BraindumpsPass.com for Helping Passing AZ-140 Exam! BraindumpsPass.com now offer the **newest AZ-140 exam dumps**, the BraindumpsPass.com AZ-140 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com AZ-140 dumps with Test Engine here: <https://www.braindumps.com/Microsoft/AZ-140-practice-exam-dumps.html> (280 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

### NEW QUESTION: 137

You have an Azure Virtual Desktop deployment that contains a host pool. The host pool contains 10 session hosts. The session hosts are configured by using a custom image and ephemeral disks.

You need to deploy Microsoft OneDrive for Business.

Which two actions should you perform for each session host? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Install FSLogix.
- B. Install the OneDrive sync app by using the per-machine installation option.
- C. Implement Application Masking.
- D. Install the OneDrive sync app by using the per-user installation option.
- E. Deploy an MSIX app attach package.

**Answer: A,B (LEAVE A REPLY)**

1. Install FSLogix - FSLogix provides a single-user solution for running multiple OneDrive for Business clients simultaneously on the same session host.
2. Install the OneDrive sync app by using the per-machine installation option - according to the Microsoft AZ-140 Official Guide, "OneDrive for Business supports per-machine installation, which is required for a multi-user VDI environment." This means that the OneDrive sync app must be installed on each session host using the per-machine installation option.

### NEW QUESTION: 138

You have an Azure Virtual Desktop host pool named Pool1, an application named App1, and an Azure file share named Share1.

You need to ensure that you can publish App1 to Pool1 by using MSIX app attach.

Which four actions should you perform in sequence before you publish App1? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

- 1 - Generate a signing certificate.
- 2 - Create an MSIX package.
- 3 - Create an MSIX image.

4 - Upload the MSIX image to Shsre1.

<https://docs.microsoft.com/en-us/windows/msix/packaging-tool/create-app-package>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/app-attach-image-prep>

### **NEW QUESTION: 139**

Which role should you assign to Operator2 to meet the technical requirements?

**A.** Desktop Virtualization Session Host Operator

**B.** Desktop Virtualization Host Pool Contributor

**C.** Desktop Virtualization User Session Operator

**D.** Desktop Virtualization Contributor

**Answer: D (LEAVE A REPLY)**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/rbac>

Topic 1, Contoso. Ltd

Existing Infrastructure

Active Directory

The network contains an on-premises Active Directory domain named contoso.com and an Azure Active Directory (Azure AD) tenant. One of the domain controllers runs as an Azure virtual machine and connects to a virtual network named VNET1. All internal name resolution is provided by DNS server that run on the domain controllers.

The on-premises Active Directory domain contains the organizational units (OUs) shown in the following table.

The on-premises Active Directory domain contains the users shown in the following table.

The Azure AD tenant contains the cloud-only users shown in the following table.

Existing Infrastructure. Network Infrastructure

All the Azure virtual networks are peered. The on-premises network connects to the virtual networks.

All servers run Windows Server 2019. All laptops and desktop computers run Windows 10 Enterprise.

Since users often work on confidential documents, all the users use their computer as a client for connecting to Remote Desktop Services (RDS).

In the West US Azure region, you have the storage accounts shown in the following table.

Existing Infrastructure. Remote Desktop Infrastructure

Contoso has a Remote Desktop infrastructure shown in the following table.

Requirements

Planned Changes

Contoso plans to implement the following changes:

Implement FSLogix profile containers for the Paris offices.

Deploy a Windows Virtual Desktop host pool named Pool4.

Migrate the RDS deployment in the Seattle office to Windows Virtual Desktop in the West US Azure region.

Requirements. Pool4 Configuration

Pool4 will have the following settings:

Host pool type: Pooled

Max session limit: 7

Load balancing algorithm: Depth-first

Images: Windows 10 Enterprise multi-session

Virtual machine size: Standard D2s v3

Name prefix: Pool4

Number of VMs: 5

Virtual network: VNET4

Requirements. Technical Requirements

Contoso identifies the following technical requirements:

Before migrating the RDS deployment in the Seattle office, obtain the recommended deployment configuration based on the current RDS utilization.

For the Windows Virtual Desktop deployment in the Montreal office, disable audio output in the device redirection settings.

For the Windows Virtual Desktop deployment in the Seattle office, store the FSLogix profile containers in Azure Storage.

Enable Operator2 to modify the RDP Properties of the Windows Virtual Desktop deployment in the Montreal office.

From a server named Server1, convert the user profile clicks to the FSLogix profile containers.

Ensure that the Pool1 virtual machines only run during business hours.

Use the principle of least privilege.

### **NEW QUESTION: 140**

You have an Azure Virtual Desktop deployment that contains a host pool. The host pool contains 10 session hosts. The session hosts are configured by using a custom image and ephemeral disks.

You need to deploy Microsoft OneDrive for Business.

Which two actions should you perform for each session host? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Install FSLogix.
- B. Install the OneDrive sync app by using the per-machine installation option.
- C. Implement Application Masking.
- D. Install the OneDrive sync app by using the per-user installation option.
- E. Deploy an MSIX app attach package.

**Answer: A,B (LEAVE A REPLY)**

The two actions you should perform for each session host in order to deploy Microsoft OneDrive for Business are:

A) Install FSLogix - FSLogix provides a single-user solution for running multiple OneDrive for Business clients simultaneously on the same session host.

**NEW QUESTION: 141**

-

You have an Azure Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

You need to recommend the virtual machine size for each host pool to meet the session host requirements.

**Answer:**

Explanation:

Table Description automatically generated

**NEW QUESTION: 142**

You have an Azure subscription that contains the virtual machines shown in the following table.

You create a shared image gallery as shown in the SharedGallery1 exhibit. (Click the SharedGallery1 tab.)

You create an image definition as shown in the Image1 exhibit. (Click the Image1 tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Reference:

<https://www.robinhobo.com/windows-virtual-desktop-wvd-image-management-how-to-manage-and-deploy-cust>

**NEW QUESTION: 143**

-

You have an Azure Virtual Desktop host pool named HostPool1 that must support 60 sessions. The session hosts for HostPool1 are configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

**NEW QUESTION: 144**

-

You have an Azure Virtual Desktop host pool that contains 10 session hosts.

You plan to configure each session host to use an FSLogix profile container that will exclude specific folders in the user profile.

You need to perform the following configurations:

- \* Create a configuration file to list the excluded profile folders.
- \* Identify which registry setting will distribute the file to each session host automatically.

What should you name the configuration file, and which registry setting should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

Graphical user interface, text, application Description automatically generated

### **NEW QUESTION: 145**

You have an Azure Virtual Desktop host pool named Pool1 and an Azure Storage account named storage1.

Pool1 and storage1 are in the same Azure region.

The current network utilization of the session hosts during peak hours is 95%.

You plan to use FSLogix profile containers stored in storage1 for users that connect to Pool1.

You need to configure the session hosts and storage1 to minimize network latency when loading and updating profiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/architecture/example-scenario/wvd/windows-virtual-desktop-fslogix>

### **NEW QUESTION: 146**

You have an Azure subscription.

You plan to deploy an Azure Virtual Desktop solution that will contain Windows 10 multi-session hosts in a single host pool. The solution has the requirements shown in the following table.

You need to configure the session host for the host pool. The solution must minimize costs.

How many session hosts should the host pool contain, and how many vCPUs should each session host have? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer:**

**NEW QUESTION: 147**

You plan to deploy Windows Virtual Desktop to meet the department requirements shown in the following table.

You plan to use Windows Virtual Desktop host pools with load balancing and autoscaling.

You need to recommend a host pool design that meets the requirements. The solution must minimize costs.

What is the minimum number of host pools you should recommend?

- A. 1
- B. 2
- C. 3
- D. 4

**Answer: (SHOW ANSWER)**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-host-pools-azure-marketplace>  
3 Host Pools - The RemoteApp can be joined inside the IT Multi-Session desktop or the Engineering.

<https://docs.microsoft.com/en-us/azure/virtual-desktop/manage-app-groups> The default app group created for a new Azure Virtual Desktop host pool also publishes the full desktop. In addition, you can create one or more RemoteApp application groups for the host pool.

**NEW QUESTION: 148**

You have an Azure Virtual Desktop host pool. The pool contains session hosts that run Windows 10 Enterprise multi-session.

You connect to a Remote Desktop session on Pool1 and discover an issue with the frequency of screen updates.

You need to identify whether the issue related to insufficient server, network, or client resources. The solution must minimize how long it takes to identify the resource type.

What should you do?

- A. From within the current session, use the Azure Virtual Desktop Experience Estimator.
- B. From Azure Cloud Shell, run the Get-AzOperationalInsightsWorkspaceUsage cmdlet and specify the DefaultProfile parameter.
- C. From Azure Cloud Shell, run the Get-AzWvdUserSession cmdlet and specify the UserSessionId parameter.
- D. From within the current session, use Performance Monitor to display the values of all the RemoteFX Graphics(\*)\Frames Skipped/Second counters.

**Answer: (SHOW ANSWER)**

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/remotefx-graphics-performance-counters>

**NEW QUESTION: 149**

You have a Windows Virtual Desktop deployment.

You publish a RemoteApp named AppVersion1.

You need AppVersion1 to appear in the Remote Desktop client as Sales Contact Application.

Which PowerShell cmdlet should you use?

- A. Register-AzWvdApplicationGroup
- B. Update-AzWvdApplication
- C. New-AzADApplication
- D. Update-AzWvdApplicationGroup

**Answer: B (LEAVE A REPLY)**

### NEW QUESTION: 150

You have an Azure subscription that contains a hybrid Azure Active Directory (Azure AD) tenant and two domain-joined Azure virtual machines. The virtual machines run Windows Server 2019 and contain managed disks.

You plan to deploy an Azure Virtual Desktop host pool that will use a Storage Spaces Direct Scale-Out File Server to host user profiles.

You need to ensure that the virtual machines can host the Storage Spaces Direct deployment.

The solution must meet the following requirements:

- \* Ensure that the user profiles are available if a single server falls.
- \* Minimize administrative effort.

What should you do? To answer, select the appropriate options In the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-server/storage/storage-spaces/deploy-storage-spaces-direct>

### NEW QUESTION: 151

You have an Azure subscription that contains the resources shown in the following table.

You create a recovery services vault named Vault1.

Which resources can you back up using Azure Backup to Vault1?

- A. AVDVM-0 only
- B. AVDVM-0 and share1 only
- C. AVDVM-0, Image1 and Image2 only
- D. AVDVM-0, share1 and Image1 only
- E. AVDVM-0, share1, Image1 and Image2

**Answer: B (LEAVE A REPLY)**

Explanation

<https://docs.microsoft.com/en-us/azure/backup/backup-overview#what-can-i-back-up> Operational backup of blobs is a local backup solution. So the backup data isn't transferred to the Backup vault

### NEW QUESTION: 152

-

You have an Azure Virtual Desktop deployment and two Azure Active Directory groups named Group1 and Group2.

You create two Conditional Access policies named Policy1 and Policy2. Policy1 is assigned to Group1.

Policy2 is assigned to Group2. Both policies include Azure Virtual Desktop as a cloud app.

You need to meet the following requirements:

- \* The users in Group1 must be prompted for multi-factor authentication (MFA) when they connect to Azure Virtual Desktop.

- \* The users in Group2 must reauthenticate every eight hours while they are connected to Azure Virtual Desktop.

Which settings should you configure in Policy1 and Policy2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

### NEW QUESTION: 153

You have an Azure subscription that contains the virtual machines shown in the following table.

You create an Azure Compute Gallery as shown in the Azure compute gallery exhibit. (Click the Azure compute gallery tab.)

You create a virtual machine image definition as shown in the VM image definition exhibit. (Click the VM image definition tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**Answer:**

**NEW QUESTION: 154**

You are automating the deployment of an Azure Virtual Desktop host pool.

You deploy the Azure Resource Manager (ARM) template shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the Dockerfile.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/virtual-desktop-fall-2019/configure-host-pool-personal-de>

**NEW QUESTION: 155**

-

Your on-premises network contains an Active Directory domain named fabrikam.com that syncs with Azure Active Directory (Azure AD). The domain contains a global group named AVDusers.

You have an Azure subscription that contains the resources shown in the following table.

All Azure Virtual Desktop users are members of the AVDusers group.

You plan to create FSLogix profile containers in Profiles1.

You need to configure Profiles1 and fabrikam.com to ensure that the HostPool1 sessions hosts can access the FSLogix profile containers.

What should you do? To answer, drag the appropriate configurations to the correct targets. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**Answer:**

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

<https://learn.microsoft.com/en-us/azure/virtual-desktop/fslogix-profile-container-configure-azure-files-active-dir>

**NEW QUESTION: 156**

You have a Azure Virtual Desktop host pool named Pool1 that is integrated with an Azure Active Directory Domain Services (Azure AD DS) managed domain.

You need to configure idle session timeout settings for users that connect to the session hosts in Pool 1.

Solution: From the Azure portal you modify the Advanced settings in the RDP Properties of Pool1.

Does This meet the goal?

A. Yes

B. No

**Answer: B ([LEAVE A REPLY](#))**

### **NEW QUESTION: 157**

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains two session hosts.

Pool1 is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

### **NEW QUESTION: 158**

You have a Windows Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

You need to recommend the virtual machine size for each host pool. The solution must minimize costs.

Which size should you recommend for each pool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/sizes>

<https://docs.microsoft.com/en-us/azure/virtual-machines/nvv3-series>

<https://docs.microsoft.com/en-us/azure/virtual-machines/dv4-dsv4-series>

### **NEW QUESTION: 159**

-

You have an Azure Virtual Desktop deployment that contains the session hosts shown in the following table.

You have the users shows in the following table.

Users connect to Azure from the locations shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

### **NEW QUESTION: 160**

Your on-premises network contains 20 Windows 10 devices.

You have an Azure Virtual Desktop deployment.

You need to deploy the Microsoft Remote Desktop client (MSRDC) to the devices. The MSRDC must be available to everyone who sign in to the devices.

What should you do?

**A.** Install the MSRDC by using msiexec.exe and the ALLUSERS=1 command line option.

**B.** Install the MSRDC by using msiexec.exe and the MSIINSTALLPERUSER=1 command line option.

**C.** Install the MSRDC by using msiexec.exe and the ALLUSERS=2 command line option.

**Answer:** ([SHOW ANSWER](#))

### **NEW QUESTION: 161**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following:

A Microsoft 365 E5 tenant

An on-premises Active Directory domain

A hybrid Azure Active Directory (Azure AD) tenant

An Azure Active Directory Domain Services (Azure AD DS) managed domain

An Azure Virtual Desktop deployment

The Azure Virtual Desktop deployment contains personal desktops that are hybrid joined to the on-premises domain and enrolled in Microsoft Intune.

You need to configure the security settings for the Microsoft Edge browsers on the personal desktops.

Solution: You configure a configuration profile in Intune.

Does this meet the goal?

**A.** Yes

**B.** No

**Answer:** ([SHOW ANSWER](#))

Reference:
