NEW QUESTION: 1

A customer is planning to migrate to Dynamics 365 Finance.

You need to recommend a cloud or on-premises solution based on the customer's business requirements. Which deployment type should you recommend? To answer, drag the appropriate deployment types to the correct requirements. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/get-started/cloud-prem-comparison

NEW QUESTION: 2

You need to determine which system functionality meets the business requirement.

What should you recommend? To answer, drag the appropriate functionalities to the correct requirements.
Each functionality may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

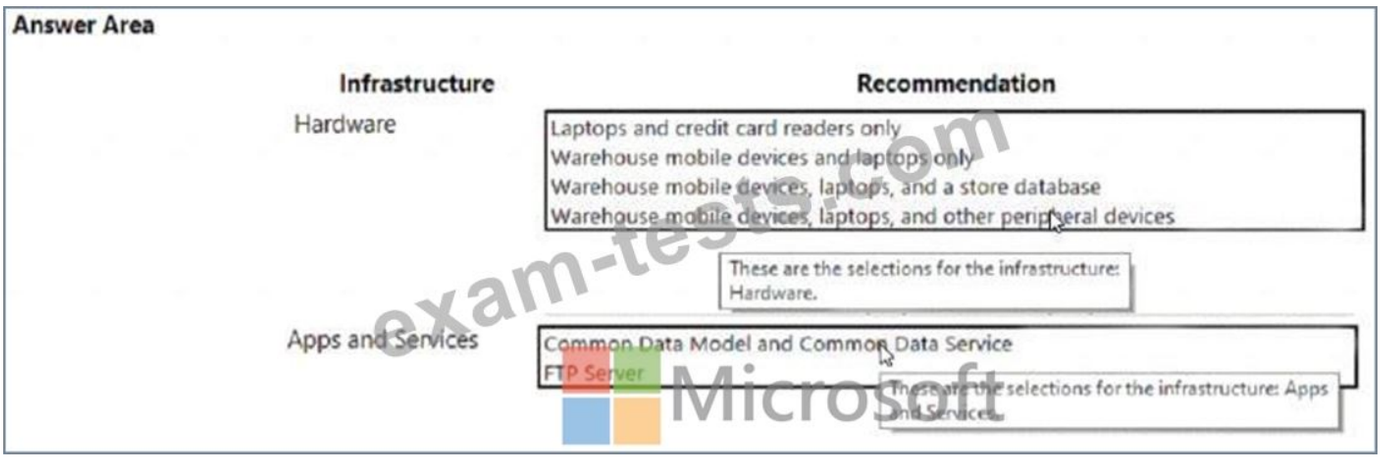

Explanation

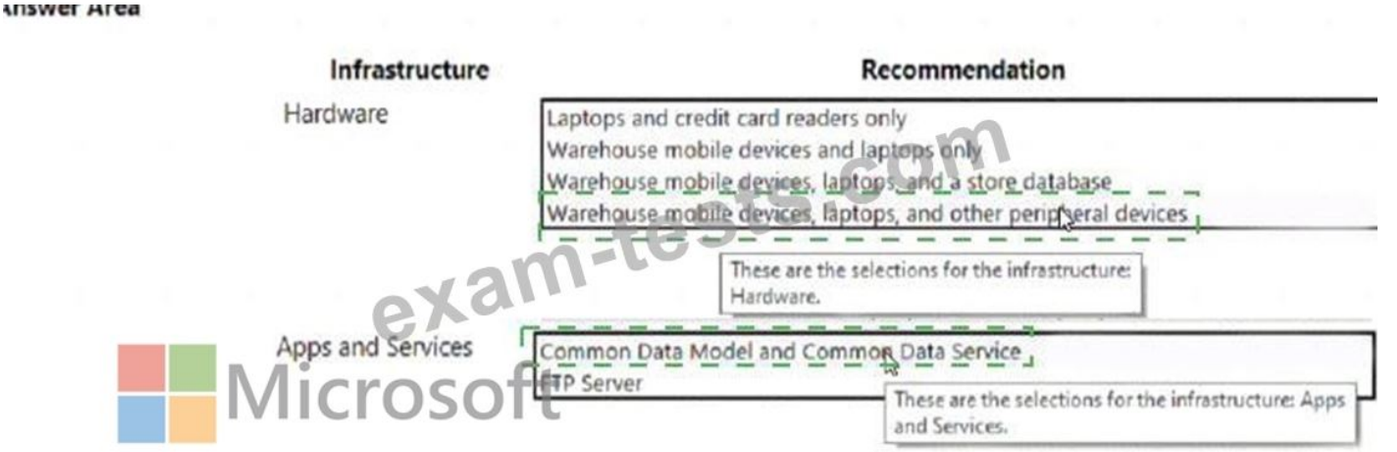

NEW QUESTION: 3
A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.
The company's main priorities are uninterrupted factory and distribution center operations, master data management, financial global reporting, and integration with analytics tools.
You need to design the infrastructure.
Solution: Implement the manufacturing factories' operations and distribution center operations on-premises and replicate the data to a Microsoft data center.
Does the solution meet the goal?
A. No
B. Yes
Answer: B (LEAVE A REPLY)

NEW QUESTION: 4
You need to determine an infrastructure for the solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation

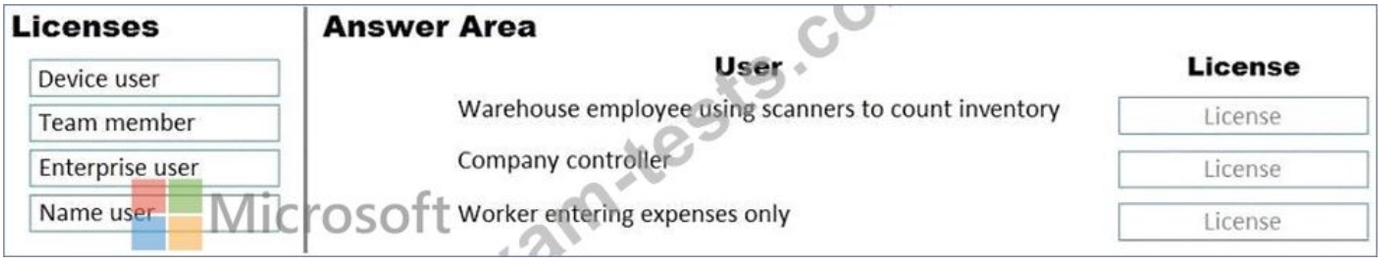

NEW QUESTION: 5

You need to determine user licensing options for Dynamics 365 Finance + Operations (on-premises) .

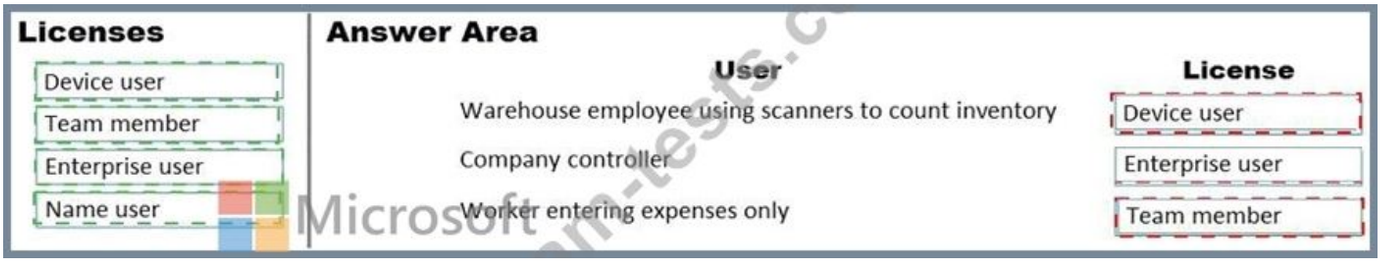

Which type of license should you recommend? To answer, drag the appropriate licenses to the correct users.

Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

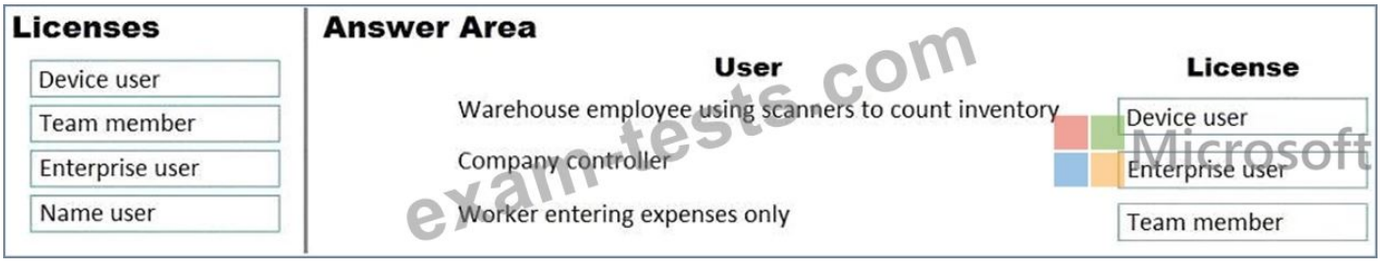

NOTE: Each correct selection is worth one point.

Answer:

Explanation

NEW QUESTION: 6

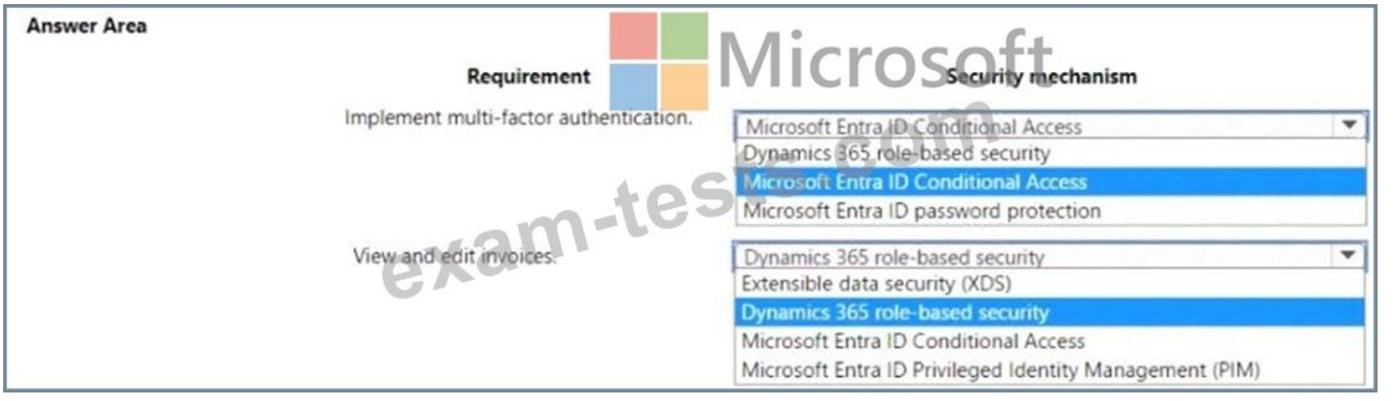

A company is implementing Dynamics 365 Finance.

All users must sign into the system using multi-factor authentication. An accounting manager must be able to view and edit invoices by using out-of-the-box functionality.

You need to recommend security solutions.

Which security solutions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 7

You need to identify the regression testing strategy that should be used by the sates order entry app for the sales order lifecyde.

Which testing strategies should you use? To answer, move the appropriate testing strategies to the correct processes. You may use each testing strategy once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

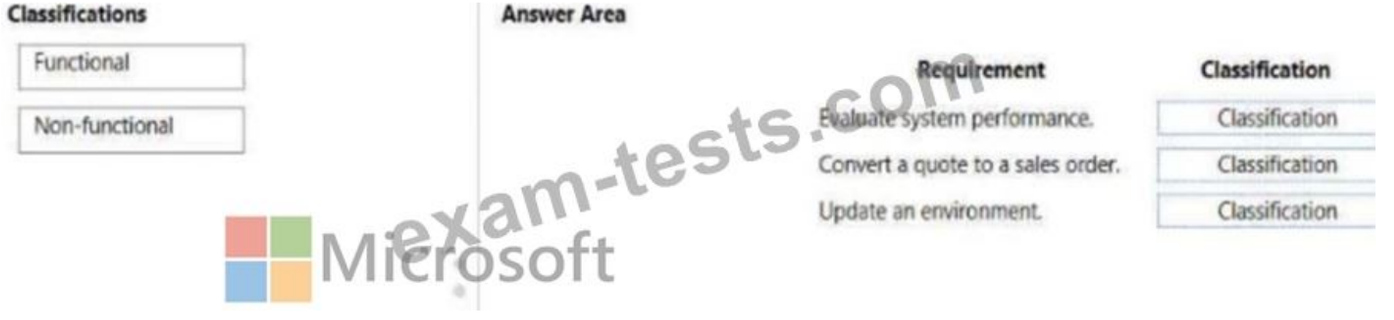

NEW QUESTION: 8

A company plans to implement Dynamics 365 Supply Chain Management.

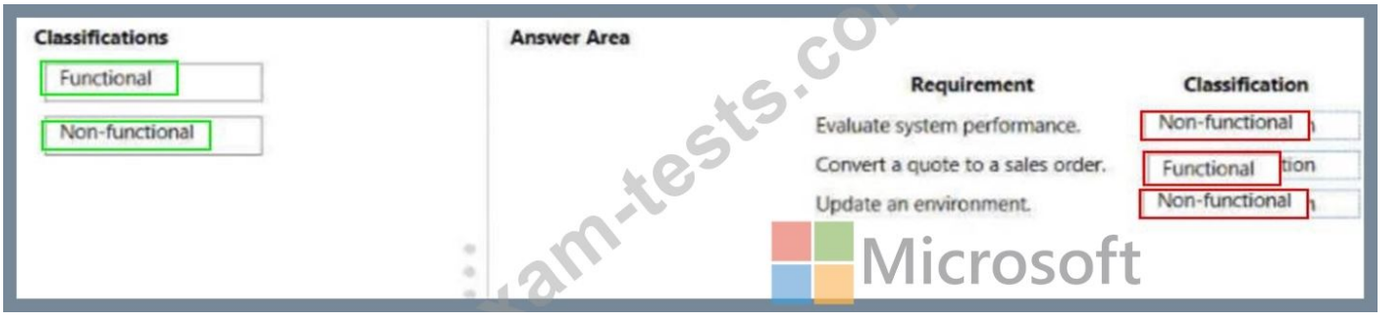

You are a solution architect and need to prepare a Solution Blueprint document for this implementation.

You need to classify the requirements by type.

What is the classification for each requirement? To answer, drag the appropriate classifications to the correct requirements. Each classification may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

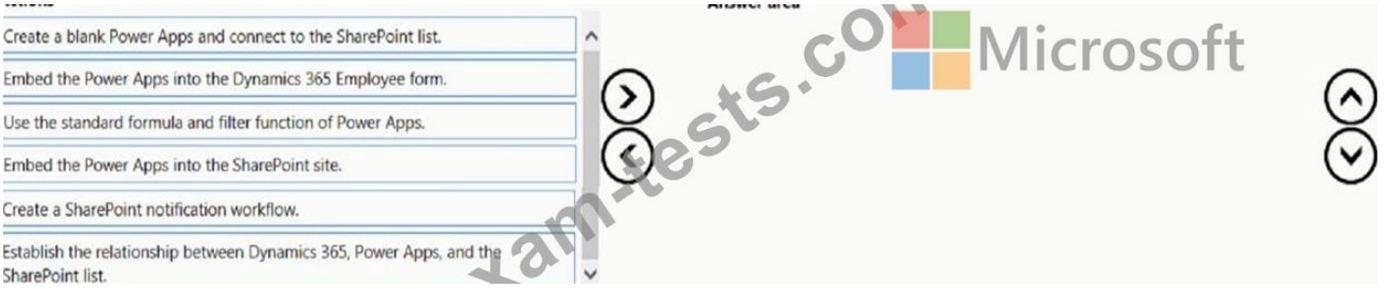

Answer:

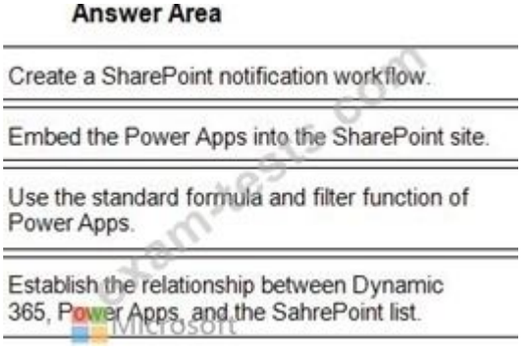

Reference:
https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements

NEW QUESTION: 9
A telecom provider uses Microsoft SharePoint to track and manage mobile phones that are issued to employees.
All information about employee-issued mobile phones be visible in Dynamics 365. Managers must be able to issue new phones directly from the system.
You need to design an integration solution using Dynamics 365 and SharePoint.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

1 - Create a SharePoint notification workflow.
2 - Embed the Power Apps into the SharePoint site.
3 - Use the standard formula and filter function of Power Apps.
4 - Establish the relationship between Dynamic 365, Power Apps, and the SahrePoint list.

NEW QUESTION: 10

A United States-based company has a cloud-based Dynamics 365 Finance implementation. The company plans to open a new location in Mexico.

Electronic invoicing is mandated in Mexico.

You need to recommend a solution that meets Mexican localization reporting requirements. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Explanation

Answer Area

Requirement	Action
Implement localization	Create a new cloud-based instance of Dynamics 365 Finance in Mexico. Select Mexico for the localized functionality region field. Select United States for the localized functionality region field. **Create a new on-premises instance of Dynamics 365 Finance in Mexico.**
Configure company	**Create a new legal entity with MEX as the country code.** Create a new site in the existing legal entity with an address in Mexico. Create a new warehouse in the existing legal entity with an address in Mexico. Copy the current legal entity into a new legal entity and change the site address to Mexico.
Identify gaps	**Identify the reporting format requirement and analyze Dynamics 365 for supporting functionality.** Recommend using current reporting methods. Recommend using out-of-the-box sales invoice report and send in the required format. Identify fields in the localization that are relevant and remove the rest to simplify the report.

Reference:
https://docs.microsoft.com/en-us/dynamics365/finance/localizations/latam-mex-cfdi-electronic-invoices

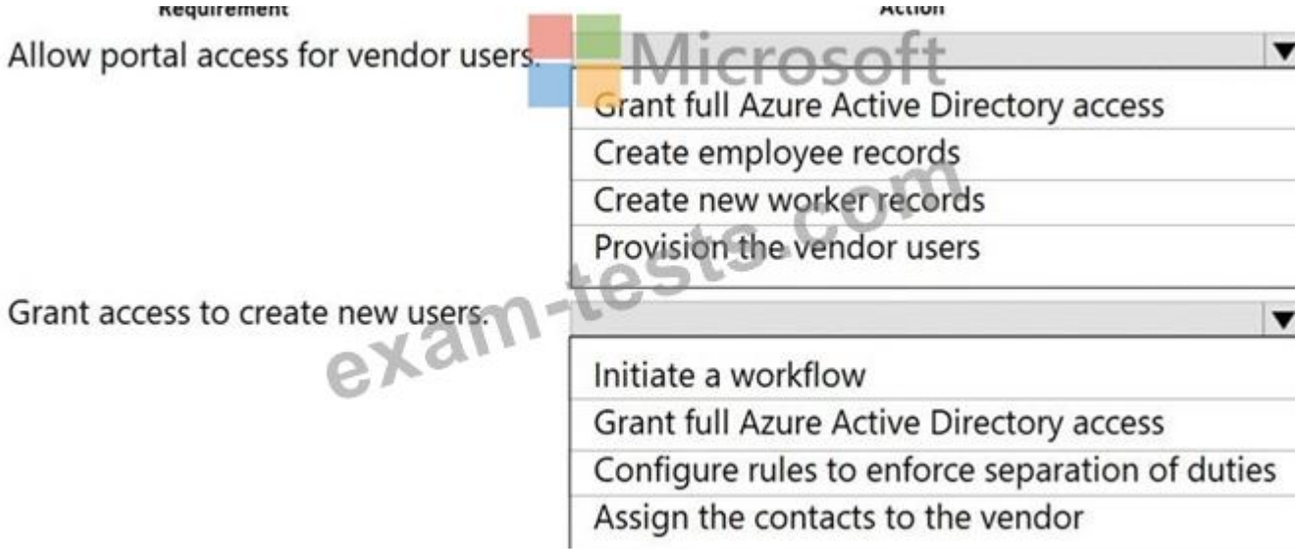

NEW QUESTION: 11
An asset management company is implementing Dynamics 365 Finance. The company is eligible for and has enrolled in the FastTrack program Business users and consultants want to prepare for each FastTrack workshop.
You need to identify when each requirement will be discussed
Which workshop should you select for each requirement' To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

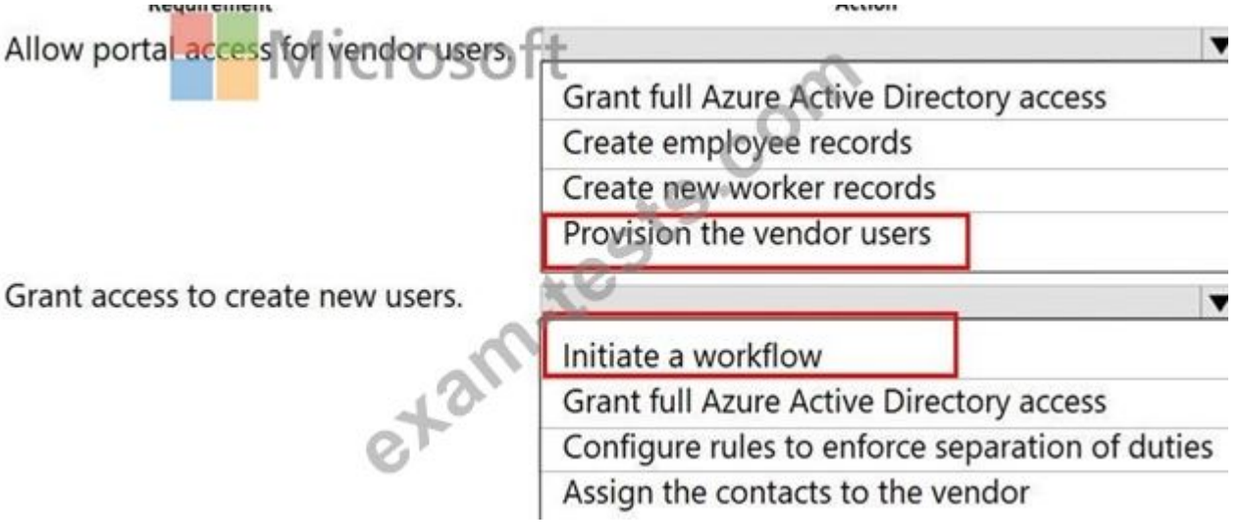

Answer:

NEW QUESTION: 12
A company is implementing the vendor collaboration functionality in Dynamics 365 Chain Management.
A vendor's external user must be able to access the vendor portal and create new users. The external user must be able to create new users only for the vendor's organization.
You need to set up the solution to meet the requirements.
How should you set up the solution? To answer, select the appropriate options in the answer area.

Answer:

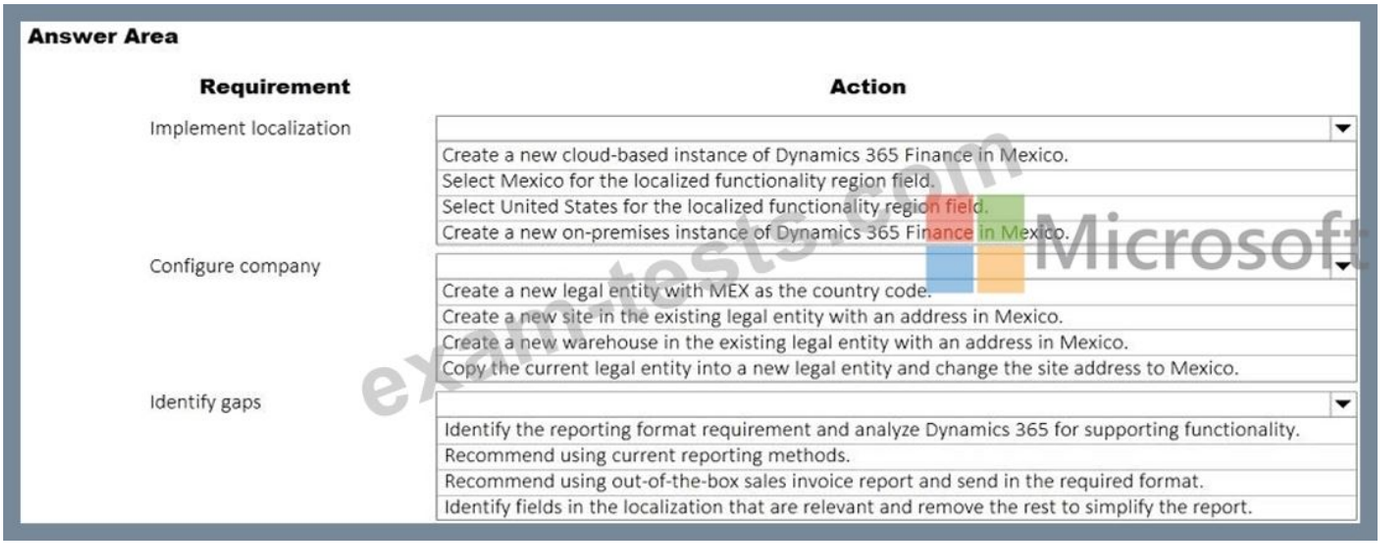

NEW QUESTION: 13

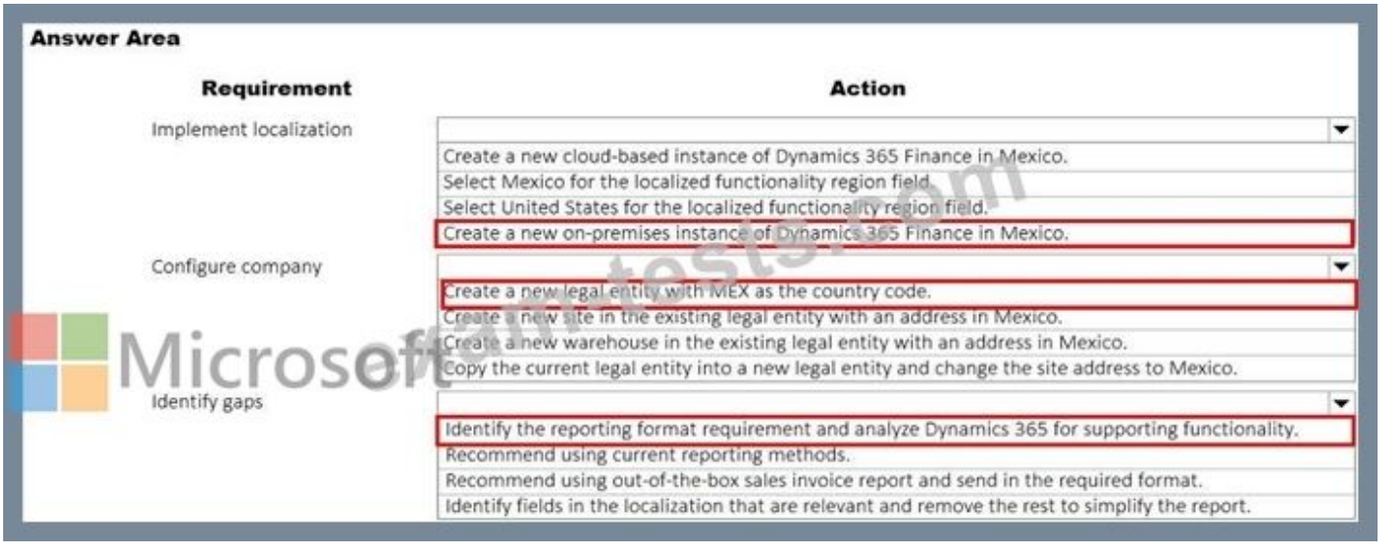

A United States-based company has a cloud-based Dynamics 365 Finance implementation. The company plans to open a new location in Mexico.

Electronic invoicing is mandated in Mexico.

You need to recommend a solution that meets Mexican localization reporting requirements. What should you recommend? To answer, select the appropriate options in the answer are a. NOTE: Each correct selection is worth one point.

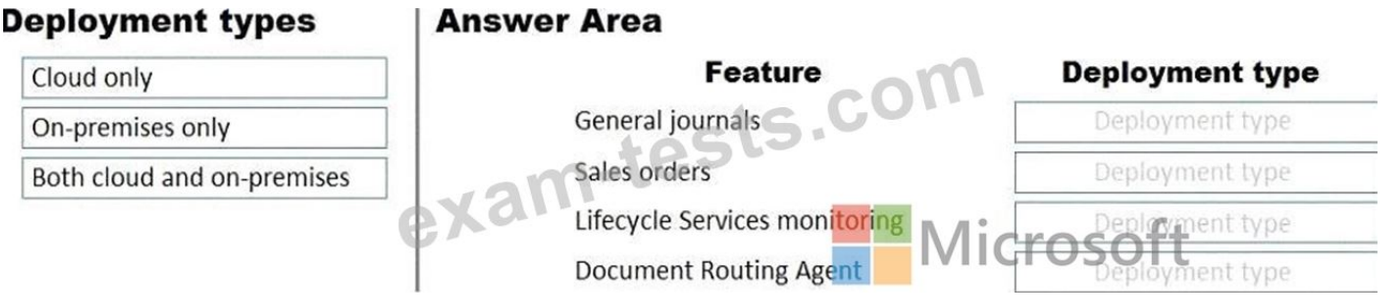

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/finance/localizations/latam-mex-cfdi-electronic-invoices

NEW QUESTION: 14

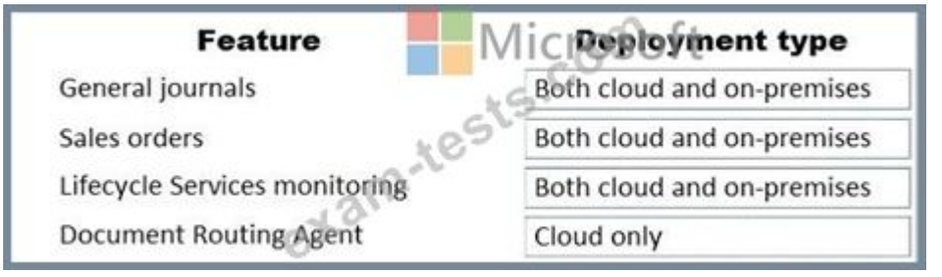

A winery is considering using Dynamics 365 Finance to implement a large-scale ERP application and needs to understand the differences between cloud-based and on-premises deployments.
You need to recommend deployment options for the company.
What should you recommend? To answer, drag the appropriate deployment types to the correct features. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation

NEW QUESTION: 15

A midsize company is enrolled in the self-guided FastTrack program. The company is preparing a Dynamics

365 Supply Chain Management implementation to go Irve.

You need to complete the prerequisites for the Go-live checklist.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Perform user acceptance testing

Go-live Readiness Review prerequisites

The project team should validate solution readiness. The following prerequisites must be met before the Go-live Readiness Review with Microsoft can be initiated. The production environment can be deployed after the Go-live Readiness Review with Microsoft has been successfully completed.

* User acceptance testing (UAT) and performance testing have been completed or almost completed in a Tier-2 (or higher) environment.

* Etc.

Box 2: Enter a Go-live date

The go-live date in LCS correctly represents the go-live date that you're targeting. This date is the date when end users will start live operations, not cutover activities.

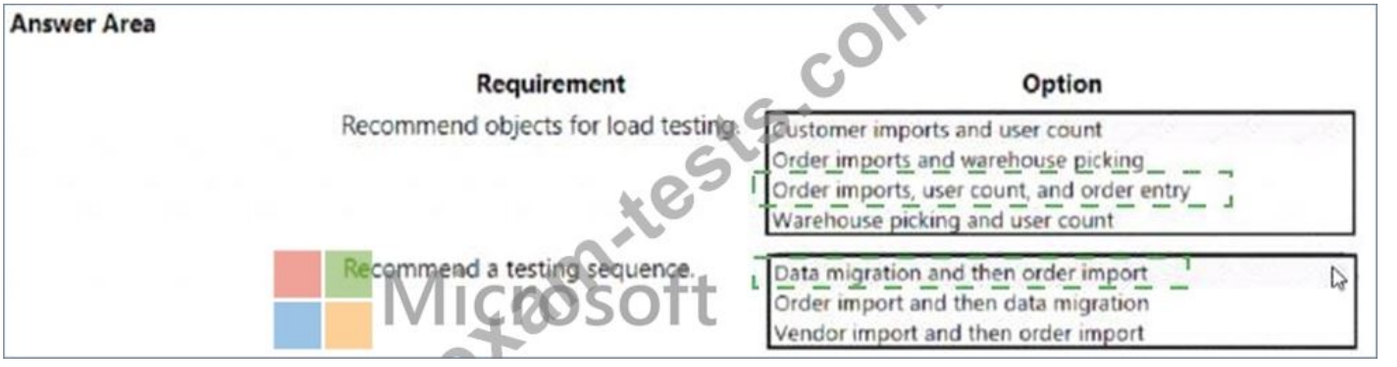

Reference: https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/imp-lifecycle/prepare-go-live

NEW QUESTION: 16

You need to recommend a performance and load testing strategy for the requirement. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

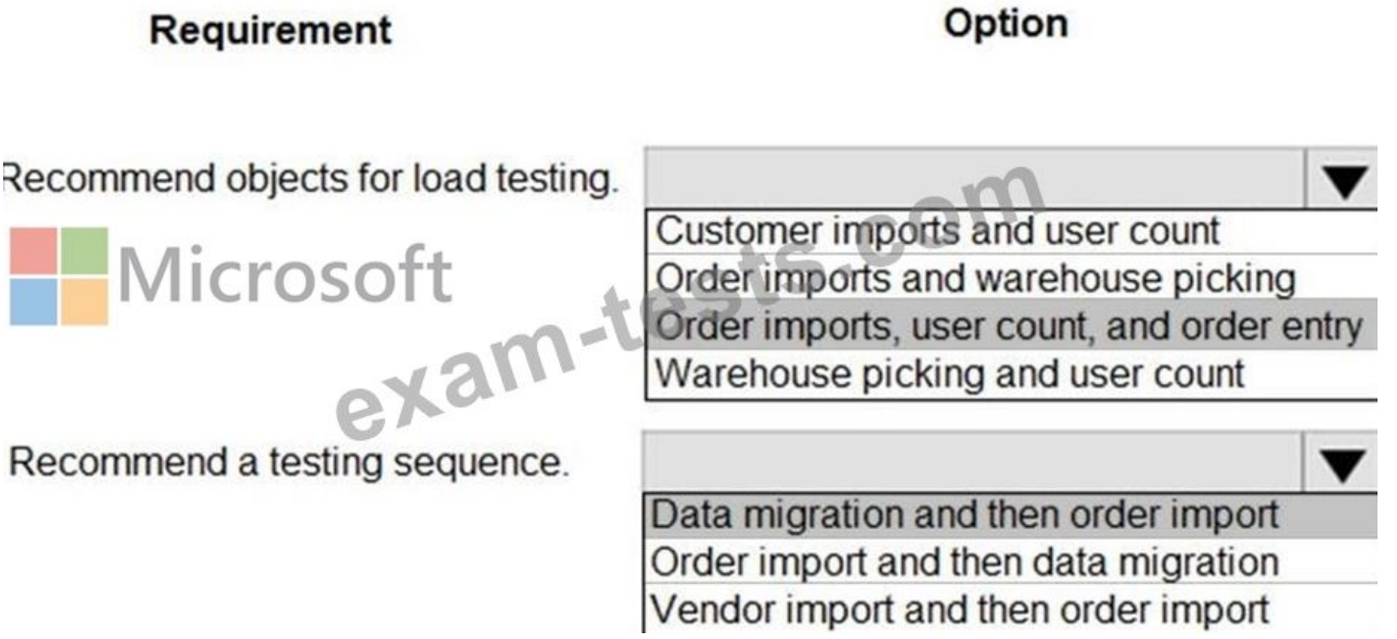

Answer:

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION: 17

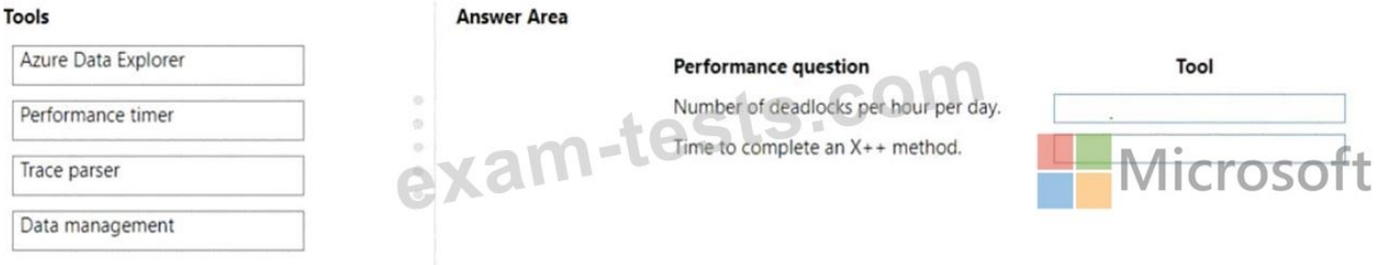

A company uses Dynamics 365 finance and operations apps. The company creates its performance monitoring strategy.

The implementation has complex modifications and data intensive processes that create deadlocks.

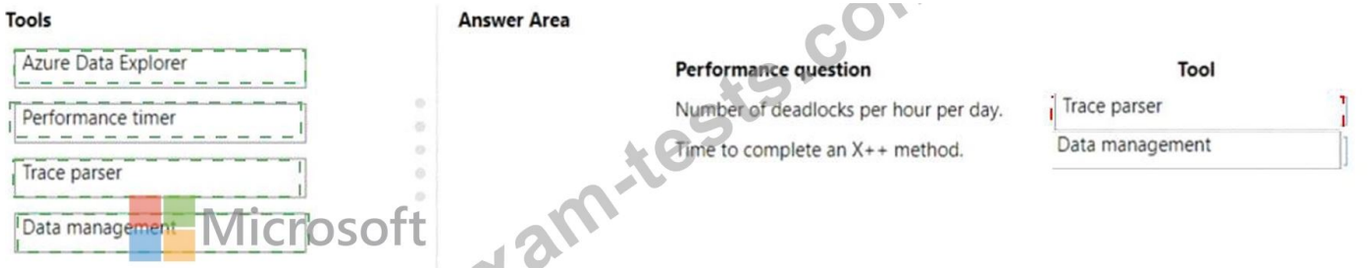

You need to recommend tools for the company to use to monitor performance.

Which tools should you recommend? To answer, drag the appropriate tools to the correct performance questions. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

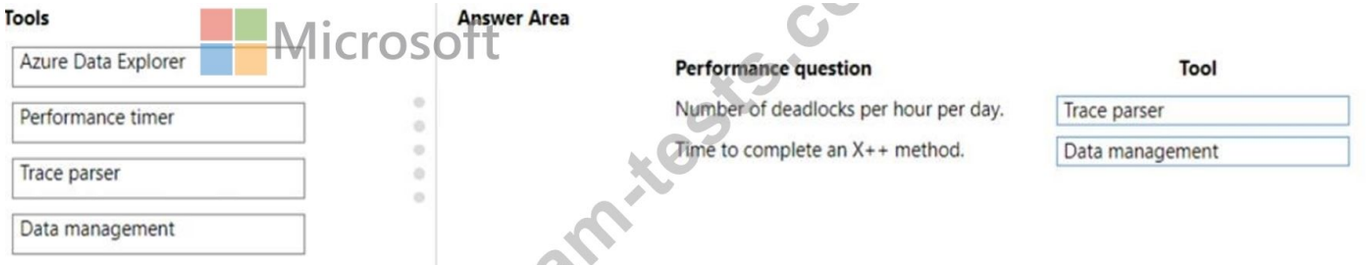

NOTE: Each correct selection is worth one point.

Answer:

Explanation

NEW QUESTION: 18

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Create a non-unique index on a table.

Does the solution meet the goal?

A. Yes

B. No

Answer: B (LEAVE A REPLY)

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/performancetroubleshooting

NEW QUESTION: 19

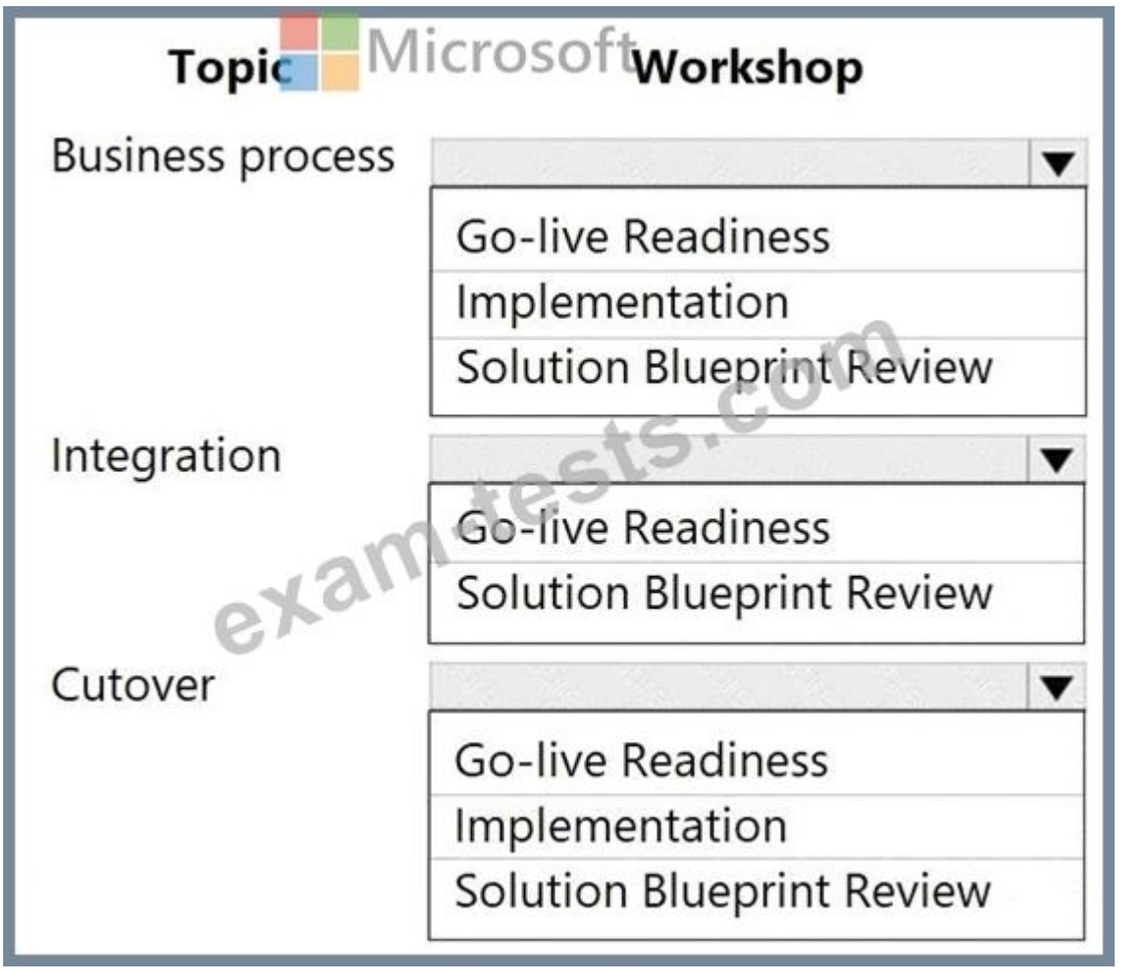

A company is implementing Dynamics 365 Supply Chain Management. The company is enrolled in the FastTrack program.

A project manager who is building a project plan needs to know which workshops discuss specific topics.

You need to identify the workshops in which each topic discussed.

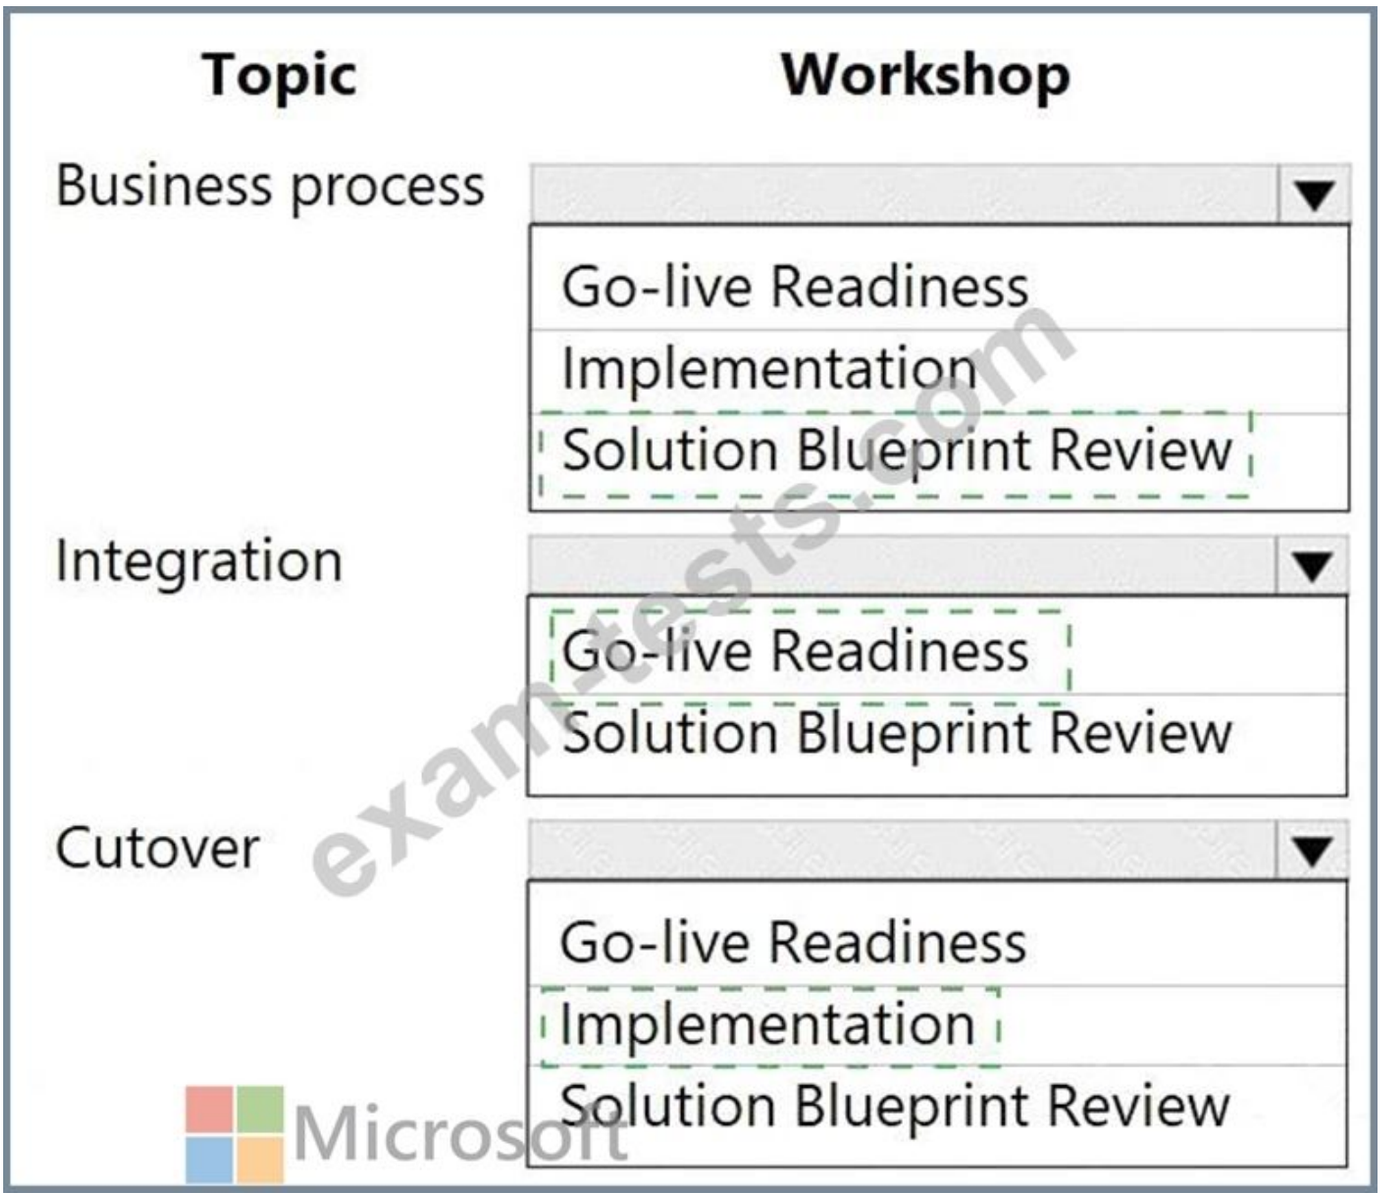

Which workshop is used for each topic? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

exam-tests.com

Answer:

Explanation:

Box 1: Solution Blueprint Review

A Solution Blueprint Review workshop serves as the starting point of Success by Design.

The Solution Blueprint Review workshop covers the following topics:

Program strategy

Application strategy

Data strategy

Integration strategy

Test strategy

*-> Business process strategy

Security strategy

Application lifecycle management strategy

Environment and capacity strategy

Intelligence strategy

Box 2: Go-live Readiness

The Go-live Readiness workshop is designed to help guarantee a successful go-live for Dynamics 365 projects.
Here are some of the topics the workshop is likely to cover:
Confirmation of the go-live date and scope
Solution acceptance and user training
Performance
*-> Integrations
Code management
Configuration management
Review of blocking issues
Cutover plan and final data migration
Risk and mitigation review
Customer go/no-go criteria
Support process and hyper-care plan
Box 3: Implementation
Cutover is part of Implemenation.
Note: Cutover strategy
Ensure that the cutover strategy provides a good approach and plan to deliver a well-defined, well-tested, reliable, and safe transition from current systems to the new production systems.
Agenda topics:
Cutover vision and strategy
Cutover project plan
Go-live cutover plan
Post go-live plan
Mandatory attendees are cutover lead, solution architect, data migration lead, and project manager roles.
Recommended attendees include stakeholders from the customer and partner teams.
Reference: https://docs.microsoft.com/en-us/dynamics365/fasttrack/solution-workshops
https://docs.microsoft.com/en-us/dynamics365/fasttrack/go-live-workshops
https://docs.microsoft.com/en-us/dynamics365/fasttrack/implementation-workshops#cutover-strategy

NEW QUESTION: 20
plans to deploy code changes to the production environment and operations apps implementation. Four sales associates enter and manage customer sales orders.
Sales associates must have access only to the forms that they require for maintaining their customers and sales orders. Sales associates must also have access only to the sales orders that they enter for the specific customers they manage.
The company must provide an annual audit report to an industry compliance governing agency with proof that the sales associates cannot perform certain tasks against their customers such as invoicing. Those tasks must be performed by a different employee of the company.

You need to implement the security controls for the requirements.
Which security controls should you use? To answer, drag the appropriate security controls to the correct requirements. Each security control may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE; Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 21
You need to recommend Microsoft solutions for City Power and Light's business requirements. What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

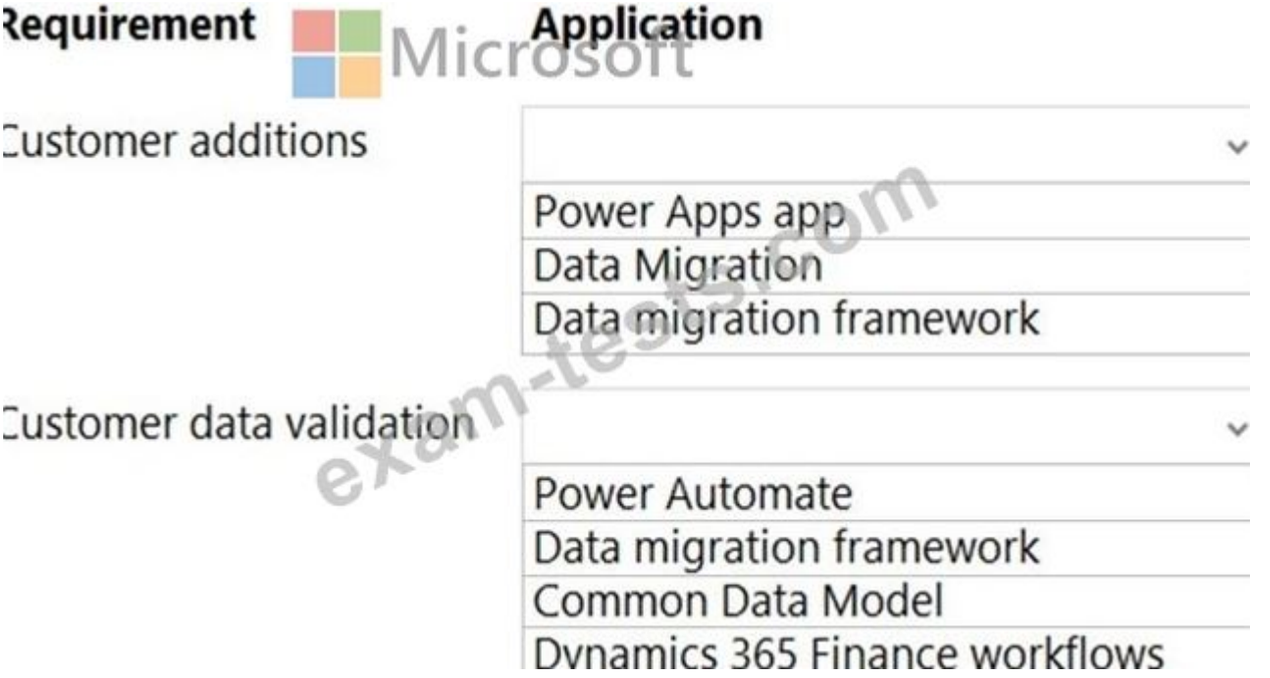

Answer:

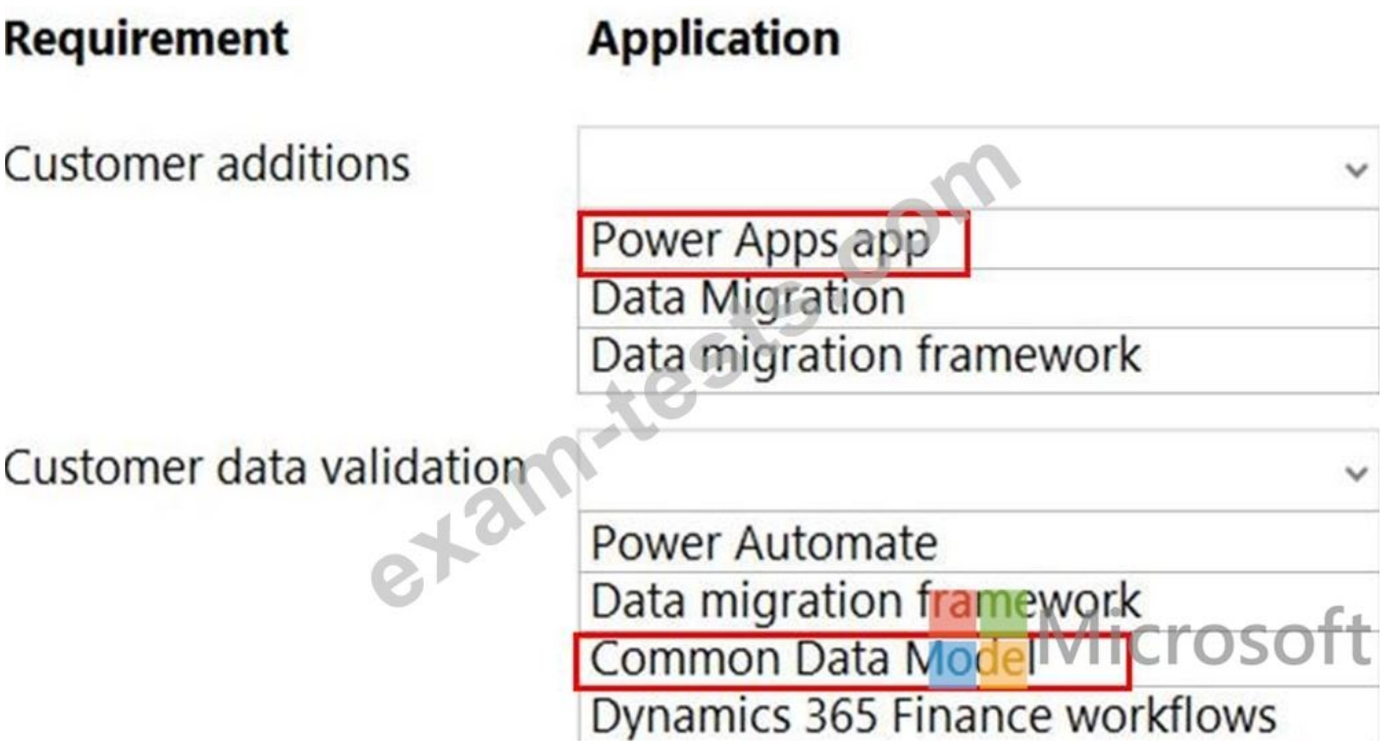

Reference:
https://dynamics.microsoft.com/en-gb/customer-voice-transition/
https://docs.microsoft.com/en-us/dynamics365/field-service/overview

NEW QUESTION: 22
You need to determine a solution for the customers in Jamaica.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 23

A company uses Dynamics 365 Finance.

The company wants to understand how version updates are handled.

You need to explain the version update and pause policy.

What should you conclude? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

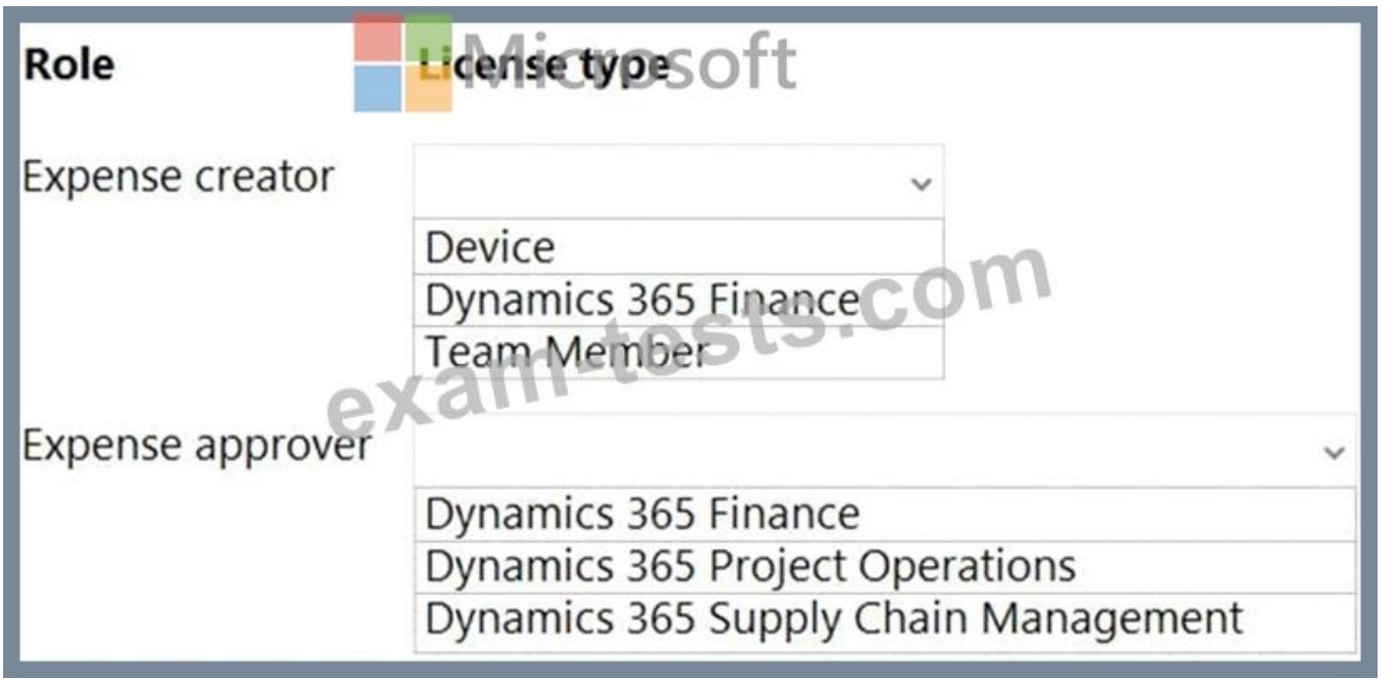

Answer:

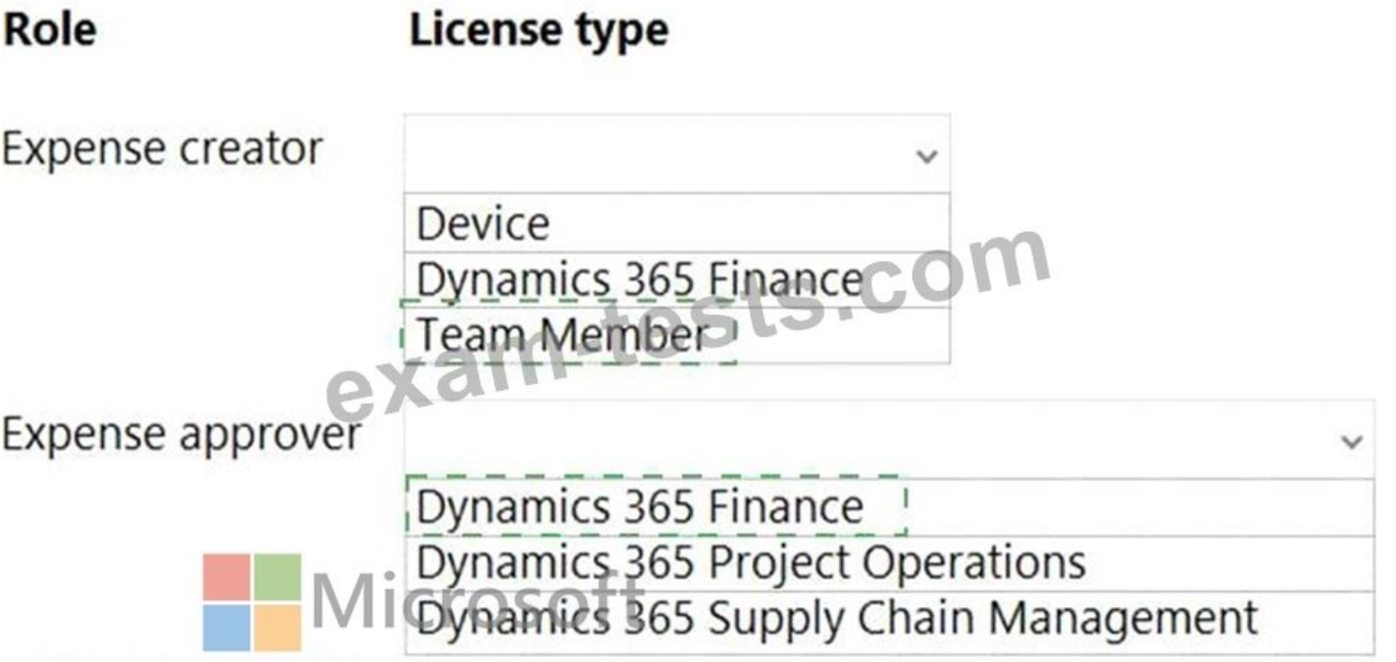

exam-tests.com
Microsoft

Explanation:
Box 1: Two
Customers will be able to take up to 7 service updates per year and are required to take a minimum of 2 service updates per year.
Box 2: Three
Customers can choose to pause up to 3 consecutive updates at a time. Pausing a service update can apply to the designated user acceptance testing (UAT) sandbox, production, or both environments. After the pause window has ended and if the customer has not self-updated to a supported service update, Microsoft will auto-apply the latest update based on the configuration selection made available in Lifecycle Services (LCS).

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/get-started/public-preview-releases

NEW QUESTION: 24
A company is evaluating licensing for Dynamics 365 Finance.
The company requires expense management functionality that enables expense reports to be submitted by various users. Expense approvals will be a back-office function.
You need to determine the license type for each role.
Which license types are required? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

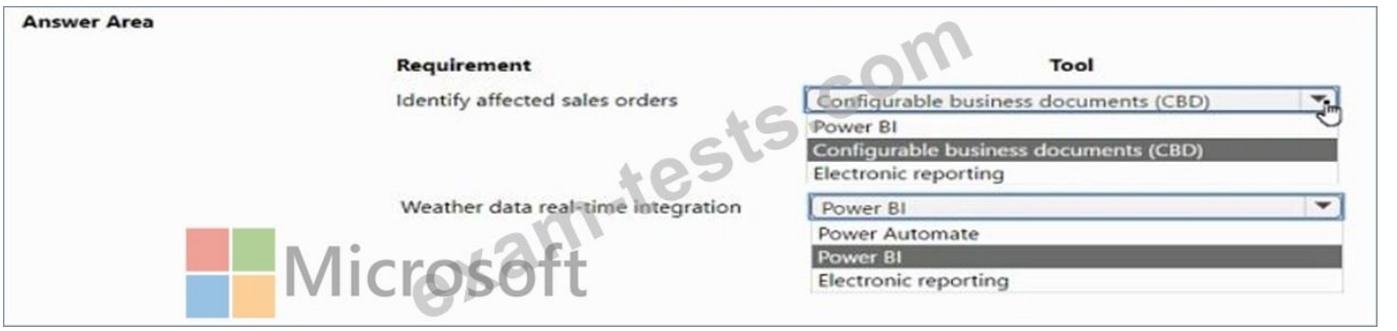

Explanation:

NEW QUESTION: 25
A manufacturing company uses Dynamics AX 2012 R3 for high-volume transactions. The company needs to upgrade to Dynamics 365 finance and operations apps.
You must establish performance metrics using a quantitative baseline in the Dynamics AX 2012 R3 environment by using the Microsoft Performance Benchmark Software Development toolkit (SDK).
You must use the latest and official version of the tool. Microsoft must provide the tool directly.
You need to launch Microsoft Performance Benchmark Software Development toolkit (SDK) for Dynamics AX 2012 R3 to establish Baseline.
Where should you navigate?
A. Lifecycle Services (LCS)
B. Azure DevOps Services
C. Microsoft PartnerSource
D. Microsoft AppSource
E. Microsoft Developer Network (MSDN)
Answer: A (LEAVE A REPLY)
Explanation
As of November, 2014, the Benchmark SDK has been moved. It is now available from the Downloadable tools section of Microsoft Dynamics Lifecycle Services.
Reference:
https://docs.microsoft.com/en-us/dynamicsax-2012/appuser-itpro/what-s-new-performance-benchmark-software-

NEW QUESTION: 26
You need to recommend a solution to meet the requirements for extreme weather.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/electronic-reporting-configuration

NEW QUESTION: 27
A company is implementing Dynamics 365 Finance. The company plans to use Business process modeler (BPM) tool to align their business processes with industry-standard processes.
You need to help the company get started using BPM.
Which prerequisite should the company install?
A. Business events catalog
B. Asset library
C. American Productivity and Quality Center (APQC) membership
D. Azure DevOps project
Answer: D (LEAVE A REPLY)
Business process modeler (BPM) in Lifecycle Services (LCS), prerequisites To effectively use BPM, you must have Microsoft Office 2010 and a Microsoft Azure DevOps project.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpm-overview

NEW QUESTION: 28
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 for Finance and Operations system administrator. You have a test environment that is used by several people at any given time.
You create a new data entity in your development and migrate the code to the test environment.
In the test environment, you are unable to find the data entity in the list.
You need to locate the data entity.
Solution: In the Data management framework parameter screen, refresh the Entity list.
Does the solution meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)

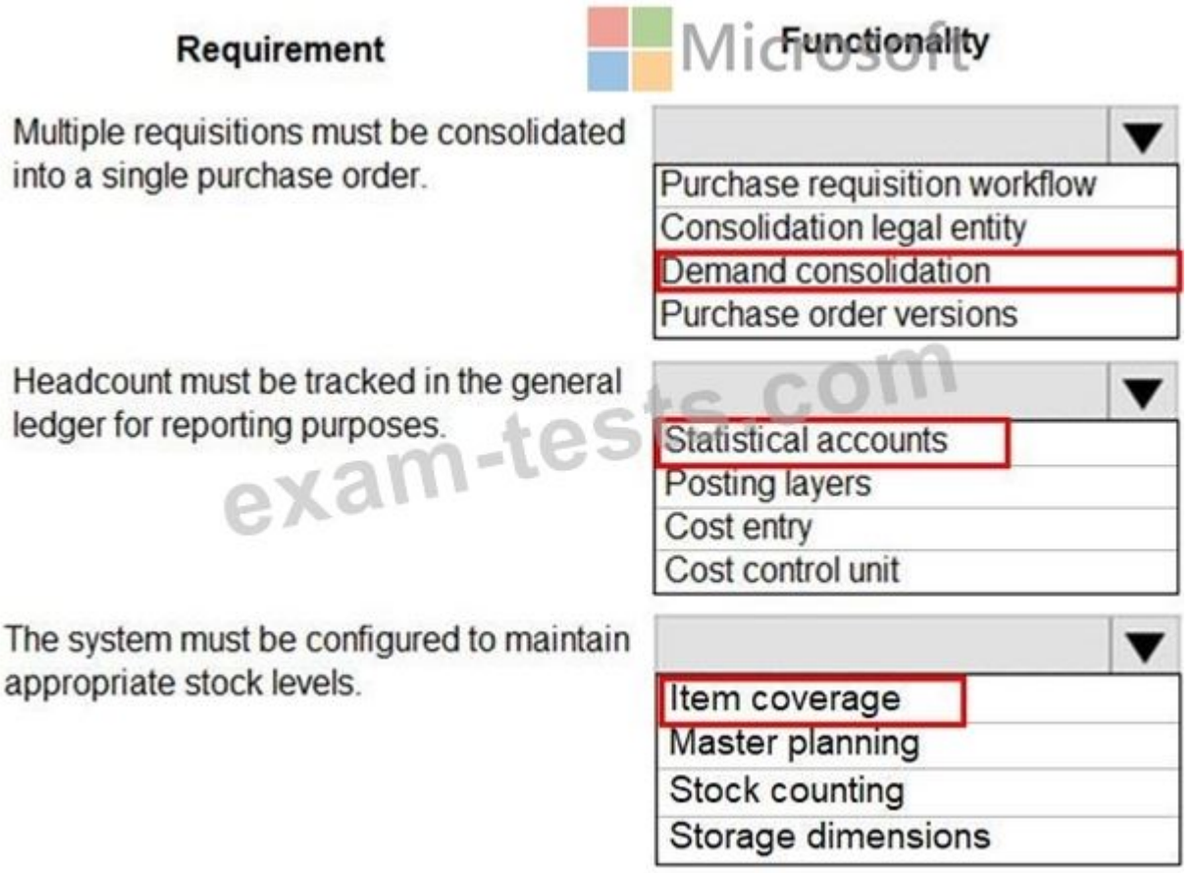

NEW QUESTION: 29
A customer is implementing Dynamics 365 Finance and Dynamics 365 Supply Chain Management.
The customer wants to use this implementation to standardize business processes.
You need to perform a gap analysis and recommend how to address the gaps.
Which functionality should you recommend for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Functionality
Multiple requisitions must be consolidated into a single purchase order.	Purchase requisition workflow Consolidation legal entity Demand consolidation Purchase order versions
Headcount must be tracked in the general ledger for reporting purposes.	Statistical accounts Posting layers Cost entry Cost control unit
The system must be configured to maintain appropriate stock levels.	Item coverage Master planning Stock counting Storage dimensions

https://docs.microsoft.com/en-us/dynamics365/supply-chain/master-planning/safety-stock-replenishment

NEW QUESTION: 30
You need to recommend a tool to meet the solution requirement.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 31

A company plans to implement Dynamics 365 Supply Chain Management.

You are a solution architect and need to prepare a Solution Blueprint document for this implementation.

You need to classify the requirements by type.

What is the classification for each requirement? To answer, drag the appropriate classifications to the correct requirements. Each classification may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

Box 1: Non-functional

Requirements are commonly referred to as either functional or non-functional. Functional requirements describe what the solution needs to do or its behaviors, and non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

The following examples are of well-composed non-functional requirements:

Average screen load time for internal users that are not mobile will be less than three seconds.

External portal must be able to handle 100 concurrent users who are performing case submission.

Any credit card number that is used cannot be stored in Common Data Service environment.

Box 2: Functional

Example functional requirements

The following scenarios describe simple examples of functional requirements:

As a sales user, I need to be able to close an opportunity as lost and then capture why it was lost so that we can improve our sales tactics in the future.

As a sales manager, I need to be able to approve a discount on a quote so that I can reduce the total price and give a discount to the customer.

As a staff accountant, I want to be prevented from closing a batch that has pending items so that I do not have to reopen it later.

Box 3: Non-functional

Examples of common non-functional requirement types include:

Availability

Compliance/regulatory

* -> Data retention/residency

Performance (response time, and so on)

Privacy

Recovery time
Security
Scalability
Reference: https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/3-functional-requirements
https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements

NEW QUESTION: 32
A company implements Dynamics 365 finance and operations apps for its retail operations.
Unauthorized vendor checks have been created in the past resulting in check fraud.
The company must print a vendor aging report from a local printer in its headquarters location every week on Sunday night.
Every week on Monday, the comptroller must review the report and approve checks to issue to vendors.
You need to recommend a solution to meet the requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent check fraud.	Electronic reporting Three-way matching Dynamics 365 Fraud Protection Positive pay
Print the vendor aging report.	Document Routing Agent Electronic reporting Document reporting services Print and Document Services

Answer:

Requirement	Solution
Prevent check fraud.	Electronic reporting Three-way matching Dynamics 365 Fraud Protection **Positive pay**
Print the vendor aging report.	Document Routing Agent **Electronic reporting** Document reporting services Print and Document Services

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/general-electronic-reporting

NEW QUESTION: 33
A company is implementing Dynamics 365 Supply Cham Management

You have two test scenarios. Both scenarios have the same functional steps. The outputs for the scenarios can differ based on the values entered for parameters.
You need to create a single derived test case in the Regression suite automation tool (RSAT).
Which test case type should you use? To answer, drag the appropriate test case types to the correct actions Each test case type may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 34
You are a consultant for Proseware, Inc.
You need to audit the system based on government financial compliance standards in Objective 2.
What should you use?
A. Security diagnostic for task recording
B. Role to user assignments report
C. User role assignments report
D. Compare permissions
E. Segregation of duties
Answer: (SHOW ANSWER)

NEW QUESTION: 35
A customer is preparing to upgrade to a new version of Dynamics 365 Finance.
Unit testing is required prior to the upgrade.

You need to recommend a testing tool for unit testing.
Which tool should you recommend?
A. Regression suite automation tool
B. Business process modeler
C. SysTest
D. Data task automation
Answer: C (LEAVE A REPLY)
Explanation
Use SysTest Framework to author unit/component test code.
SysTest framework is Unit Test framework in Dynamics 365 for Finance and Operations, Enterprise edition.
SysTest framework was available in the earlier version as well, and it provides developers the ability to write unit test code for the business logic.

NEW QUESTION: 36
Fourth Coffee plans to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company owns and operates the following divisions:

Division	Action
Production	Packages and roasts coffee beans
Distribution	Delivers products to market

You need to ensure that Fourth Coffee can report financial results by division. Which strategy should you recommend?
A. Create two legal entities, create one warehouse and associate the financial dimension to the warehouse.
B. Create one legal entity with one site that has two warehouses. Associate the financial dimensions to the warehouses.
C. Create two legal entities, create one site and associate a financial dimension per company.
D. Create one legal entity with two sites. Associate financial dimensions to sites.
Answer: D (LEAVE A REPLY)
Reference:
https://www.nexsoftsys.com/articles/financial-dimensions-in-dynamics-365-services.html

NEW QUESTION: 37
Fourth Coffee plans to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company owns and operates the following divisions:

Division	Action
Production	Packages and roasts coffee beans
Distribution	Delivers products to market

You need to ensure that Fourth Coffee can report financial results by division. Which strategy should you recommend?

A. Create one legal entity with one site that has two warehouses. Associate the financial dimensions to the warehouses.

B. Create two legal entities, create one warehouse and associate the financial dimension to the warehouse.

C. Create one legal entity with two sites. Associate financial dimensions to sites.

D. Create two legal entities, create one site and associate a financial dimension per company.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 38

A company is implementing Dynamics 365 Finance.

The company wants to use Azure DevOps pipelines to automate builds.

You need to recommend the pipeline types for the company should use.

Which pipeline types should you recommend? To answer, drag the appropriate pipelines to the correct requirements. Each pipeline may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

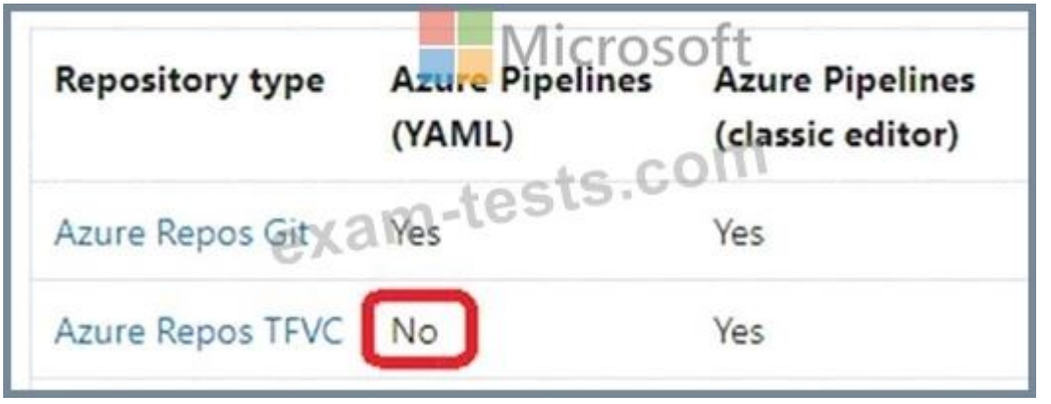

Box 1: Both YAML and classic

Box 2: Classic only

Supported source repositories

Azure Pipelines, Azure DevOps Server, and TFS integrate with a number of version control systems. When you use any of these version control systems, you can configure a pipeline to build, test, and deploy your application.

YAML pipelines are a new form of pipelines that have been introduced in Azure DevOps Server 2019 and in Azure Pipelines. YAML pipelines only work with certain version control systems. The following table shows all the supported version control systems and the ones that support YAML pipelines.

Repository type	Azure Pipelines (YAML)	Azure Pipelines (classic editor)
Azure Repos Git	Yes	Yes
Azure Repos TFVC	No	Yes

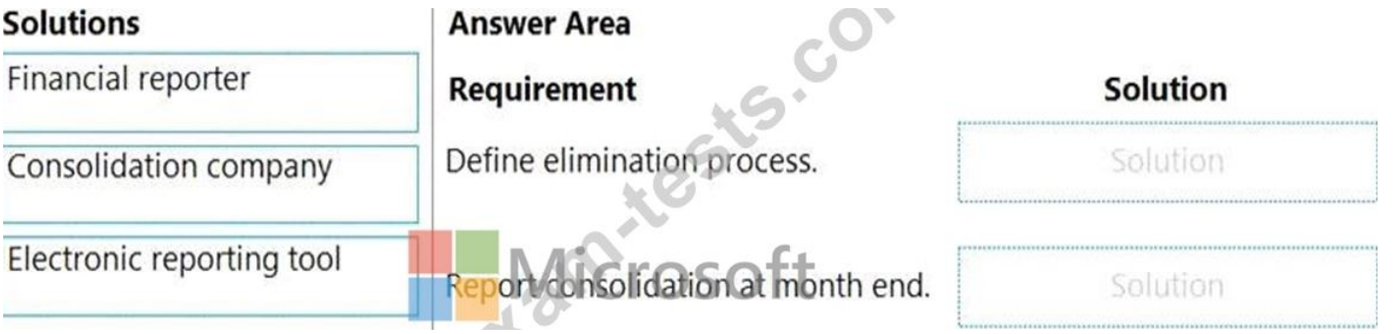

Reference: https://learn.microsoft.com/en-us/azure/devops/pipelines/repos/

NEW QUESTION: 39

You need to recommend a solution to meet Margie's consolidation requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation

Box 1: Consolidation company

Eliminations can be reported in multiple ways:

* A separate company can be created and used to manually determine and post elimination transactions. This company can be used in the consolidation process or in financial reporting.
* Elimination rules can be set up in the system.
* The accounts and financial dimensions that are used to determine intercompany activity can be filtered on a row definition or column definition in Financial reporting, and full drill-down capabilities can be used.

Box 2: Financial reporting

There are multiple options for consolidating data:

* Financial reporting - This option enables consolidation of transactions and balances, and can be generated at any time. Multiple levels of hierarchies can be created, and multiple reporting currencies can be viewed.
* Consolidate online - This option consolidates daily balances by the selected accounts and dimensions, and stores them in a consolidation company.
* Consolidate with import - This option imports balances into a consolidation company.

Export company balances

Note: The CEO is considering the acquisition of additional companies in the same countries as the current companies. The consolidation structure may change within the first 90 days of go-live. Margie's does not want to finalize the consolidation structure for a hard-close at month's end until this has been finalized.

Reference:

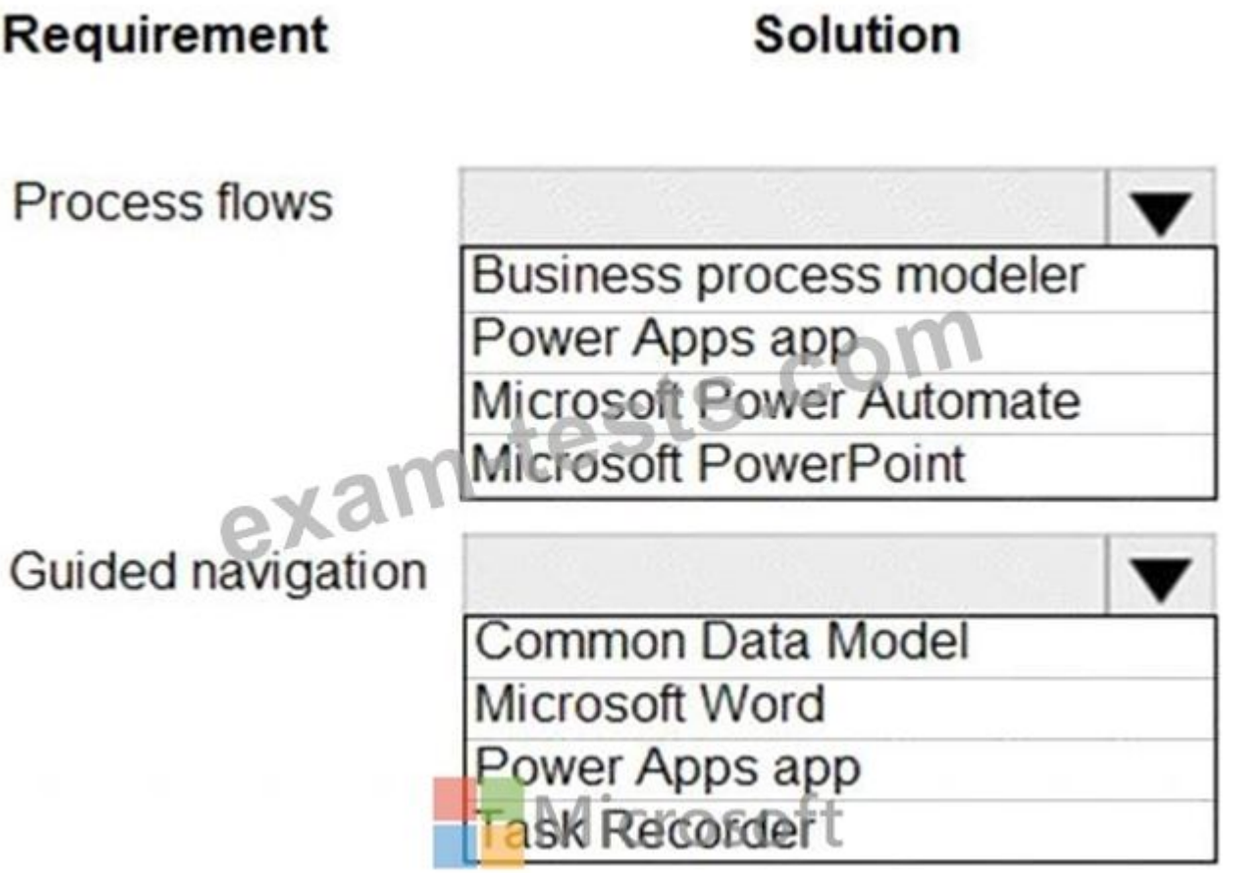

https://docs.microsoft.com/en-us/dynamics365/finance/budgeting/consolidation-elimination-overview

NEW QUESTION: 40

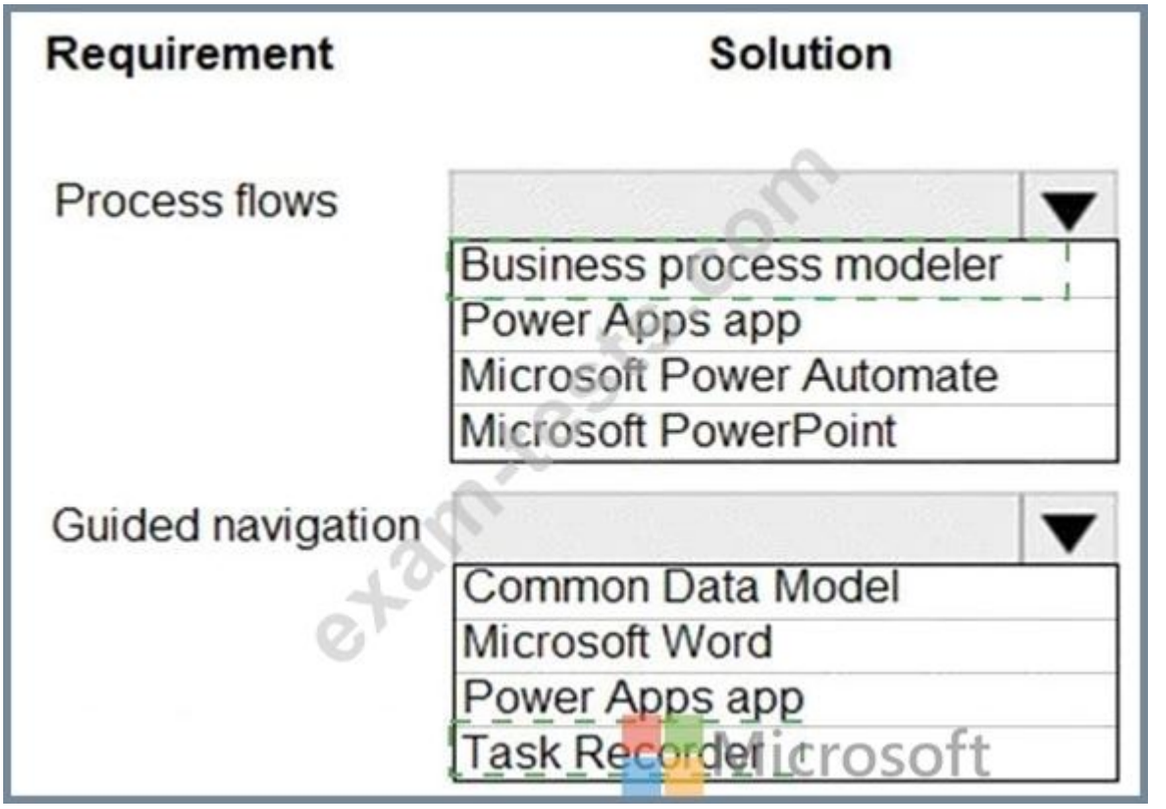

You need to recommend a tool to meet the solution requirement.

What should you recommend? To answer, select the appropriate options in the answer area.

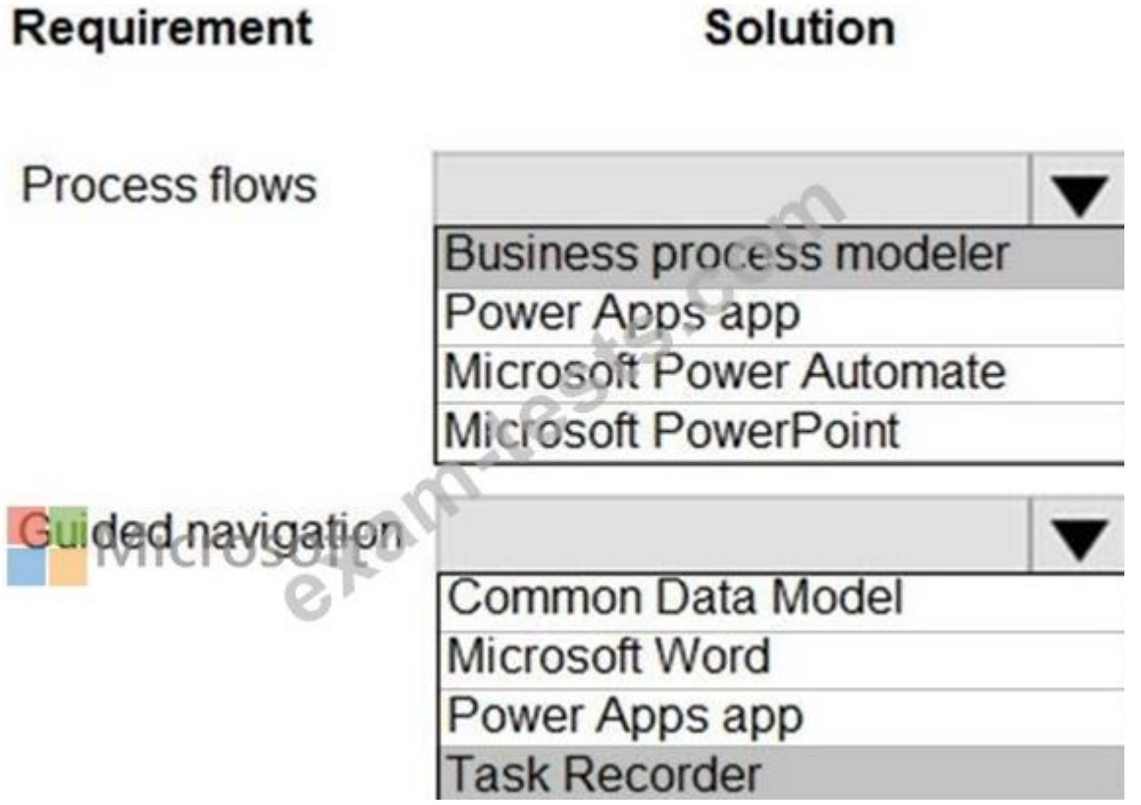

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 41

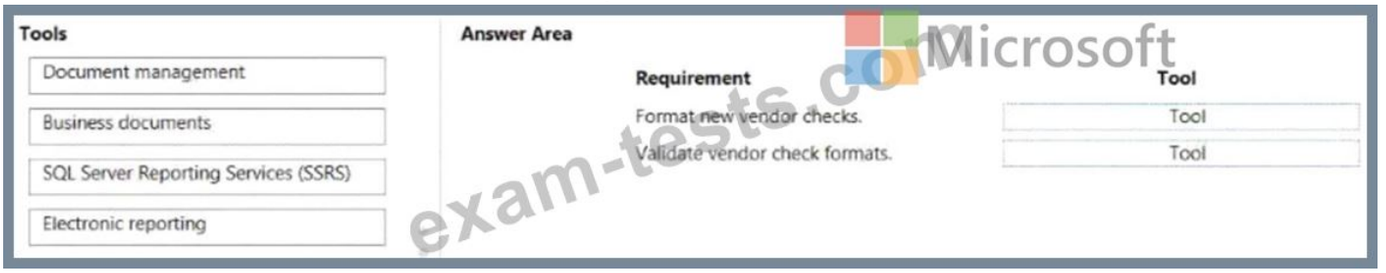

A company implements Dynamics 365 Finance. The company does not have a developer on staff.

The company designs vendor checks that will be accepted by banks. The company wants to format new vendor checks for multiple banks.

You need to recommend a solution to validate that a venerated vendor check format matches the original check format.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Electronic reporting

You can use Electronic reporting (ER) to format vendor checks. Many bank-specific and check provider-specific check formats are available on the market. Sample check formats have been included in the Payment check model in the ER tool repository. These sample checks are labeled Check in the middle (US) and Check on top stub below (US).

Box 2: Document management

Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.

NEW QUESTION: 42

An organization has implemented the accounts payable module in Dynamics 365 Finance.

Corporate policy specifies the following:

* Managers and directors are allowed to approve invoices for payment.
* Users are allowed to delegate their signing authority to other users when they are out of the office.
* Accounts payable workflow will be used to assist in automating the signing process.
* Users whose job has signing authority can approve invoices for payment.

You need to meet the organization's corporate policy. What should you recommend?

A. Create workflow rules.

B. Email the delegation policy to all managers.

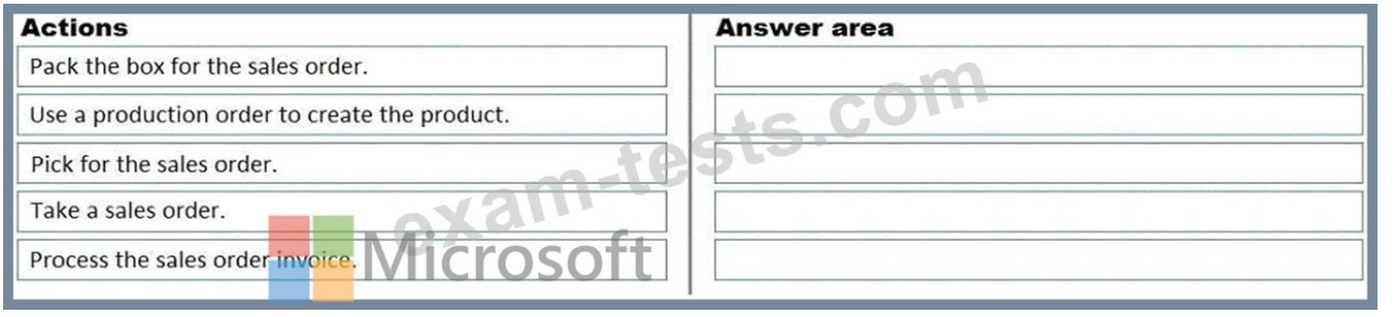

C. Create business event rules.

D. Assign all jobs signing authority.

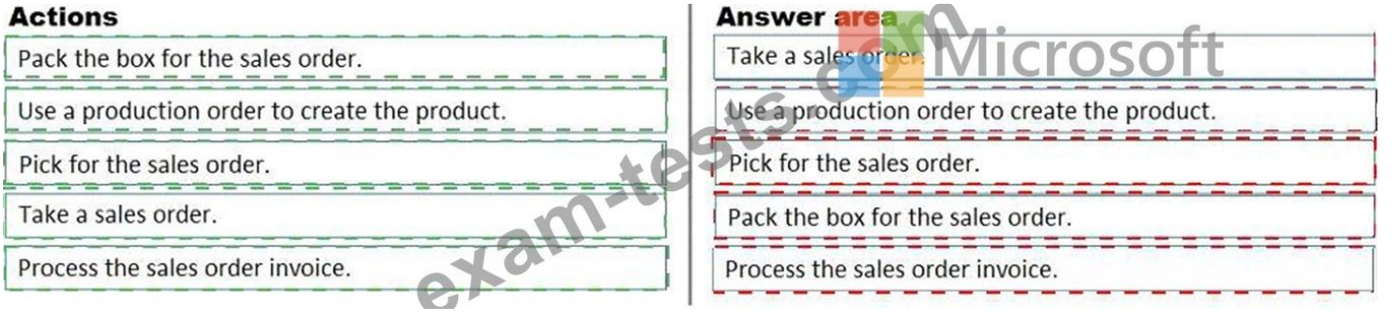

Answer: (SHOW ANSWER)

NEW QUESTION: 43

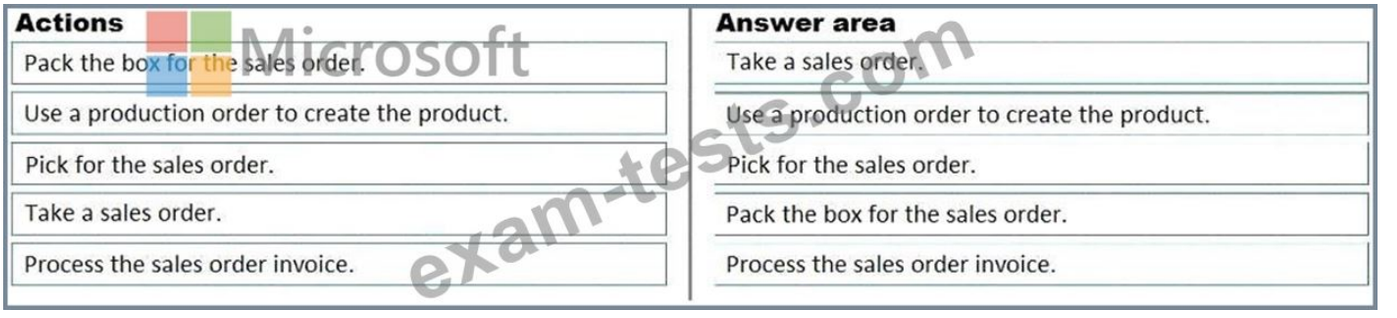

A graphics printing company using Dynamics 365 Supply Chain Management sells 100 percent made-to-order signs. These signs cannot be pre-produced.
The company wants to create an end-to-end process that includes production, sales order packing, and sales order picking.
You need to determine the order of the functions.
In which order should you recommend the actions be performed? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

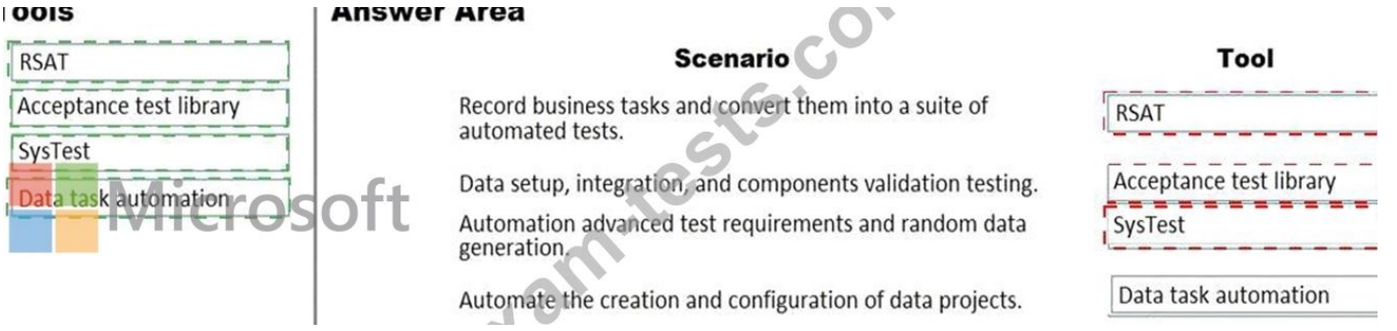

Explanation

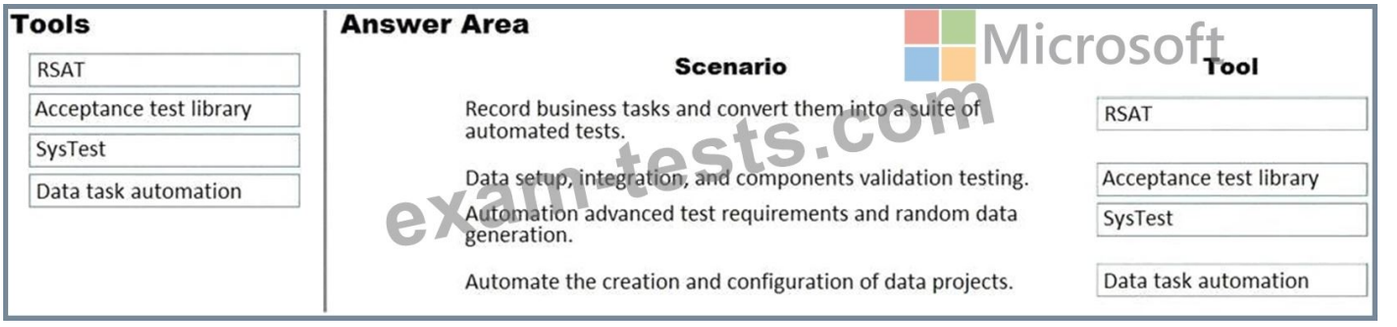

NEW QUESTION: 44
A company is implementing Dynamics 365 and requires extensive data and end-to-end testing during each iteration.
You need to determine a testing strategy for multiple scenarios.
What should you recommend? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

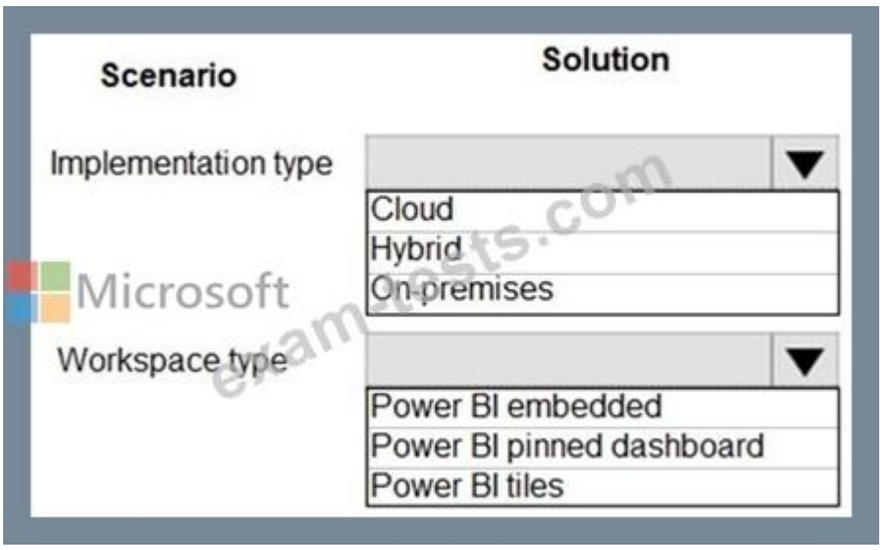

Explanation:

NEW QUESTION: 48
An organization is planning to migrate to Dynamics 365 Finance.
The organization reports that the legacy system has failed during peak sessions. You need to recommend an approach that will handle peak session volume.
Which two approaches should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Configure a single box development environment.
B. Use performance and load testing.
C. Optimize server configuration.
D. Perform user integration testing.
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 49
An organization uses Dynamics 365 Finance. You are hired to architect a solution for the organization. You need to analyze usage characteristics.
A. Trace Parser
B. Microsoft Excel
C. Data Management Workspace
D. Business Process Modeler
Answer: D (LEAVE A REPLY)

NEW QUESTION: 50
A company uses Dynamics 365 Finance.
The company receives a large number of accounts payable invoices on a regular basis that are currently being entered manually.
You need to research ways accounts payable invoices can be created automatically.
What should you recommend? To answer, drag the appropriate solutions to the correct scenarios. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 51

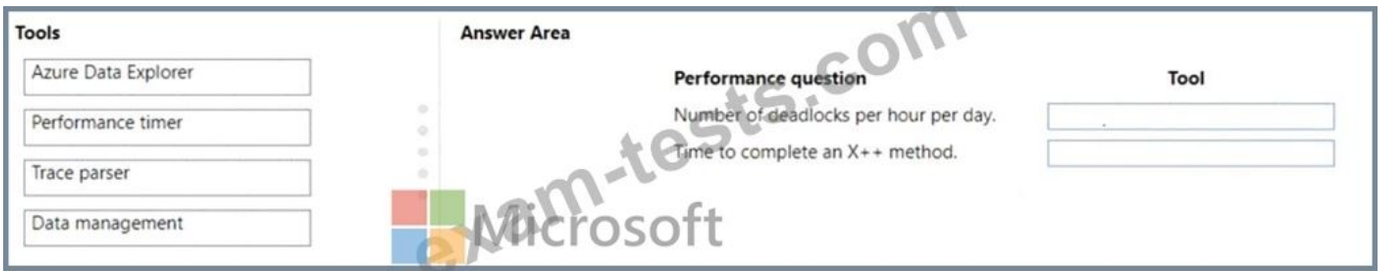

A company uses Dynamics 365 finance and operations apps. The company creates its performance monitoring strategy.

The implementation has complex modifications and data intensive processes that create deadlocks.

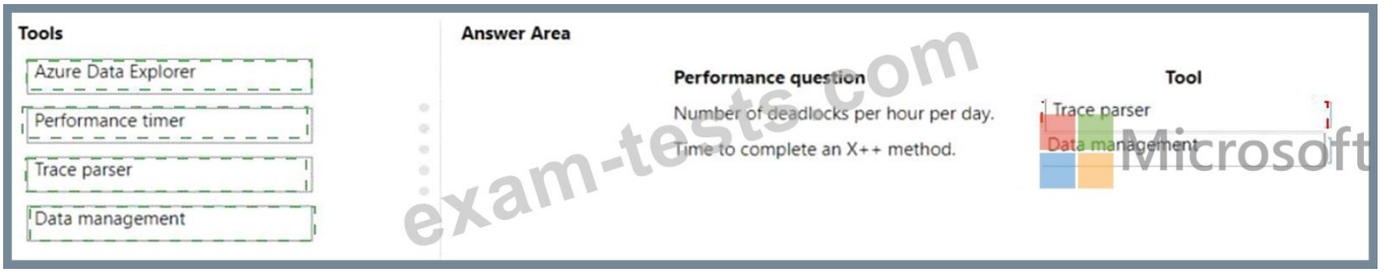

You need to recommend tools for the company to use to monitor performance.

Which tools should you recommend? To answer, drag the appropriate tools to the correct performance questions. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

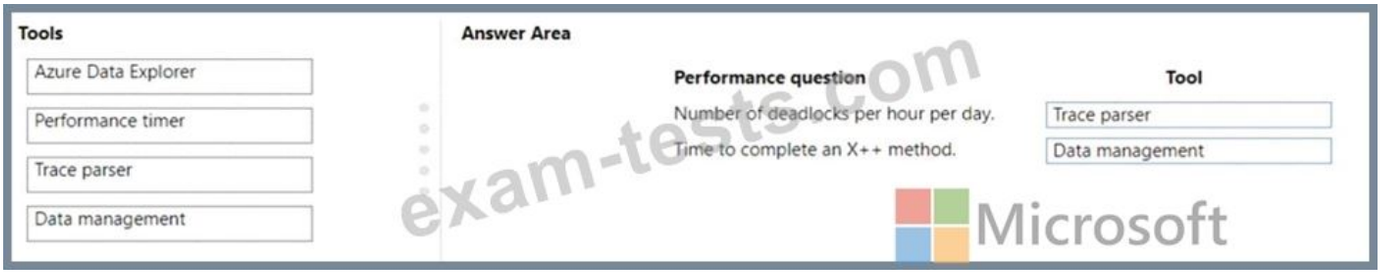

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 52

A company implements Dynamics 365 Commerce. The company has 200 retail stores. The company has a retail store custom solution and a third-party e-commerce solution. Dynamics 365 Commerce will replace the custom retail point of sale (POS) solution. Dynamics 365 Commerce must integrate with the company's third-party e-commerce solution. The third-party e-commerce solution must meet the following requirements:

* Integrate with Microsoft Dynamics 365 for in-store order pickups.
* Store orders in XML file format.
* Send the XML order files to an FTP file location.

Dynamics 365 Commerce must meet the following requirements:

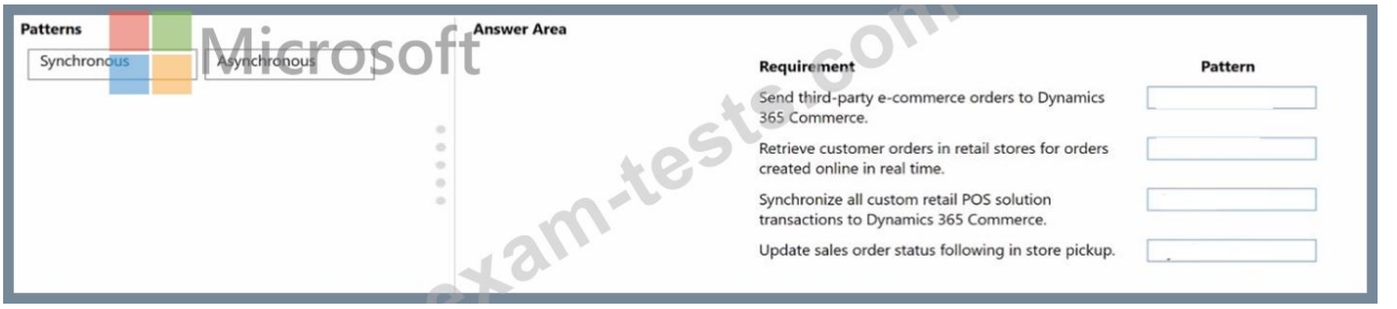

* Serve as the inventory system of record.
* Serve as the retail sales and financial system of record.
* Provide point-of-sale (POS) capabilities in store.
* Provide the ability for e-commerce customers to pick up orders in store.
* Update the status of the sales order to prevent it from being fulfilled multiple times.

The custom retail POS solution must meet the following requirements:

* Import retail transactions from all stores into Dynamics 365 Commerce.
* Produce a single pipe-delimited file of all daily sales transactions by store.
* Continue to operate for six months before it is deprecated.

You need to create data integrations for the business processes.

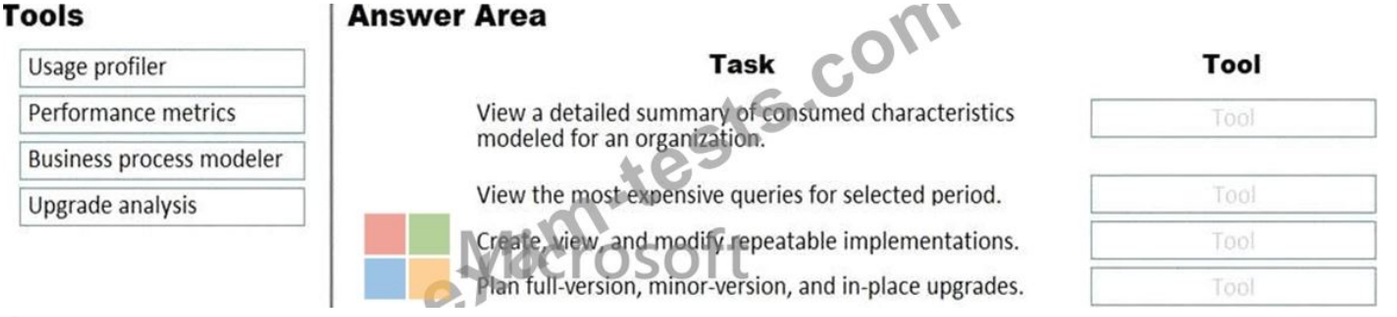

Which integration patterns should you use? To answer, drag the appropriate patterns to the correct requirements. Each pattern may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

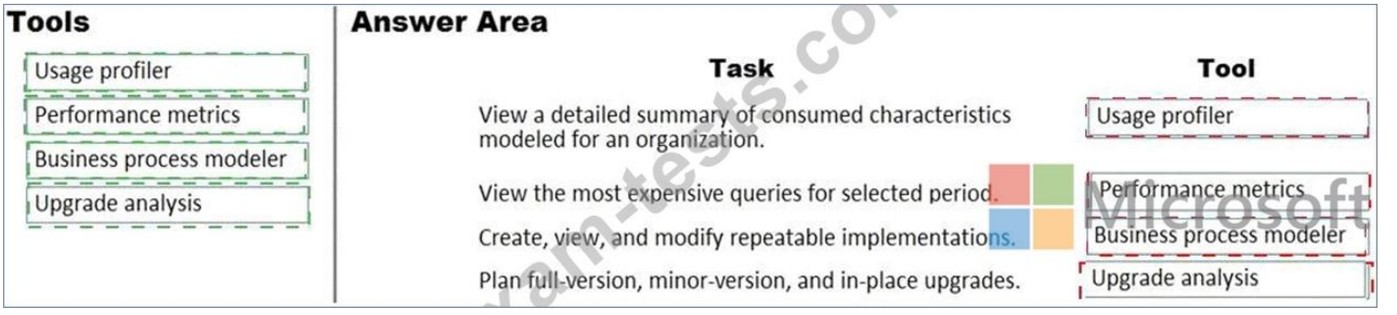

Answer:

NEW QUESTION: 54
A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).
Development environments must be licensed for the duration of the implementation.
You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.
What should you recommend? To answer, drag the appropriate solutions to the correct requirements.
Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 55

A company implements Dynamics 365 Finance.

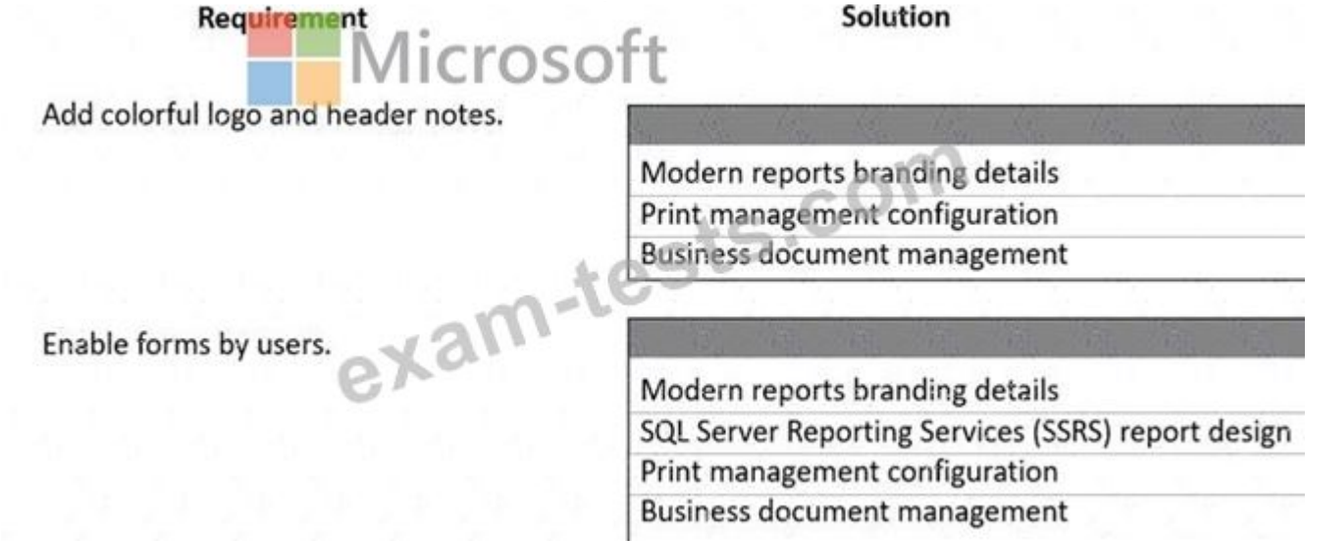

A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.

You must enable modern design for additional reports created by users in the future.

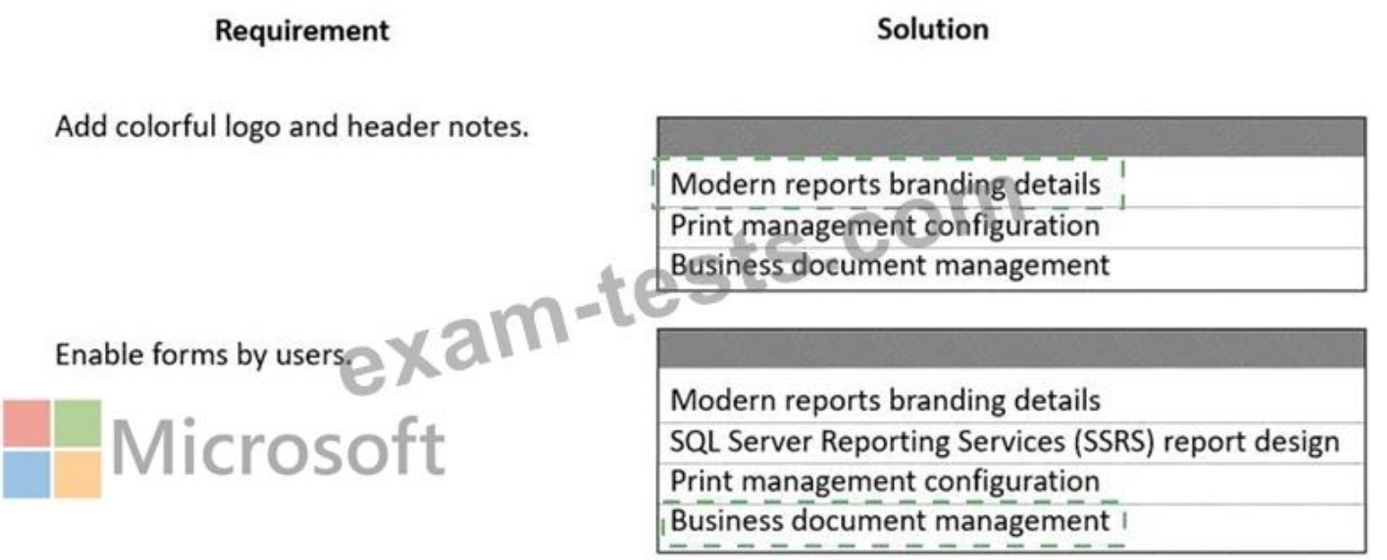

You need to meet the branding standards and enable additional forms and reports to be created by users.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

exam-tests.com

Explanation:
Box 1: Modern reports branding details
Modern report designs in Microsoft Dynamics 365 for Finance and Operations .' The logos, color schemes, and notes are setup in "Organization administration"->"Setup"->"Document branding"->"Branding details".
Box 2: Business document management
Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.
Note:
Business users use the Electronic reporting (ER) framework to configure formats for outbound documents in accordance with the legal requirements of various countries/regions. Users can also define the dataflow to specify what application data is placed in generated documents. The ER framework generates outbound documents in Microsoft Office formats (Excel workbooks or Word documents) by using predefined templates.

NEW QUESTION: 56
A company audits the security of its Dynamics 365 Supply Chain Management environment. The security administrator must identify the following details:
* The security roles that have access to the budget plan form.
* The duties that grant access to the form.

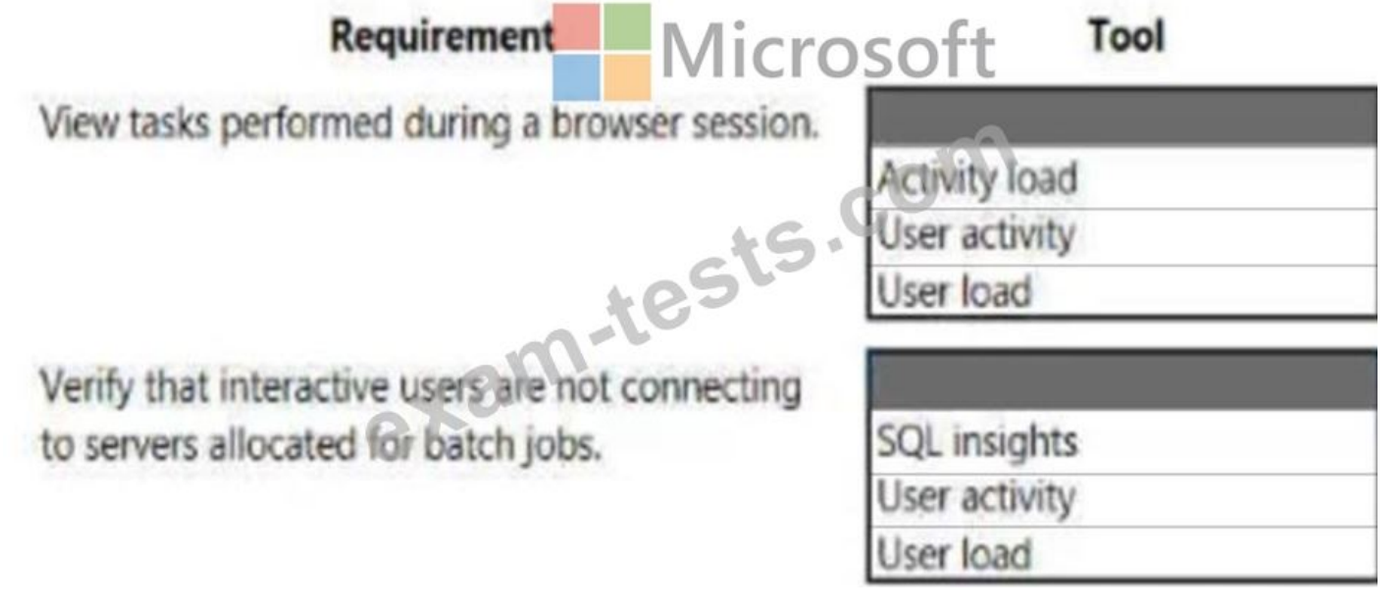

You need to recommend auditing tools to meet the requirements.
Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

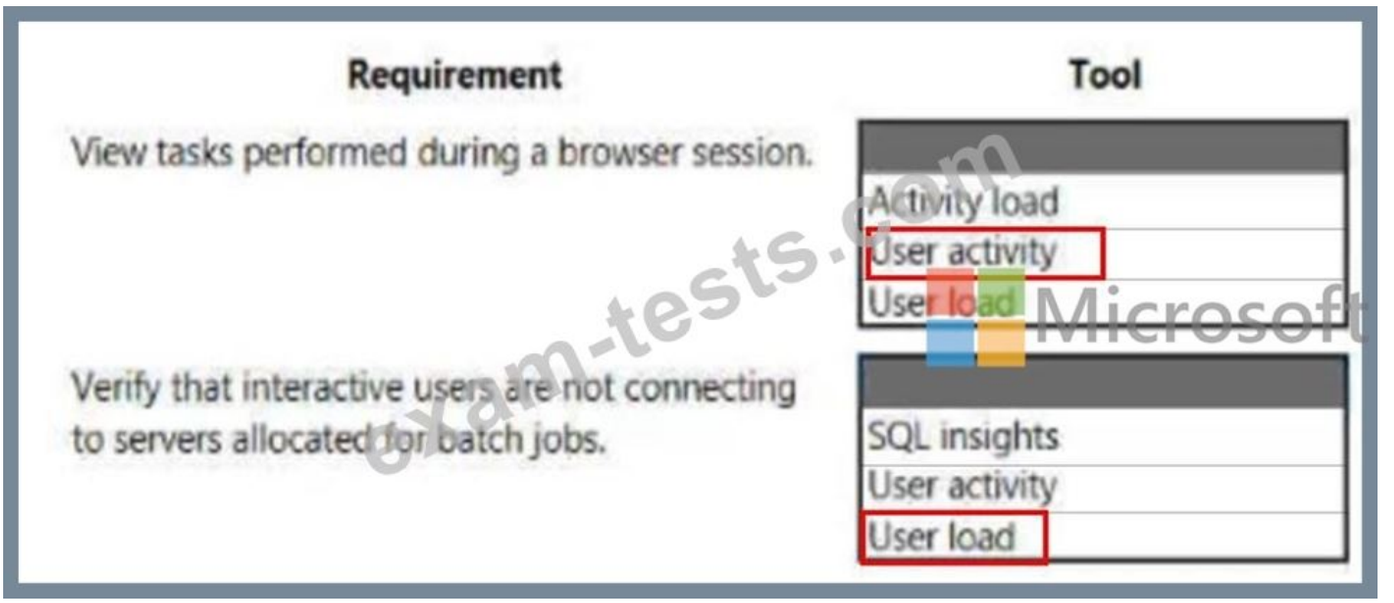

Answer:

NEW QUESTION: 57
The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment.
The environment administrator must be able to do the following:
* View tasks performed during a browser session.
* Verify that interactive users are not connecting to servers allocated for batch jobs.
You need to determine which environment monitoring toots meet the requirements.
Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

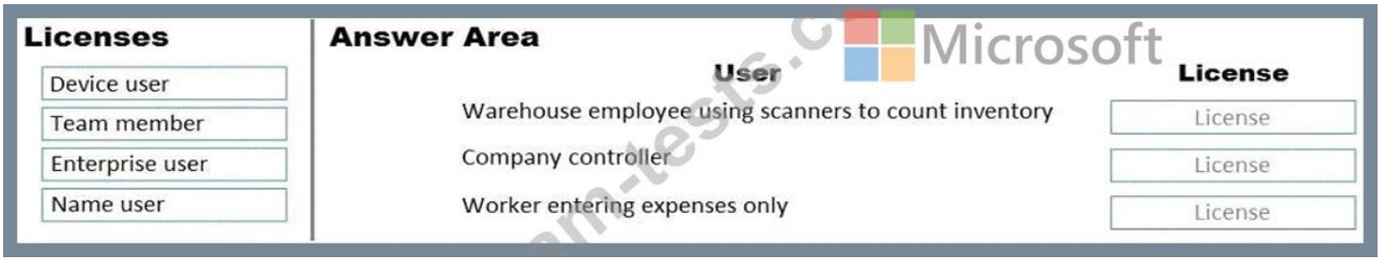

Answer:

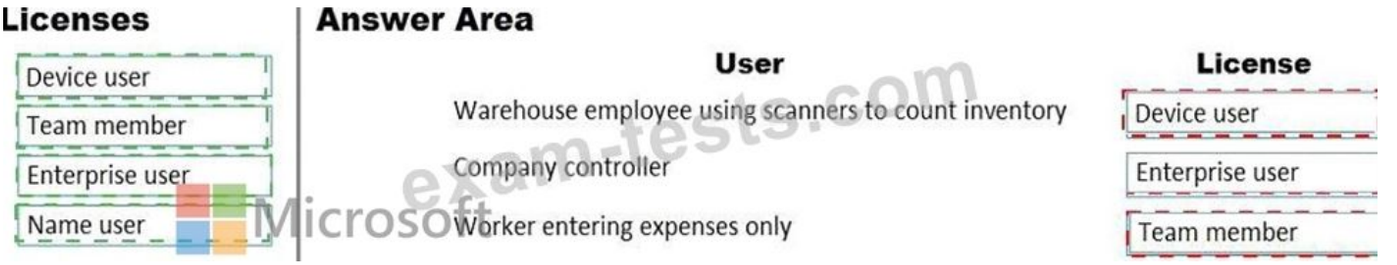

NEW QUESTION: 58
A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. You create a security role named ReadOnlyUserAR and add the role to users.
You create a custom duty named
You need to recommend how to implement the privileges.
Which three actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Add the Customers privilege to CustCustomerMasterInquire.
B. Add the CustCustomerMasterInquire duty to ReadOnlyUserAR.
C. Add the Customers privilege to the CustCustomer.
D. Add the Customers privilege to CustomerViewList.
E. Add ReadOnlyUserAR to users.
F. Add CustomerViewList to ReadOnlyUserAR.
Answer: B,E,F (LEAVE A REPLY)

NEW QUESTION: 59
You need to determine user licensing options for Dynamics 365 Finance + Operations (on-premises).
Which type of license should you recommend? To answer, drag the appropriate licenses to the correct users.
Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION: 67

A company plans to build Power Apps apps as part of their digital transformation strategy.

App makers require access to individual environments to learn how to build apps through the Community Plan. Tenant users require access to an environment in which they can test apps as well as have database backup and restore capabilities.

You need to recommend appropriate environments for the company.

What should you recommend? To answer, drag the appropriate environments to the correct requirements. Each environment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Developer

Developer

Developer environments are created by users who have the Developer Plan license. They're special environments intended only for use by the owner. Provisioning developer environments can be restricted to admins (see Block trial licenses commands). The developer environment will be available as long as you actively use the Power Apps Developer Plan.
Box 2: Sandbox
These are non-production environments, which offer features like copy and reset. Sandbox environments are used for development and testing, separate from production. Provisioning sandbox environments can be restricted to admins (because production environment creation can be blocked), but converting from a production to a sandbox environment can't be blocked.

A toy manufacturer keeps finished products in a physical warehouse.
The manufacturer and distributor use different inventory control software.
Sales orders are used to move inventory to the distributor.
The distributor must be notified immediately when the toy manufacturer ships an order.
You need to determine a solution for providing notifications to the distributor's inventory system.
What are three possible ways to achieve this goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Recurring integrations
B. Lifecycle Services
C. Business events
D. Custom web service
E. OData
Answer: (SHOW ANSWER)

NEW QUESTION: 70
A company is implementing Dynamics 365 Supply Chain Management. The company has 11 legal entities. Each entity uses a separate enterprise resource planning (ERP) system. A customer may have a unique customer number in each system because the systems are disconnected. One of the customer numbers will be used as the master number in Dynamics 365. The company plans to add entities to Supply Chain Management over time. Customer records will continue to be added to the ERP systems throughout the implementation lifecycle and must be kept up to date. The ERP systems will be decommissioned after go-live.
You need to create a strategy to migrate the customer data and ensure that new records are automatically mapped.

Which solution should you implement for each requirement? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 71
A company uses a legacy finance application that runs on a single SQL Server instance. The company plans to implement Dynamics 365 Finance. The following table describes the current implementation and design decisions for the new implementation:

Feature	Current application	Dynamics 365 implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

You need to identify the gap in the migration plan. Which requirement should you identify as a gap?

A. Business logic

B. Users

C. User Interface

D. Reports

E. Data

Answer: B (LEAVE A REPLY)

Answer:

Answer Area

exam-testa.com Microsoft

NEW QUESTION: 74

A company with multiple legal entities implements Dynamics 365 Finance. The company does not want to purchase additional licensing or incur development costs.

The company's controller notes that vendors exist in multiple companies. The system does not apply and does not post payments to the correct company.

The controller notes that a company-specific report exists for vendor payment journals.

You must replace the single company-specific report with a global report that displays the vendor payment journal status across all companies in the organization for a single vendor.

You must minimize development and creation of new reports.

You need to identify a tool to create the report.

What should you recommend?

A. Financial Reporter

B. Electronic reporting tool

C. View

D. SQL Server Reporting Services (SSRS)

E. Power BI

Answer: A (LEAVE A REPLY)

Financial reporting for the application allows financial and business professionals to create, maintain, deploy, and view financial statements. It moves beyond traditional reporting constraints to help you efficiently design various types of reports.

Financial reporting includes dimension support. Therefore, account segments or dimensions are immediately available. No additional tools or configuration steps are required.

NEW QUESTION: 76

A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).

Development environments must be licensed for the duration of the implementation.

You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements.

Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Server and Cloud Enrollment (SCE)

The Server and Cloud Enrollment (SCE) is a licensing vehicle under the Microsoft Enterprise Agreement that enables organizations to standardize on one or more Microsoft Server and Cloud technologies.

To enroll, an installed base-wide commitment, or monetary commitment in the case of Azure, is required to one or more of the following four SCE components:

* Core Infrastructure
* Application Platform
* Developer Platform
* Microsoft Azure

Enrolling in SCE requires the following:

* Enterprise Agreement: Although you need to sign an Enterprise Agreement, an Enterprise Enrollment for Desktop is not needed to qualify.
* Annuity coverage: 100 percent Software Assurance or Subscription coverage is required on your install base for each product family that you commit to. This includes those licenses that were not covered by Software Assurance when you entered the program.

Box 2: Azure Subscription Environment

NEW QUESTION: 78
A company with multiple legal entities implements Dynamics 365 Finance.
You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Create separate departments to manage functional areas.
B. Create separate business units.
C. Create separate cost centers to manage operations.
D. Create separate value streams for item management.
Answer: (SHOW ANSWER)
Operating units
An operating unit is an organization that is used to divide the control of economic resources and operational processes in a business. People in an operating unit have a duty to maximize the use of scarce resources, improve processes, and account for their performance.
The operating units in finance and operations apps are:
(B) Business unit - A semi-autonomous operating unit that is created to meet strategic business objectives. It is used for financial reporting that is based on industries or product lines that the organization serves independently of legal entities.
(C) Cost center - An operating unit in which managers are accountable for budgeted and actual expenditures. It is used for the management and operational control of business processes that span legal entities.

NEW QUESTION: 79

A company uses Dynamics 365 Supply Chain Management. You are evaluating the company's new business processes.

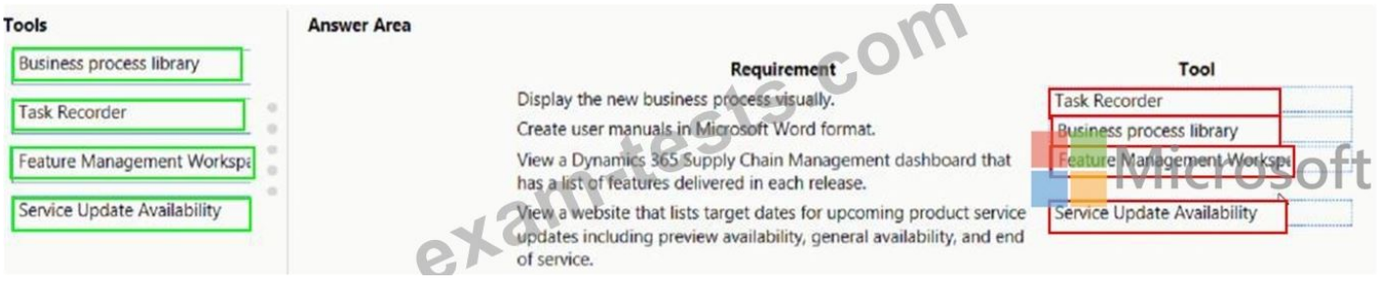

You need to determine which tools functional consultants should use to identify any possible gaps and new features available from Microsoft.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 83
You need to recommend a performance and load testing strategy for the requirement. What should you recommend? To answer, select the appropriate options in the answer are a. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 84

A company plans to implement Dynamics 365 Supply Chain Management.

You are a solution architect and need to prepare a Solution Blueprint document for this implementation.

You need to classify the requirements by type.

What is the classification for each requirement? To answer, drag the appropriate classifications to the correct requirements. Each classification may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Answer:

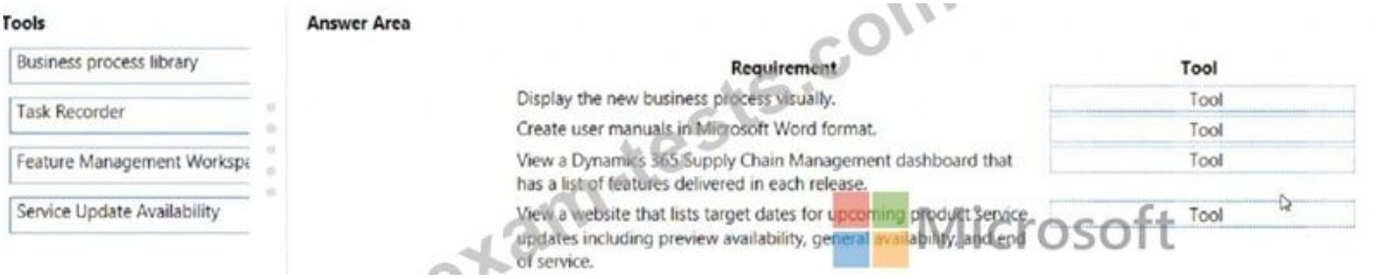

Explanation

Box 1: Non-functional

Requirements are commonly referred to as either functional or non-functional. Functional requirements describe what the solution needs to do or its behaviors, and non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.
The following examples are of well-composed non-functional requirements:
Average screen load time for internal users that are not mobile will be less than three seconds.
External portal must be able to handle 100 concurrent users who are performing case submission.
Any credit card number that is used cannot be stored in Common Data Service environment.
Box 2: Functional
Example functional requirements
The following scenarios describe simple examples of functional requirements:
As a sales user, I need to be able to close an opportunity as lost and then capture why it was lost so that we can improve our sales tactics in the future.
As a sales manager, I need to be able to approve a discount on a quote so that I can reduce the total price and give a discount to the customer.
As a staff accountant, I want to be prevented from closing a batch that has pending items so that I do not have to reopen it later.
Box 3: Non-functional
Examples of common non-functional requirement types include:
Availability
Compliance/regulatory
* -> Data retention/residency
Performance (response time, and so on)
Privacy
Recovery time
Security
Scalability
Reference: https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/3-functional-requirements
https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements

NEW QUESTION: 85
A company uses Dynamics 365 Supply Chain Management. You are evaluating the company's new business processes.
You need to determine which tools functional consultants should use to identify any possible gaps and new features available from Microsoft.
What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 87

DRAG DROP

You are planning a Dynamics 365 implementation.
You need to recommend a solution for the different types of environment instances.
What should you recommend? To answer, drag the appropriate instance types to the correct scenarios. Each instance type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

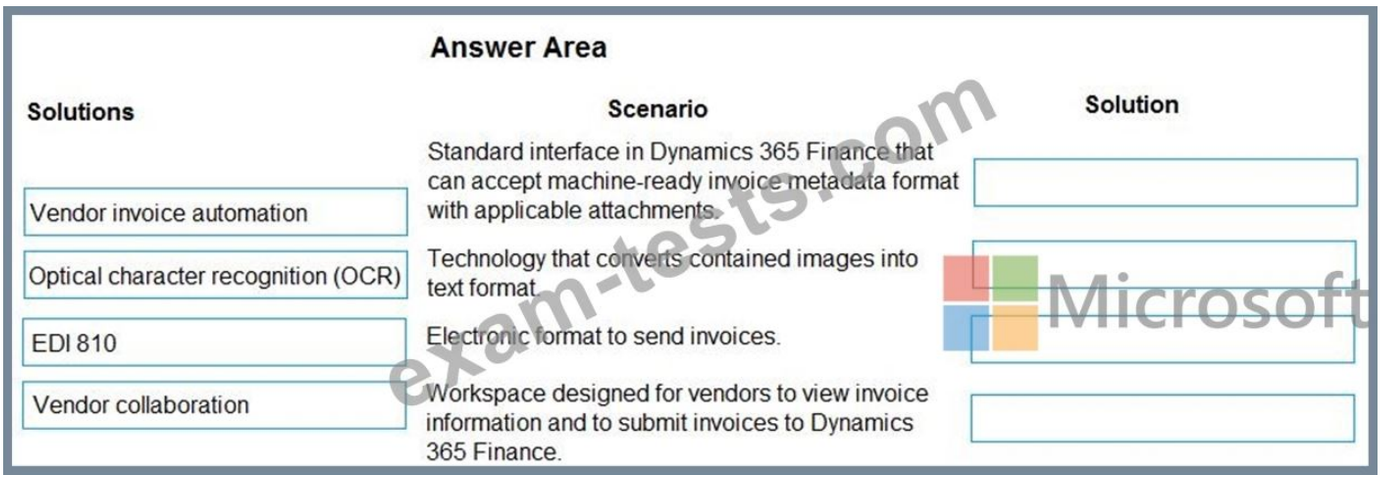

Answer:

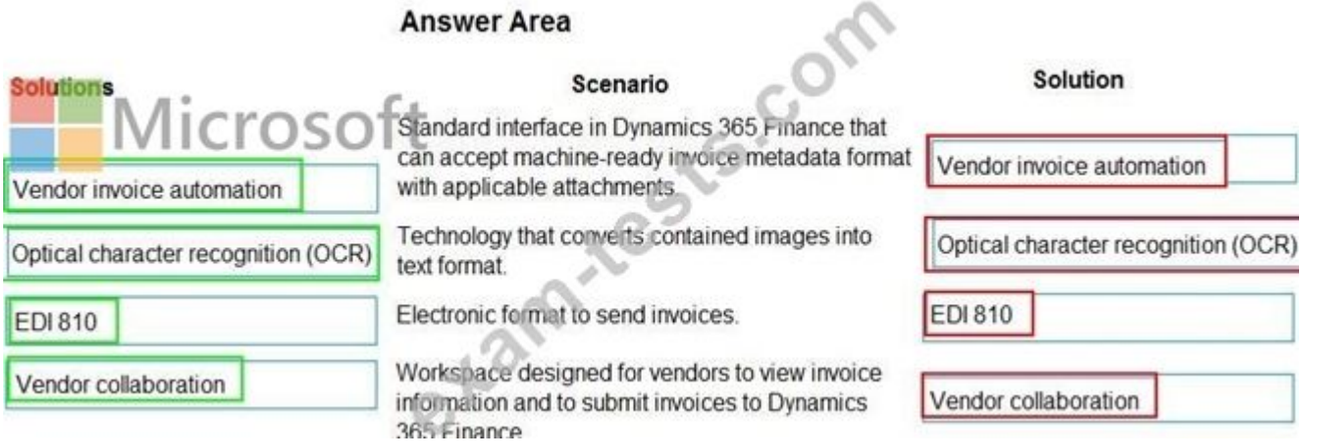

Section: Define solution testing and management strategies
Explanation/Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/imp-lifecycle/environment-planning

NEW QUESTION: 88
A company uses Dynamics 365 Finance.
The company receives a large number of accounts payable invoices on a regular basis that are currently being entered manually.
You need to research ways accounts payable invoices can be created automatically.
What should you recommend? To answer, drag the appropriate solutions to the correct scenarios. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

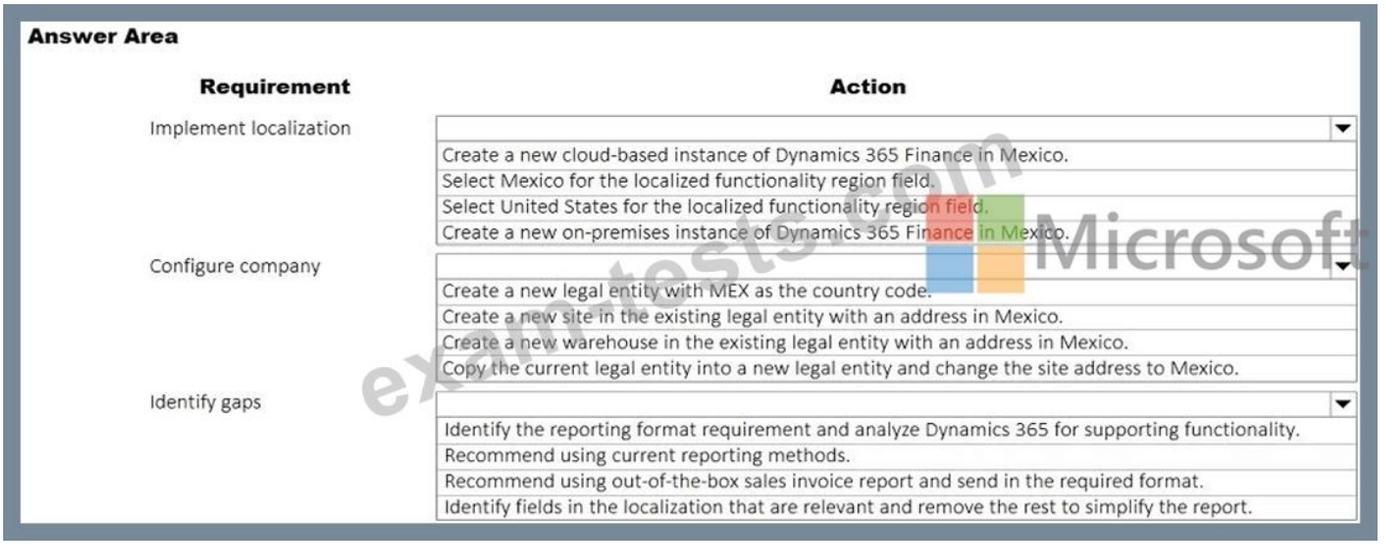

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/finance/accounts-payable/vendor-invoice-automation
https://docs.microsoft.com/en-us/learn/modules/configure-manage-vendor-collaboration-dyn365-supply-chain-mgmt/

NEW QUESTION: 89
A United States-based company has a cloud-based Dynamics 365 Finance implementation. The company plans to open a new location in Mexico.
Electronic invoicing is mandated in Mexico.
You need to recommend a solution that meets Mexican localization reporting requirements. What should you recommend? To answer, select the appropriate options in the answer are a. NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/finance/localizations/latam-mex-cfdi-electronic-invoices

NEW QUESTION: 90

A company needs to create customer-facing documents in Dynamics 365 Finance.
The company does not have an in-house developer.
You need to determine a solution for creating the documents.
Which three tools should you recommend? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Electronic reporting
B. Financial reports
C. Microsoft Word
D. Microsoft Excel
E. SSRS reports

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 91

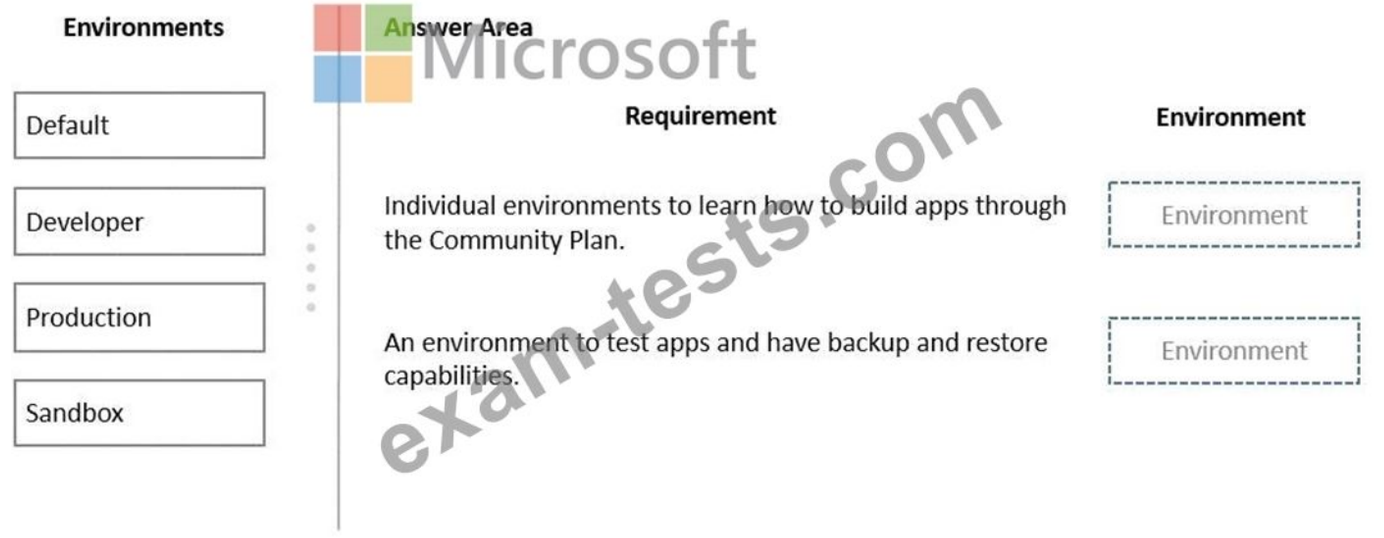

A company plans to build Power Apps apps as part of their digital transformation strategy.

App makers require access to individual environments to learn how to build apps through the Community Plan. Tenant users require access to an environment in which they can test apps as well as have database backup and restore capabilities.

You need to recommend appropriate environments for the company.

What should you recommend? To answer, drag the appropriate environments to the correct requirements. Each environment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation

Box 1: Developer

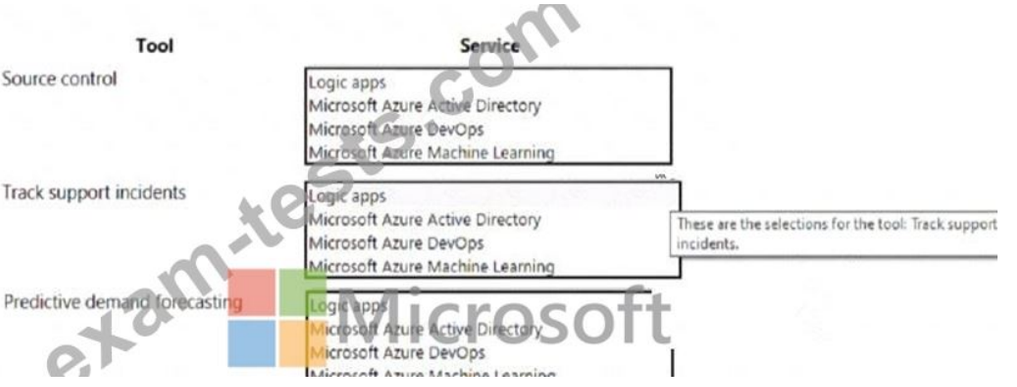

Developer

Developer environments are created by users who have the Developer Plan license. They're special environments intended only for use by the owner. Provisioning developer environments

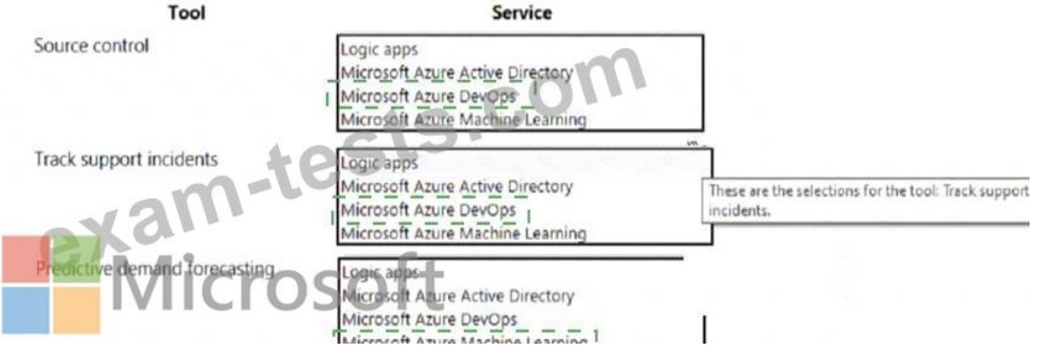

can be restricted to admins (see Block trial licenses commands). The developer environment will be available as long as you actively use the Power Apps Developer Plan.
Box 2: Sandbox
These are non-production environments, which offer features like copy and reset. Sandbox environments are used for development and testing, separate from production. Provisioning sandbox environments can be restricted to admins (because production environment creation can be blocked), but converting from a production to a sandbox environment can't be blocked.

NEW QUESTION: 92
A client is implementing Dynamics 365 Finance.
You need to help the client understand which Microsoft Azure tools to use to perform various tasks. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

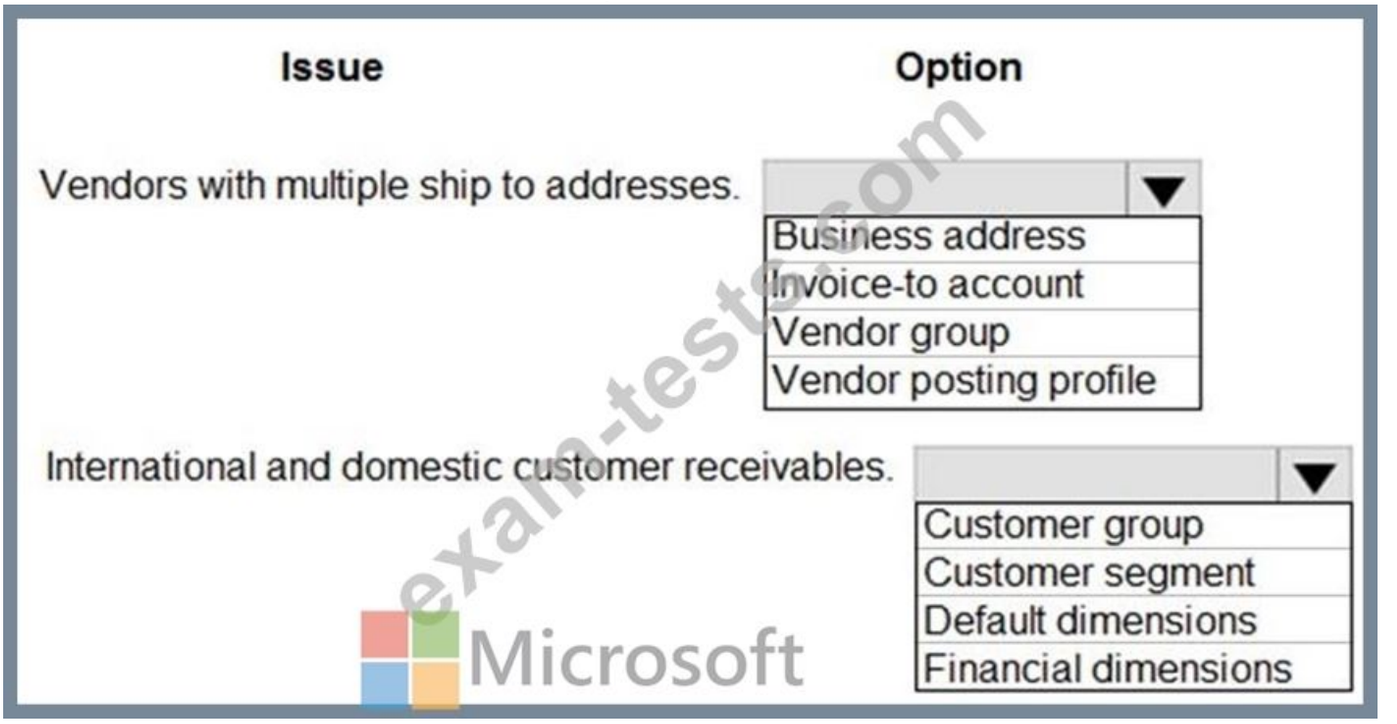

NEW QUESTION: 93

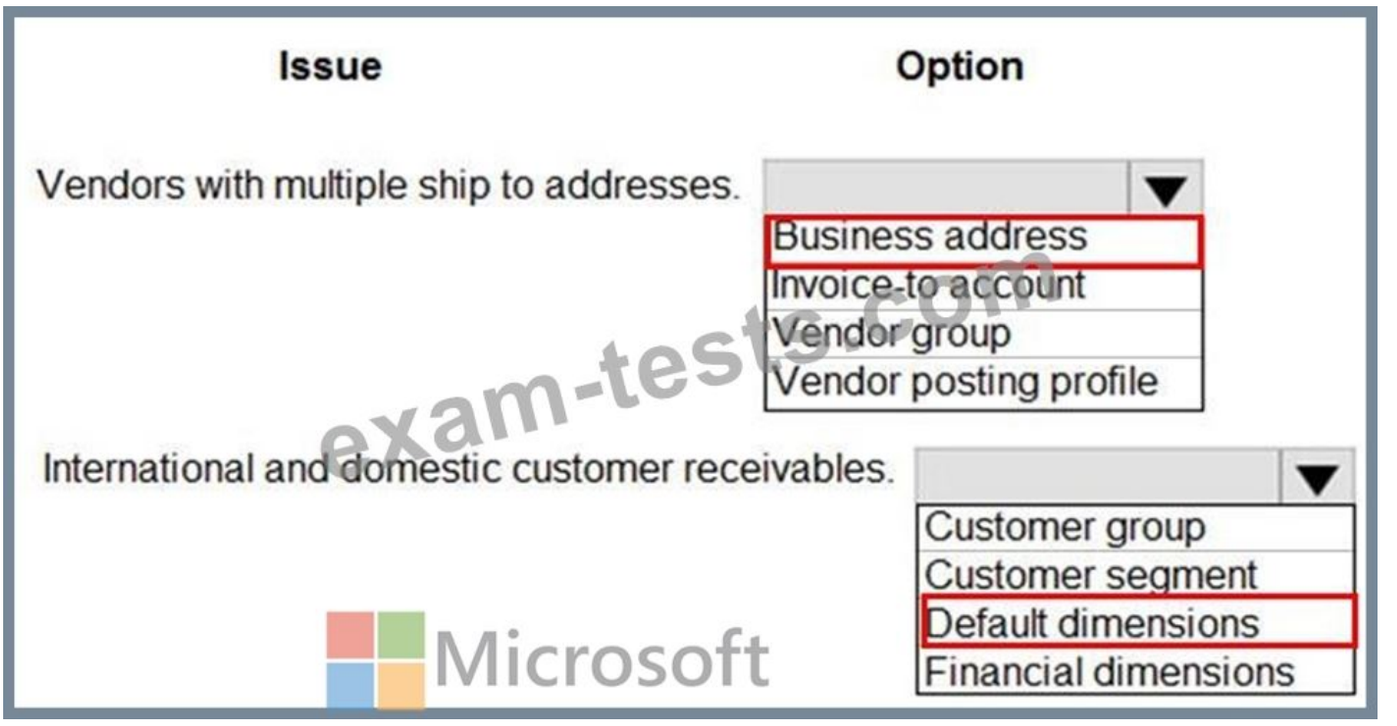

You need to correctly structure the master data.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 94

A company is planning a Dynamics 365 Finance implementation. The company completes a build versus buy analysis and determines that customizations need to be built.

Multiple developers will work on the customizations. The company needs to ensure that each developer s source code is not in conflict with the other developer's code.

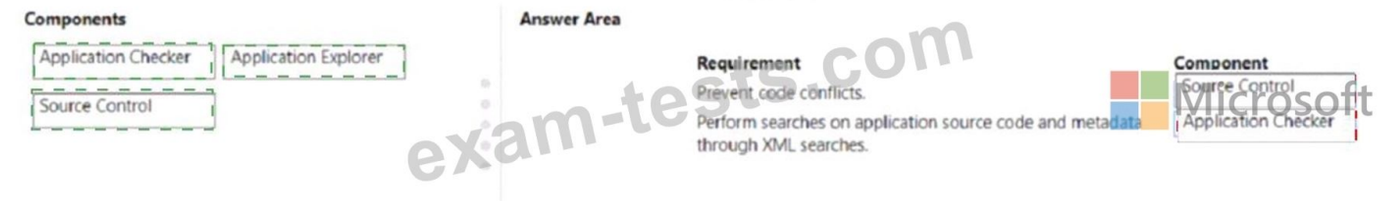

In addition, the technical quality team requires the ability to perform robust searches on the source code and metadata through XML searches.

You need to define the code management strategy.

Which components meet the requirements? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each connect selection is worth one point.

Answer:

Explanation

NEW QUESTION: 95

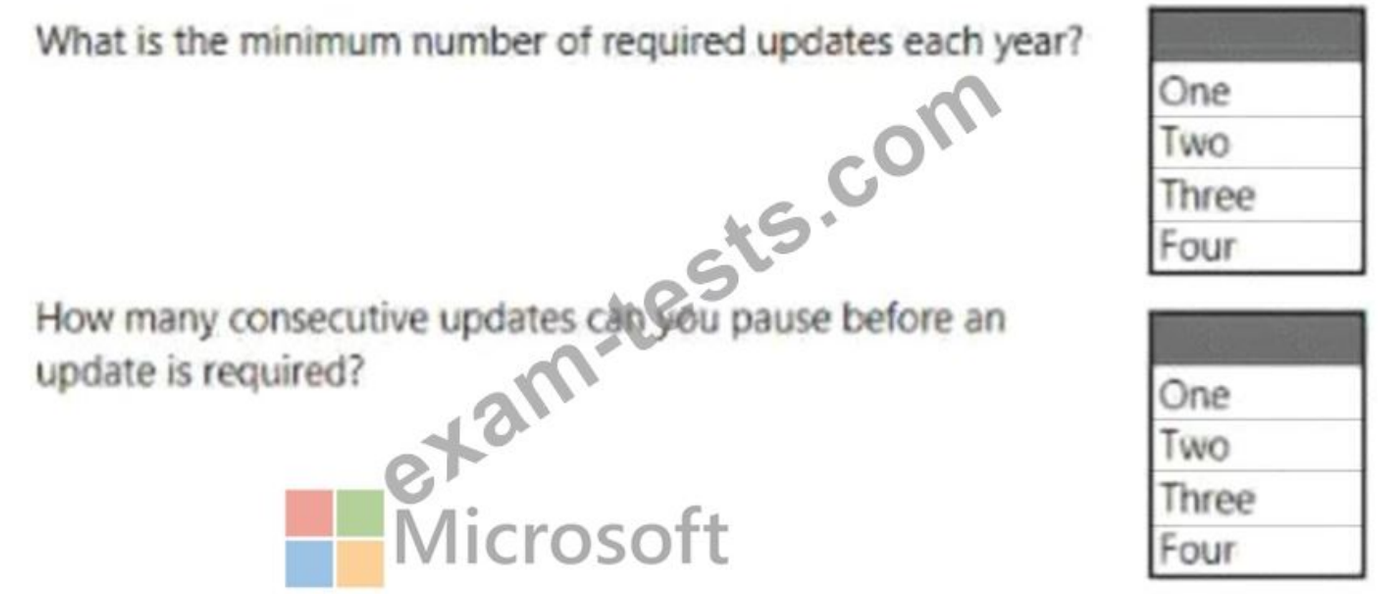

A company uses Dynamics 365 Finance.

The company wants to understand how version updates are handled.

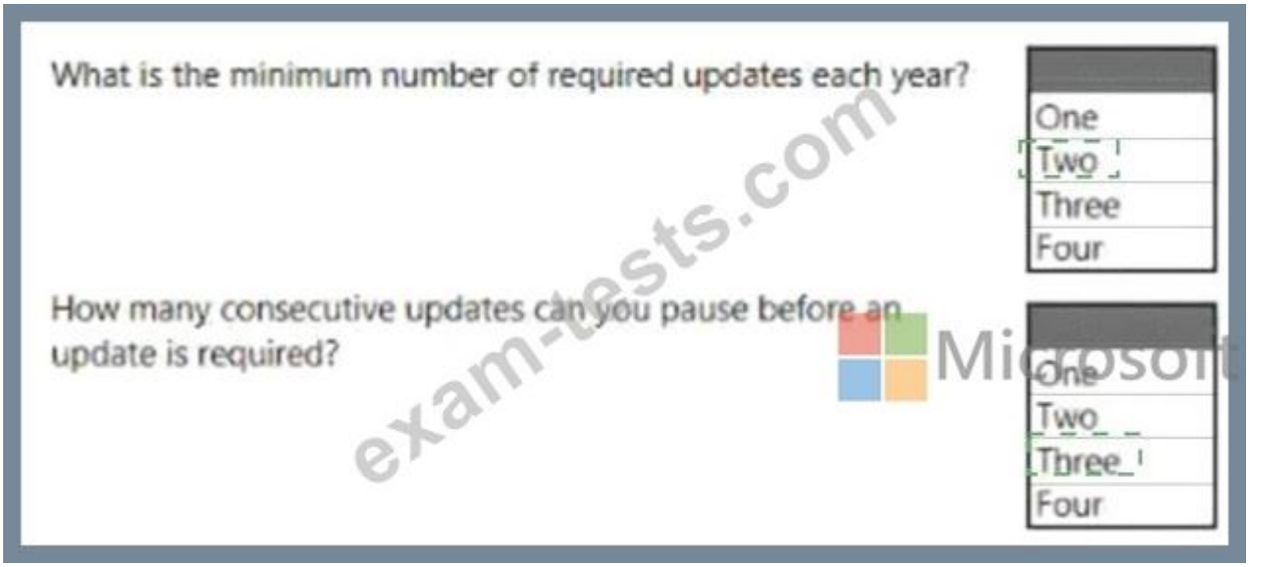

You need to explain the version update and pause policy.

What should you conclude? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation

Box 1: Two

Customers will be able to take up to 7 service updates per year and are required to take a minimum of 2 service updates per year.

Box 2: Three
Customers can choose to pause up to 3 consecutive updates at a time. Pausing a service update can apply to the designated user acceptance testing (UAT) sandbox, production, or both environments. After the pause window has ended and if the customer has not self-updated to a supported service update, Microsoft will auto-apply the latest update based on the configuration selection made available in Lifecycle Services (LCS).

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/get-started/public-preview-releases

NEW QUESTION: 96
A professional services company is implementing Dynamics 365 Finance. The company has the following business entities:

Company	Comments
CompanyA	This is a company that reports on behalf of all organizational units.
OperationsB	This is a transactional company that operates with their own tax ID.
OperationsC	This is a regional business unit within OperationsB.
OperationsD	This is a transactional company that operates with their own tax ID.

You need to configure the system to support this organizational structure.
How should you configure the organization? To answer, drag the appropriate configurations to the correct entities. Each configuration may be used once. more than once. or not at all You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Box 1: Legal entity
Box 2: Legal entity for elimination
Elimination transactions are required when a parent legal entity does business with one or more subsidiary legal entities and uses consolidated financial reporting. Consolidated financial

statements must include only transactions that occur between the consolidated organization and other entities outside that organizations.
Therefore, transactions between legal entities that are part of the same organization must be removed, or eliminated, from the general ledger, so they don't appear on financial reports. There are multiple ways to report about eliminations:
An elimination rule can be created and processed in a consolidation or elimination company.
Financial reporting can be used to show the eliminations accounts and dimensions on a specific row or column.
A separate legal entity can be used to post manual transaction entries to track eliminations.
Reference: https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/elimination-rules

NEW QUESTION: 97
A customer is planning to migrate to Dynamics 365 Finance.
You need to recommend a cloud or on-premises solution based on the customer's business requirements.
Which deployment type should you recommend? To answer, drag the appropriate deployment types to the correct requirements. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation

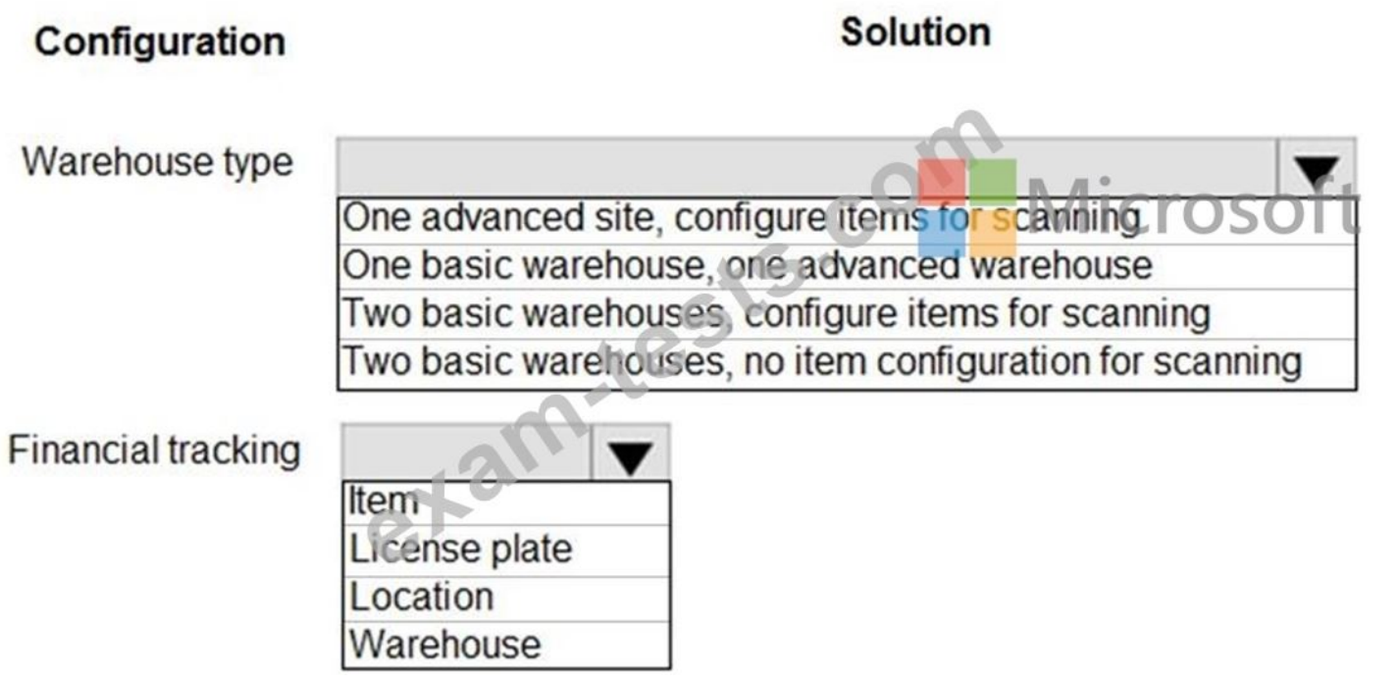

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/get-started/cloud-prem-comparison

NEW QUESTION: 98

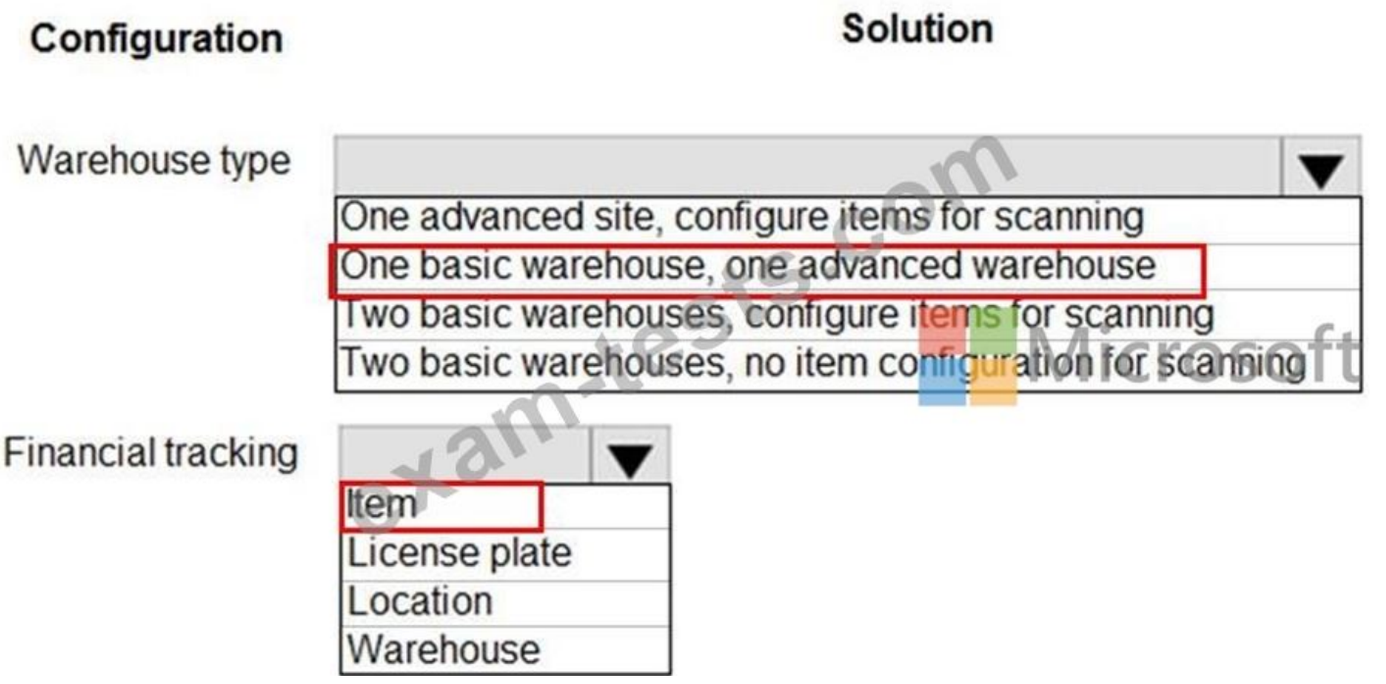

You need to recommend a site and warehouse configuration.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Reference:

https://docs.microsoft.com/en-us/dynamics365/supply-chain/warehousing/warehouse-management-overview

NEW QUESTION: 99

You must recommend a solution to meet the requirements for User2.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Business process modeler

Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry-standard processes that are described by the American Productivity & Quality Center (APQC). You can perform fit-gap analysis between your business requirements and the default processes in Finance and Operations apps. Additionally, you can add new business processes that aren't already defined.

BPM is compatible with the following products:

Microsoft Word - You can generate documentation for business processes.

Microsoft Visio - You can export business process maps to Visio files.

Note: Vendors and purchasing

As customers purchase packages, Margie's Travel can claim rebates with the providing vendor for every package sold. The rebates are claimed quarterly, and internal workflows have been established for approval prior to vendor submission. The workflows for package offerings eligible for rebates can be complex. User2 has created Visio diagrams for the associated approval processes.

Box 2: Regression suite automation tool (RSAT

The Regression suite automation tool (RSAT) significantly reduces the time and cost of user acceptance testing (UAT) of Finance and Operations apps. UAT is typically required before you

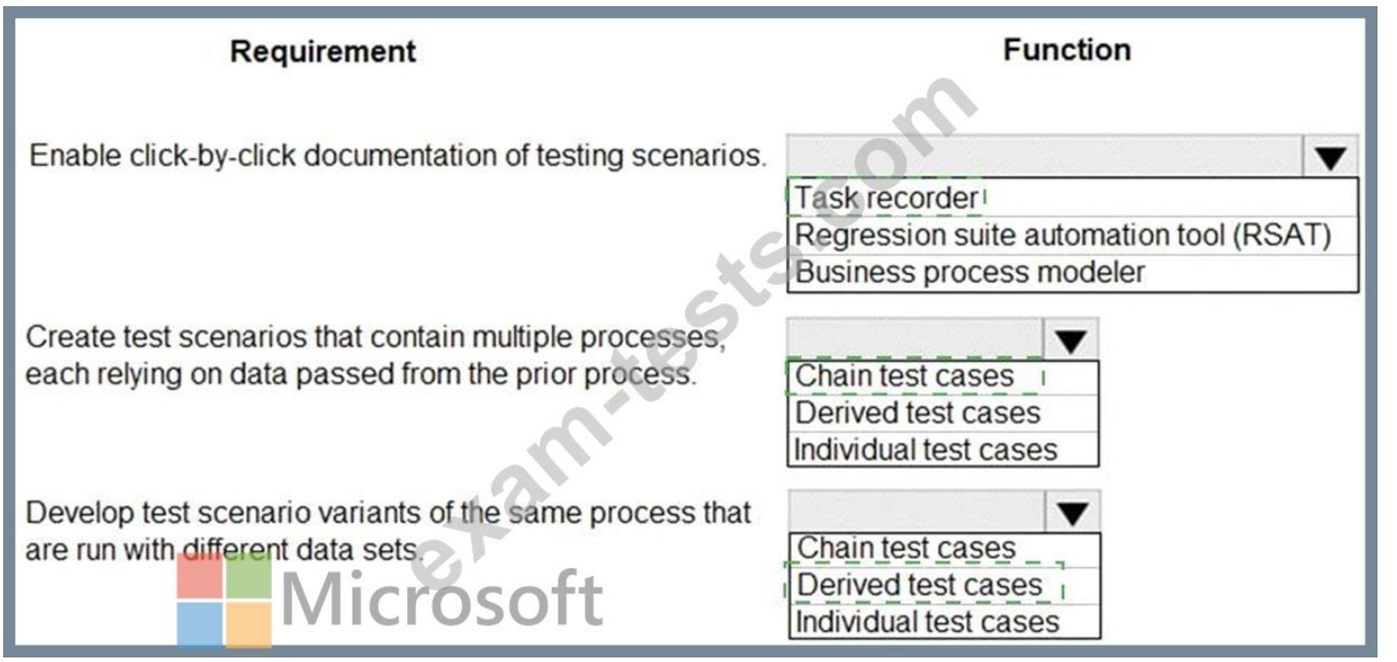

take a Microsoft application update, or before you apply custom code and configurations to your production environment.
RSAT lets functional power users record business tasks by using Task recorder and then convert the recordings into a suite of automated tests, without having to write source code.
Note: The accounts receivable and accounts payable departments are unclear about the workflows associated with the rebate process. User2 must ensure that representatives from each department validate that they have tested their respective steps in the overall process. Testing feedback must be communicated to User2.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpm-overview
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-overview

NEW QUESTION: 100
A company uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management.
The company plans to continuously apply upgrades.
You need to determine which functions meet the requirements.
Which function meets each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Function
Enable click-by-click documentation of testing scenarios.	Task recorder Regression suite automation tool (RSAT) Business process modeler
Create test scenarios that contain multiple processes, each relying on data passed from the prior process.	Chain test cases Derived test cases Individual test cases
Develop test scenario variants of the same process that are run with different data sets.	Chain test cases Derived test cases Individual test cases

NEW QUESTION: 101

You need to recommend which type of Dynamics 365 licenses are needed.

What should you recommend? To answer, select the appropriate options in the answer area.

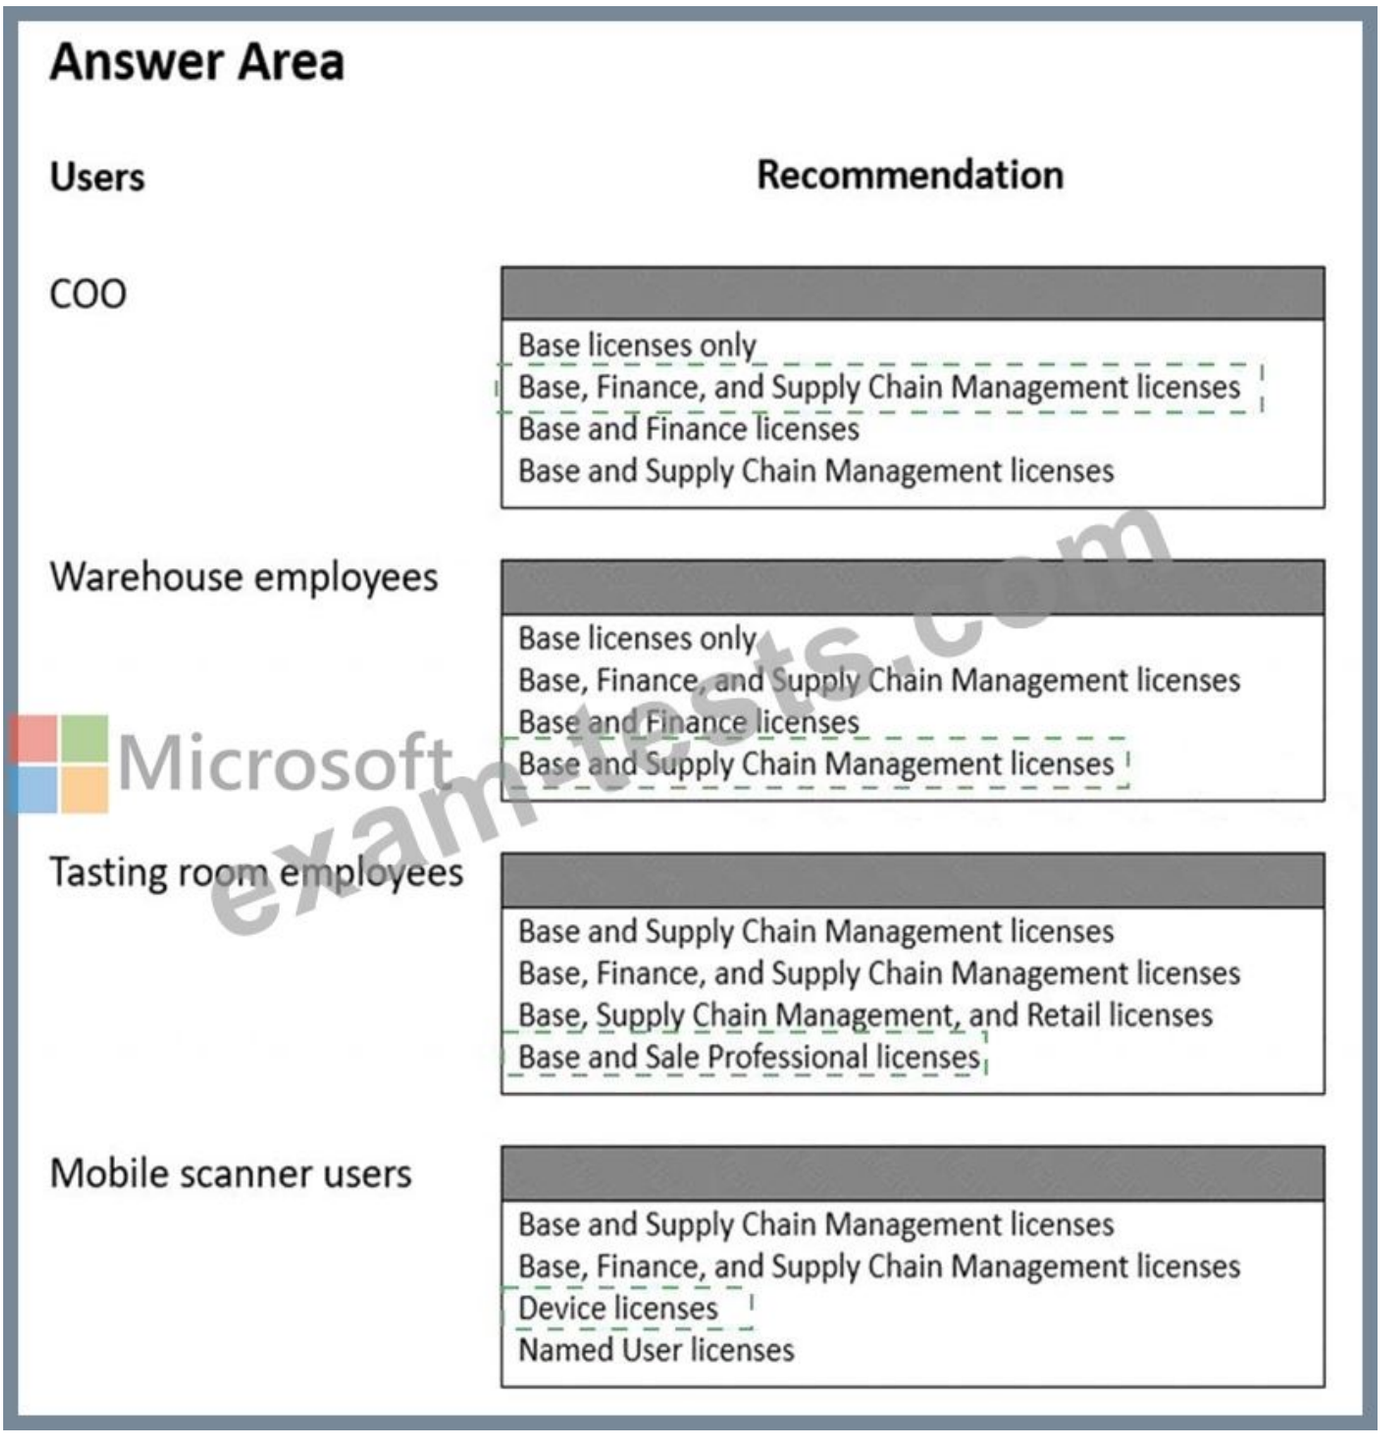

NOTE: Each correct selection is worth one point.

Answer Area

Users	Recommendation
COO	Base licenses only Base, Finance, and Supply Chain Management licenses Base and Finance licenses Base and Supply Chain Management licenses
Warehouse employees	Base licenses only Base, Finance, and Supply Chain Management licenses Base and Finance licenses Base and Supply Chain Management licenses
Tasting room employees	Base and Supply Chain Management licenses Base, Finance, and Supply Chain Management licenses Base, Supply Chain Management, and Retail licenses Base and Sale Professional licenses
Mobile scanner users	Base and Supply Chain Management licenses Base, Finance, and Supply Chain Management licenses Device licenses Named User licenses

Microsoft
exam-tests.com

Answer:

Explanation:

Box 1: Base, Finance, and Supply Chain Managemenet licences

Only the President/CEO, CFO, COO, Controller and VP Operations users must be able to access finance and warehouse features.

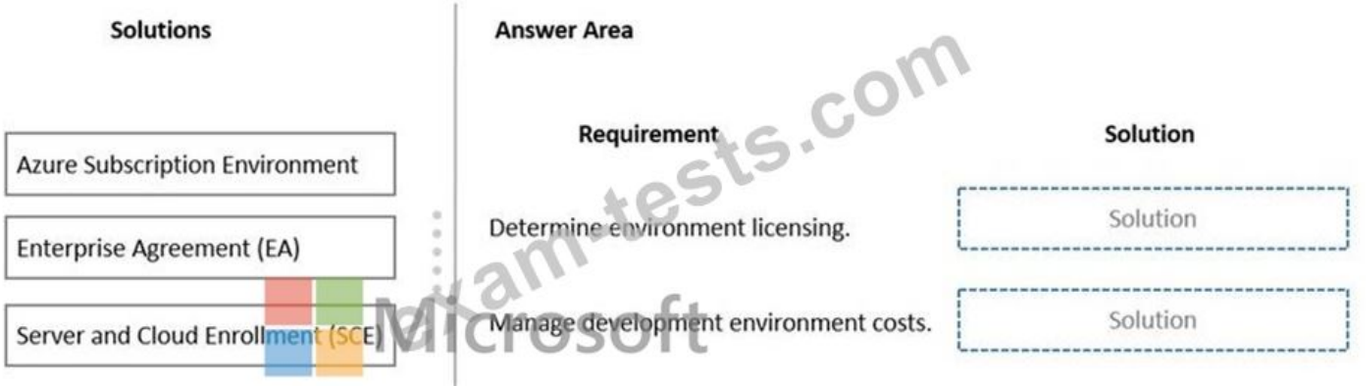

Box 2: Base and Supply Chain Management licenses.

Warehouse users must only have access to warehouse function. All other users must have access to finance functions.

Box 3: Base and Sale Professional licenses

The company holds events for club members in the tasting room and ships both full cases and individual bottles to members. The tasting room is not treated as a retail store. All sales to club members only and purchases must be made on-account.
The tasting room will not have mobile scanners.
Box 4: Device licenses
The distribution center must have mobile scanners for the warehouse.

NEW QUESTION: 102
A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).
Development environments must be licensed for the duration of the implementation.
You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.
What should you recommend? To answer, drag the appropriate solutions to the correct requirements.
Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

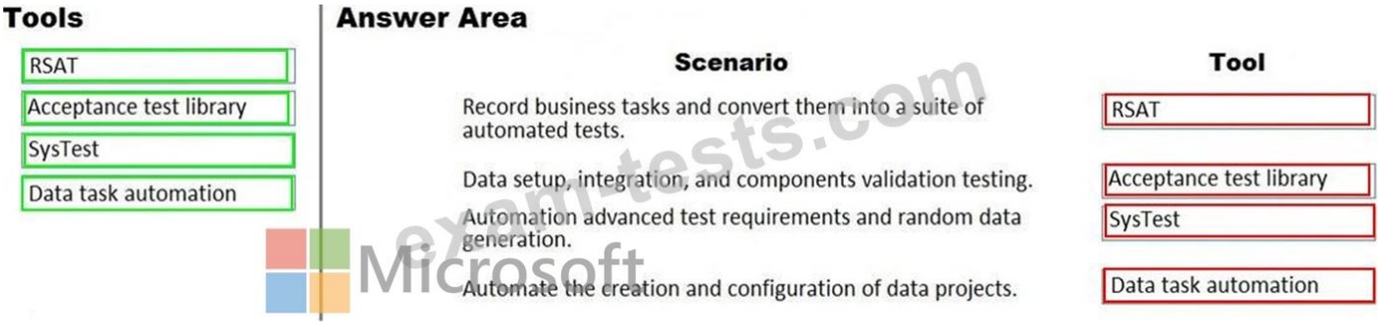

NEW QUESTION: 103
A company implements Dynamics 365 Supply Chain Management.
The company uses a third-party analytics software solution for reporting. The solution requires permissions to ensure T-SQL code can access data.

The company must include Dynamics 365 Supply Chain Management data in the analytics software solution to display data in a single view with other data.
You need to identify the correct data analytics approach.
Which solution should you use?
A. Bring your own database (BYOD)
B. Dual-write
C. Power BI
D. Microsoft Dataverse
E. Entity store
Answer: D (LEAVE A REPLY)

NEW QUESTION: 104
A company is implementing Dynamics 365 and requires extensive data and end-to-end testing during each iteration.
You need to determine a testing strategy for multiple scenarios.
What should you recommend? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION: 105
You are designing a solution for a company. The solution will integrate with various data sources.
You need to recommend the correct timing for each integration pattern.

What should you recommend? To answer, drag the appropriate timings to the correct patterns. Each timing may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

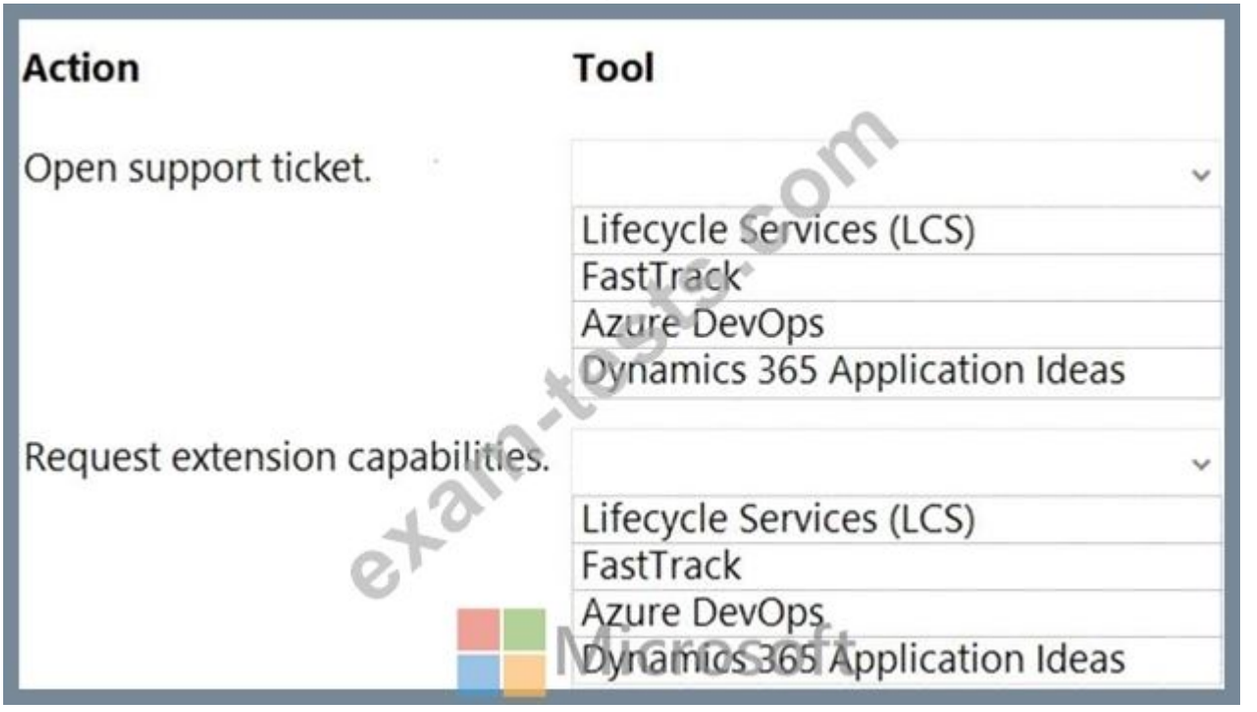

Answer:

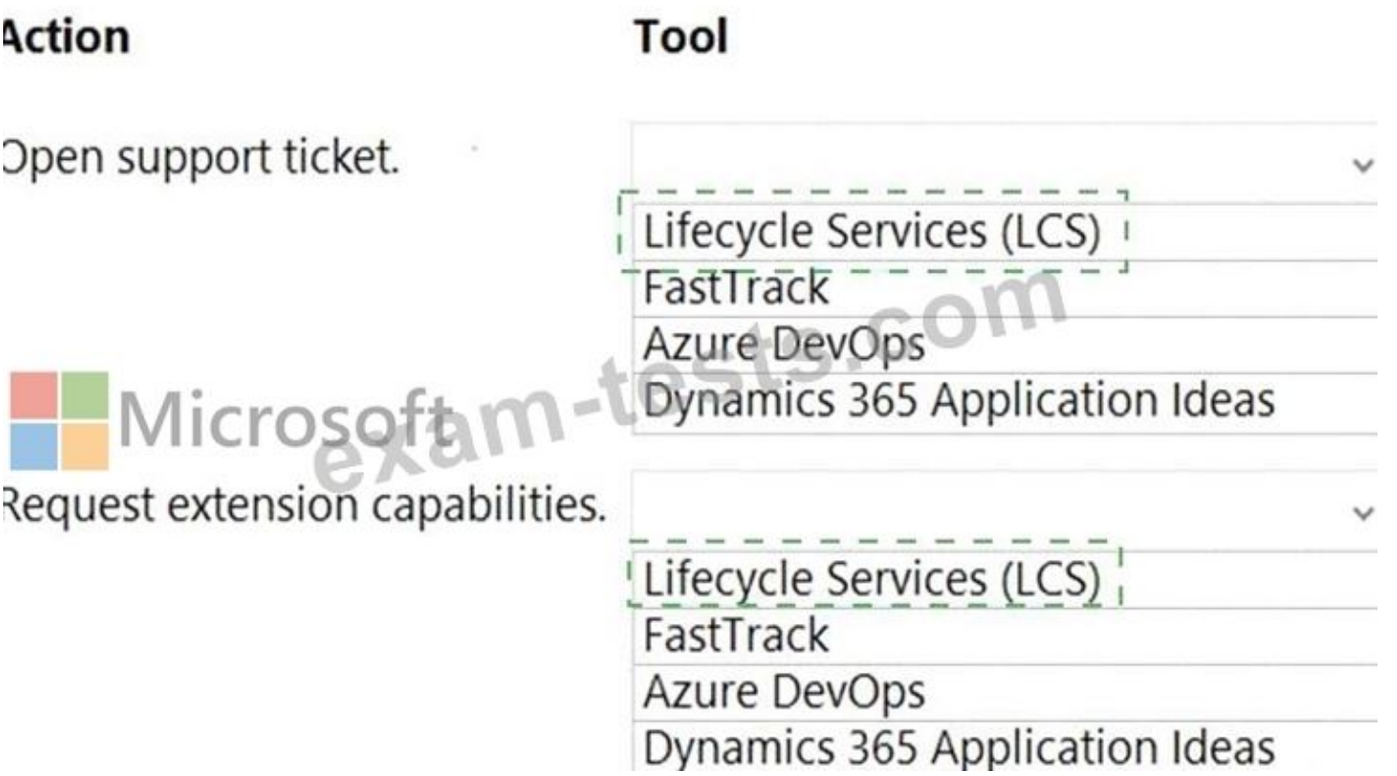

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/integration-overview

NEW QUESTION: 106

You are a solution architect that implements Dynamics 365 finance and operations apps.
An advanced scenario in master planning includes a product bug.
You need to create a modification to avoid the scenario with the product bug, but Microsoft has not created the required extension capabilities.
You need to recommend a solution to log the product bug and request the extension capabilities.
Which tools should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

exam-tests.com

Explanation:

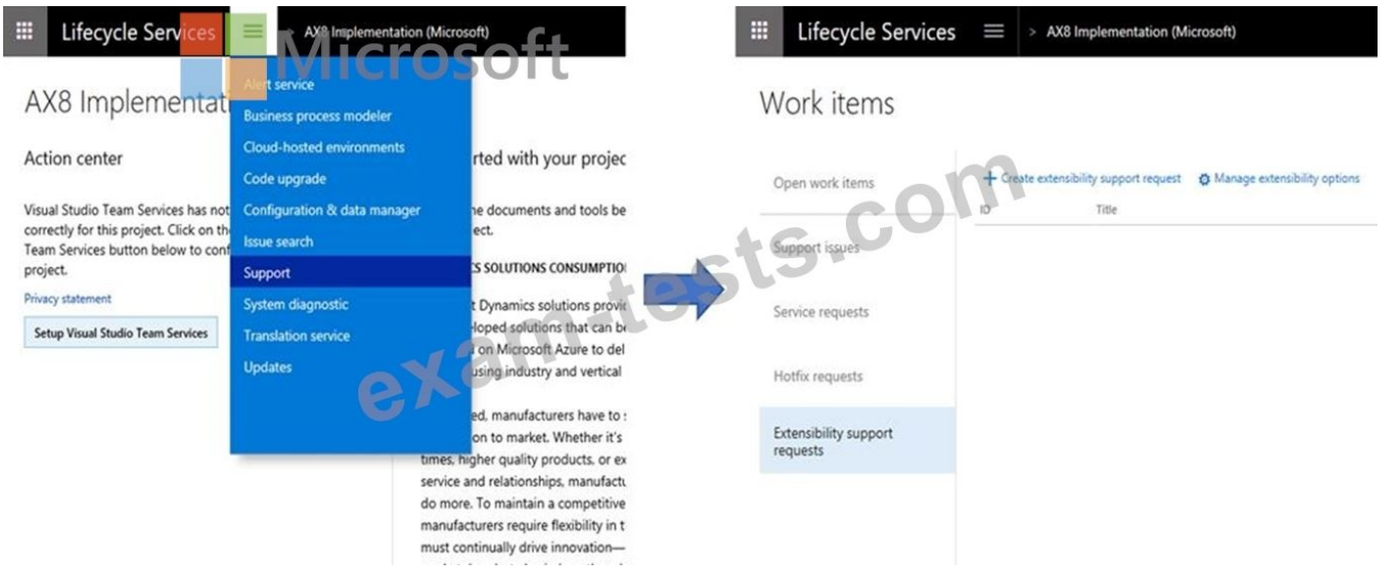

Box 1: Lifecycle Services (LCS)

To open a support ticket with the Microsoft Support team, in LCS, the Support tile opens a tool that helps you manage support incidents. To submit issues directly to Microsoft, select the Support tile in your LCS project.

Box 2: Lifecycle Services (LCS)

Extensibility requests are logged using a specific project in LCS. Logged requests are collected under that same project. We recommend that you log related requests under the same LCS project as this helps maintain a holistic view on all requests for a specific solution or an implementation. Microsoft then further identifies logged requests by the organization name that is associated with the LCS account.

In your LCS project, at the top of the page, select the hamburger icon and then click Support menu item.

NEW QUESTION: 107
You are preparing a proof of concept environment using Dynamics 365 Finance.
You need to analyze the results generated from the Regression suite automation tool (RSAT).
Which Lifecycle Services tool should you use to store the RSAT testing files?
A. Business process modeler
B. Methodologies
C. Usage profiler
D. Asset library
Answer: A (LEAVE A REPLY)

NEW QUESTION: 108
A company is deploying a Microsoft Power Platform solution.
You need to grant access to the solution based on the following requirements:
* Users must be able to customize the environment.
* Users must be able to view rows only for the tables they create.

Which role should you assign?
A. System Customizer
B. Common Data Service User
C. Environment Maker
D. System Administrator
Answer: (SHOW ANSWER)
The System Customizer:
Has full permission to customize the system.
Can only view rows for system tables that they create.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/environments-overview

NEW QUESTION: 109
Your company has a Microsoft has a Microsoft 365 subscription.
You need to prevent temporary employees from using the chat feature in Microsoft Teams.
Solution: From the Microsoft Teams admin center, you modify the External access settings.
Does this meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)
External access settings in the Microsoft Teams admin center control the ability of users to communicate with users from other domains. This does not prevent temporary employees from using the chat feature internally within the organization. To achieve the goal, a messaging policy that restricts chat usage for specific users needs to be implemented.
Reference: Manage channel policies in Microsoft Teams

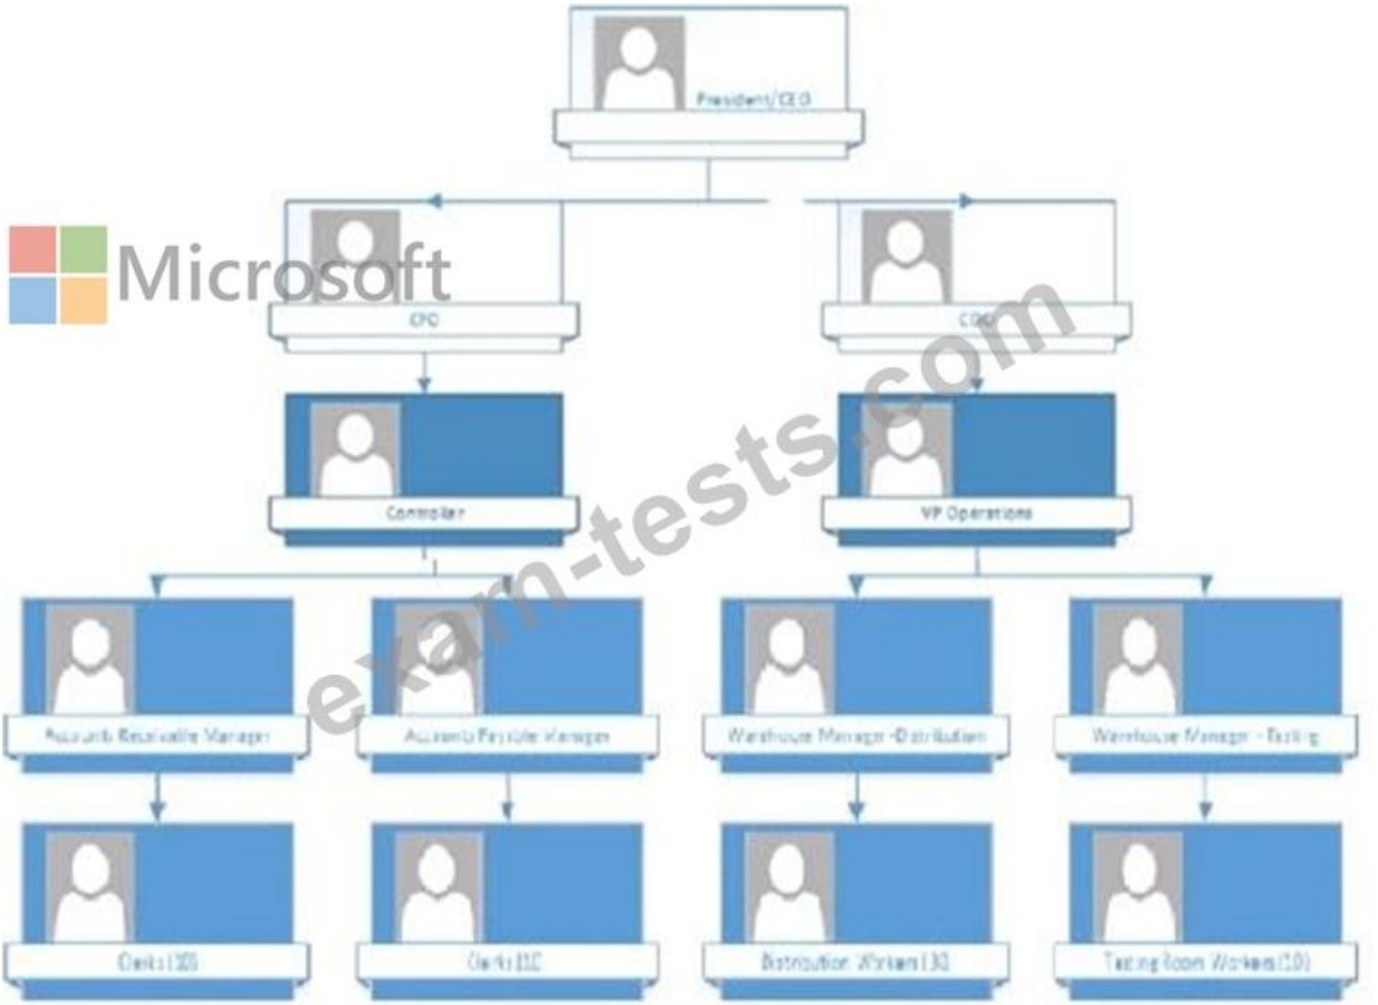

NEW QUESTION: 110
You are an architect implementing a Dynamics 365 Finance environment.
You need to analyze test results generated by the development team. Which tool should you use?
A. Trace parser
B. Task Recorder
C. Regression suite automation tool
D. SysTest
Answer: (SHOW ANSWER)
Topic 1, CoHo Vineyard and Winery
Company structure
The following graphic shows the company structure:

exam-tests.com

Organization

The current organizational chart and roles as follows:

Current environment

Coho Vineyard and Winery currently uses manual processes for most of its operations. The company stores names and phone numbers for club members and prospective club members in a Microsoft Excel workbook. The sales team currently tracks club membership in a separate system. Sales team stock awards are granted on a three-year basis. The solution for the sales Team cannot be replaced for three years.

* The types of wine, such as cabernet sauvignon and red blends are tracked as separate items. Each item will have a year associated with it such as Red Blend 2017, 2018, 2019, etc. The items are updated for the year association annually.
* Peak times for order entry could be in the hundreds. This typically happens when first and second shift workers overlap and all users are on the system, as well as orders imported in.
* Packaging materials, bottles, and accessories are received in the warehouse FOB Destination from the manufacturer in China.
* Each retailer has individual item numbers, barcode placement descriptions and other additions such as pictures and details of the wine year and flavor notes.

CoHo Vineyard and Winery has outgrown their legacy ERP system and plans to implement Dynamics 365 Finance. CoHo wants to use out-of-the-box tools which are linked to the system where possible and not create new tools.

Licensing and organization

* Only the President/CEO, CFO, COO, Controller and VP Operations users must be able to access finance and warehouse features.
* Warehouse users must only have access to warehouse function. All other users must have access to finance functions.
* The distribution center must have mobile scanners for the warehouse. The tasting room will not have mobile scanners.
* The inventory cost must be tracked separately by distribution center or tasting room.

Club membership events

* You must ensure the members created in their existing system are also customers in Dynamics 365 Finance and that the customers do not exist in both systems under multiple record numbers.
* When tasting events are planned, text notifications must be sent out to the club members.
* text notifications must sent out to non-club members to encourage the non-members to join the club.
* During tasting events. CoHo will need access to place orders during the event but will not have the need for cash registers.

Warehouse and shipping

* The system must be able to track inventory throughout the whole warehouse process.
* A Certificate of Origin must accompany each shipment.
* Private label items that are shipped to retailers must be stored and costed as a single item number at CoHo.
* The system must be able to compare year-to-year performance of a single wine type.

Implementation

* Business processes must be documented as step-by-step processes and must align with the process flows in a visual format
* Data will be migrated and is a requirement for order entry.
* Data migration must be completed prior to testing.
* You must track each step of process validation so that the users have ownership for their individual functional areas. The tracking system used should be integrated with the system where possible.

Issues

* Users are struggling to understand the new system's processes.
* CoHo is concerned that the go-live will may not go smoothly.

NEW QUESTION: 111

You are designing a solution for a company. The solution will integrate with various data sources. You need to recommend the correct timing for each integration pattern.

What should you recommend? To answer, drag the appropriate timings to the correct patterns. Each timing may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/integration-overview

NEW QUESTION: 112

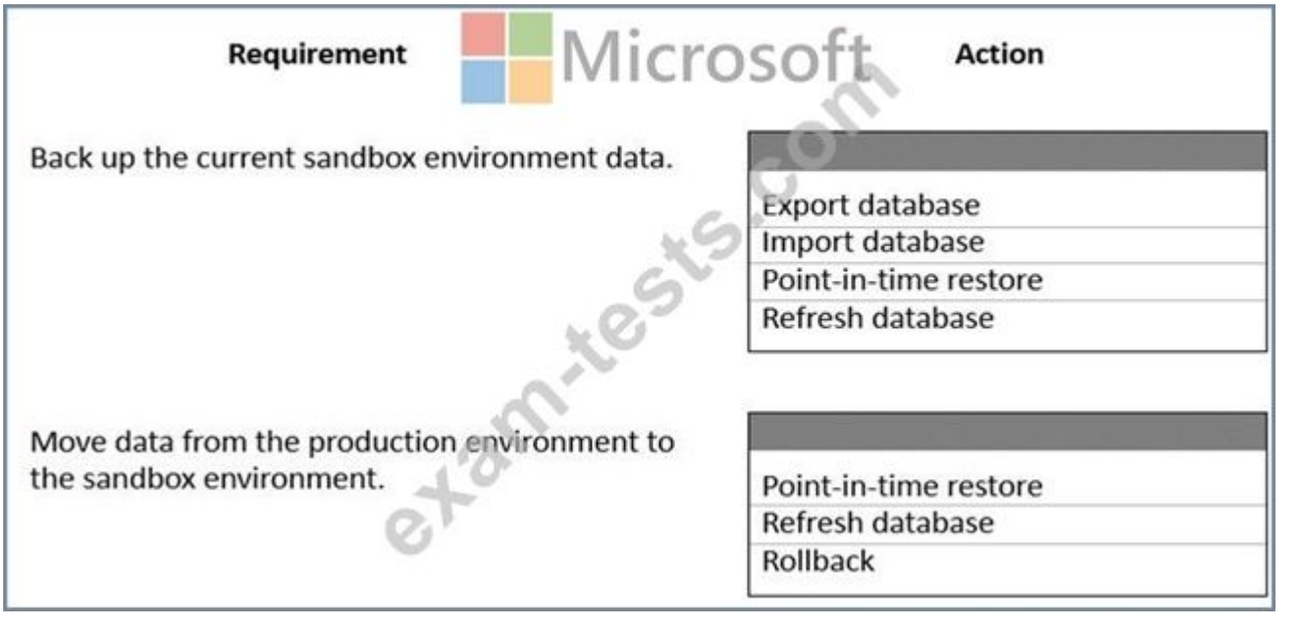

A company uses Dynamics 365 Supply Chain Management.

A user reports an error on a transaction in the production environment that occurred 30 days ago.

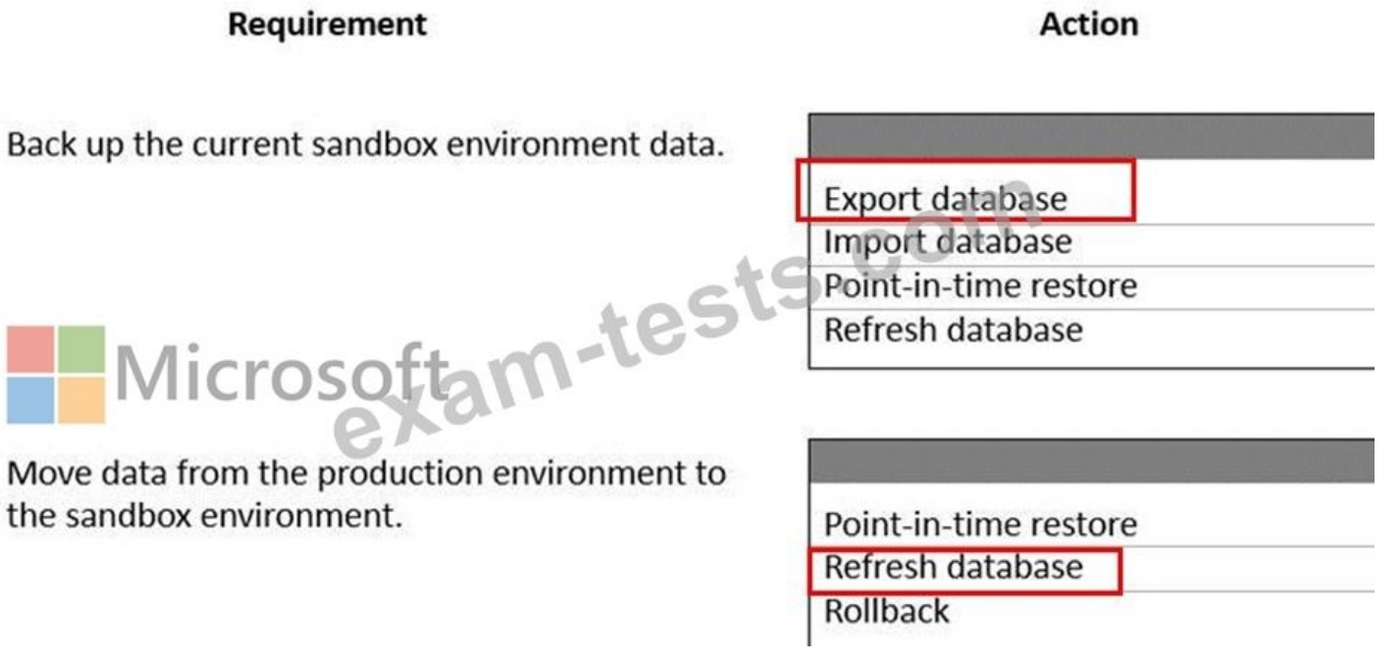

You need to move the current data from the production environment to the sandbox environment to troubleshoot the transaction error. You must back up the sandbox environment before you copy data to the production environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

exam-tests.com

Reference:
https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/database/database-refresh

NEW QUESTION: 113
Note: This question is part of a series of questions that present the same scenario.
Each question in the series contains a unique solution that might meet the slated goals.
Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it.
As a result, these questions will not appear in the review screen.
A company is implementing Dynamics 365 Finance.
The company uses Microsoft 365 apps. The company wants to integrate Microsoft word and Excel into Dynamics 365 Finance.
You need to identity the underlying technology that is required
Solution: Lifecycle Services (ICS)
Does the solution meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)

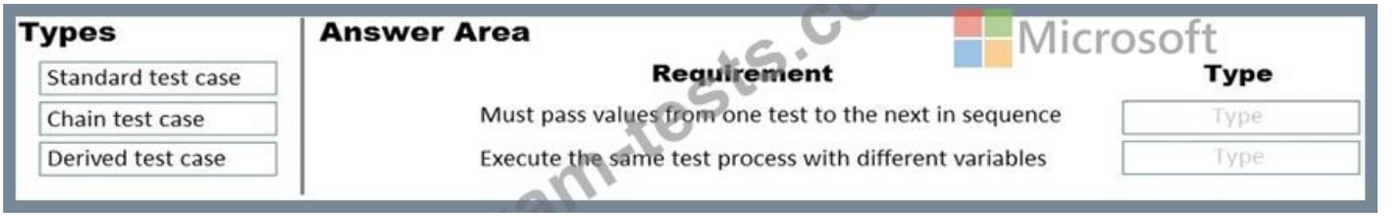

NEW QUESTION: 114
A client plans to implement Dynamics 365 Finance.
The client is unsure whether to use a cloud-based or on-premises implementation.
For which scenario should the client install the on-premises version of the app?
A. The client is concerned about disaster recovery and high availability.
B. The client needs to comply with federal regulations and keep their financial data at their headquarters location.

C. The client is concerned about their retail stores losing internet connection and not being able to process offline store transactions.
D. The client needs to be SOC 1 compliant.
Answer: B (LEAVE A REPLY)
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/deployment/choose-deployment-type With an on-premises deployment, existing data center investments can be leveraged. Customers can also configure their enterprise preferences to meet the regulatory and compliance needs of their business, comply with data sovereignty rules in regions where there are no Azure Data Centers, or ensure business continuity in areas with limited public infrastructure.

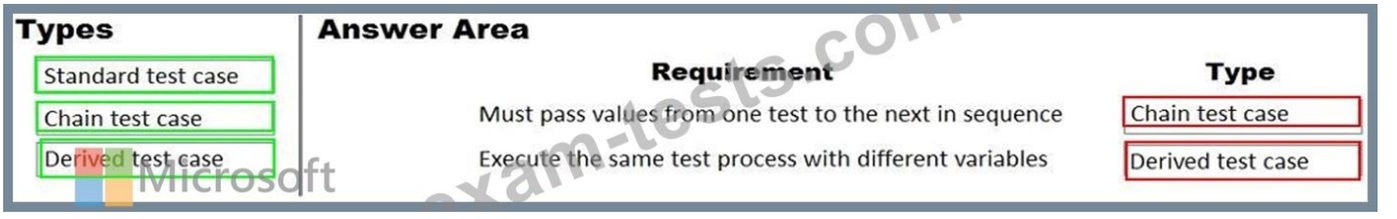

NEW QUESTION: 115
A company plans to upgrade from Microsoft Dynamics AX 2012 to Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The company has a large call center that uses a third-party system to enter sales orders.
The company decides to keep the third-party system and integrate il with Dynamics 365 Finance and Dynamics 365 Supply Chain v.-r >-:-r---r The company also wants to reuse the Microsoft Dynamics AX 2012 integration and endpoints with Dynamics 365 Finance and Dynamics 365 Supply Chain Management.
For performance reasons, non-real-time integrations must be avoided.
All solutions that are proposed should be supported by Microsoft in case there are performance issues.
You need to plan the integration strategy.
What should you do?
A. Plan for testing in a Tier 2 + environment.
B. Plan for testing in a production environment.
C. Use the Microsoft Excel add-in
D. Define custom service API requirements.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 116
You need to recommend a toolset to assist with User3 s feedback about the issues with journal entry and new user training. What should you recommend?
A. RSAT tool with LCS
B. Task Recorder with RSAT
C. Task Recorder with BPM library
D. RSAT tool with Asset library
Answer: C (LEAVE A REPLY)

NEW QUESTION: 117
A client is implementing Dynamics 365.
The client is exploring the available testing options.
You need to recommend which tool should be used based on the requirement.
What should you recommend? To answer, drag the appropriate types to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-chain-test-cases
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-derived-test-cases

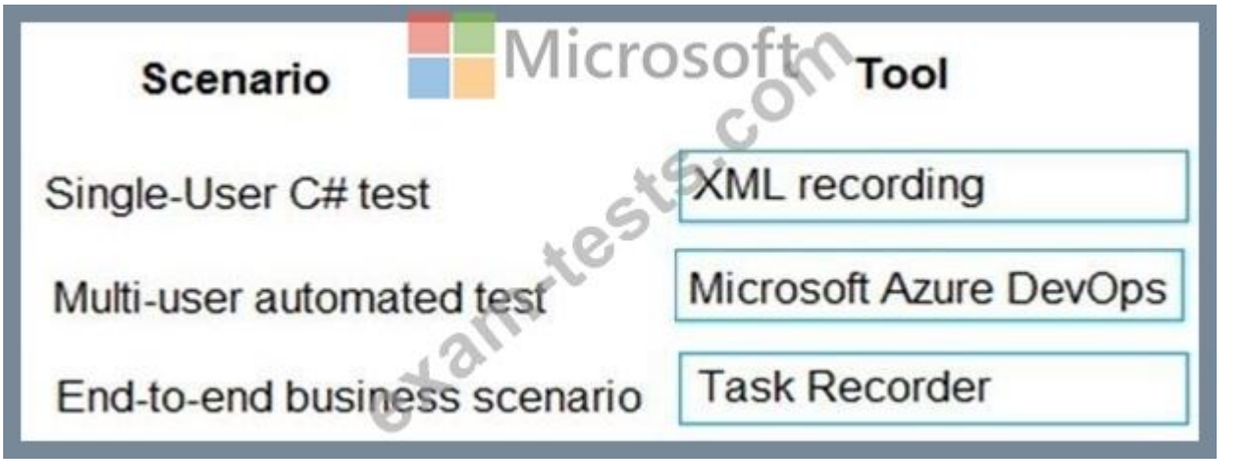

NEW QUESTION: 118
A company is planning a Dynamics 365 deployment.
The company needs to determine whether to implement an on-premises or a cloud deployment based on system performance.
You need to work with a developer to determine the proper tool from the Performance SDK to complete performance testing.
Which tool should you use? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/perfsdk-tutorial-lbd

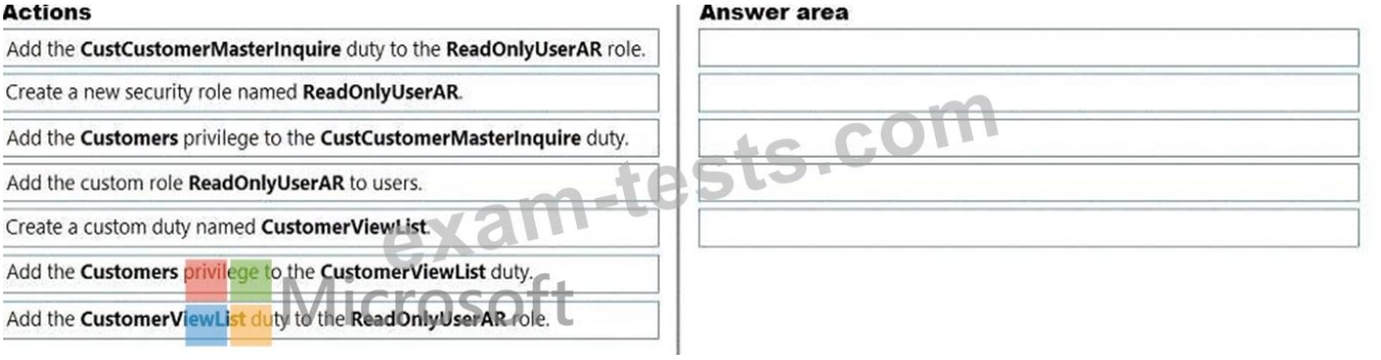

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/single-user-test-perf-sdk

NEW QUESTION: 119

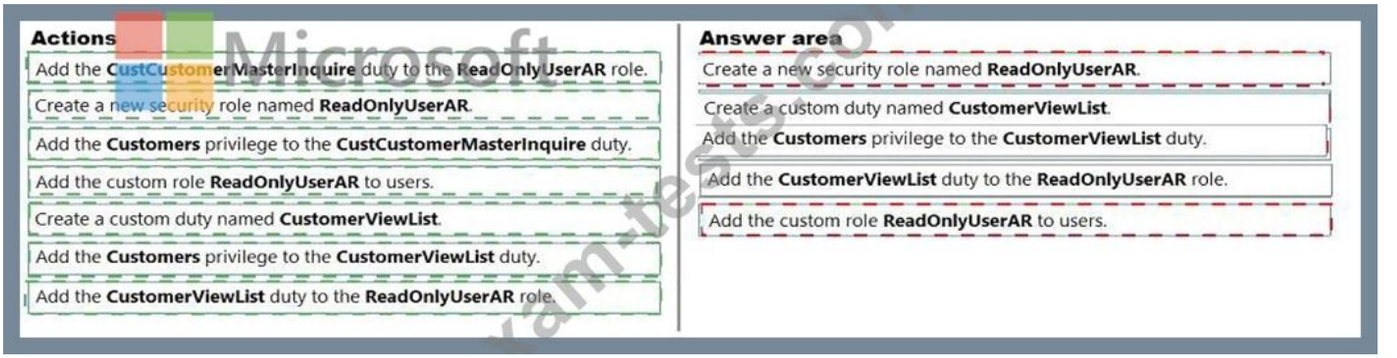

A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. It must be accurately reported during a security audit.

You need to recommend how to implement the privileges.

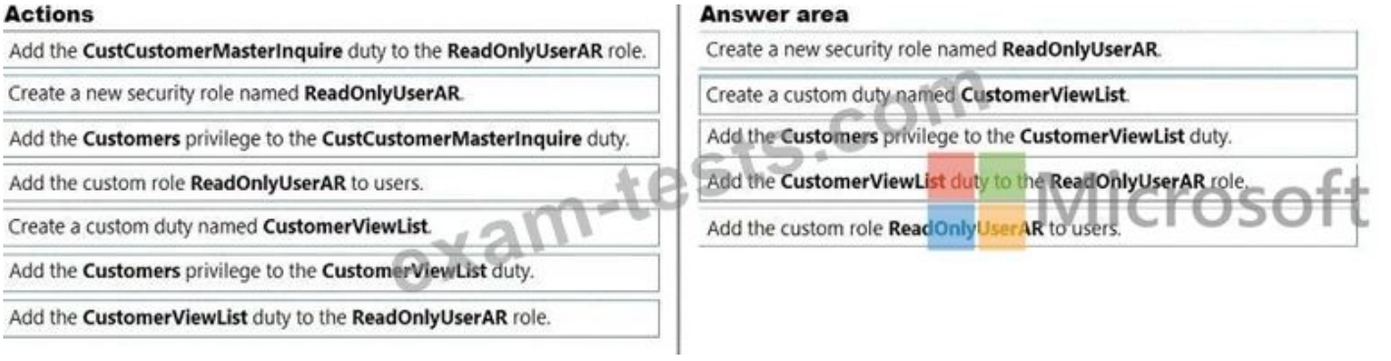

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation

Reference:
https://www.powerobjects.com/blog/2018/01/23/dynamics-365-for-finance-and-operations-security/

NEW QUESTION: 120

A company plans to use Dynamics 365 finance and operations apps.

Code builds for new development must follow Microsoft's recommendations by using supported tools.

Virtual machine (VM) environments are required for the following usage:

Develop code.

Centrally merge all code in a structured way.

You need to implement a code management solution.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

exam-tests.com

Explanation

Box 1: Lifecycle Services (LCS)

Deploying cloud development environments

To deploy a cloud development environment in your LCS project:

Create a connection between an LCS project and your Azure subscription. You will need your Azure subscription ID and authorize the use of the subscription.

Select + under Environments to deploy.

Select an application and platform version.

Select an environment topology. For more information, see Sign up for preview subscriptions.

If you chose a cloud-hosted environment, select which Azure connector you want to use. Then select Deploy.

Box 2: Azure DevOps

Azure DevOps provides developer services for allowing teams to plan work, collaborate on code development, and build and deploy applications. Azure DevOps supports a collaborative culture and set of processes that bring together developers, project managers, and contributors to develop software.

Box 3: Git

Git is a DevOps tool used for source code management. It is a free and open-source version control system used to handle small to very large projects efficiently. Git is used to tracking changes in the source code, enabling multiple developers to work together on non-linear development.

Reference: https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/dev-tools/access-instances

https://docs.microsoft.com/en-us/azure/devops/user-guide/what-is-azure-devops

https://www.simplilearn.com/tutorials/git-tutorial/what-is-git

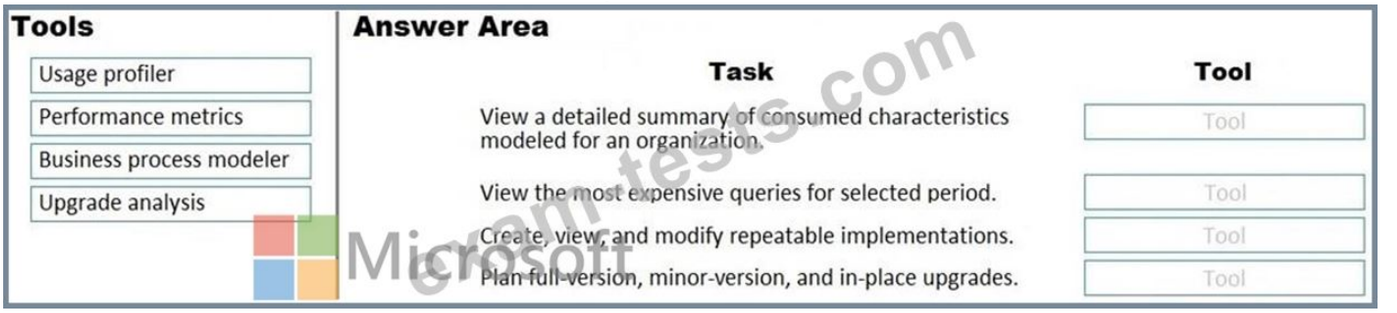

NEW QUESTION: 121

A research institute is implementing Dynamics 365 Finance and plans to use Lifecycle Services (LCS) to standardize the implementation process.

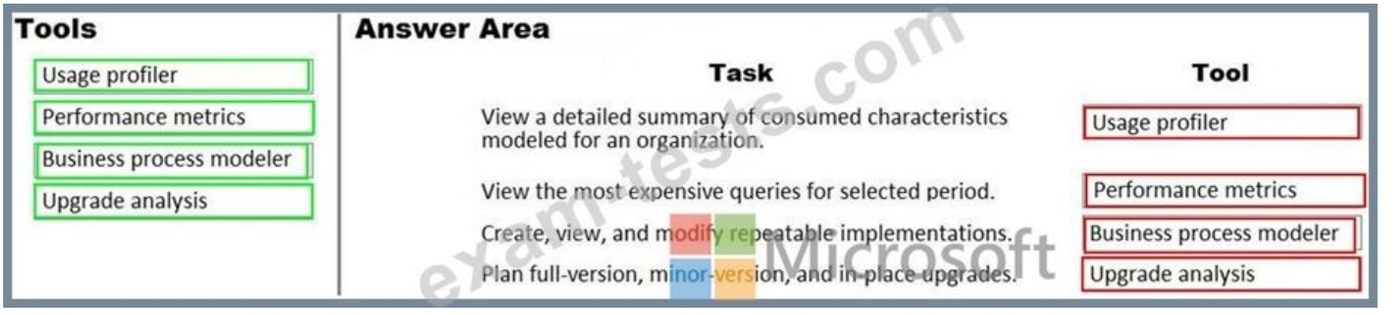

You need to define a strategy for implementing LCS tools to meet the requirements.

What should you recommend? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/ax-2012/usage-profiler- lcs

NEW QUESTION: 122

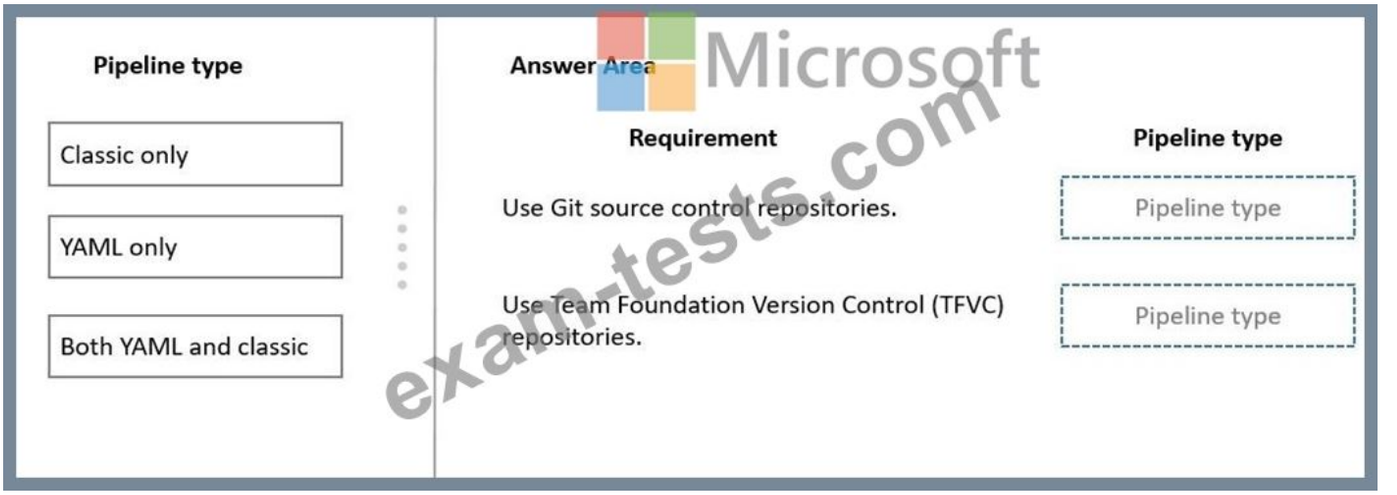

A company is implementing Dynamics 365 Finance.

The company wants to use Azure DevOps pipelines to automate builds.

You need to recommend the pipeline types for the company should use.

Which pipeline types should you recommend? To answer, drag the appropriate pipelines to the correct requirements. Each pipeline may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 123

A company uses Dynamics 365 Finance. The company experiences performance issues with several forms in production.

You need to use Live View SQL performance metrics to identity potential issues that occur in real time.

You need to recommend a solution to troubleshoot performance issues.

Which two performance metrics should the company use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Blocking statements

B. Batch requests

C. Database File 10

D. Executing statements

E. Executing indexes

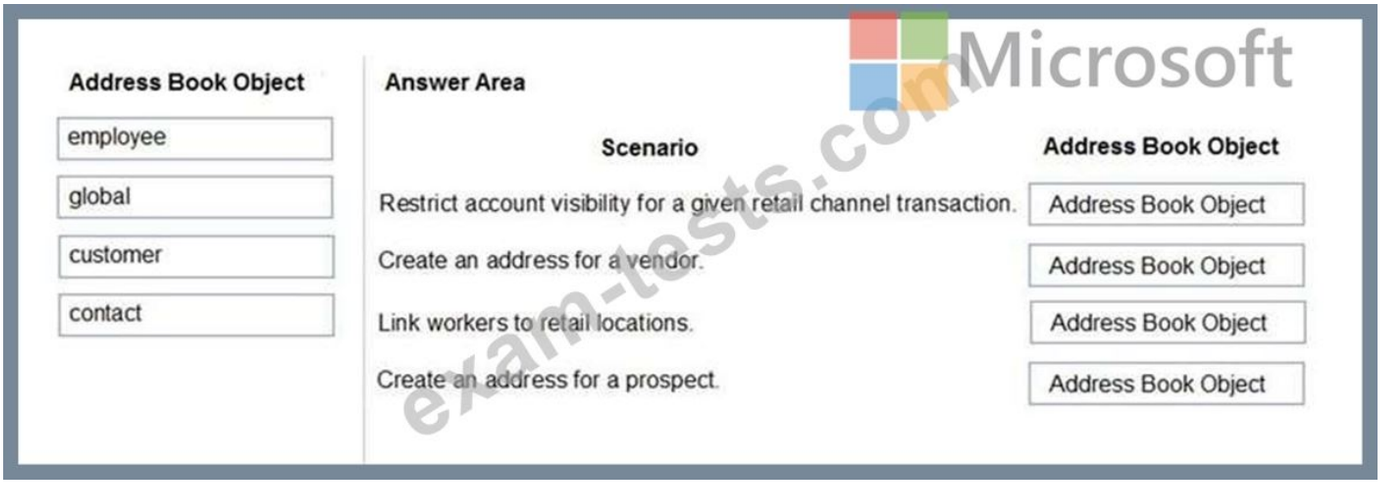

Answer: A,D (LEAVE A REPLY)

AD: Live View - Shows executing statements and blocking statements.

A: Sample flow

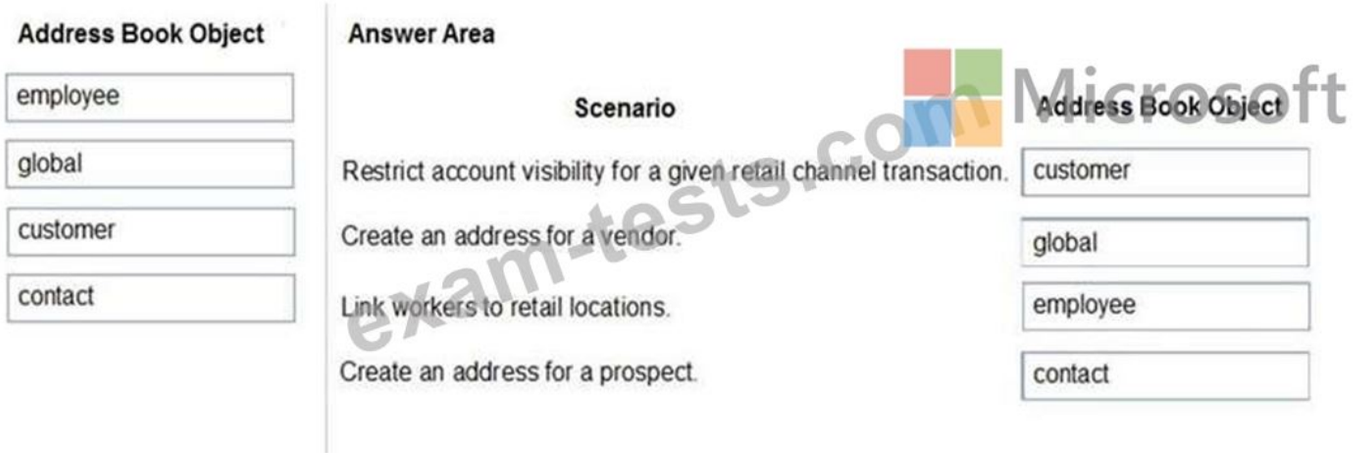

Scenario: Users report slow performance when using the system. One issue could be a blocking statement.
Blocking by itself is typical in a healthy system and is only a problem when it becomes excessive or starts degrading business activities.
* Go to the Live View tab and check if there are any blocking statements. If there is a blocking statement, copy the blocking query ID.
* Open the Queries tab and select the Current Blocking Tree query. This will return the root blocker that is blocking the SQL operation.
* Etc.

Answer:

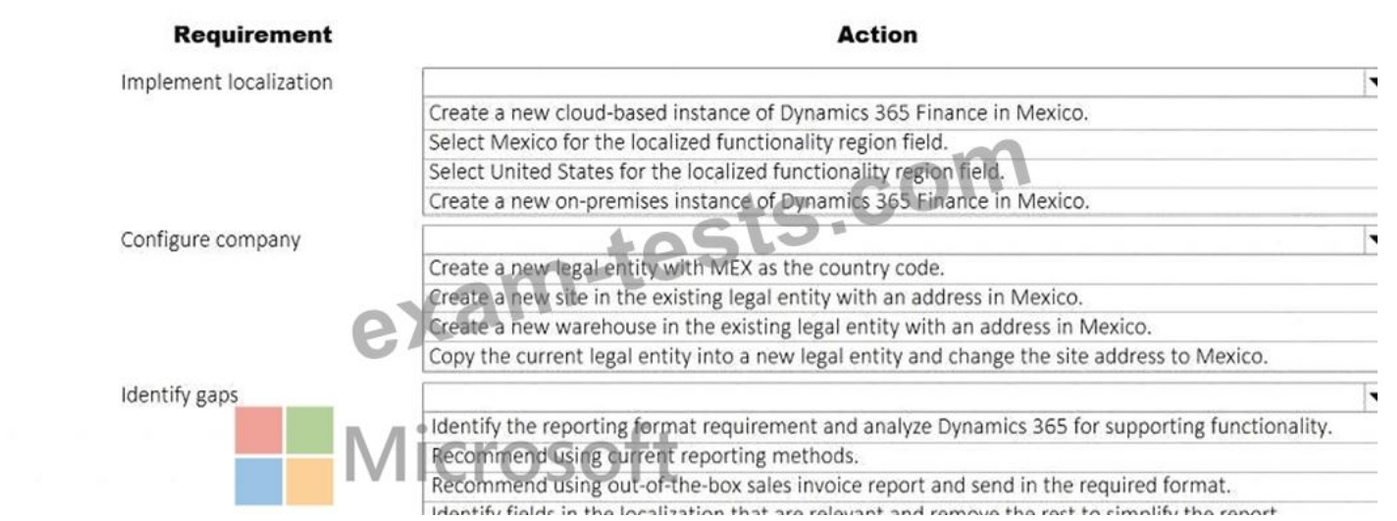

NEW QUESTION: 125

A United States-based company has a cloud-based Dynamics 365 Finance implementation. The company plans to open a new location in Mexico.

Electronic invoicing is mandated in Mexico.

You need to recommend a solution that meets Mexican localization reporting requirements. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:
https://docs.microsoft.com/en-us/dynamics365/finance/localizations/latam-mex-cfdi-electronic-invoices

NEW QUESTION: 126

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company implements Dynamics 365 Finance.
Forms and reports take longer than usual to open and run in the production environment.
You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).
Solution: Disable and enable page locks and lock escalation.
Does the solution meet the goal?

A. Yes

B. No

Answer: (SHOW ANSWER)

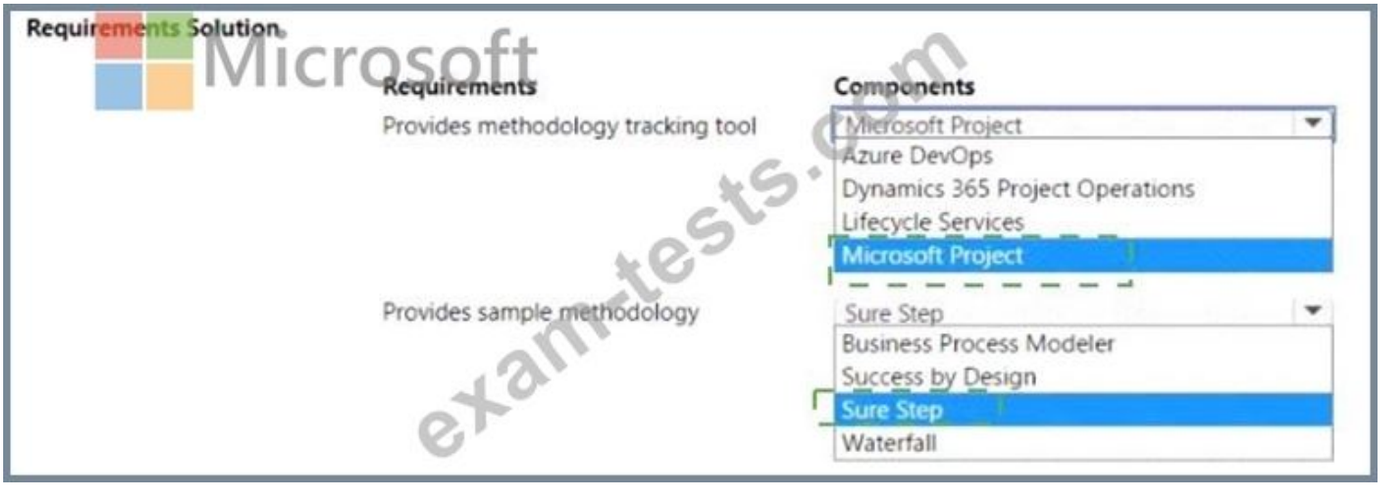

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/performancetroubleshoo

NEW QUESTION: 127

You need to implement a solution for entering the methodology information for the project.
Which components should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 128

A customer is implementing Dynamics 365 Finance and Dynamics 365 Supply Chain Management.
The customer wants to use this implementation to standardize business processes.

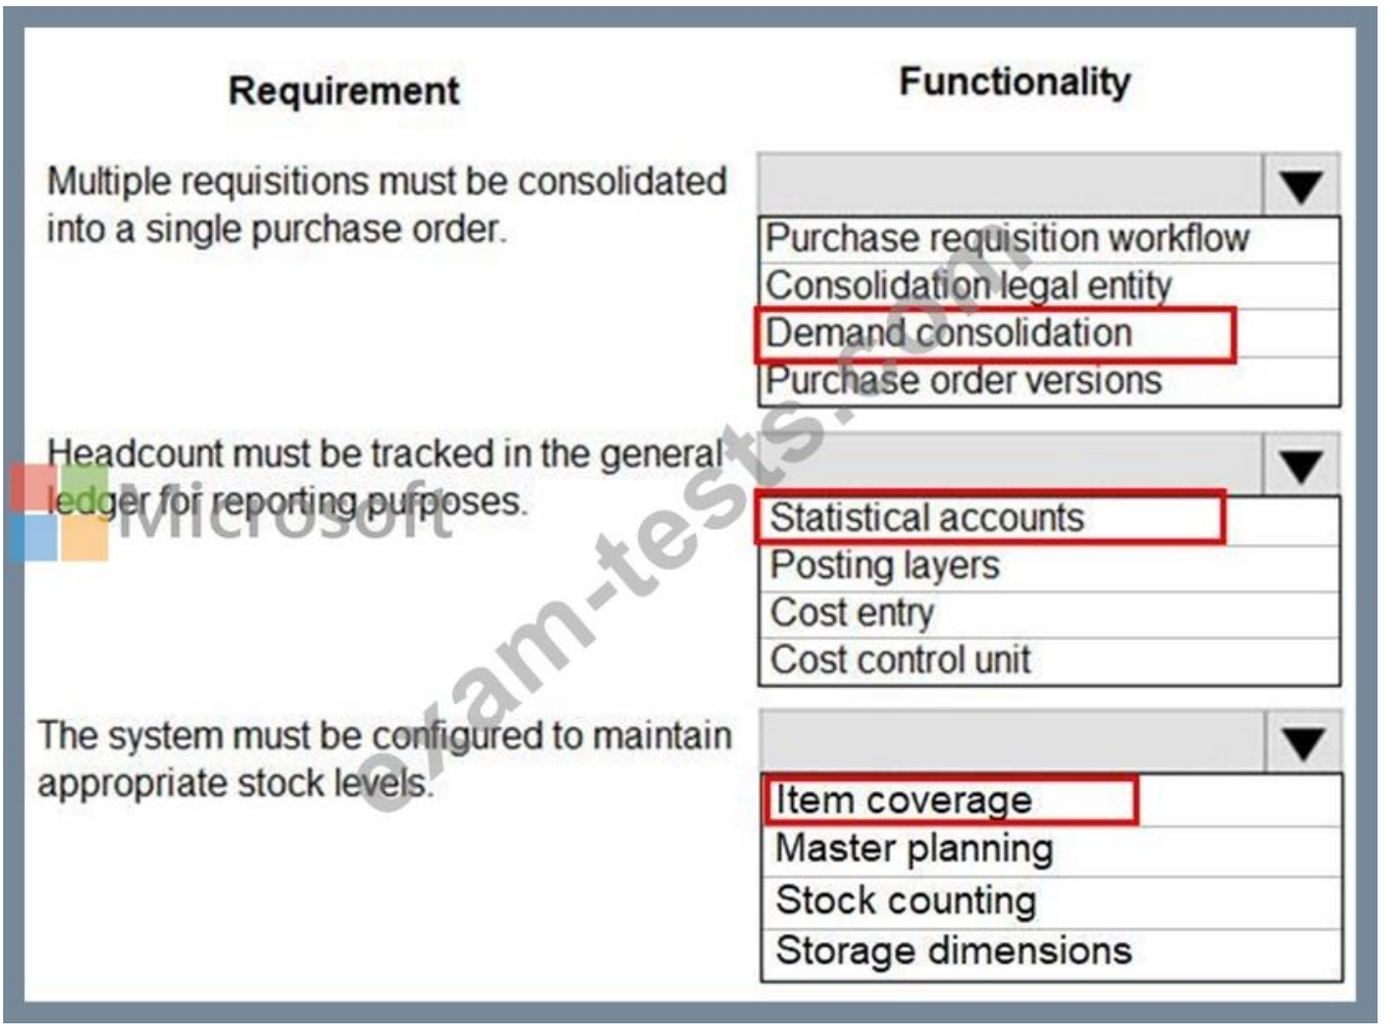

You need to perform a gap analysis and recommend how to address the gaps.
Which functionality should you recommend for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Functionality
Multiple requisitions must be consolidated into a single purchase order.	Purchase requisition workflow Consolidation legal entity Demand consolidation Purchase order versions
Headcount must be tracked in the general ledger for reporting purposes.	Statistical accounts Posting layers Cost entry Cost control unit
The system must be configured to maintain appropriate stock levels.	Item coverage Master planning Stock counting Storage dimensions

exam-tests.com

Microsoft

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/supply-chain/master-planning/safety-stock-replenishment

NEW QUESTION: 129

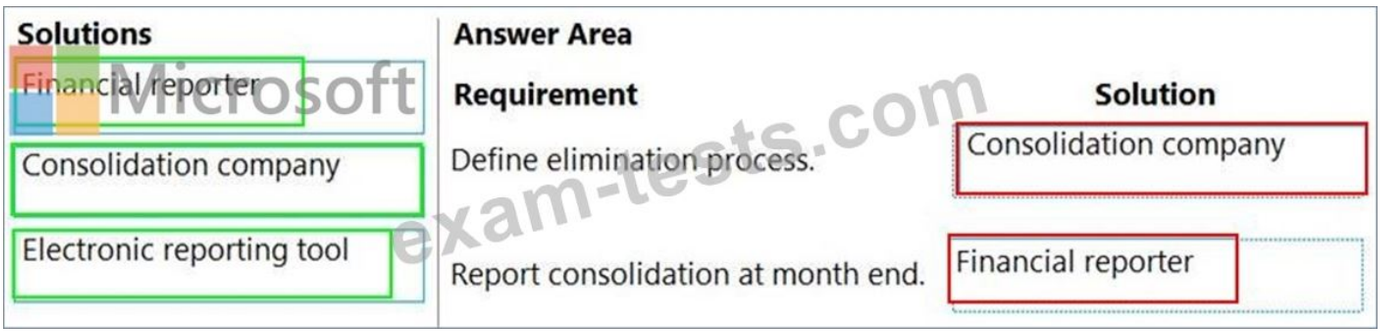

You need to recommend a solution to meet Margie's consolidation requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 130

A midsize company is enrolled in the self-guided FastTrack program. The company is preparing a Dynamics

365 Supply Chain Management implementation to go Irve.

You need to complete the prerequisites for the Go-live checklist.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Perform user acceptance testing

Go-live Readiness Review prerequisites

The project team should validate solution readiness. The following prerequisites must be met before the Go-live Readiness Review with Microsoft can be initiated. The production environment can be deployed after the Go-live Readiness Review with Microsoft has been successfully completed.

* User acceptance testing (UAT) and performance testing have been completed or almost completed in a Tier-2 (or higher) environment.

* Etc.

Box 2: Enter a Go-live date
The go-live date in LCS correctly represents the go-live date that you're targeting. This date is the date when end users will start live operations, not cutover activities.
Reference: https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/imp-lifecycle/prepare-go-live

NEW QUESTION: 131
A company uses Dynamics 365 Finance and Supply Chain Management.
The company would like to add a third-party solution for scheduling appointments.
You need to recommend a solution to transfer critical schedule information.
Which two actions should you perform to make a recommendation? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Analyze the impact of the new system in each business unit.
B. Categorize business requirements for functional consultants to identify gaps in functionality.
C. Describe the new functionality that is missing in the current system.
D. Identify business processes that must be added, removed, or modified by functional consultants.
Answer: B,D (LEAVE A REPLY)
Section: Identify solution requirements

NEW QUESTION: 132
A company uses Dynamics 365 Supply Chain Management.
You are performing regression testing using the Regression suite automation tool (RSAT). You observe that invoice totals for some sales orders are lower than expected.
You need to ensure that the invoice totals are correct.
What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 133

A company uses Dynamics 365 Supply Chain Management. The company has offices in several geographic regions.

Users must only be allowed to access the system from IP addresses that are associated with the regions where the company has offices.

You need to set up security for the company.

What should you set up?

A. Enable Session management

B. Azure Active Directory Conditional Access

C. Extensible Data Security policies (XDS)

D. Security policy

E. Assign user roles

Answer: B (LEAVE A REPLY)

Explanation

You can limit access to users with block access by location to reduce unauthorized access. By using Conditional Access policies, you can apply the right access controls when needed to help keep your organization secure and stay out of your user's way when not needed. Conditional Access analyses signals such as user, device, and location to automate decisions and enforce organizational access policies for resources.

For example, when location restrictions are set in a user's profile and the user tries to sign in from a blocked location, access to customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, Dynamics 365 Project Service Automation), and Finance and Operations apps are denied.

Reference: https://docs.microsoft.com/en-us/power-platform/admin/restrict-access-online-trusted-ip-rules

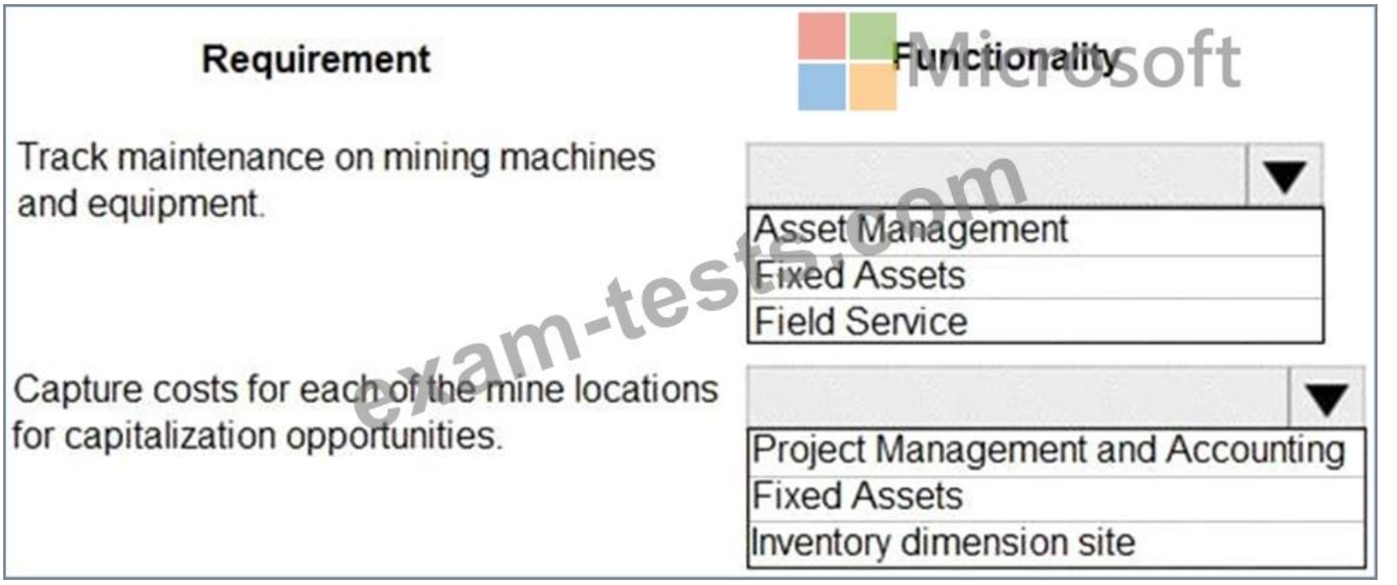

NEW QUESTION: 134

A mining company is upgrading their system to Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

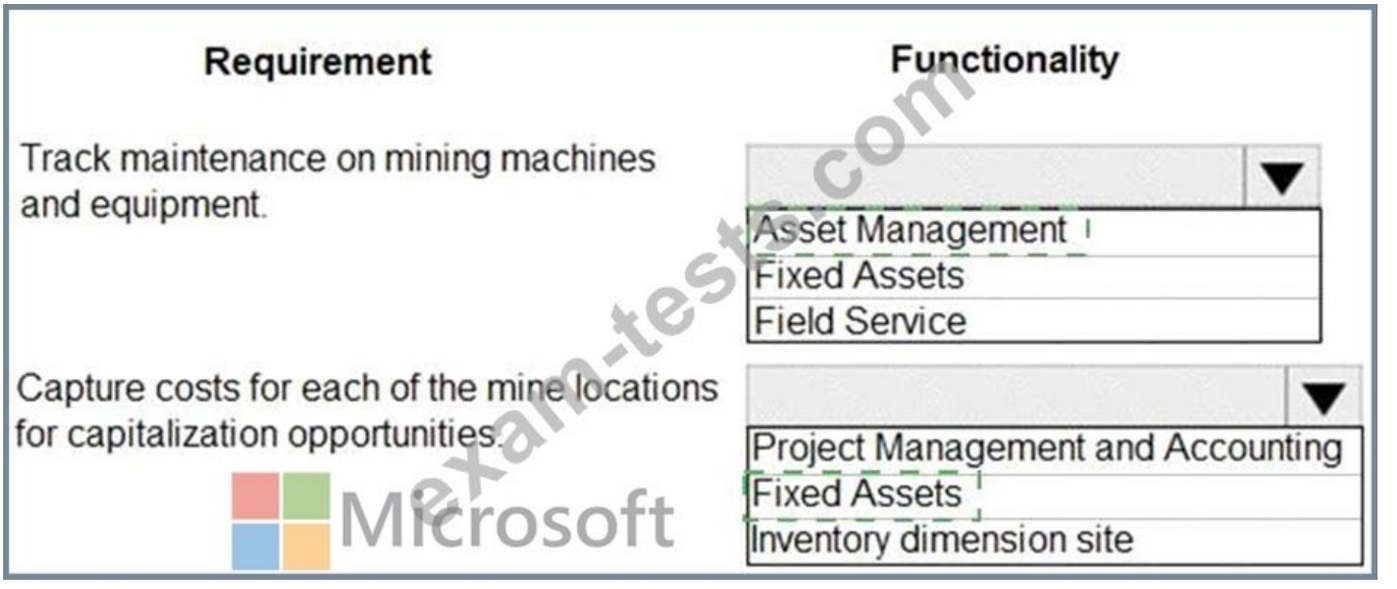

You need to determine which functionality of the Dynamics 365 suite meets each requirement.

Which functionality should you implement for each requirement? To answer, select the appropriate options from the answer area.

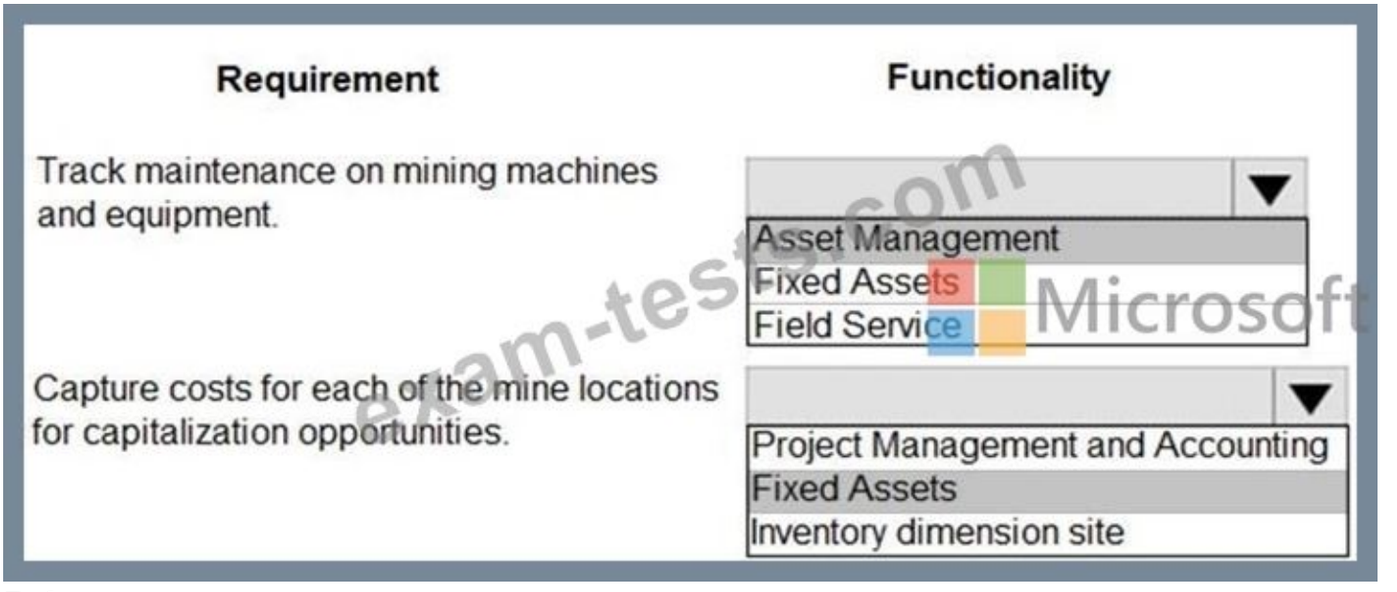

NOTE: Each correct selection is worth one point.

Answer:

Explanation

Reference:

https://docs.microsoft.com/en-us/dynamics365/supply-chain/asset-management/

NEW QUESTION: 135

The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment.

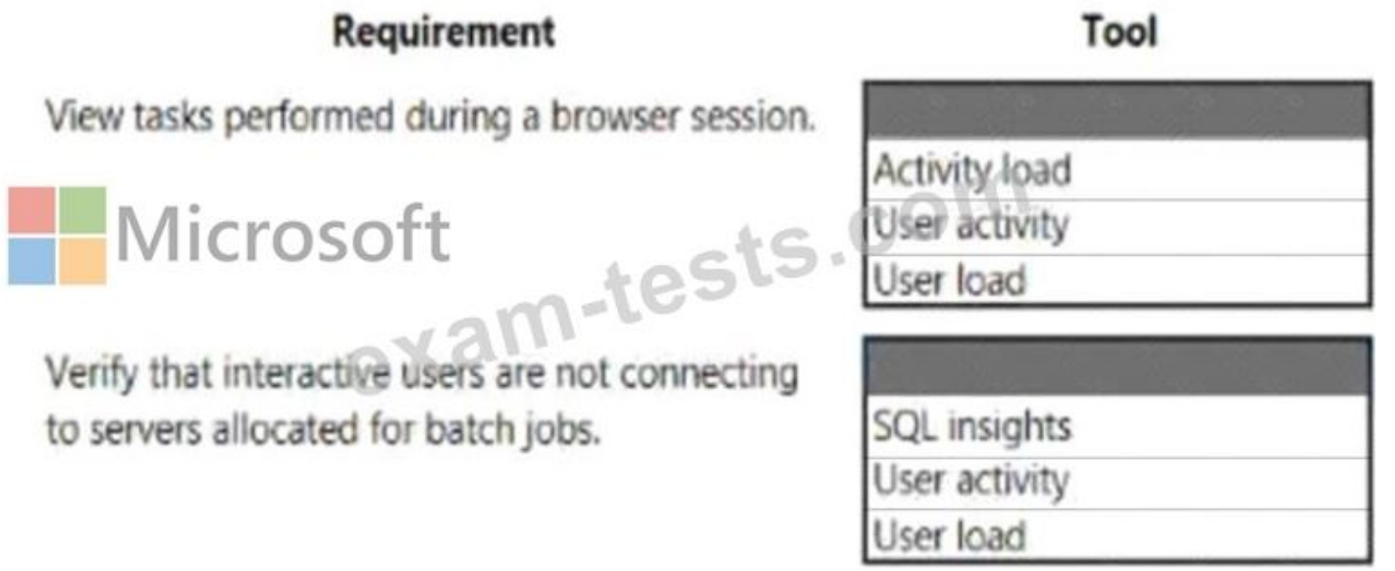

The environment administrator must be able to do the following:

* View tasks performed during a browser session.
* Verify that interactive users are not connecting to servers allocated for batch jobs.

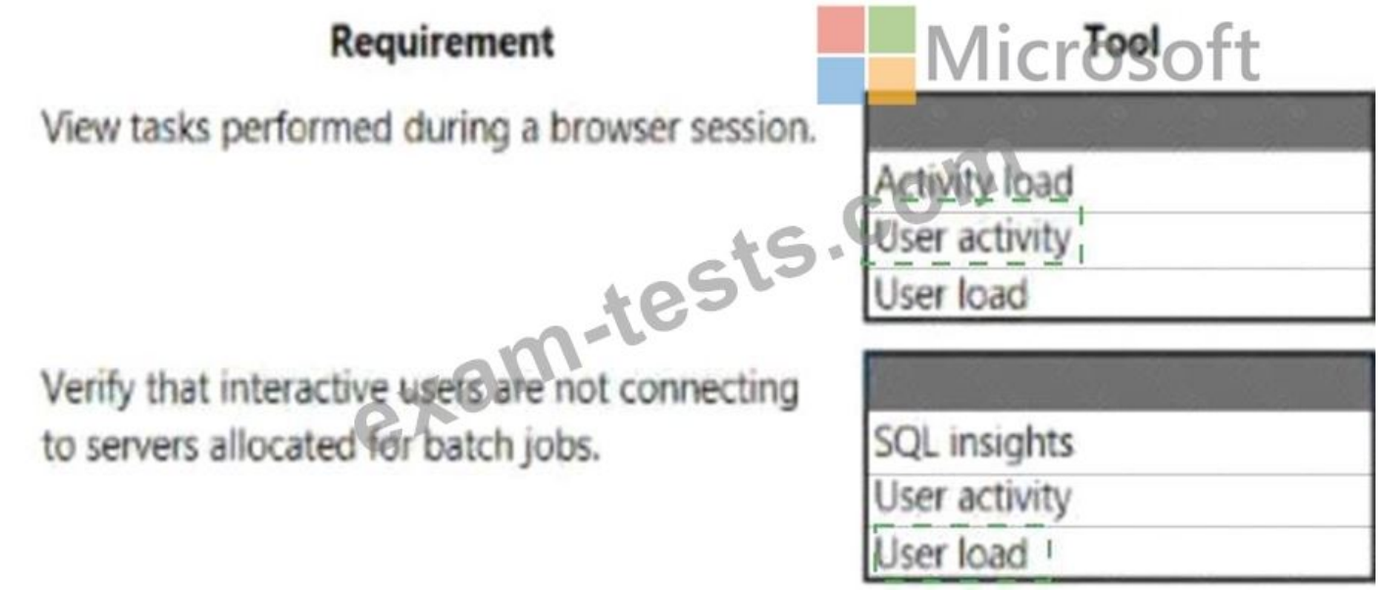

You need to determine which environment monitoring toots meet the requirements.

Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: User activity

The User activity grid shows the various activities that users performed, based on their session timestamp.

Box 2: User Load
The User load section shows all the system users. Each chart shows the time that the user spent on a specific machine.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/monitoring-diagnostics

NEW QUESTION: 136
You are an architect implementing Dynamics 365.
The Dynamics 365 administrator who manages deployments of components leaves the company.
Microsoft Azure DevOps pipelines must be configured to automate deployments.
You need to recommend which Microsoft Azure DevOps pipeline tasks to use to meet the requirements. What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Task
Add a package to a Lifecycle Services (LCS) project asset library.	Dynamics Lifecycle Services (LCS) Asset Upload Dynamics Lifecycle Services (LCS) Asset Deployment Create Deployable Package Add Licenses to Deployable Package Update Model Version
Add a package from a Lifecycle Services (LCS) project asset library to a non-production environment.	Dynamics Lifecycle Services (LCS) Asset Upload Dynamics Lifecycle Services (LCS) Asset Deployment Create Deployable Package Add Licenses to Deployable Package Update Model Version
Compile binaries into a package for build and release pipelines.	Dynamics Lifecycle Services (LCS) Asset Upload Dynamics Lifecycle Services (LCS) Asset Deployment Create Deployable Package Add Licenses to Deployable Package Update Model Version

NEW QUESTION: 137
A local community college uses Microsoft SharePoint Online to track and manage laptop computers that are issued to faculty and other employees.
Information about all laptops must be visible in Asset Management for Dynamics 365 Supply Chain Management. Users must be able to issue new laptop computers to faculty and other employees directly from the system.
You need to recommend a solution for the college.
Which two actions should you recommend? Each correct answer provides a complete solution.
NOTE: Each correct selection is worth one point.
A. Implement data management.
B. Implement human resources.
C. Embed PowerApps into the Employees form.
D. Implement fixed assets.
Answer: B,C (LEAVE A REPLY)
Reference:
https://dynamics365.wordpress.com/tag/embedded-powerapps/

NEW QUESTION: 138
A company implements Dynamics 365 finance and operations apps for its retail operations.
Unauthorized vendor checks have been created in the past resulting in check fraud.
The company must print a vendor aging report from a local printer in its headquarters location every week on Sunday night.
Every week on Monday, the comptroller must review the report and approve checks to issue to vendors.
You need to recommend a solution to meet the requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent check fraud.	Electronic reporting Three-way matching Dynamics 365 Fraud Protection Positive pay
Print the vendor aging report.	Document Routing Agent Electronic reporting Document reporting services Print and Document Services

Answer:

Requirement	Solution
Prevent check fraud.	Electronic reporting Three-way matching Dynamics 365 Fraud Protection Positive pay
Print the vendor aging report.	Document Routing Agent Electronic reporting Document reporting services Print and Document Services

Explanation:

Box 1: Positive Pay

Positive Pay within Dynamics AX is one of the easiest systems to put into place to help prevent check fraud and protect your business. Positive Pay generates an electronic file that you can submit to your bank with a list of your approved checks, reducing the chance of processing any fraudulent checks.

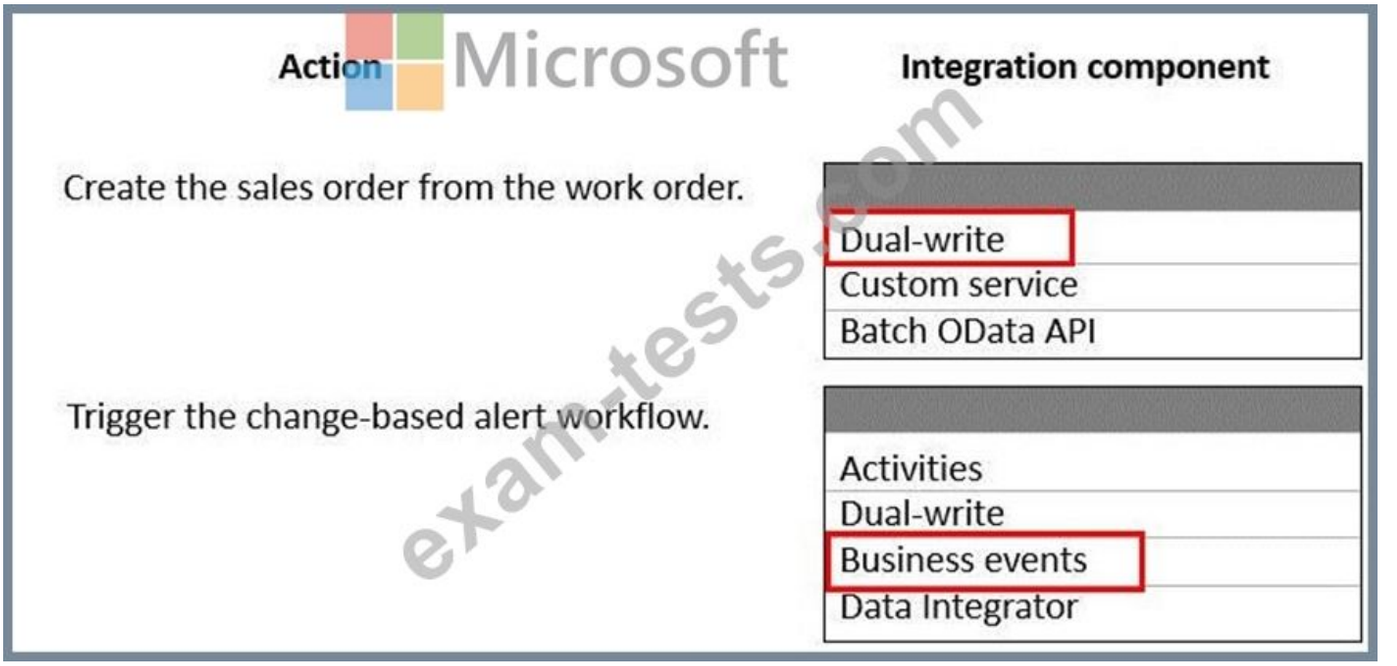

Box 2: Electronic reporting
Electronic reporting (ER) is a configurable tool that helps you create and maintain regulatory electronic reporting and payments.
You can use ER to configure formats for both incoming and outgoing electronic documents in accordance with the legal requirements of various countries and regions. ER lets you manage these formats during their lifecycle. For example, you can adopt new regulatory requirements and generate business documents in the required format to electronically exchange information with government bodies, banks, and other parties.
The ER engine is targeted at business users instead of developers. Because you configure formats instead of code, the processes for creating and adjusting formats for electronic documents are faster and easier.
Reference: https://stoneridgesoftware.com/how-to-generate-positive-pay-text-files-in-dynamics-ax/
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/general-electronic-reporting

NEW QUESTION: 139
A company deploys Dynamics 365 finance and operations apps. The implementation includes Dynamics 365 and Microsoft Power Platform solutions. The company creates and manages service calls for technicians by using Dynamics 365 Field Service.
When a work order is created, Dynamics 365 Field Service must create a sales order for that work order in real time.
A user creates a change-based alert that will trigger when a newly created sales order from a workflow is greater than $5,000. The alert must trigger a workflow the user can modify to automate other steps.
You need to recommend components for the company to use.
NOTE: Each correct selection is worth one point.

Action	Integration component
Create the sales order from the work order.	Dual-write Custom service Batch OData API
Trigger the change-based alert workflow.	Activities Dual-write Business events Data Integrator

NEW QUESTION: 146
You need to recommend a solution to meet Margie's consolidation requirements.
What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Box 1: Consolidation company
Eliminations can be reported in multiple ways:
* A separate company can be created and used to manually determine and post elimination transactions. This company can be used in the consolidation process or in financial reporting.

* Elimination rules can be set up in the system.
* The accounts and financial dimensions that are used to determine intercompany activity can be filtered on a row definition or column definition in Financial reporting, and full drill-down capabilities can be used.
Box 2: Financial reporting
There are multiple options for consolidating data:
* Financial reporting - This option enables consolidation of transactions and balances, and can be generated at any time. Multiple levels of hierarchies can be created, and multiple reporting currencies can be viewed.
* Consolidate online - This option consolidates daily balances by the selected accounts and dimensions, and stores them in a consolidation company.
* Consolidate with import - This option imports balances into a consolidation company.
Export company balances
Note: The CEO is considering the acquisition of additional companies in the same countries as the current companies. The consolidation structure may change within the first 90 days of go-live. Margie's does not want to finalize the consolidation structure for a hard-close at month's end until this has been finalized.

NEW QUESTION: 152

A company implements Dynamics 365 finance and operations apps for its retail operations.
Unauthorized vendor checks have been created in the past resulting in check fraud.
The company must print a vendor aging report from a local printer in its headquarters location every week on Sunday night.
Every week on Monday, the comptroller must review the report and approve checks to issue to vendors.
You need to recommend a solution to meet the requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

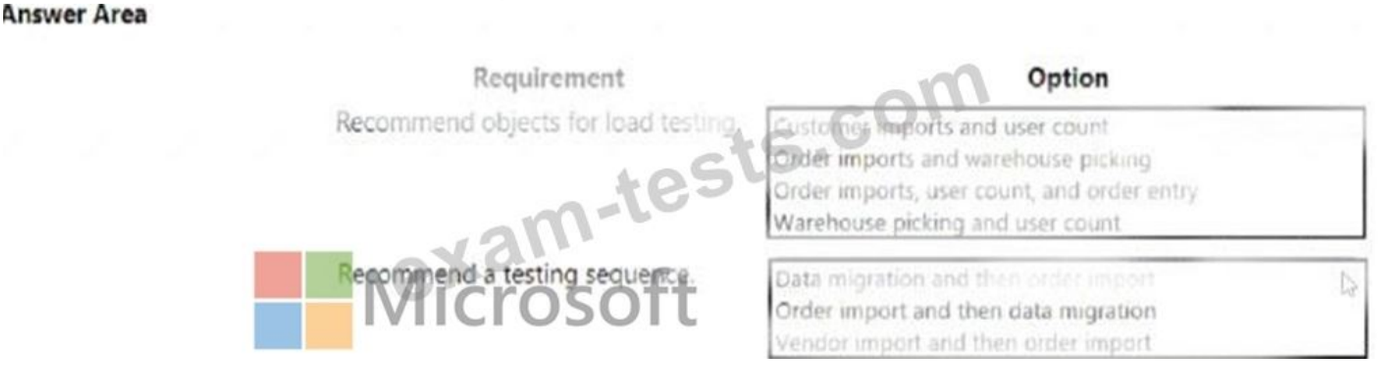

Answer:

Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/general-electronic-reporting

NEW QUESTION: 153
You need to recommend a performance and load testing strategy for the requirement. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation

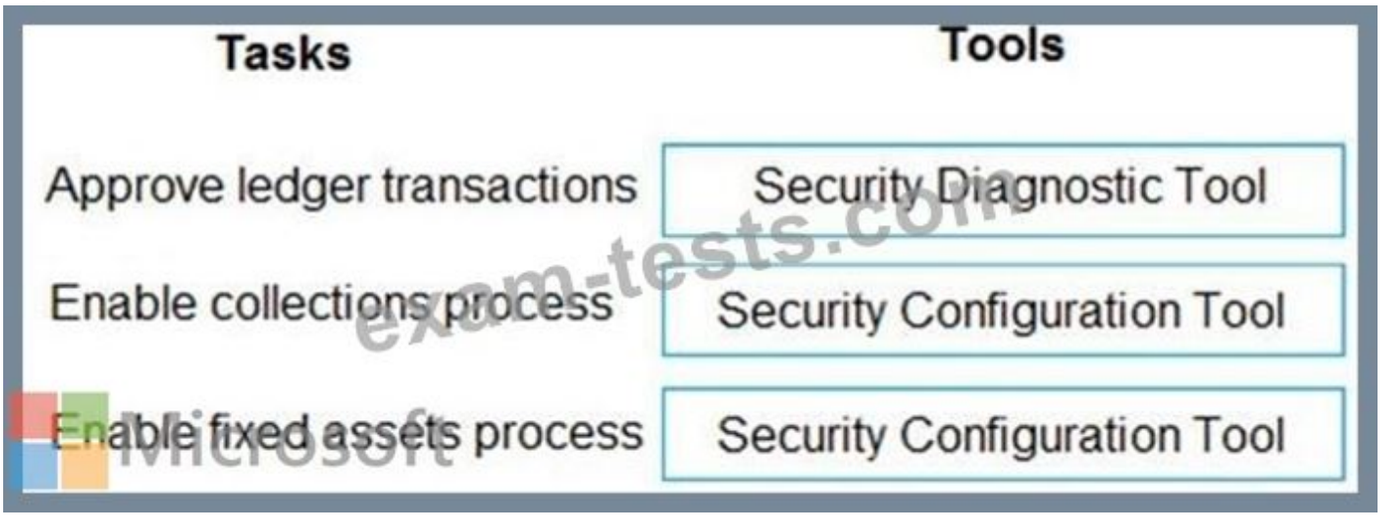

NEW QUESTION: 154
An organization is implementing Dynamics 365 Finance.
You need to assign security roles.
Which tools should you use? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation

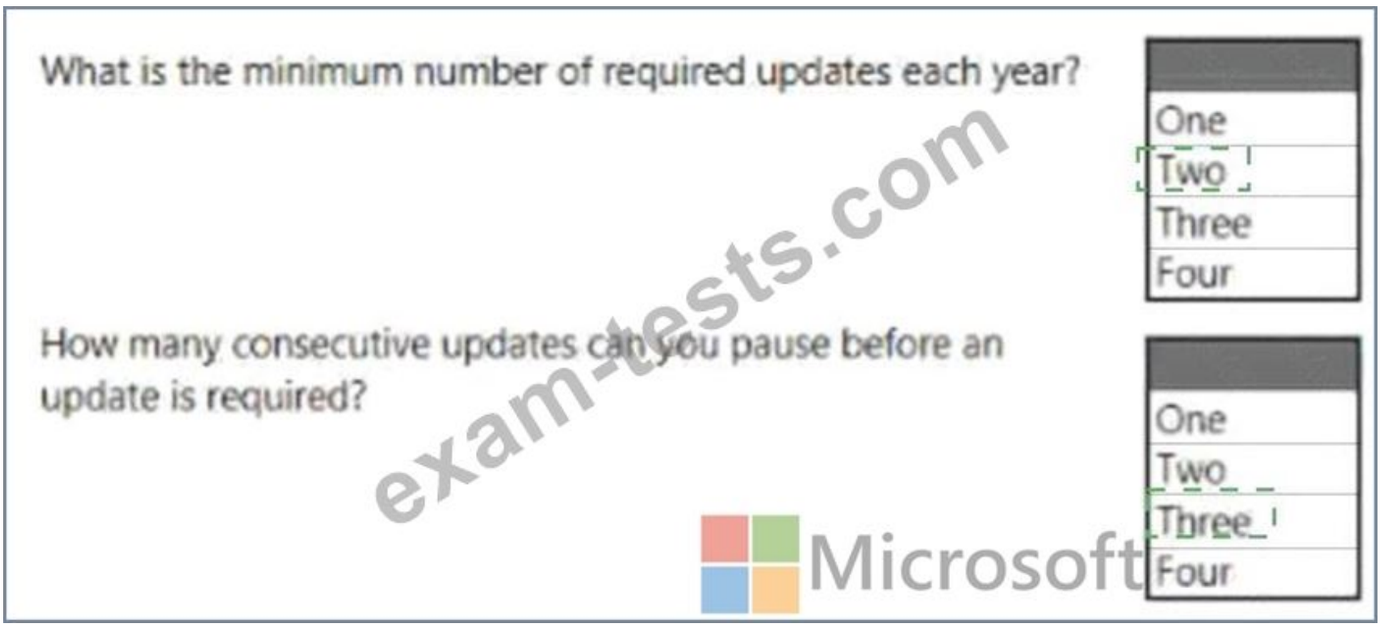

Reference:

NEW QUESTION: 155
A company uses Dynamics 365 Finance.
The company wants to understand how version updates are handled.
You need to explain the version update and pause policy.
What should you conclude? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Two

Customers will be able to take up to 7 service updates per year and are required to take a minimum of 2 service updates per year.

Box 2: Three

Customers can choose to pause up to 3 consecutive updates at a time. Pausing a service update can apply to the designated user acceptance testing (UAT) sandbox, production, or both environments. After the pause window has ended and if the customer has not self-updated to a supported service update, Microsoft will auto-apply the latest update based on the configuration selection made available in Lifecycle Services (LCS).

NEW QUESTION: 156

You need to recommend solutions to meet the CIO's requirements (or the customers and the roadmap. What should you recommend? To answer, select the appropriate options in the answer are a. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 157

You need to identify the security configuration required for new users and for the manufacturing managers.

Which security configurations should you use? To answer, move the appropriate security configurations to the correct requirements. You may use each security configuration once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 158

You need to report the environment structure and tenants.

Where must the tenants be reported?

A. Go-live checklist

B. Azure DevOps

C. Project onboarding

D. Solution blueprint review

Answer: A (LEAVE A REPLY)

Explanation

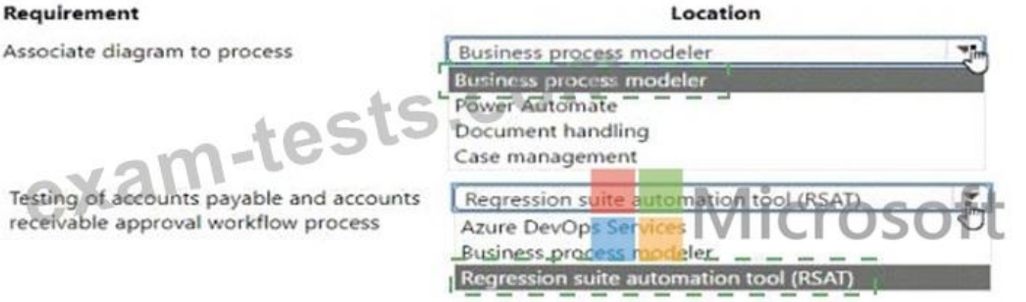

Note: Once user acceptance testing (UAT) has been completed, the project manager must report the number of tenants for production to Microsoft.

Go-live Readiness Review prerequisites
The project team should validate solution readiness. The following prerequisites must be met before the Go-live Readiness Review with Microsoft can be initiated. The production environment can be deployed after the Go-live Readiness Review with Microsoft has been successfully completed.
* User acceptance testing (UAT) and performance testing have been completed or almost completed in a Tier-2 (or higher) environment.
* The environment version that is planned for the go-live complies with the Software lifecycle policy.
* The environment version that is planned for the go-live complies with the Software lifecycle policy.
* All licenses that are required for go-live have been purchased in the correct tenant.
* Etc.
Reference: https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/imp-lifecycle/prepare-go-live

NEW QUESTION: 159
You must recommend a solution to meet the requirements for User2.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

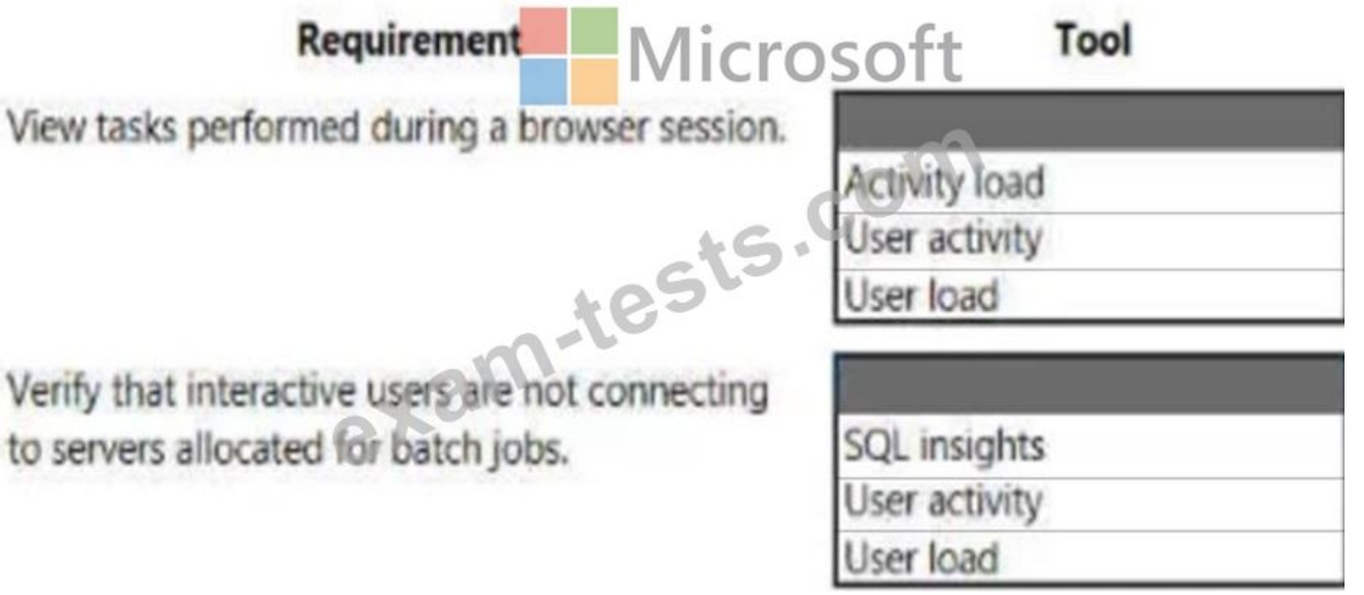

Explanation:

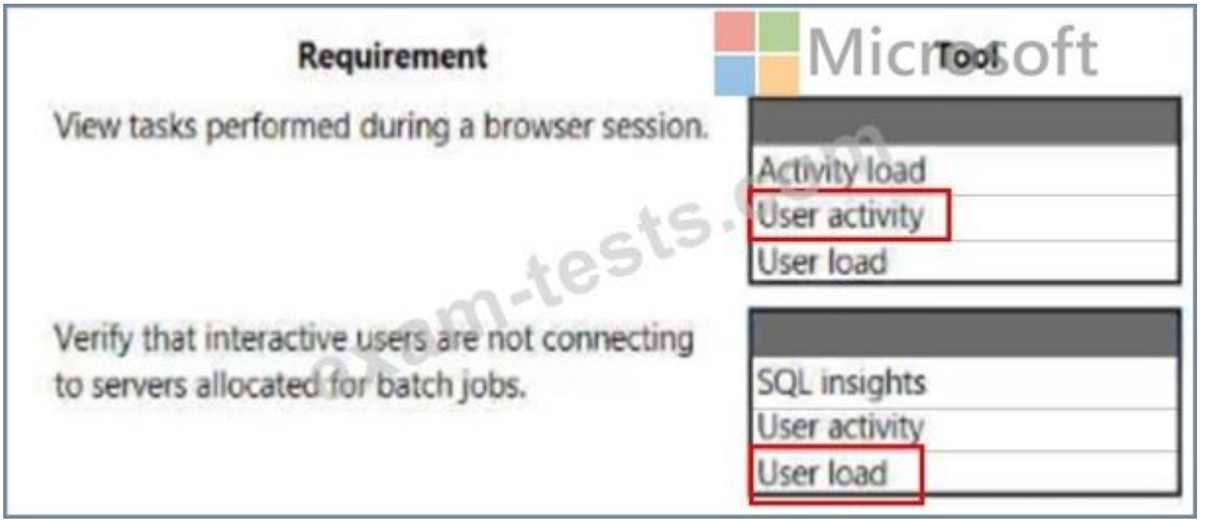

Box 1: Business process modeler

Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry-standard processes that are described by the American Productivity & Quality Center (APQC). You can perform fit-gap analysis between your business requirements and the default processes in Finance and Operations apps. Additionally, you can add new business processes that aren't already defined.
BPM is compatible with the following products:
Microsoft Word - You can generate documentation for business processes.
Microsoft Visio - You can export business process maps to Visio files.
Note: Vendors and purchasing
As customers purchase packages, Margie's Travel can claim rebates with the providing vendor for every package sold. The rebates are claimed quarterly, and internal workflows have been established for approval prior to vendor submission. The workflows for package offerings eligible for rebates can be complex. User2 has created Visio diagrams for the associated approval processes.
Box 2: Regression suite automation tool (RSAT
The Regression suite automation tool (RSAT) significantly reduces the time and cost of user acceptance testing (UAT) of Finance and Operations apps. UAT is typically required before you take a Microsoft application update, or before you apply custom code and configurations to your production environment.
RSAT lets functional power users record business tasks by using Task recorder and then convert the recordings into a suite of automated tests, without having to write source code.
Note: The accounts receivable and accounts payable departments are unclear about the workflows associated with the rebate process. User2 must ensure that representatives from each department validate that they have tested their respective steps in the overall process. Testing feedback must be communicated to User2.

NEW QUESTION: 160
The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment.
The environment administrator must be able to do the following:
* View tasks performed during a browser session.
* Verify that interactive users are not connecting to servers allocated for batch jobs.
You need to determine which environment monitoring toots meet the requirements.
Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 161

A company uses Dynamics 365 Supply Chain Management.

You are performing regression testing using the Regression suite automation tool (RSAT). You observe that invoice totals for some sales orders are lower than expected.

You need to ensure that the invoice totals are correct.

What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 162

A company plans to use Dynamics 365 finance and operations apps.

Code builds for new development must follow Microsoft's recommendations by using supported tools.

Virtual machine (VM) environments are required for the following usage:

Develop code.

Centrally merge all code in a structured way.

You need to implement a code management solution.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION: 171
A graphics printing company using Dynamics 365 Supply Chain Management sells 100 percent made-to-order signs. These signs cannot be pre-produced.
The company wants to create an end-to-end process that includes production, sales order packing, and sales order picking.
You need to determine the order of the functions.
In which order should you recommend the actions be performed? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation

NEW QUESTION: 172

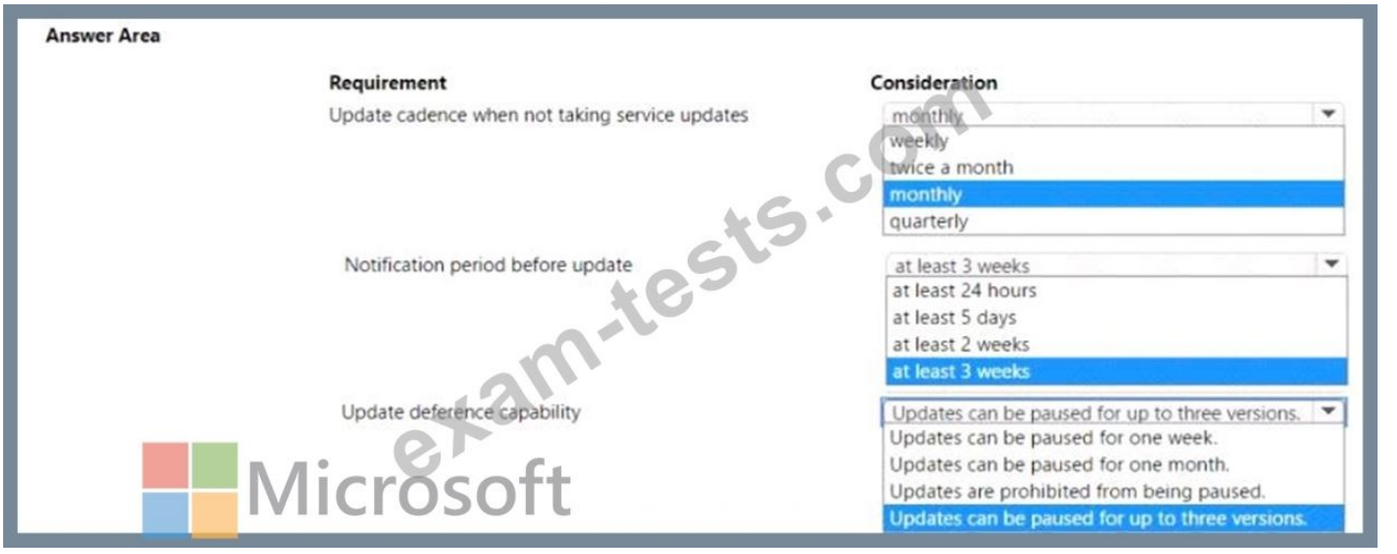

A company that manufactures car parts is implementing Dynamics 365 Finance on the public cloud.

The company must create a regression testing plan for its One Version strategy. The company determines that it will take only mandatory service updates and apply them when they are generally available. The company must also plan for regression testing the proactive quality updates (PQU).

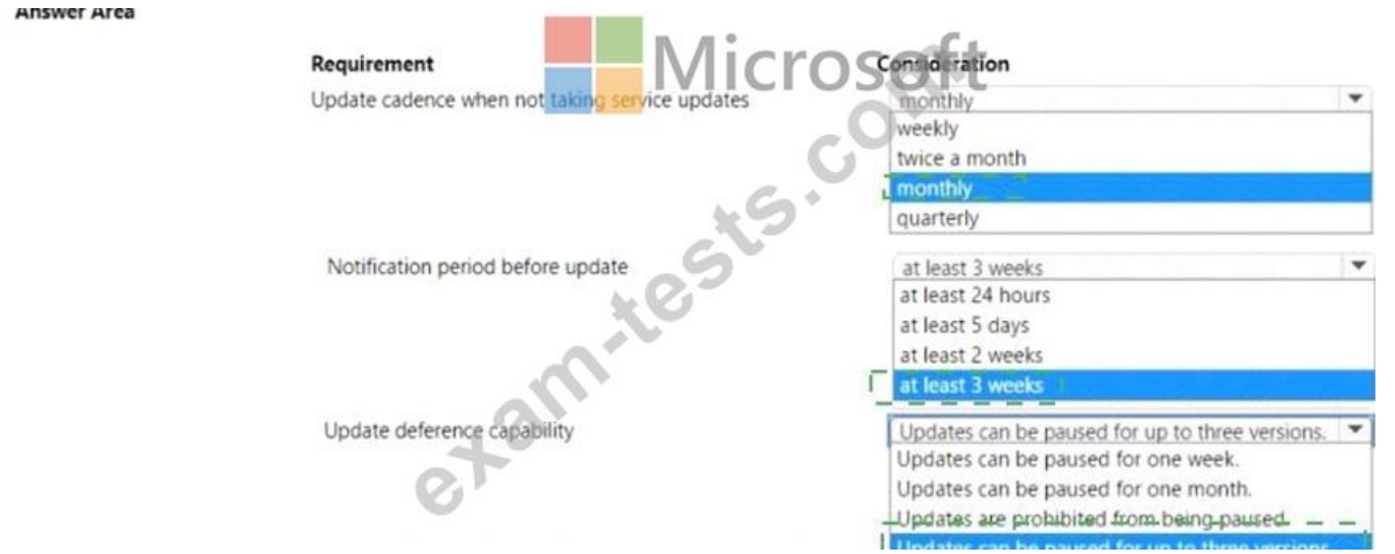

You need to provide the considerations for the One Version requirements.

Which consideration should you provide for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 173

A graphics printing company using Dynamics 365 Supply Chain Management sells 100 percent made-to-order signs. These signs cannot be pre-produced.

The company wants to create an end-to-end process that includes production, sales order packing, and sales order picking.

You need to determine the order of the functions.

In which order should you recommend the actions be performed? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Pack the box for the sales order.	
Use a production order to create the product.	
Pick for the sales order.	
Take a sales order.	
Process the sales order invoice.	

Answer:

Actions	Answer area
Pack the box for the sales order.	Take a sales order.
Use a production order to create the product.	Use a production order to create the product.
Pick for the sales order.	Pick for the sales order.
Take a sales order.	Pack the box for the sales order.
Process the sales order invoice.	Process the sales order invoice.

NEW QUESTION: 174

A company is implementing Dynamics 365 and requires extensive data and end-to-end testing during each iteration.

You need to determine a testing strategy for multiple scenarios.

What should you recommend? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

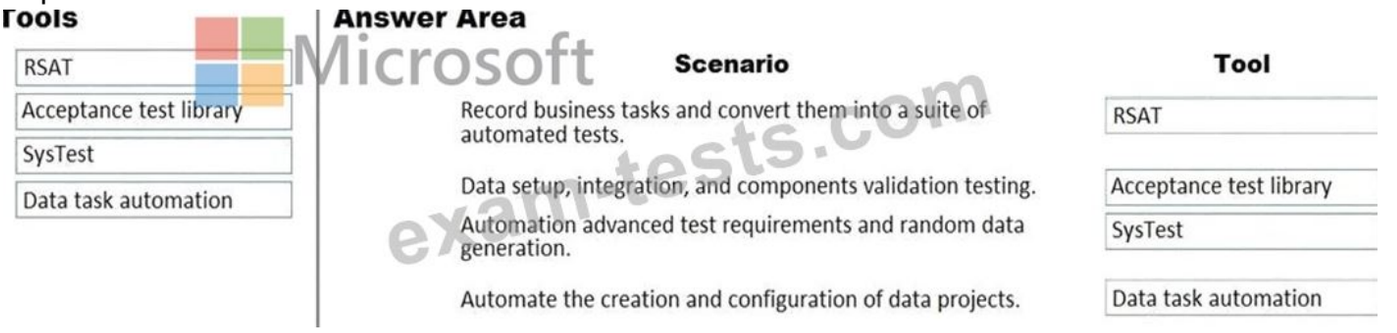

NOTE: Each correct selection is worth one point.

NEW QUESTION: 175

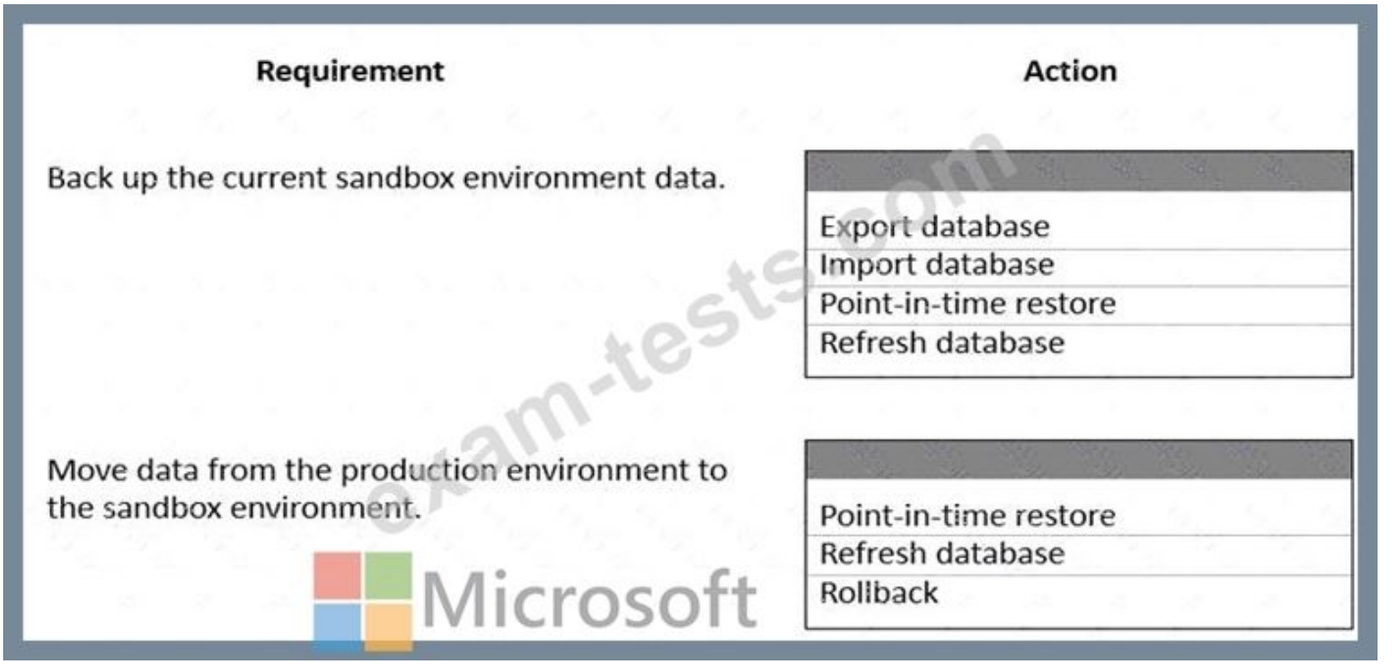

A company uses Dynamics 365 Supply Chain Management.

A user reports an error on a transaction in the production environment that occurred 30 days ago.

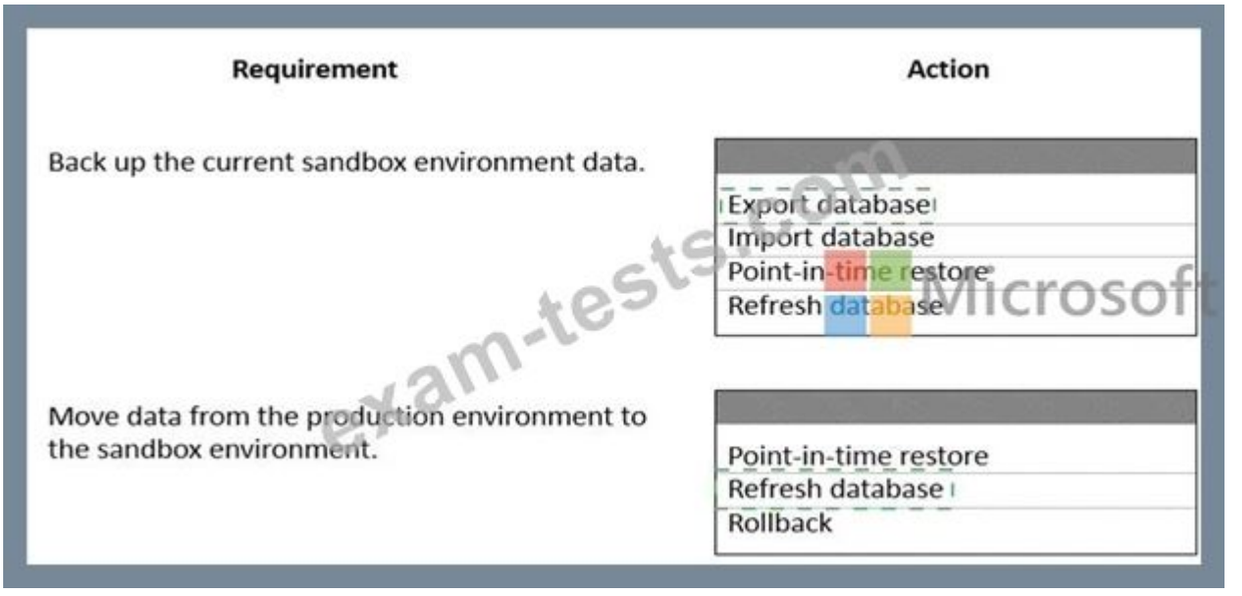

You need to move the current data from the production environment to the sandbox environment to troubleshoot the transaction error. You must back up the sandbox environment before you copy data to the production environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

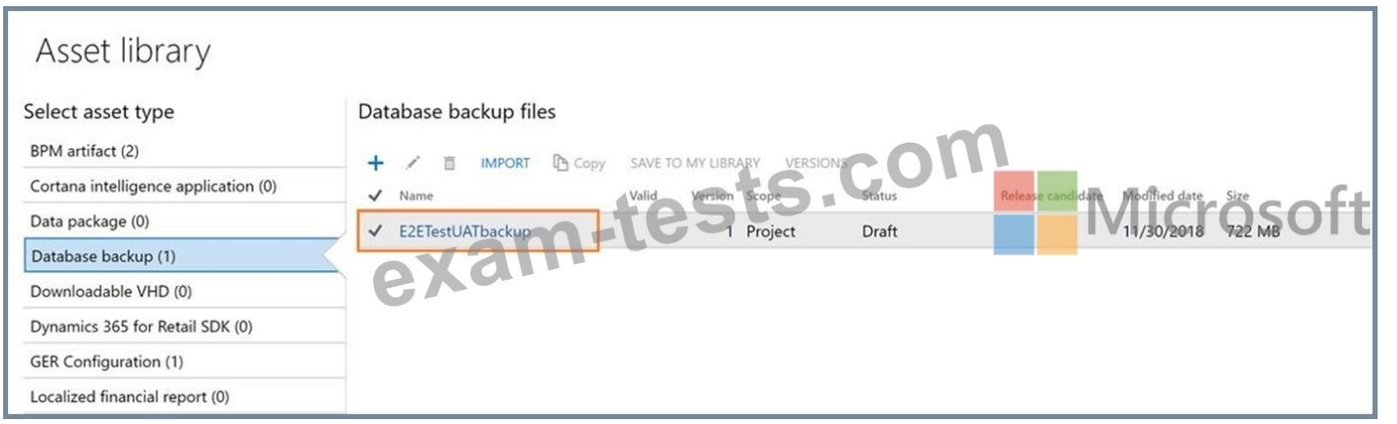

Box 1: Export database

Export a database

Dynamics Lifecycle Services (LCS) to export a database from a sandbox user acceptance testing (UAT) environment to the Asset library.

After the export operation completes successfully, sign out of the servicing operation on your Environment details page. You can then see the asset in your Asset Library in the Database backups section.

Graphical user interface, text, application, Word Description automatically generated

The .bacpac files are stored here and can be manually downloaded to your Tier 1 developer environments for import.

Box 2: Refresh database

Refresh database

You can use Microsoft Dynamics Lifecycle Services (LCS) to perform a refresh of the database to a sandbox user acceptance testing (UAT) environment. A database refresh lets you copy the transactional and financial reporting databases of your production environment into the target, sandbox UAT environment. If you have another sandbox environment, you can also copy the databases from that environment to your target, sandbox UAT environment.

NEW QUESTION: 180

A company plans to implement Dynamics 365 Supply Chain Management.

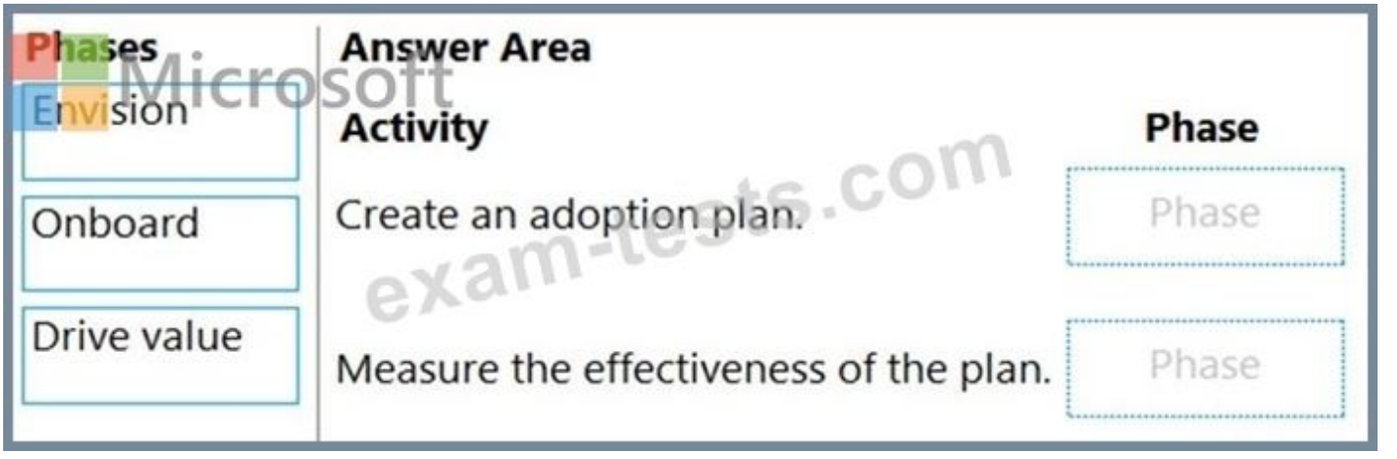

The company's employees have been using the same system and processes for many years.

Employees are reluctant to change the old processes.

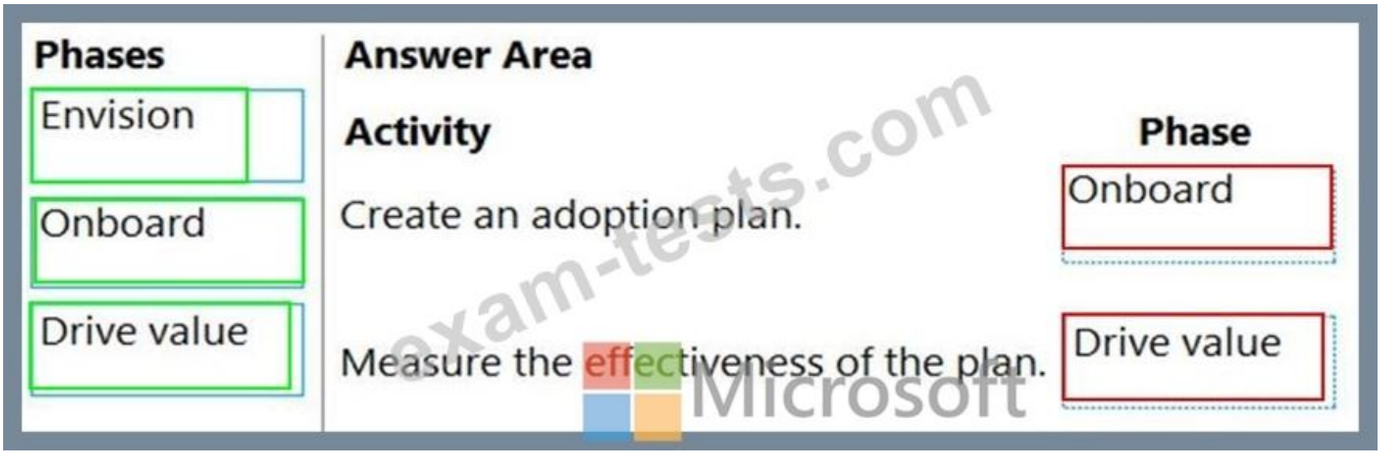

You need to create an adoption plan and measure the effectiveness of the plan.

In which phase does each activity belong? To answer, drag the appropriate phases to the correct activities. Each phase may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 181

A company is upgrading their AX 2012 R3 environment to Dynamics 365 Finance. The company plans to upgrade the data store by using a phased approach. You need to define the strategy to migrate master data and opening balances. Which tool should you recommend?

A. Data upgrade tool

B. Business process modeler

C. Usage profiler

D. Microsoft Dynamics AX Intelligent Data Management Framework

Answer: A (LEAVE A REPLY)

Lifecycle Services is a tool set that Microsoft Services provides that will be essential to your upgrade and to your life after the upgrade. As you are going through the business process analysis, I'd encourage you to check out Lifecycle Services and look at what they have provided in their business process modeler. Lifecycle Services is a nice tool set for you to organize your business processes.

Note: Prepare model metadata

During data upgrade, one goal is to maintain element IDs between the existing AX 2012 environment and the upgraded finance and operations environment. To accomplish this goal, you must bring a copy of the element IDs from the AX 2012 environment into the finance and operations environment. AX 2012 stores element IDs in a table that is named ModelElement. This table is in the model database, which is a separate database from the AX 2012 business data database. During an upgrade to finance and operations, you must copy the AX 2012 database to Microsoft Azure. This process can be time consuming.

To avoid copying the whole model database to Azure SQL Database, use the following procedure to replicate the ModelElement table in the business data database. Later, during data upgrade runs, the database synchronization process will retrieve the required information from this replicated table and make sure that element IDs are maintained in the upgraded finance and operations environment.

In the finance and operations data upgrade checklist, click Prepare model metadata.

When you're prompted, click Yes.

Wait for the copy process to be completed.

If the process is successful, the task is marked as completed.

NEW QUESTION: 182

A client plans to implement Dynamics 365 Finance.

The client is unsure whether to use a cloud-based or on-premises implementation.

For which scenario should the client install the on-premises version of the app?

A. The client is concerned about their retail stores losing internet connection and not being able to process offline store transactions.

B. The client needs to comply with data sovereignty rules in a region where Microsoft Azure Data Centers are limited.

C. The client wants direct access to production environments.

D. The client has integrations that depend on direct Microsoft SQL access.

Answer: B (LEAVE A REPLY)

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/deployment/choose-deployment-type With an on-premises deployment, existing data center investments can be leveraged. Customers can also configure their enterprise preferences to meet the regulatory and compliance needs of their business, comply with data sovereignty rules in regions where there are no Azure Data Centers, or ensure business continuity in areas with limited public infrastructure.

NEW QUESTION: 183

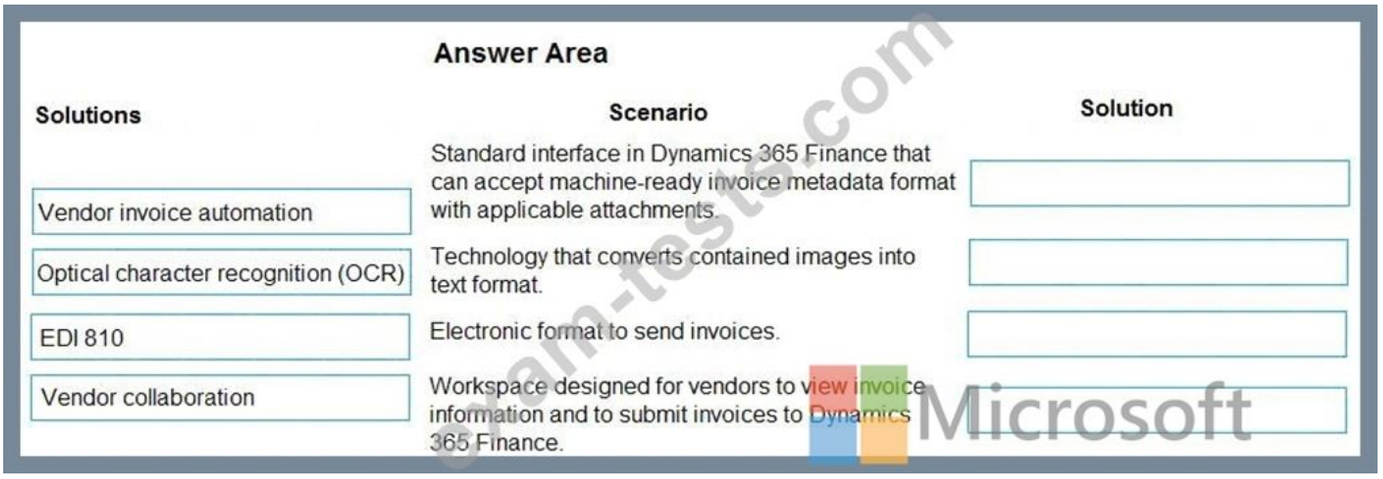

A company uses Dynamics 365 Finance.

The company receives a large number of accounts payable invoices on a regular basis that are currently being entered manually.

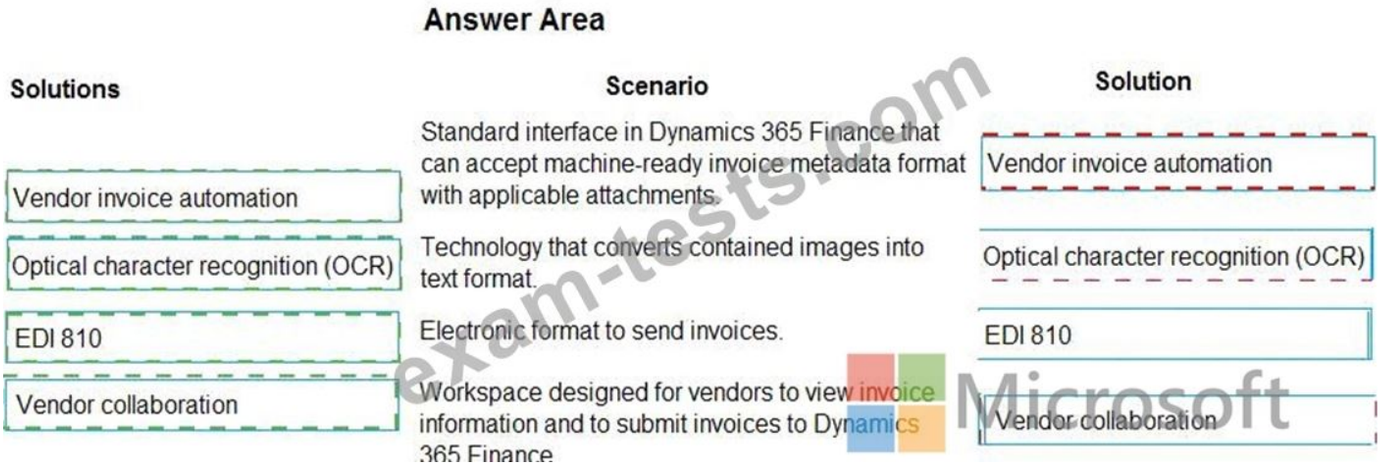

You need to research ways accounts payable invoices can be created automatically.

What should you recommend? To answer, drag the appropriate solutions to the correct scenarios. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION: 189
A company uses Dynamics 365 Supply Chain Management.
The system has a slow response time when sales orders are entered.
You need to identify any blocking SQL statements.
Which Lifecycle Services (LCS) tool should you use?
A. SQL Insights - Live View
B. SQL Insights - Index Analysis
C. Telemetry data monitoring
D. Performance SDK
Answer: (SHOW ANSWER)

All SQL performance tools in LCS are available under the SQL Insights tab on the Environment Monitoring page for a specific environment. The following tabs are available:
Live View - Shows executing statements and blocking statements. The current SQL Now page that shows performance issues will be replaced with Live View.
Index Analysis - Shows aggregated index and table information, based on user scans, user seeks, user updates, and row count. Like performance metrics, this tool shows the trend for the selected index along with additional table metrics. This feature is not available in self-service environments.
Queries - Shows a list of predefined queries that can be used to retrieve metrics on demand. Examples of queries include a current blocking tree, a list of active plan guides, and a list of most expensive queries.
Etc.

NEW QUESTION: 190
A company is headquartered in Canada and has four regional offices in Japan, Great Britain, Germany, and Mexico.
An architect is documenting the following business requirements:
* Accounts payable parameters must be unique within an organization.
* Monthly financial results must be consolidated.
You need to design the organization to map to the requirements.
Which functionality should you use?
A. Legal entities
B. Line of business
C. Business units
D. Operating units
Answer: C (LEAVE A REPLY)
Section: Design solution components
Explanation/Reference:
https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/generating-consolidated-financial- statements

NEW QUESTION: 191
A winery is considering using Dynamics 365 Finance to implement a large-scale ERP application and needs to understand the differences between cloud-based and on-premises deployments.
You need to recommend deployment options for the company.
What should you recommend? To answer, drag the appropriate deployment types to the correct features. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

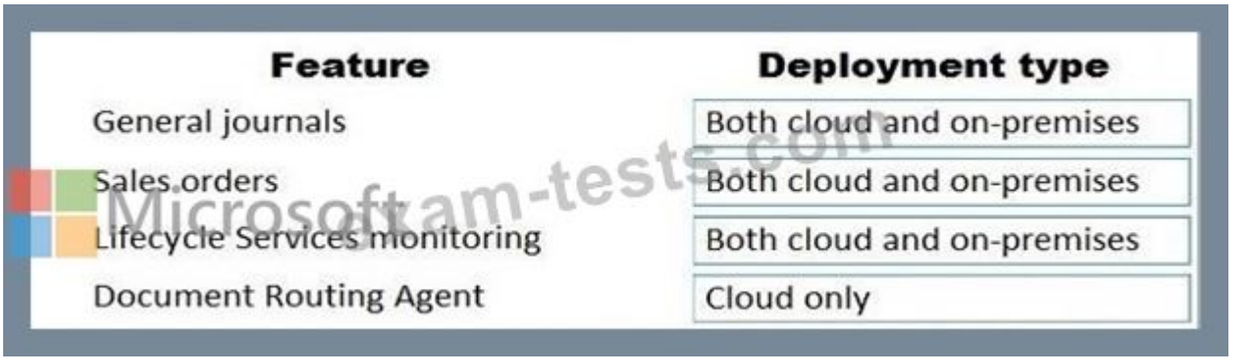

NOTE: Each correct selection is worth one point.

Answer:

Explanation

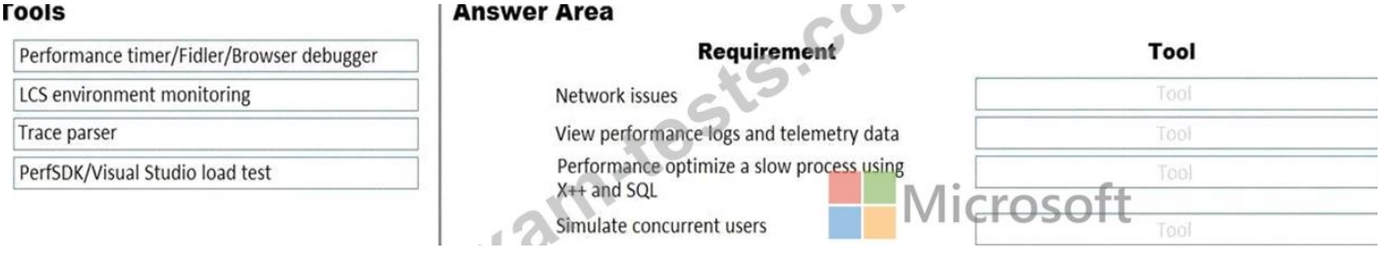

NEW QUESTION: 192

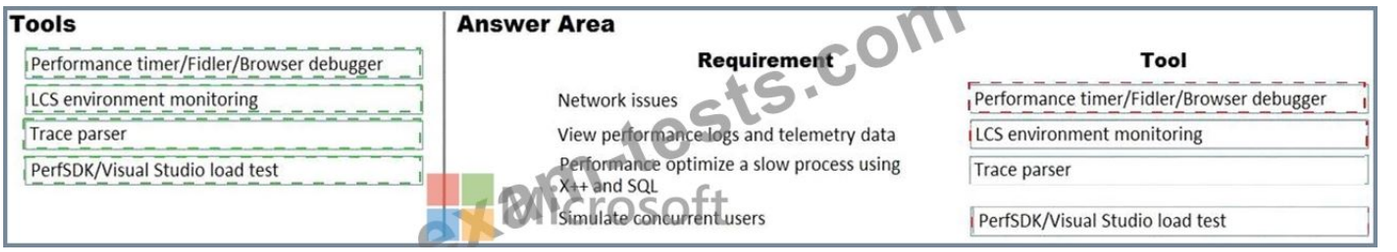

An organization uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management. The organization is experiencing various performance issues and is looking for solutions. You need to recommend tools to determine the cause of the performance issues.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

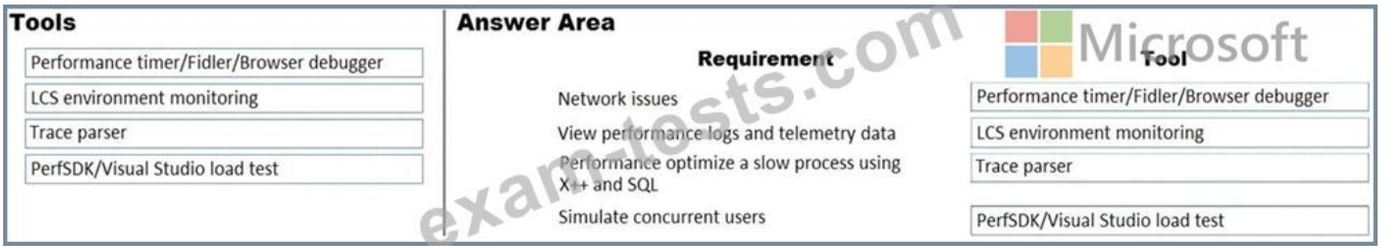

NOTE: Each correct selection is worth one point.

Answer:

Explanation

NEW QUESTION: 193

A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).

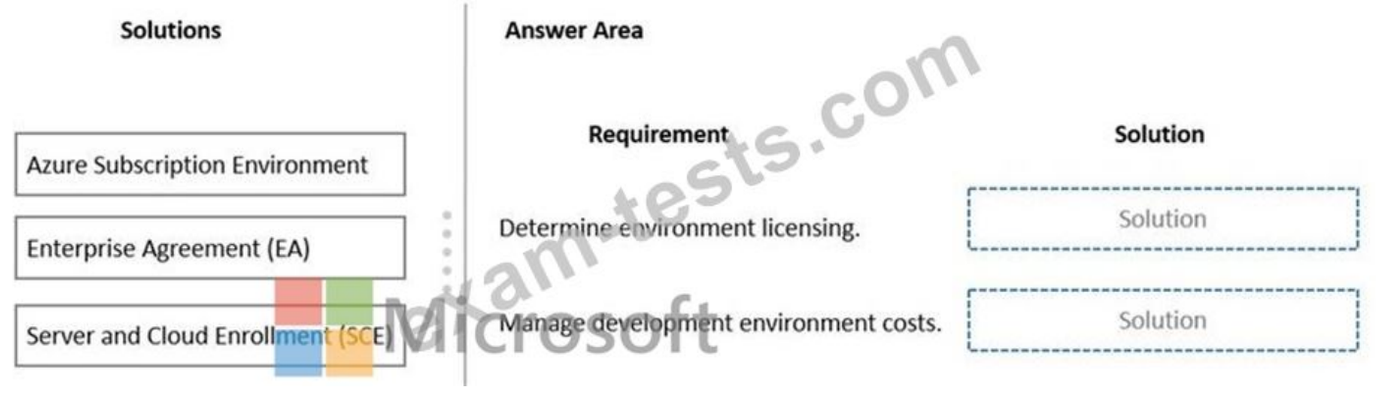

Development environments must be licensed for the duration of the implementation.

You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements.

Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 194
A company is implementing Dynamics 365 Finance. The company « enrolled in the FastTrack program.
You need to explain the benefits of FastTrack.
What are three benefits? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. solution design and development for the customer
B. predictable success based on past experience
C. formalization of roles
D. proactive guidance
E. early discovery of risks and issues
Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 195
A company is implementing Dynamics 365 Supply Chain Management.
You are helping the company use Subscription Estimator in Lifecycle Services (LCS).
You need to import data for the usage profile.
Which data source should you use?
A. Data Migration Framework
B. Azure Data Lake connector
C. Performance SDK
D. Business process modeler (BPM)
Answer: D (LEAVE A REPLY)
Usage profiler (Lifecycle Services, LCS), Import business processes from BPM.
We recommend that you start by importing data from Business process modeler, and then add additional data manually.
Go to Lifecycle Services.
Configure your organization in Business process modeler.
On the project home page, click the Usage profiler tile, and then on the Usage profiler page, click Import from BPM. The system displays the message Retrieving BPM data. When it has finished importing the data, you will be returned to the Usage profiler page.

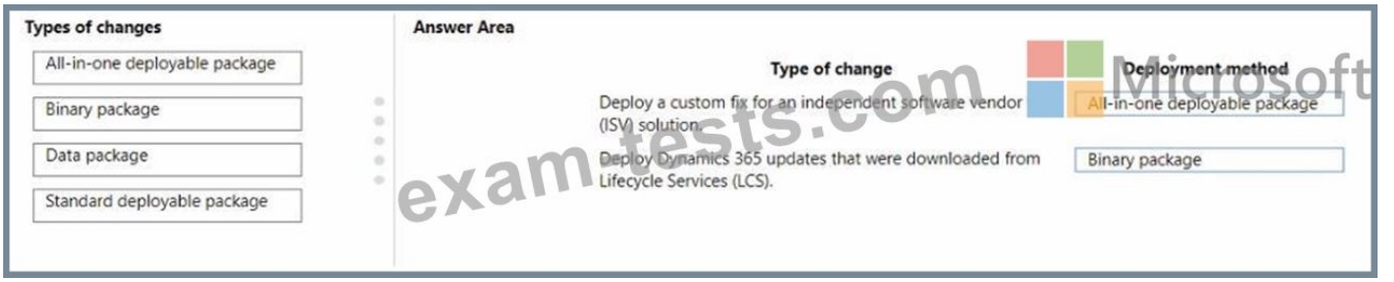

NEW QUESTION: 196
A company implements Dynamics 365 Finance in a self-service environment. The company plans to deploy code changes to the production environment.
You need to recommend methods to deploy the changes.
What should you recommend? To answer, drag the appropriate deployment methods to the correct code types of changes. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE Each correct selection is worth one point.

NEW QUESTION: 200
A company plans to implement Dynamics 365 Supply Chain Management.
The company's employees have been using the same system and processes for many years.
Employees are reluctant to change the old processes.
You need to create an adoption plan and measure the effectiveness of the plan.
In which phase does each activity belong? To answer, drag the appropriate phases to the correct activities.
Each phase may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation

Box 1: Onboard

Phase two: Onboard

Work with your key stakeholders to build and launch your adoption plan. Prepare your environment and test your adoption approach with Early Adopters. Use feedback to make adjustments before scaling to the business. In this phase, you will:

Build your adoption plan.

Launch to Early Adopters.

Adjust your plan.

Box 2: Drive value

Phase three: Drive value

Full-scale deployment and business success depend on usage and satisfaction. This requires planning through the Envision and Onboard phases plus ongoing operational excellence. In this phase, you will:

Monitor end-user adoption.

Measure and report usage.

Encourage ongoing engagement.

NEW QUESTION: 201

An asset management company is preparing to purchase licenses for Dynamics 365 Finance.

The licenses should be assigned based on the user's job scope. The organization does not want to issue full licenses to all users.
You need to determine a licensing strategy that meets the requirements.
Which license should you recommend? To answer, drag the appropriate license to the correct requirement.
Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 202

A company is implementing Dynamics 365 Supply Chain Management. The company has 11 legal entities. Each entity uses a separate enterprise resource planning (ERP) system. A customer may have a unique customer number in each system because the systems are disconnected. One of the customer numbers will be used as the master number in Dynamics 365.
The company plans to add entities to Supply Chain Management over time. Customer records will continue to be added to the ERP systems throughout the implementation lifecycle and must be kept up to date. The ERP systems will be decommissioned after go-live.
You need to create a strategy to migrate the customer data and ensure that new records are automatically mapped.
Which solution should you implement for each requirement? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 206

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.

The company's main priorities are uninterrupted factory and distribution center operations, master data management, financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement the manufacturing factories' operations and distribution center operations on-premises and replicate the data to a Microsoft data center.

Does the solution meet the goal?

A. Yes

B. No

Answer: A (LEAVE A REPLY)

Section: Design solution components

NEW QUESTION: 207

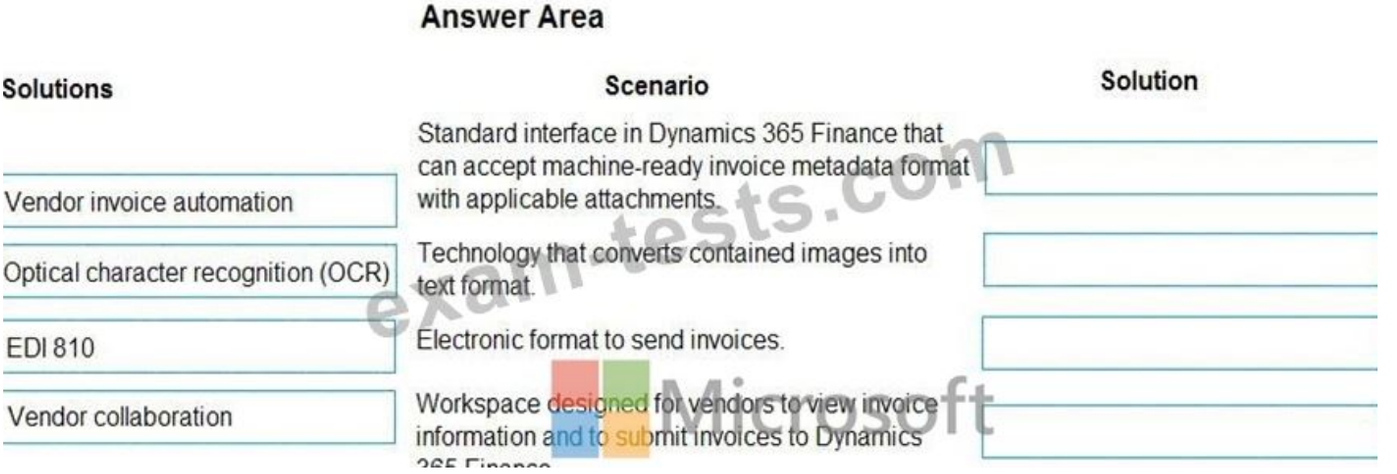

A company uses Dynamics 365 Finance.

The company receives a large number of accounts payable invoices on a regular basis that are currently being entered manually.

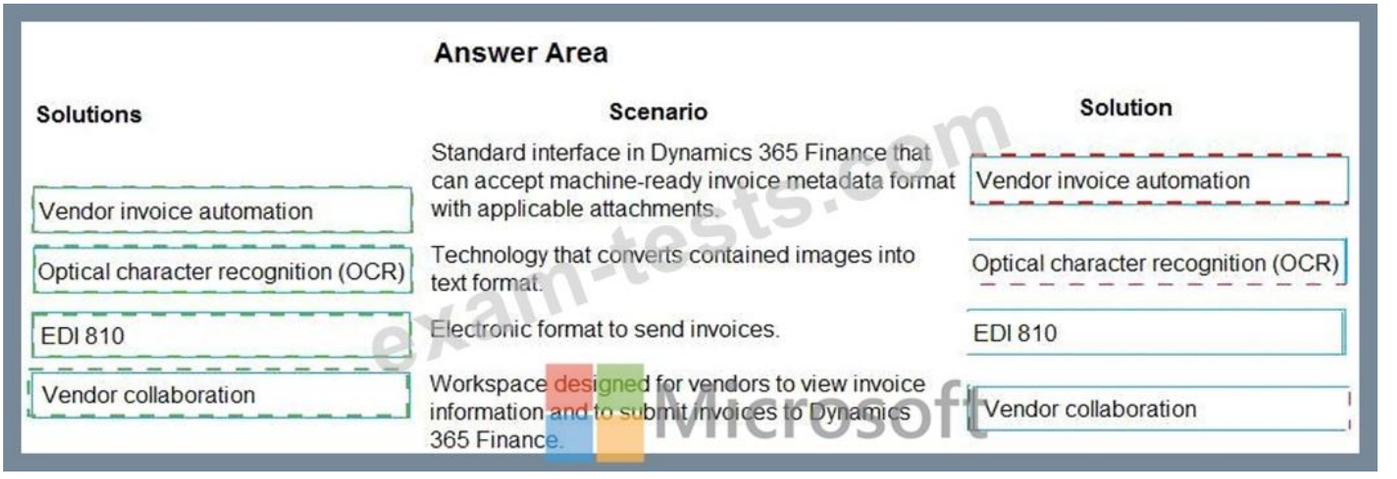

You need to research ways accounts payable invoices can be created automatically.

What should you recommend? To answer, drag the appropriate solutions to the correct scenarios. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

You need to help the client understand which Microsoft Azure tools to use to perform various tasks. What should you recommend? To answer, select the appropriate options in the answer are a. NOTE: Each correct selection is worth one point.

Answer:

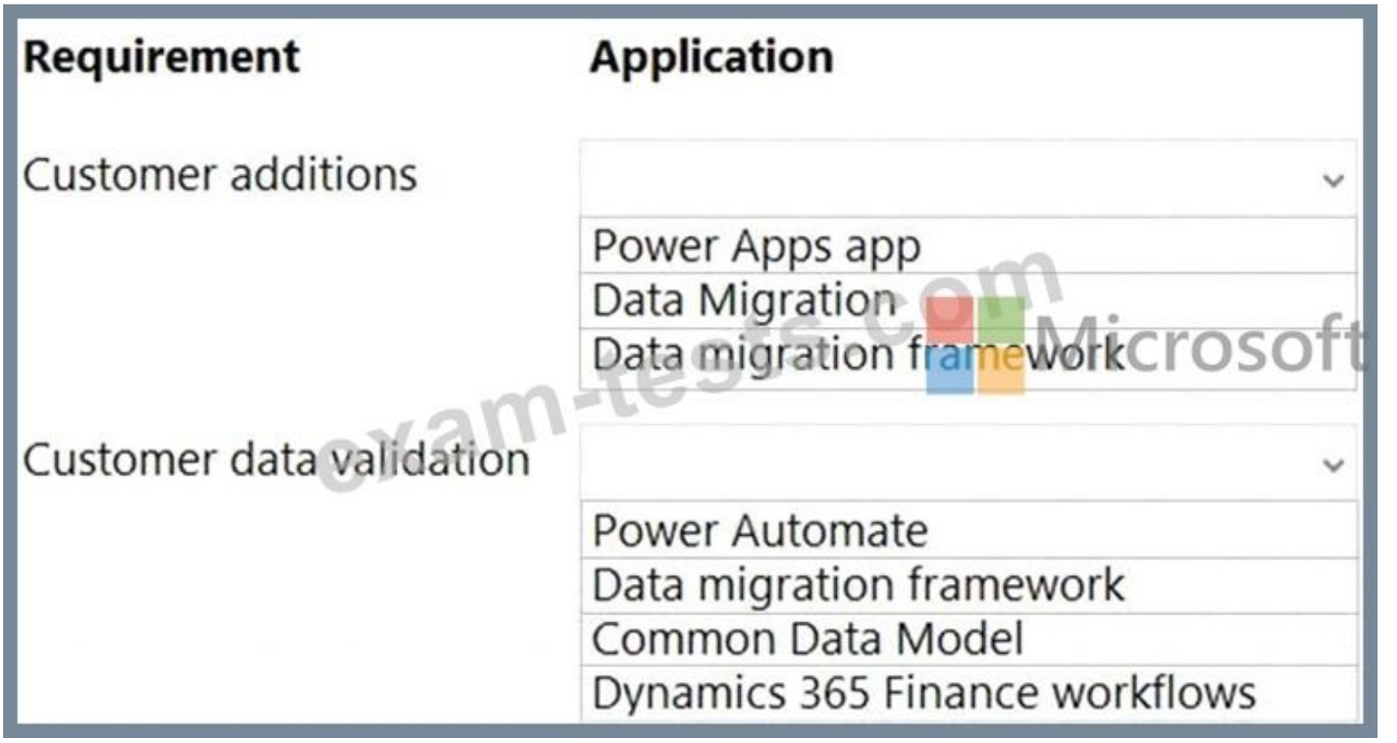

NEW QUESTION: 211

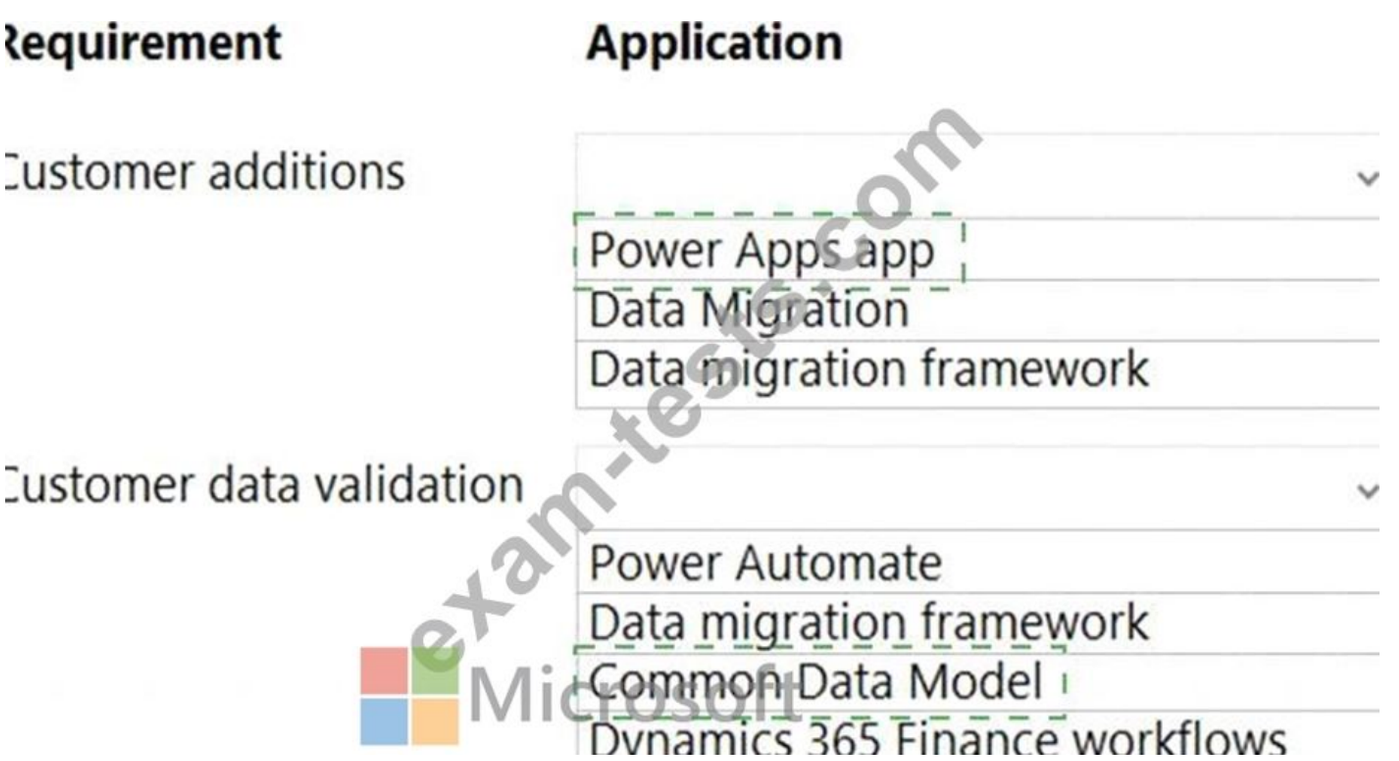

You need to determine a solution for the customers in Jamaica.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Power Apps app

Customers who sign up for add-on Jamaica excursions bring friends who have not signed up ahead of time.

The sales representatives record the customer information on paper, take payment, and then enter the information into the system later. The information is frequently inaccurate and creates discrepancies.

Box 2: Common Data Model

Dynamics 365 common data model (CDM) is designed to simplify the data integration and management across business processes and applications. Microsoft introduced CDM as an integral part PowerApps offering.

The good news is that Dynamics 365 CDM enables apps to easily integrate and share data even without custom and extensive integration.

Note: In Jamaica, employees use SoftwareC, a homegrown application based on spreadsheets. Local sales representatives use pen and paper in the field.

New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.

NEW QUESTION: 213

You need to implement a solution for entering the methodology information for the project.

Which components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 5, Blue Yonder Airlines

Background

Blue Yonder Airlines is a private airline company established in 1963 in Boston. The company completes over

2,000 flights a day with flights operating exclusively in North America. Blue Yonder Airlines is in the planning phase for replacing its current enterprise resource planning (ERP) with Dynamics 365 Finance, Supply Cham Management, and Commerce and is making solution architecture decisions prior to engaging the remainder of the implementation team.

Current Environment

Technology

* Blue Yonder Airlines operates on a custom-built ERP solution.
* Blue Yonder Airlines uses a proprietary reporting and analytics platform that reports on data between multiple systems, including the ERP solution.
* The ERP solution automatically pushes transactional data every five minutes to a separate database that the reporting and analytics platform uses for sales and operations planning (S&OP) activities.

* SQL Server Reporting Services (SSRS) reports are used for several financial reports that are sent to vendors in the existing ERP solution.
* Users utilize a third-party tool that selects alternate layouts of the reports depending on the users' requirements.
* Blue Yonder Airlines currently uses Microsoft 365 and Office 365.

Implementation

* The implementation of new solutions and features follows an Agile implementation strategy.
* Blue Yonder Airlines has several highly skilled project managers
* Blue Yonder Airlines has a live Microsoft Dataverse instance that runs several model-driven Microsoft Power Apps apps. Several initiatives using Microsoft Power Automate and Power Virtual Agents are in the middle of implementations.

Development

* There are five different functional groups, called pods, which fully own their development cycles for different functionality in their ERP.
* All code is deployed and managed by using Microsoft Visual Studio projects.
* All development environments are currently hosted by a third-party company. The current costs are very expensive. ^
* Blue Yonder Airlines plans to use the new ERP implementation to address performance and integration issues.

Licensing

* Blue Yonder Airlines does not require licensing on its ERP solution because the system is custom.
* Most users have more access within the ERP solution than required.

Issues

Development

* The development and functional teams are not taking ownership of the performance benchmark testing.

There are no functional designs, benchmark scenarios, or expectations setting created to date.

Security

* Blue Yonder Airlines does not know how to configure the security of the users to enable access to complete its day-to-day operations.

Licensing

* A licensing compliance audit has determined that the correct number of employees are added to the system but too many base and attach licenses are being used.
* Some users will likely have to consolidate duties to maintain compliance.

NEW QUESTION: 214

The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment.

The environment administrator must be able to do the following:

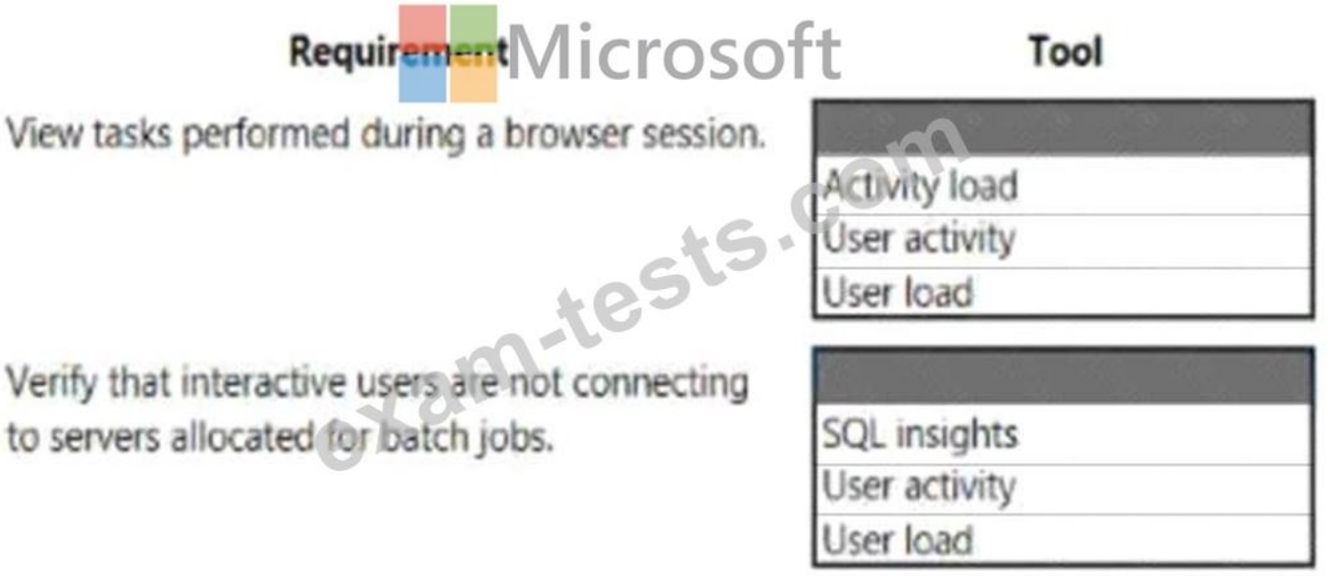

* View tasks performed during a browser session.

* Verify that interactive users are not connecting to servers allocated for batch jobs.

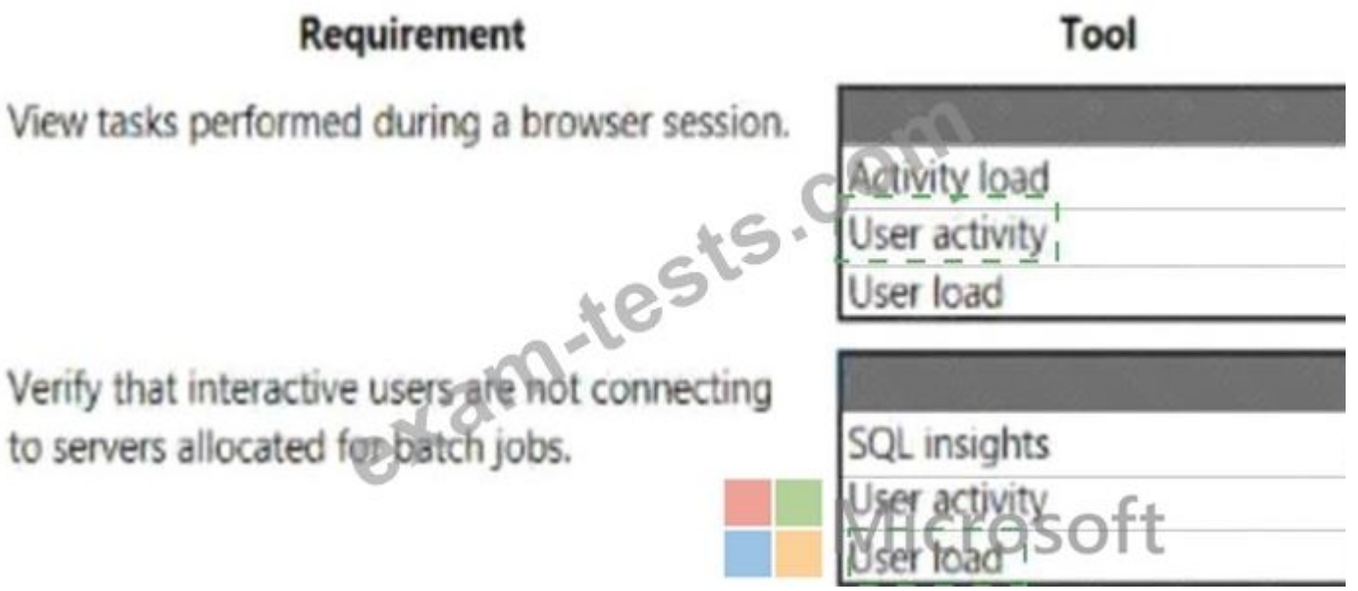

You need to determine which environment monitoring toots meet the requirements.

Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: User activity

The User activity grid shows the various activities that users performed, based on their session timestamp.

Box 2: User Load

The User load section shows all the system users. Each chart shows the time that the user spent on a specific machine.

Reference:

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/monitoring-diagnostics

NEW QUESTION: 215

A client is implementing Dynamics 365 Finance.

You need to help the client understand which Microsoft Azure tools to use to perform various tasks. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation

NEW QUESTION: 216

An asset management company is implementing Dynamics 365 Finance. The company is eligible for and has enrolled in the FastTrack program Business users and consultants want to prepare for each FastTrack workshop.

You need to identify when each requirement will be discussed

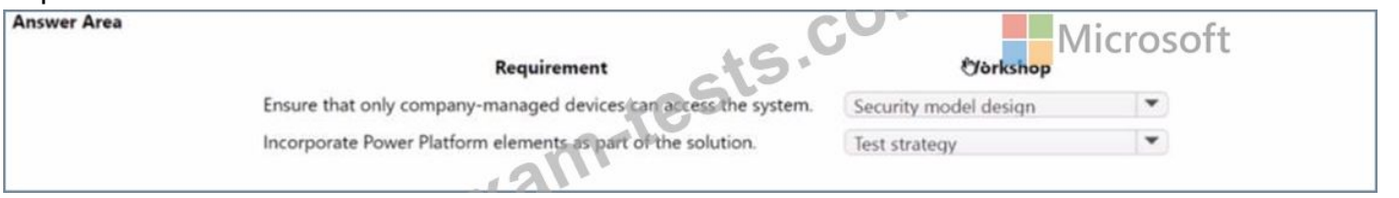

Which workshop should you select for each requirement' To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 217

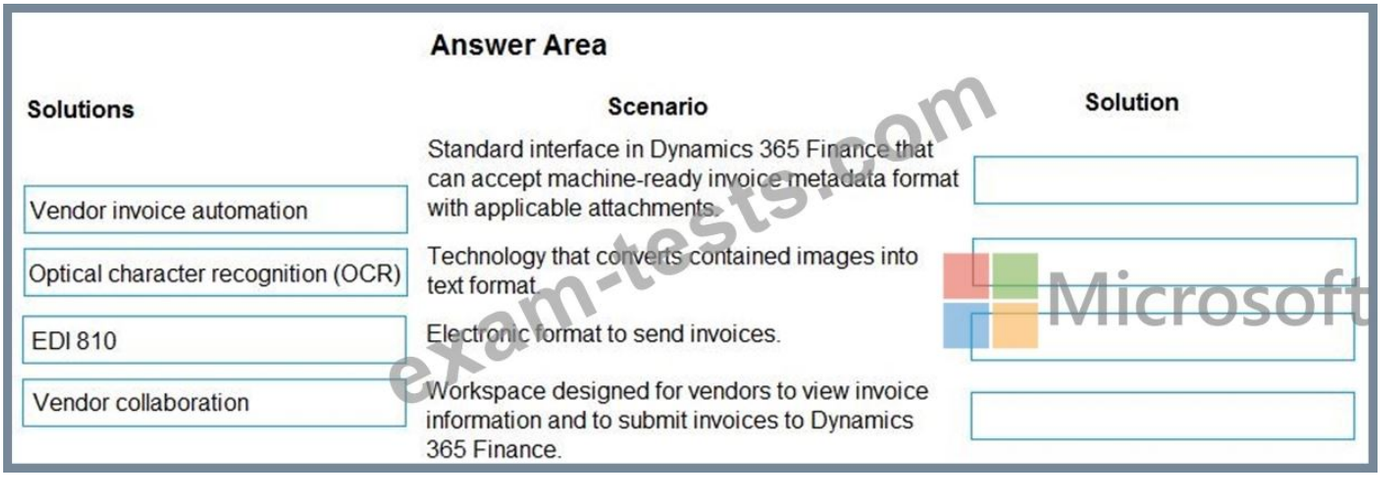

A company uses Dynamics 365 Finance.

The company receives a large number of accounts payable invoices on a regular basis that are currently being entered manually.

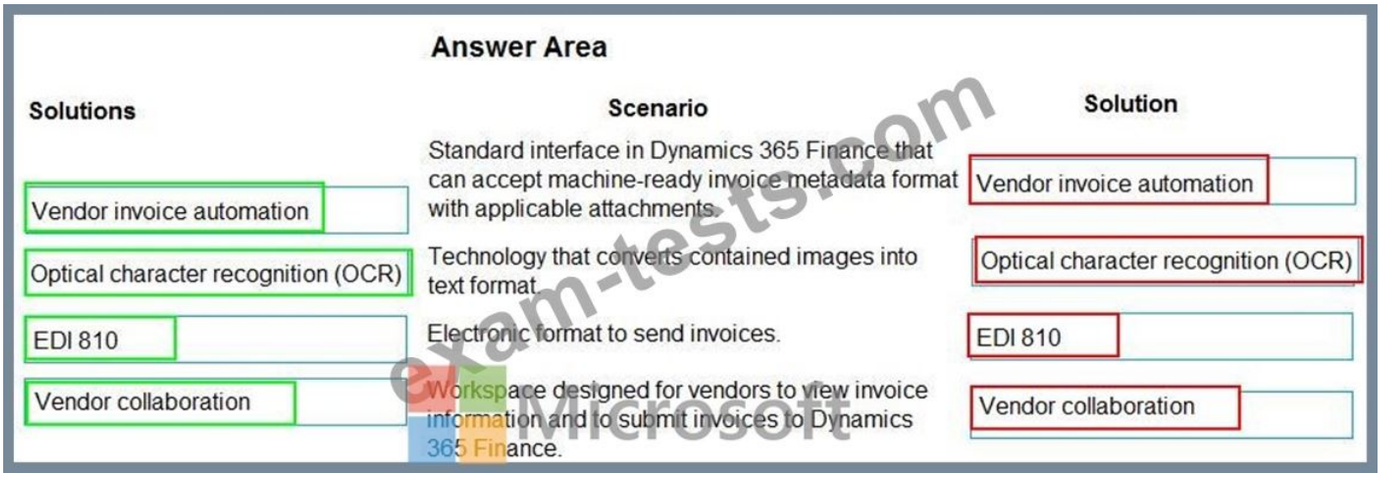

You need to research ways accounts payable invoices can be created automatically.

What should you recommend? To answer, drag the appropriate solutions to the correct scenarios. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 218
You need to recommend an appropriate implementation methodology.
Which methodology should you recommend?
A. Spiral
B. Lean
C. Waterfall
D. Agile
Answer: D (LEAVE A REPLY)
This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, dick the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is

identical to the information displayed on the subsequent tabs. When you are ready to answer a question, dick the Question button to return to the question.

Overview

CoHo Vineyard and Winery is based in the United States. The company has a single vineyard. The company distributes full pallets of wine worldwide and sometimes sells wine by using a private label. Grape growing and wine production operations are owned and operated by a third-party company. The company uses bottles, accessories, and other disposables from a company in China.

CoHo Vineyard and Winery opens a second location. This location manages inventory for Wine Club members and includes a wine tasting room. The location also includes a warehouse and distribution center.

The wine club currently has 200 members. The company hopes to increase this number.

The company holds events for club members in the tasting room and ships both full cases and individual bottles to members. The tasting room is not treated as a retail store. All sales to club members only and purchases must be made on-account.

NEW QUESTION: 219

A distribution center uses Dynamics 365 Supply Chain Management.

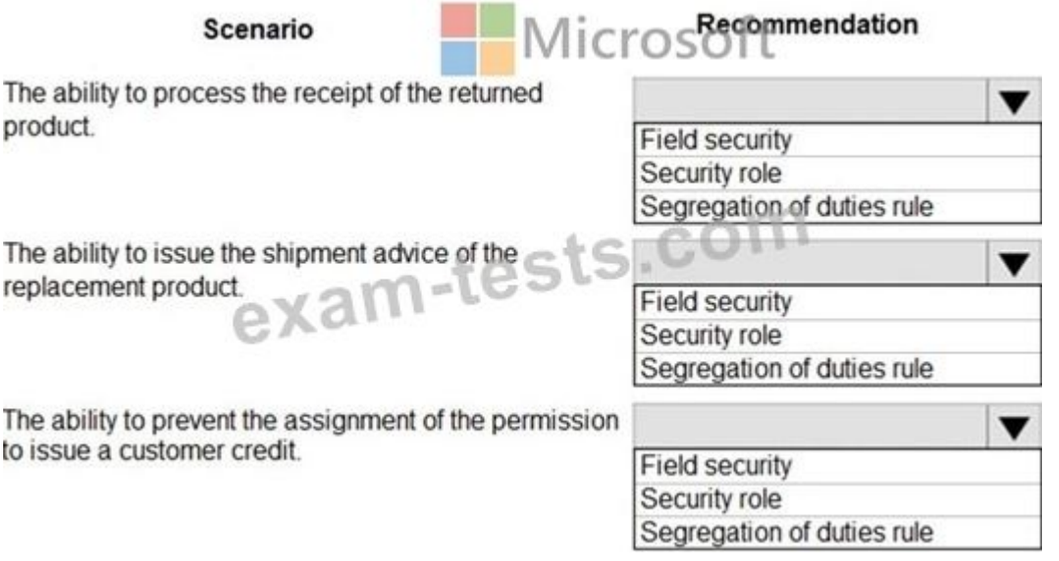

When product returns are received at the distribution center, they are inspected, and a replacement is sent to the customer. Customer service processes both the return receipts and replacement orders to speed up the process.

The system must be able to prevent a single user from completing an entire return process.

You need to recommend a solution.

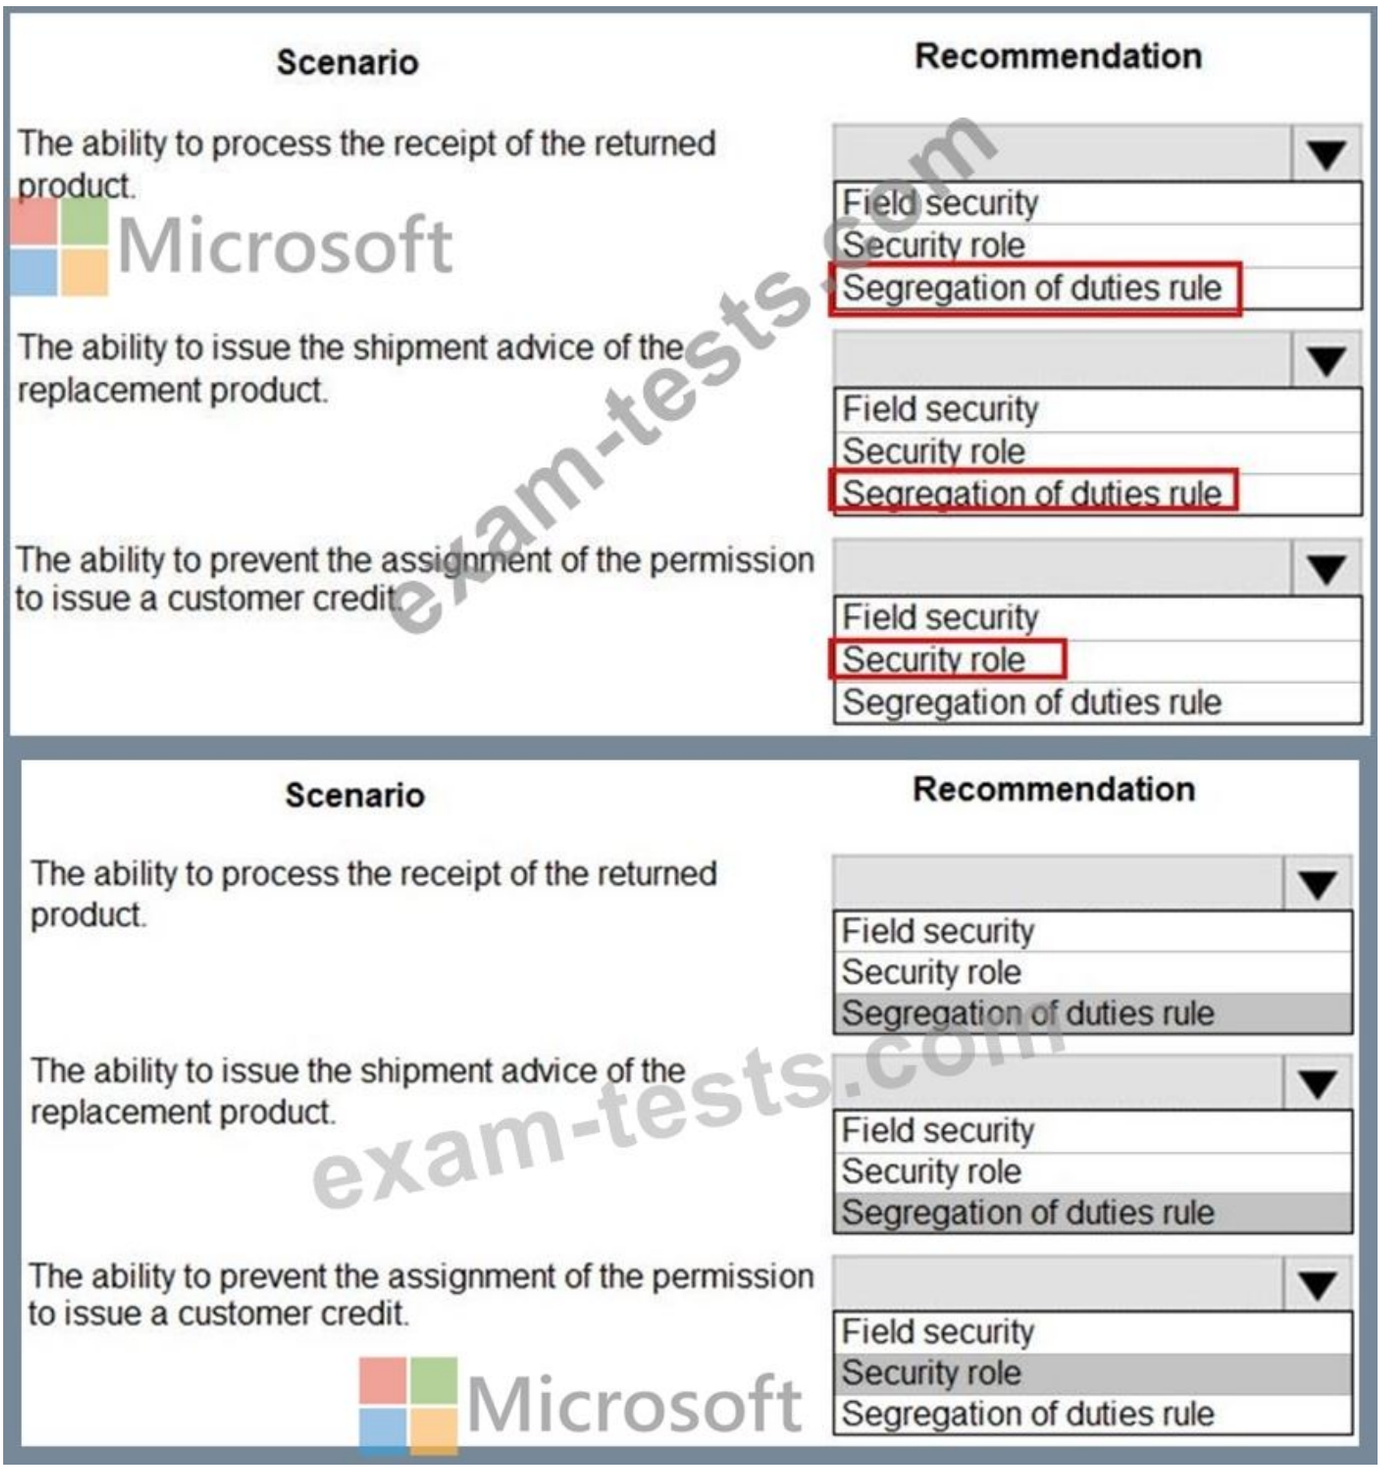

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 226

You need to recommend the appropriate number of production instances and the hosting location. What should you recommend?

A. One production instance in China.

B. Two on-premises production instances hosted in both China and the United States.

C. One on-premises production instance hosted in United States and one cloud production instance hosted in China.

D. Two production instances hosted in China and the United States.

E. One production instance hosted in the United States.

Answer: E (LEAVE A REPLY)

Topic 3, Margie's Travel

Background

Margie's Travel company (http://www.margiestravel.com/) provides travel services to consumers. These services include package offers, special deals, and excursion add-ons such as jet ski and horseback rides in Jamaic a. Margie's Travel negotiates rates with multiple vendors and secures bundled pricing for consumers, serving as a travel broker. Margie's Travel only sells services and does not have any tangible products or merchandise.

Margie's Travel began in 1994 when Margie, CEO, and president, planned group trips for her friends in the United States (US). As this grew organically. Margie's created a second company based in Jamaica, followed by the acquisition of a third company in the United Kingdom (UK). The company has grown fast challenging the current systems that support the business model. Margie has determined it is time to implement Dynamics 36S Finance.

Applications and environment

The current system has the following structure:

* In the US. employees use Software A. accounting software, which is a desktop installation package for small businesses and single users.

* In the UK. employees use Softwares, ERP (enterprise resource planning) software installed on local servers. The cost of maintaining Software B licensing is high, and Margie's Travel has decided against the software and associated overhead costs.
* In Jamaica, employees use Software C. a homegrown application based on spreadsheets, local sales representatives use pen and paper in the field.
* Margie's Travel employees use personal email addresses and chat tools and text each other directly due to the lack of corporate tools.
* IT department resources are located in the US and are responsible for management of all software support.
* Margie's Travel company does not have standardized processes across the organization.
* The manager in each country/region is responsible for system downtime. This has proven to be a challenge due to the multiple time zones across the organization and the centralized IT department.

As customers purchase packages. Margie's Travel can claim rebates with the providing vendor for every package sold. The rebates are claimed quarterly, and internal workflows have been established for approval prior to vendor submission. The workflows for package offerings eligible for rebates can be complex. User2 has created Visio diagrams for the associated approval processes.

Customer relations

* Customers exist in all three current countries/regions where Margie's Travel operates.
* Margie's Travel offers consumers a loyalty program. Consumers can earn points per dollar spent across all in countries/regions in which Margie's operates. The loyalty program is currently managed by using a spreadsheet.

Application and environment

* All three countries/regions must use Dynamics 365 Finance.
* The system must allow for updates to be applied at the same time as they are periodically released.
* Margie's Travel requires that the new business processes be standardized and follow industry best practices.
* Margie's Travel requires implementation of Office 365 and Microsoft Teams to streamline operations. The IT department will be responsible for troubleshooting these applications, along with Dynamics 365 Finance.
* The infrastructure team must ensure that separate environments are created for development and build, prior to moving to test and eventually gold environments.
* The infrastructure team must move the code for the loyalty program to a test environment.
* The CTO has directed the infrastructure team to guarantee they are on the most current version available at the time of go-live.
* The go-live activities must be coordinated across all countries/regions, with data validation planned for each time zone.
* Once user acceptance testing (UAT) has been completed, the project manager must report the number of tenants for production to Microsoft.

* A report must show seasonality and weather patterns so that Margie's Travel does not offer excursions during timeframes where severe weather is predicted.
* Sales representatives in the field will only be licensed for Microsoft 365 and Microsoft Power Platform.

Customer relations

* Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.
* Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK. This feature is not planned for the initial system rollout: however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.
* New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.
* The rebates cannot be claimed because disparate systems today do not allow for consolidation to ensure that thresholds are met to claim rebates.
* The accounts receivable and accounts payable departments are unclear about the workflows associated with the rebate process. User2 must ensure that representatives from each department validate that they have tested their respective steps in the overall process. Testing feedback must be communicated to User2.

Customer relation

* Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.
* Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK. This feature is not planned for the initial system rollout: however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.
* New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.

NEW QUESTION: 227

A distribution center uses Dynamics 365 Supply Chain Management.

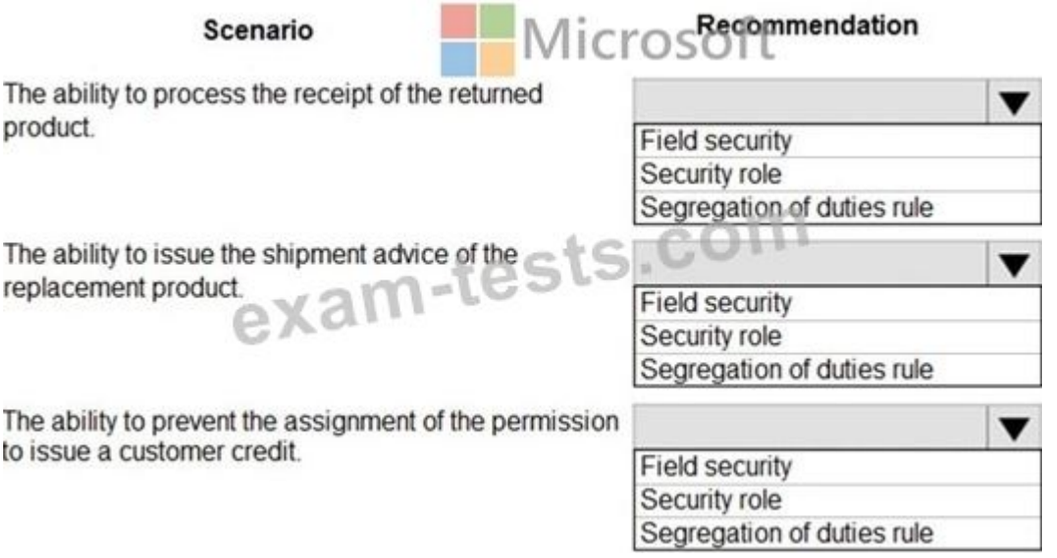

When product returns are received at the distribution center, they are inspected, and a replacement is sent to the customer. Customer service processes both the return receipts and replacement orders to speed up the process.

The system must be able to prevent a single user from completing an entire return process.

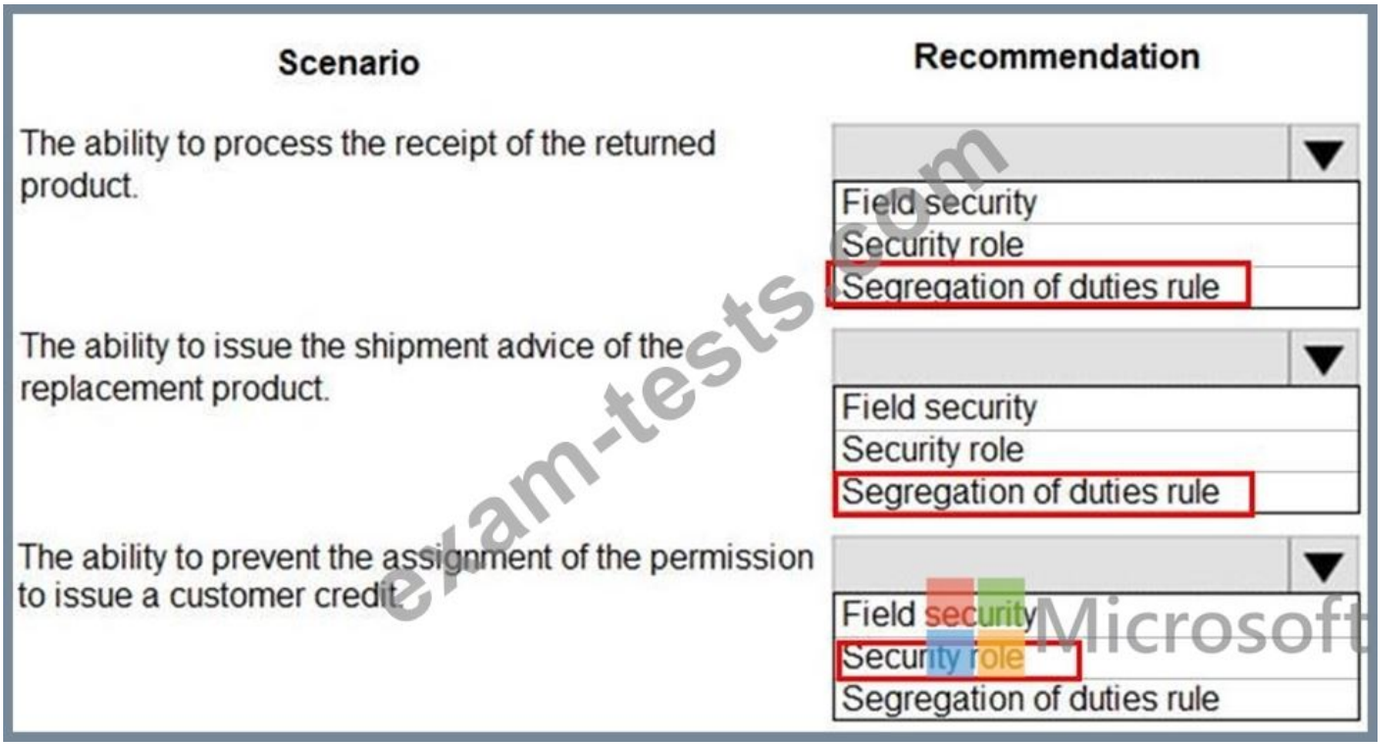

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 228
You need to recommend a solution to meet the requirements for the globalization features. Which feature should you recommend?
A. First release program
B. FastTrack program
C. Product Roadmap
D. Release validation program
E. Preview early access program
Answer: A (LEAVE A REPLY)
Note:
* The CTO has learned that there are updates to globalization features in Dynamics 365 Finance. The IT staff has been tasked with ensuring that they are the first group to receive these updates.
* The IT department has decided not to code for globalization issues because they are in an upcoming service update. They are closing in on go-live and need to make sure that the updates are applied in time.
Service updates are continuous, touchless updates that provide new features and functionality. You are in control and manage how your organization receives these updates. For example, you can sign up for the First Release program so that your organization receives updates first. You can apply the updates to any of your environments manually (self-update) or remain on the default release schedule and receive the auto-updates when you schedule them using LCS.

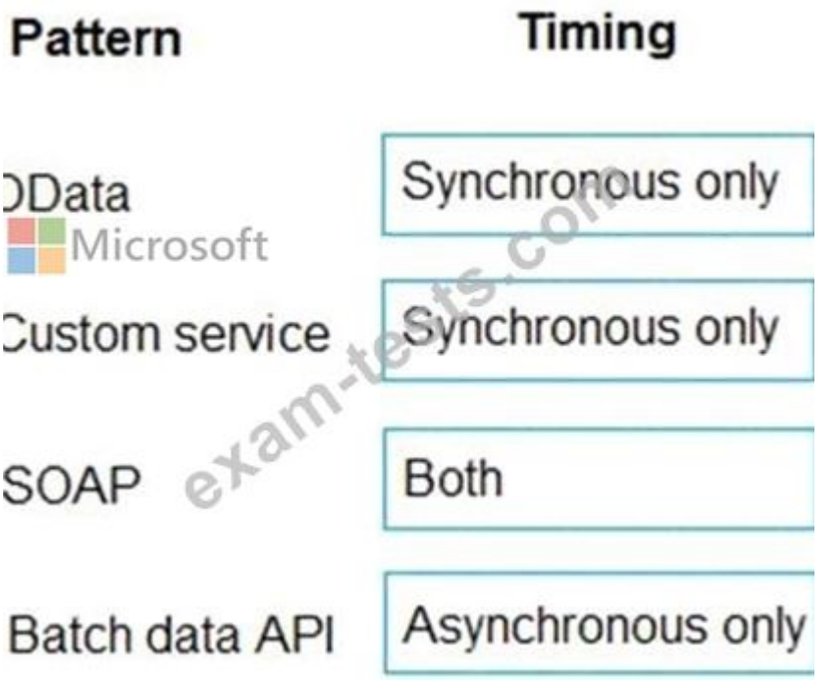

NEW QUESTION: 229
You are designing a solution for a company. The solution will integrate with various data sources. You need to recommend the correct timing for each integration pattern.
What should you recommend? To answer, drag the appropriate timings to the correct patterns. Each timing may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Graphical user interface, text, application Description automatically generated

NEW QUESTION: 231

You need to determine user licensing options for Dynamics 365 Finance + Operations (on-premises) .

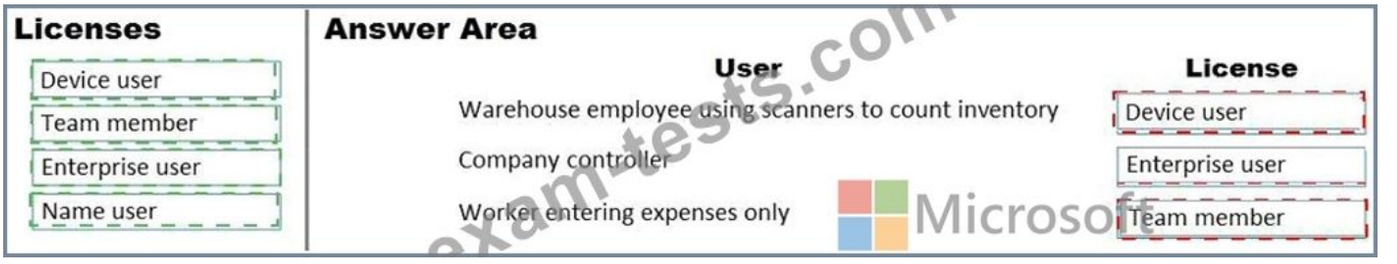

Which type of license should you recommend? To answer, drag the appropriate licenses to the correct users.

Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

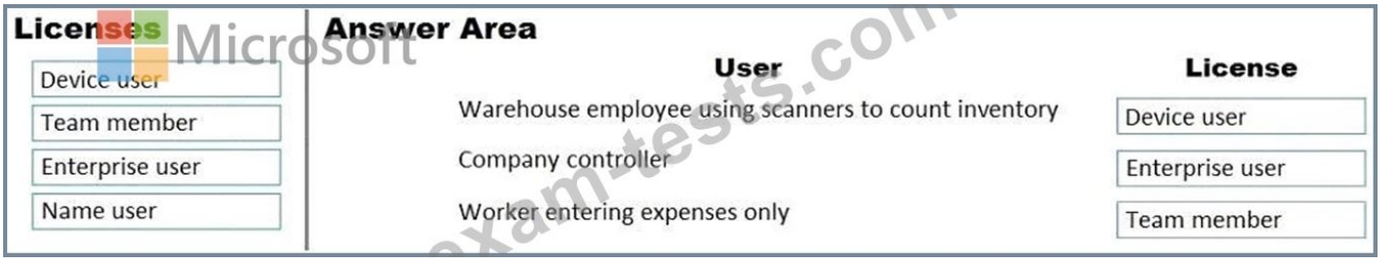

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 232

A toy manufacturer keeps finished products in a physical warehouse.

* The manufacturer and distributor use different inventory control software.
* Sales orders are used to move inventory to the distributor.
* The distributor must be notified immediately when the toy manufacturer ships an order.

You need to determine a solution for providing notifications to the distributor's inventory system.

What are three possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. OData

B. Custom web service

C. Lifecycle Services

D. Business events

E. Recurring integrations

Answer: A,D,E (LEAVE A REPLY)

Section: Design solution components

NEW QUESTION: 233

The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment.

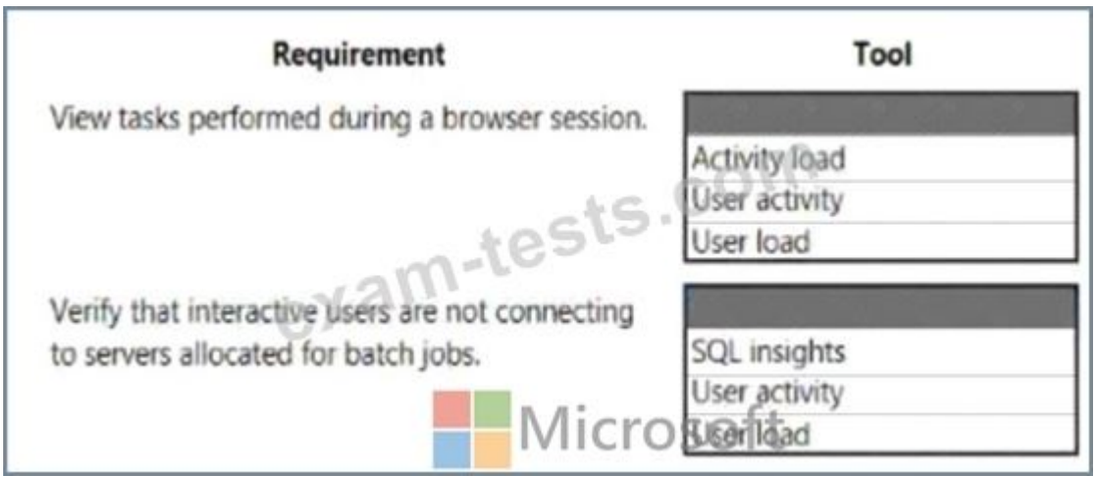

The environment administrator must be able to do the following:

* View tasks performed during a browser session.
* Verify that interactive users are not connecting to servers allocated for batch jobs.

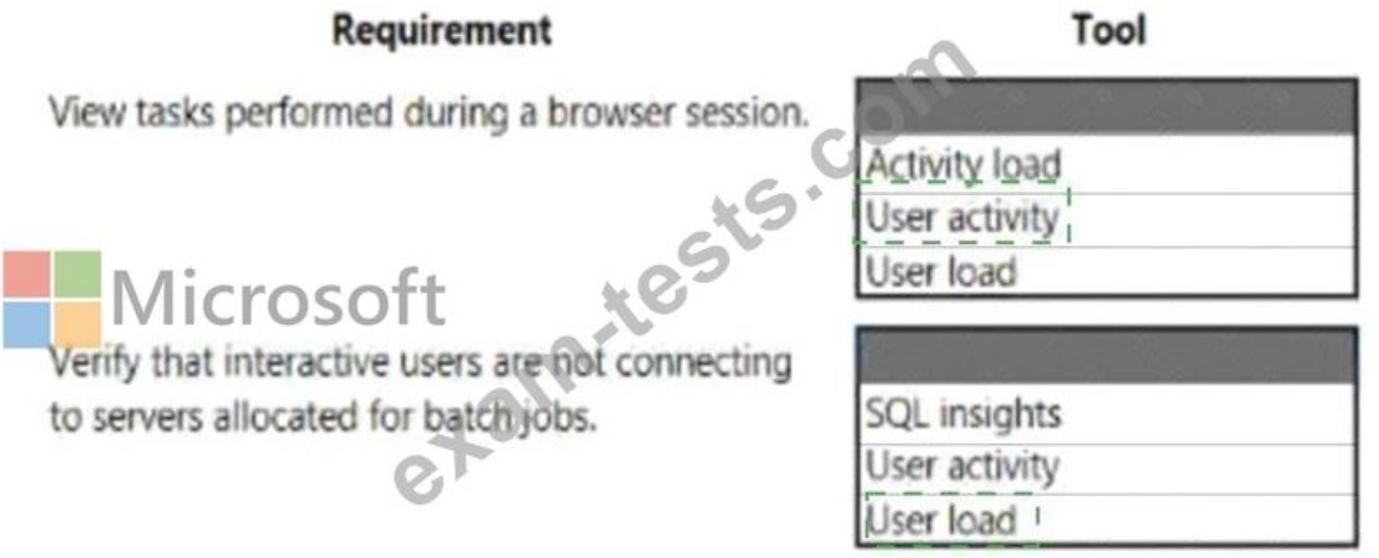

You need to determine which environment monitoring toots meet the requirements.

Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Box 1: User activity
The User activity grid shows the various activities that users performed, based on their session timestamp.
Box 2: User Load
The User load section shows all the system users. Each chart shows the time that the user spent on a specific machine.
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/monitoring-diagnostics

NEW QUESTION: 234
A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).
Development environments must be licensed for the duration of the implementation.
You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements.
Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Box 1: Server and Cloud Enrollment (SCE)
The Server and Cloud Enrollment (SCE) is a licensing vehicle under the Microsoft Enterprise Agreement that enables organizations to standardize on one or more Microsoft Server and Cloud technologies.
To enroll, an installed base-wide commitment, or monetary commitment in the case of Azure, is required to one or more of the following four SCE components:
* Core Infrastructure
* Application Platform
* Developer Platform
* Microsoft Azure
Enrolling in SCE requires the following:
* Enterprise Agreement: Although you need to sign an Enterprise Agreement, an Enterprise Enrollment for Desktop is not needed to qualify.
* Annuity coverage: 100 percent Software Assurance or Subscription coverage is required on your install base for each product family that you commit to. This includes those licenses that were not covered by Software Assurance when you entered the program.
Box 2: Azure Subscription Environment
Reference: https://www.microsoft.com/licensing/docs/view/Enterprise-Agreement-EA-EAS-SCE

NEW QUESTION: 235

You need to recommend solutions for City Power and Light's new system.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

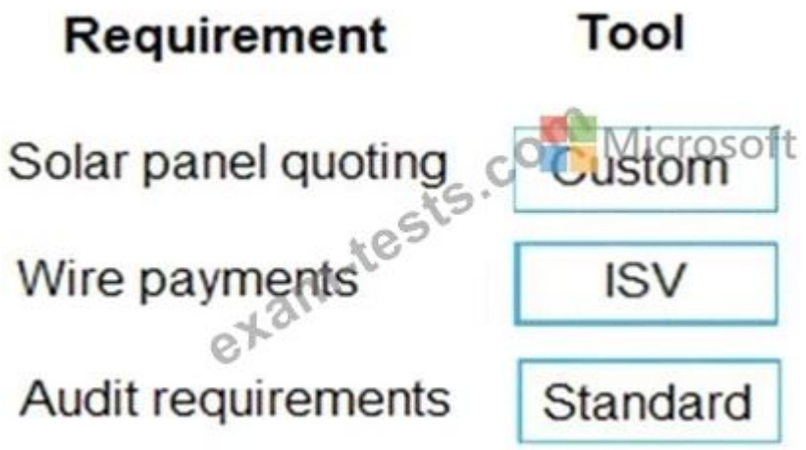

Answer:

Explanation:

Graphical user interface, application Description automatically generated

Topic 3, Margie's Travel

Case Study

Background

Margie's

Travel company (http://www.margiestravel.com/) provides travel services to consumers. These services include package offers, special deals, and excursion add-ons such as jet ski and horseback rides in Jamaica.

Margie

's Travel negotiates rates with multiple vendors and secures bundled pricing for consumers, serving as a travel broker. Margie's Travel only sells services and does not have any tangible products or merchandise.

Margie's Travel began in 1994 when Margie, CEO, and president, planned group trips for her friends in the United States (US). As this grew organically. Margie's created a second company based in Jamaica, followed by the acquisition of a third company in the United Kingdom (UK). The company has grown fast challenging the current systems that support the business model. Margie has determined it is time to implement Dynamics

36S Finance.

Applications and environment

The current system has the following structure:

* In the US. employees use Software A. accounting software, which is a desktop installation package for small businesses and single users.
* In the UK. employees use Softwares, ERP (enterprise resource planning) software installed on local servers.

The cost of maintaining Software B licensing is high, and Margie's Travel has decided against the software and associated overhead costs.

* In Jamaica, employees use Software C. a homegrown application based on spreadsheets, local sales representatives use pen and paper in the field.
* Margie's Travel employees use personal email addresses and chat tools and text each other directly due to the lack of corporate tools.
* IT department resources are located in the US and are responsible for management of all software support.

* Margie's Travel company does not have standardized processes across the organization.
* The manager in each country/region is responsible for system downtime. This has proven to be a challenge due to the multiple time zones across the organization and the centralized IT department.

Vendors and purchasing

As customers purchase packages. Margie's Travel can claim rebates with the providing vendor for every package sold. The rebates are claimed quarterly, and internal workflows have been established for approval prior to vendor submission. The workflows for package offerings eligible for rebates can be complex. User2 has created Visio diagrams for the associated approval processes.

Customer relations

* Customers exist in all three current countries/regions where Margie's Travel operates.
* Margie's Travel offers consumers a loyalty program. Consumers can earn points per dollar spent across all in countries/regions in which Margie's operates. The loyalty program is currently managed by using a spreadsheet.

Application and environment

* All three countries/regions must use Dynamics 365 Finance.
* The system must allow for updates to be applied at the same time as they are periodically released.
* Margie's Travel requires that the new business processes be standardized and follow industry best practices.
* Margie's Travel requires implementation of Office 365 and Microsoft Teams to streamline operations. The IT department will be responsible for troubleshooting these applications, along with Dynamics 365 Finance.
* The infrastructure team must ensure that separate environments are created for development and build, prior to moving to test and eventually gold environments.
* The infrastructure team must move the code for the loyalty program to a test environment.
* The CTO has directed the infrastructure team to guarantee they are on the most current version available at the time of go-live.
* The go-live activities must be coordinated across all countries/regions, with data validation planned for each time zone.
* Once user acceptance testing (UAT) has been completed, the project manager must report the number of tenants for production to Microsoft.
* A report must show seasonality and weather patterns so that Margie's Travel does not offer excursions during timeframes where severe weather is predicted.
* Sales representatives in the field will only be licensed for Microsoft 365 and Microsoft Power Platform.

Customer relations

* Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.

* Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK.
This feature is not planned for the initial system rollout: however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.
* New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.
Vendor negotiations
* The rebates cannot be claimed because disparate systems today do not allow for consolidation to ensure that thresholds are met to claim rebates.
* The accounts receivable and accounts payable departments are unclear about the workflows associated with the rebate process. User2 must ensure that representatives from each department validate that they have tested their respective steps in the overall process. Testing feedback must be communicated to User2.
Customer relation
* Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.
* Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK.
This feature is not planned for the initial system rollout: however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.
* New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.

NEW QUESTION: 236
A company has identified a bug in Dynamics 365 Supply Chain Management
The bug has been found in the Lifecycle Services (LCS) Issue search tool with an open status and no hotfix attached.
You need to determine how the company should respond to this situation.
What should you recommend7
A. Pause updates
B. Update to the latest platform version.
C. Enter a support ticket
Answer: (SHOW ANSWER)

NEW QUESTION: 237

You are a Dynamics 365 for Finance and Operations system administrator.
You have 50 identified purchase order numbers that are not used in the system and are not being recycled.
Why they are missing is unknown. Purchasing operations is currently operating around the clock and no downtime can occur.
You need to use the missing numbers in the system.
What should you do?
A. Change the number sequence to non-continuous and create the new purchase orders
B. Change the number sequence to continuous and create the new purchase orders
C. Run Automatic cleanup of number sequence and create the new purchase orders
D. Run the Number sequence wizard for the purchase order number sequence
E. Change the number sequence to manual, then manually assign the number sequences to the new purchase orders
Answer: C (LEAVE A REPLY)

NEW QUESTION: 238
A company uses a legacy finance application that runs on a single SQL Server instance. The company plans to implement Dynamics 365 Finance. The following table describes the current implementation and design decisions for the new implementation:

Feature	Current application	Dynamics 365 implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

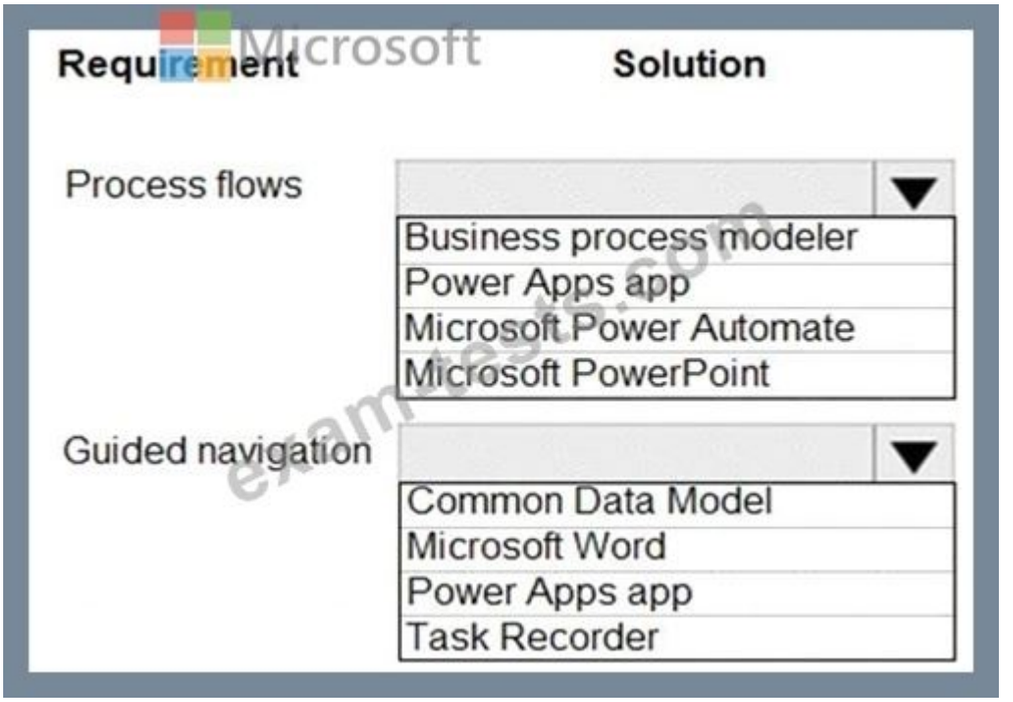

exam-tests.com Microsoft

You need to identify the gap in the migration plan. Which requirement should you identify as a gap?
A. Business logic
B. Users
C. User Interface
D. Reports
E. Data
Answer: (SHOW ANSWER)
Reference:
https://docs.microsoft.com/en-us/office365/enterprise/add-several-users-at-the-same-time

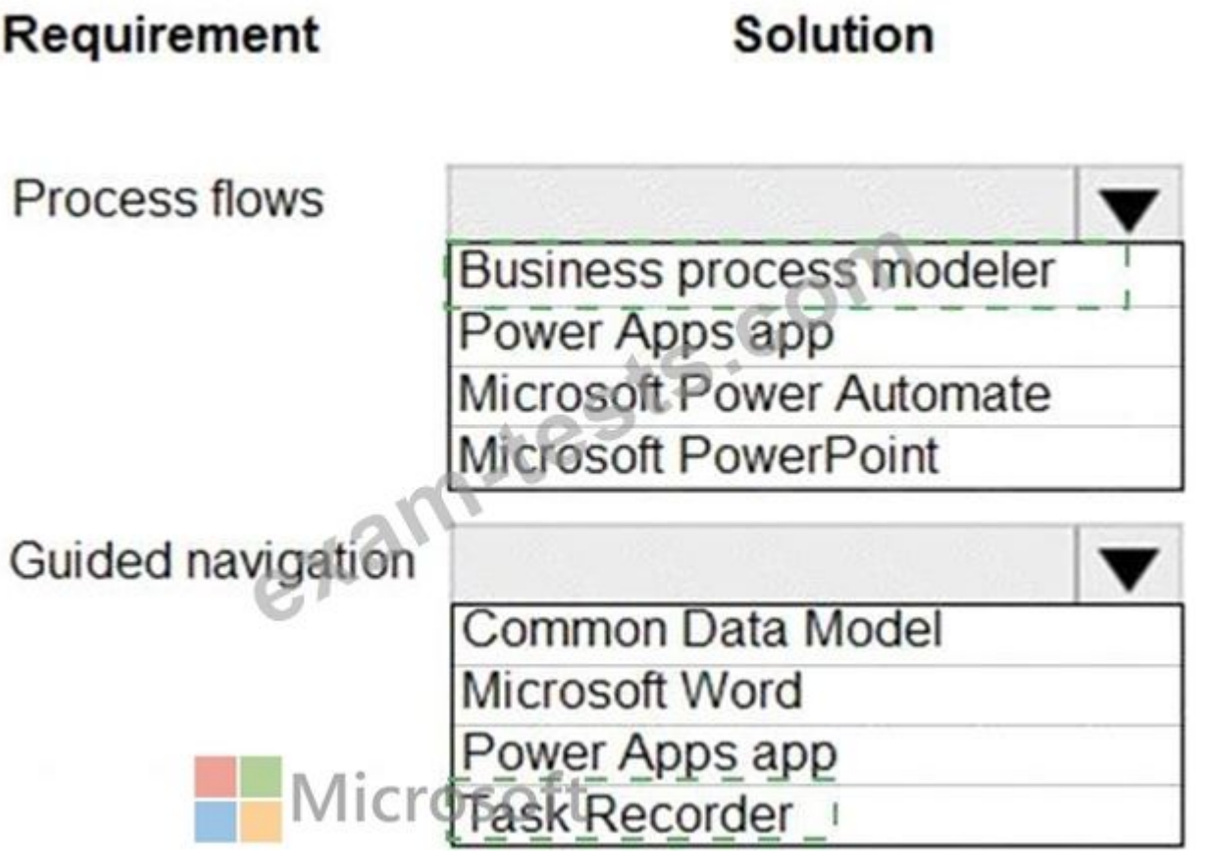

NEW QUESTION: 239
A company is implementing Dynamics 365 Finance. The company is in the FastTrack program.

User experience is a high priority for this implementation. The company wants to design the solution for ease of use, aesthetics, and consistency of experience.
You need to determine in which session user experiences are designed.
What is the appropriate session?
A. Project kickoff meeting
B. Implementation workshop
C. Go-live Readiness workshop
D. Solution Blueprint Review workshop
Answer: (SHOW ANSWER)
The Implementation workshops includes User experience design:
Identify key goals and design elements the customer is leveraging to deliver an optimal user experience.
Agenda topics:
Ease of use - legacy system mapping
Ease of use - simplicity/efficiency
Aesthetics - ISV alignment
Aesthetics - corporate branding
Performance - speed
Consistency of experience
Mandatory attendees are solution architects, functional leads, and technical leads.
Recommended attendees include stakeholders from the customer and partner team

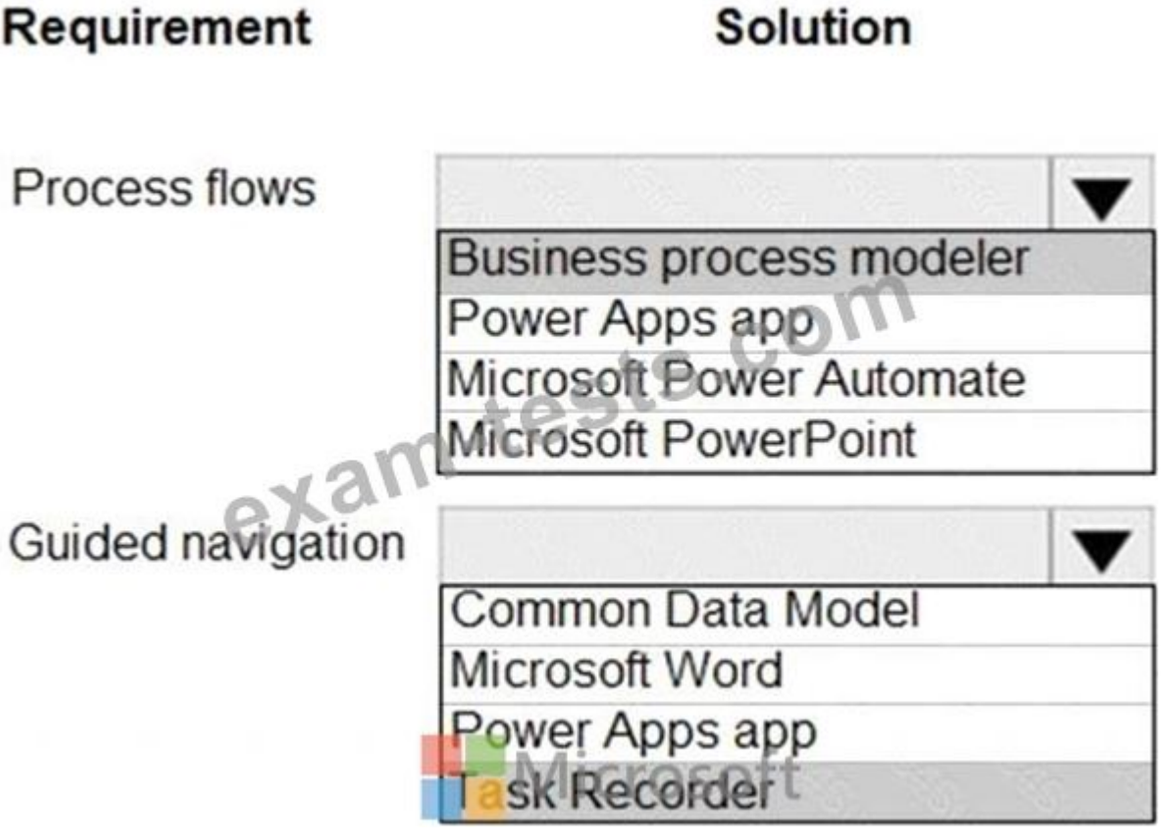

NEW QUESTION: 240
You need to recommend a tool to meet the solution requirement.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 248

A distribution center uses Dynamics 365 Supply Chain Management.

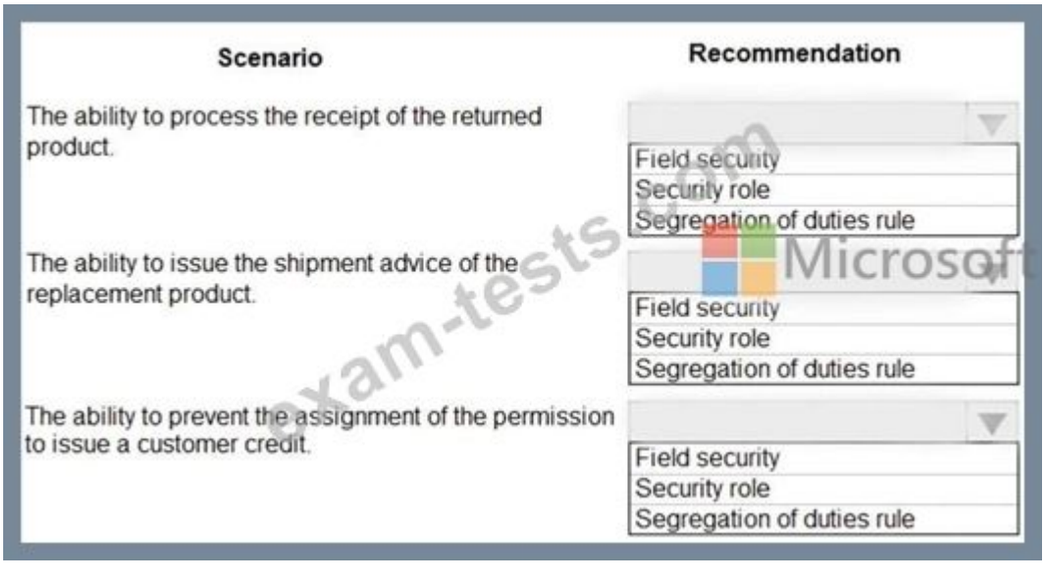

When product returns are received at the distribution center, they are inspected, and a replacement is sent to the customer. Customer service processes both the return receipts and replacement orders to speed up the process.

The system must be able to prevent a single user from completing an entire return process.

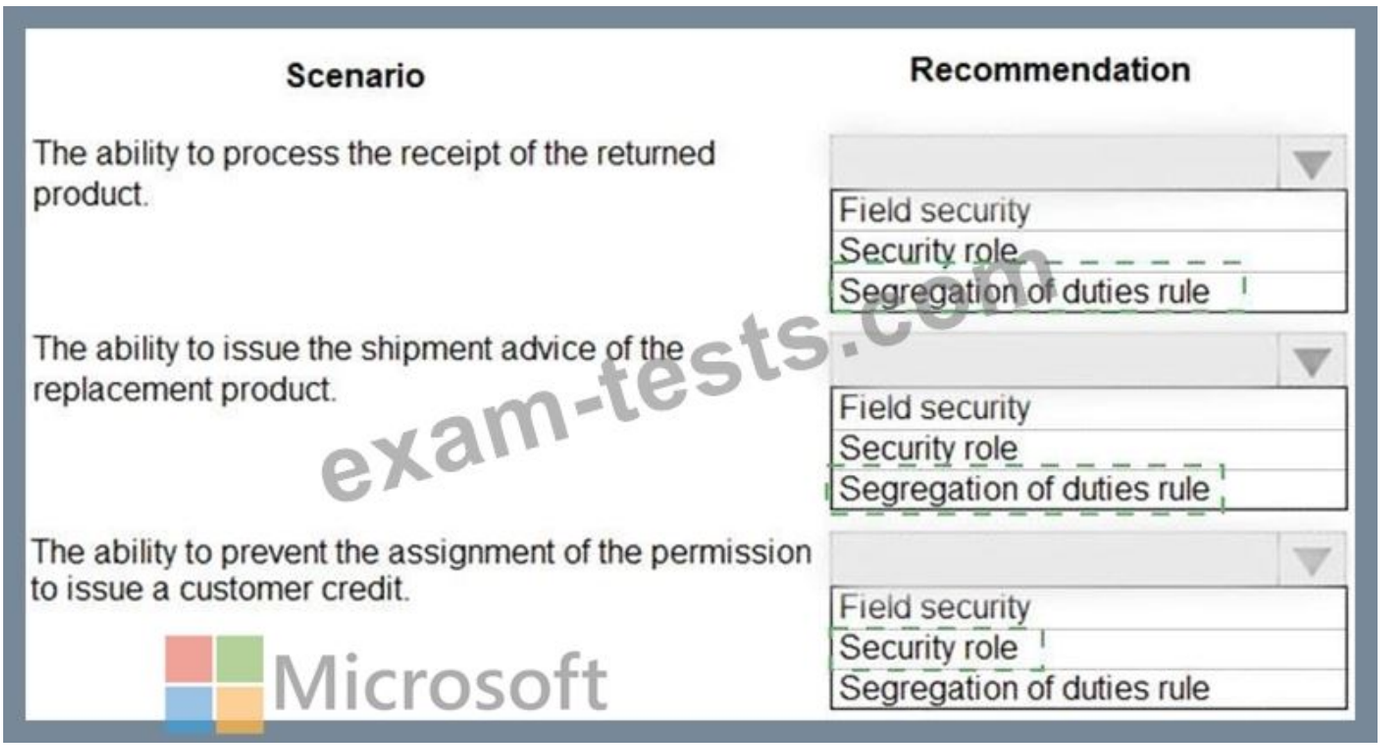

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

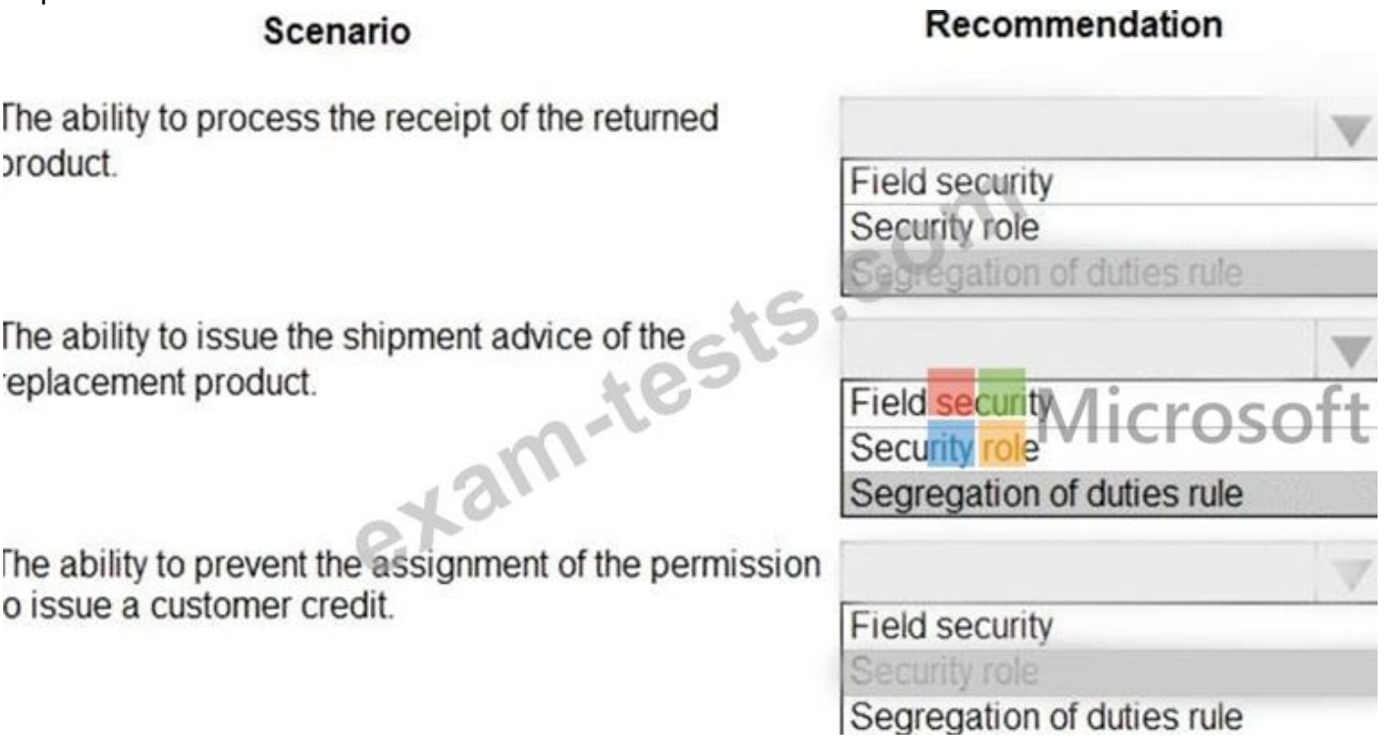

NOTE: Each correct selection is worth one point.

Answer:

Explanation

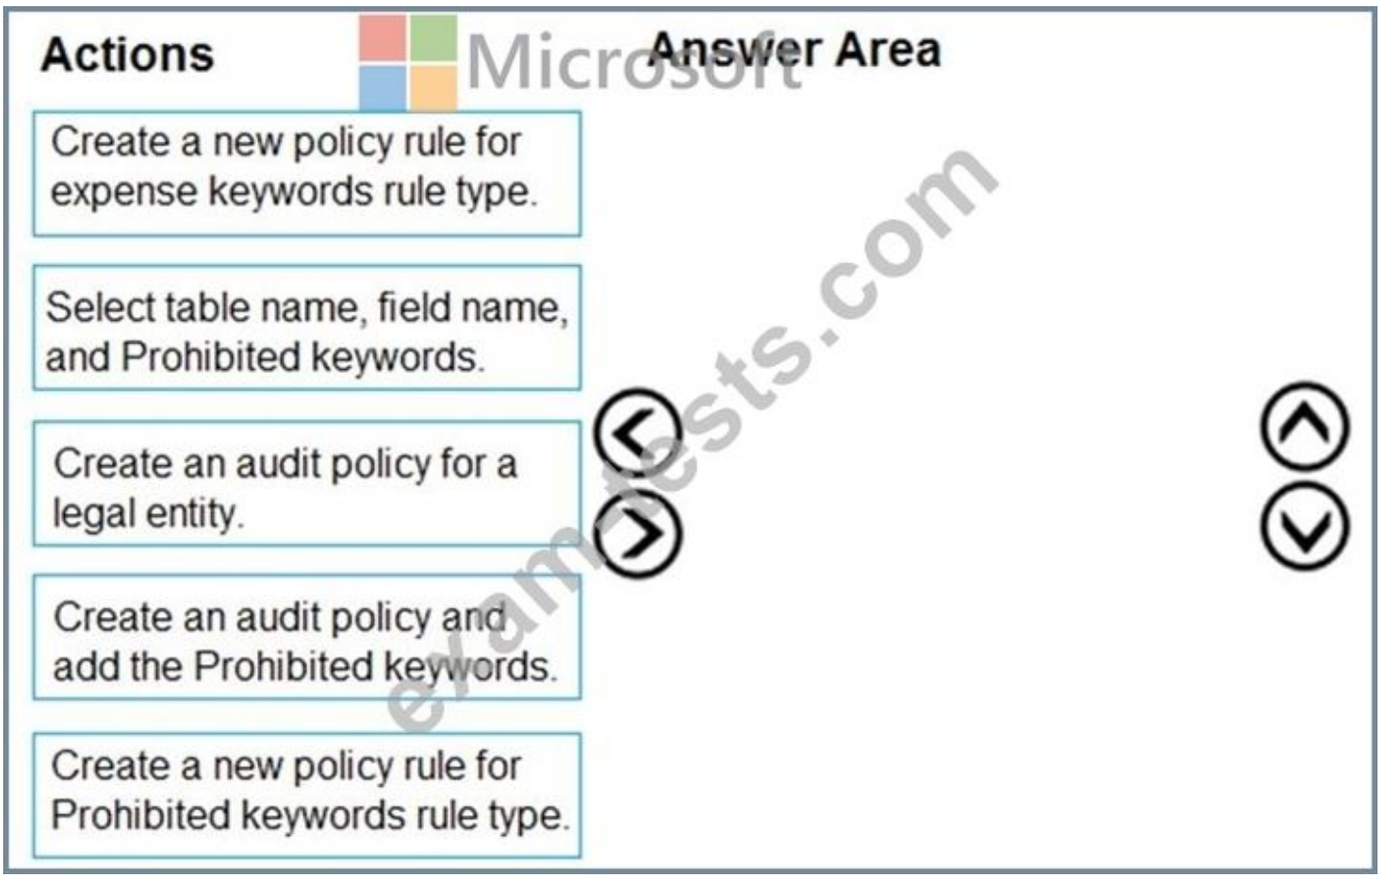

NEW QUESTION: 249

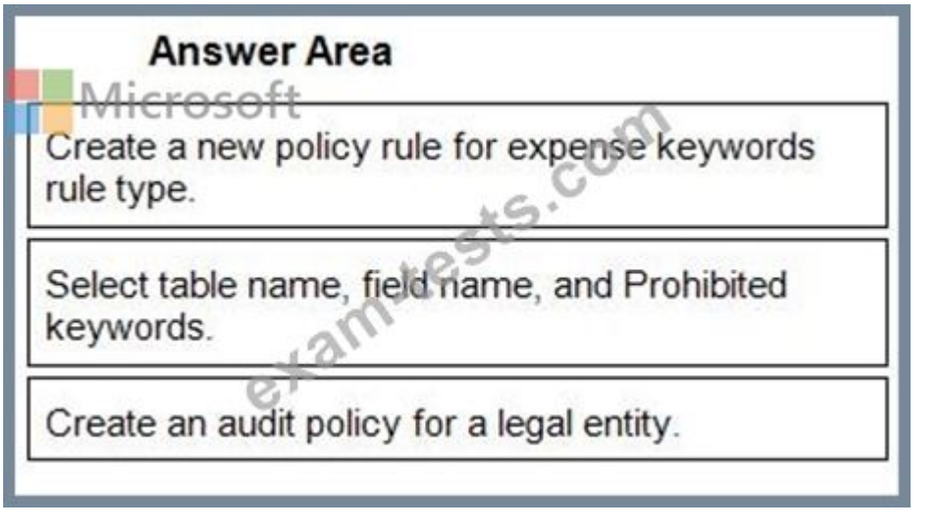

Company policy restricts employees from filling expense reports for the reimbursement of alcoholic beverages.

You need to recommend a solution that checks all expense reports for this requirement.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

1 - Create a new policy rule for expense keywords rule type.

2 - Select table name, field name, and Prohibited keywords.

3 - Create an audit policy for a legal entity.

Reference:

https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/audit-policy-rules

https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/tasks/define-audit-policies-source-documents

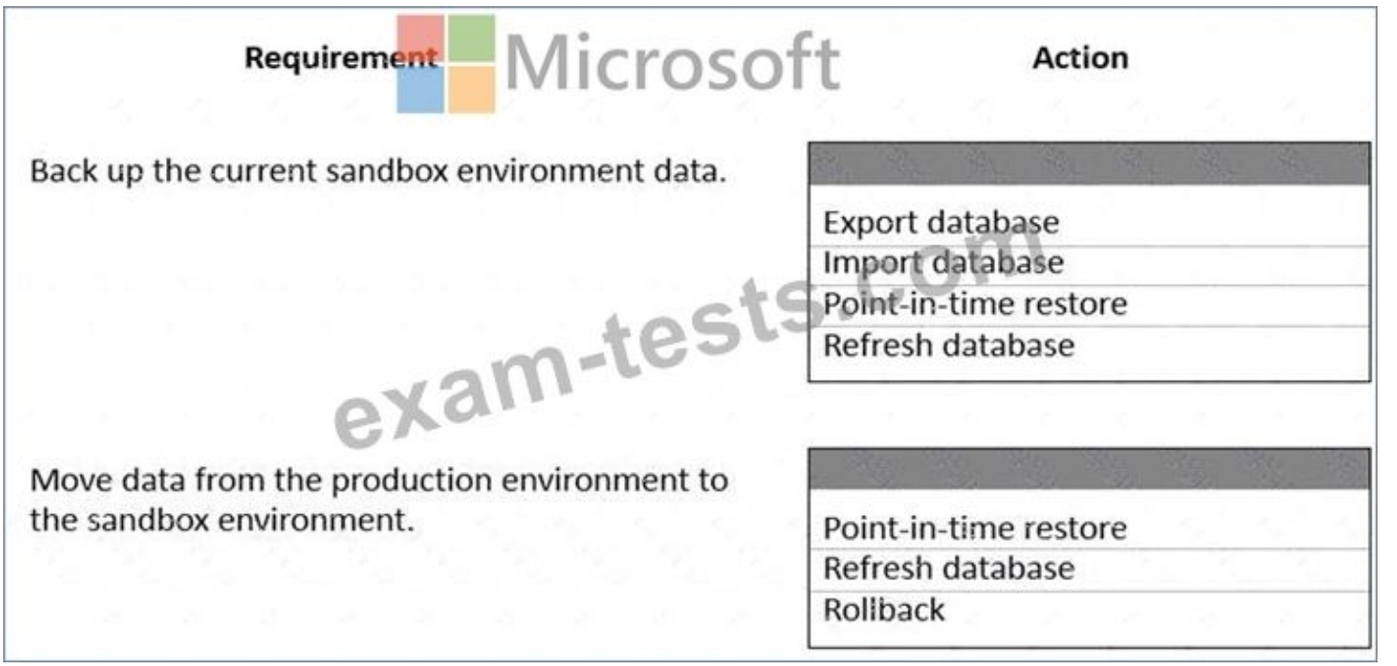

NEW QUESTION: 250

A company with multiple legal entities implements Dynamics 365 Finance. The company does not want to purchase additional licensing or incur development costs.

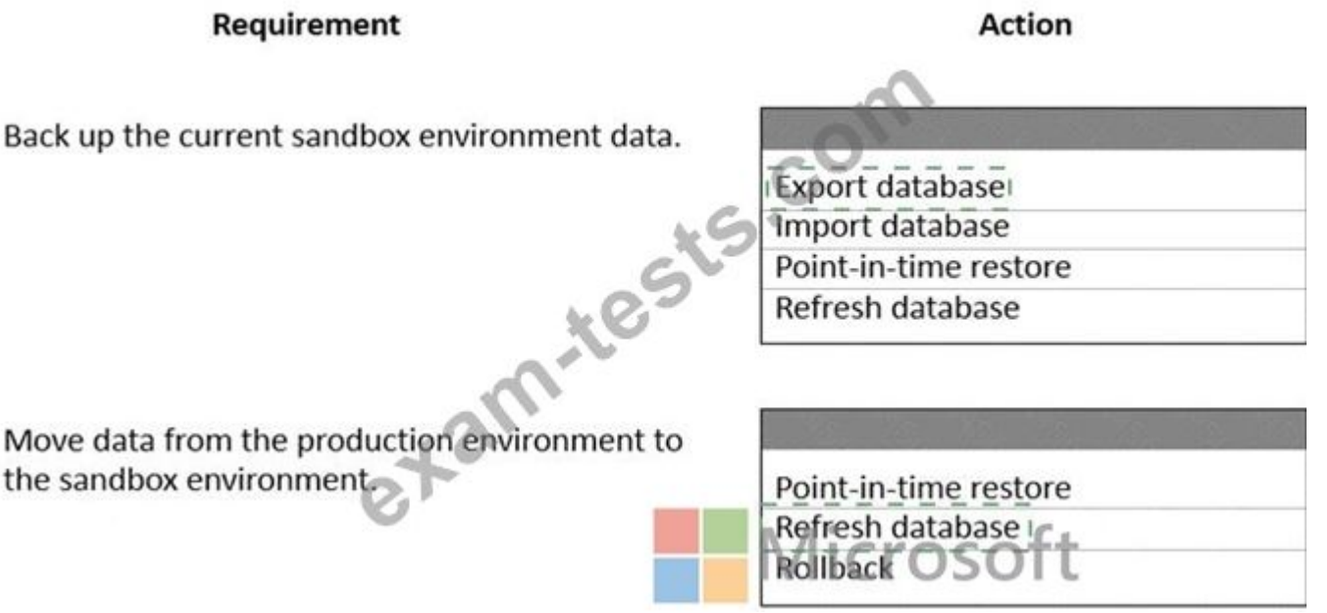

The company's controller notes that vendors exist in multiple companies. The system does not apply and does not post payments to the correct company.
The controller notes that a company-specific report exists for vendor payment journals.
You must replace the single company-specific report with a global report that displays the vendor payment journal status across all companies in the organization for a single vendor.
You must minimize development and creation of new reports.
You need to identify a tool to create the report.
What should you recommend?
A. Financial Reporter
B. Electronic reporting tool
C. View
D. SQL Server Reporting Services (SSRS)
E. Power BI
Answer: A (LEAVE A REPLY)
Financial reporting for the application allows financial and business professionals to create, maintain, deploy, and view financial statements. It moves beyond traditional reporting constraints to help you efficiently design various types of reports.
Financial reporting includes dimension support. Therefore, account segments or dimensions are immediately available. No additional tools or configuration steps are required.

NEW QUESTION: 251
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the slated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen A company timplementing Dynamics 365 Finance. The company uses Microsoft 365 apps. The company wants to integrate Microsoft word and Excel into Dynamics 365 Finance. You need to identity the underlying technology that is required Solution: Lifecycle Services (ICS) Does the solution meet the goal?
A. No
B. Yes
Answer: B (LEAVE A REPLY)

NEW QUESTION: 252
A company uses Dynamics 365 Supply Chain Management.
A user reports an error on a transaction in the production environment that occurred 30 days ago.
You need to move the current data from the production environment to the sandbox environment to troubleshoot the transaction error. You must back up the sandbox environment before you copy data to the production environment.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

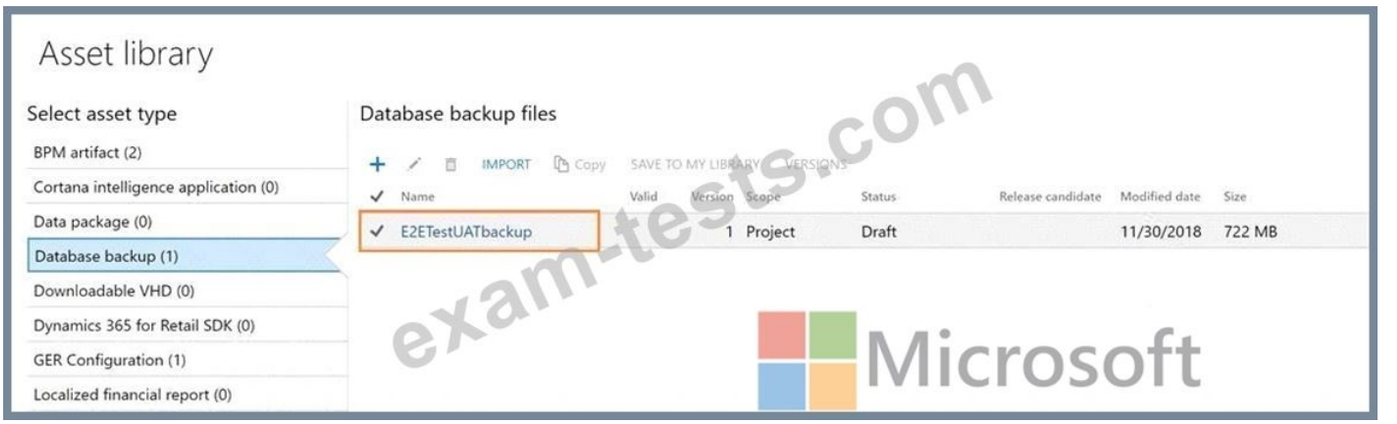

Box 1: Export database

Export a database

Dynamics Lifecycle Services (LCS) to export a database from a sandbox user acceptance testing (UAT) environment to the Asset library.

After the export operation completes successfully, sign out of the servicing operation on your Environment details page. You can then see the asset in your Asset Library in the Database backups section.

Graphical user interface, text, application, Word Description automatically generated

The .bacpac files are stored here and can be manually downloaded to your Tier 1 developer environments for import.

Box 2: Refresh database

Refresh database

You can use Microsoft Dynamics Lifecycle Services (LCS) to perform a refresh of the database to a sandbox user acceptance testing (UAT) environment. A database refresh lets you copy the transactional and financial reporting databases of your production environment into the target, sandbox UAT environment. If you have another sandbox environment, you can also copy the databases from that environment to your target, sandbox UAT environment.

NEW QUESTION: 253

A company use Dynamics 365 Business Central.

The company identifies the following issues:

Users report they cannot perform planning and dispatching of service orders or track bills of material in the system.

The finance department says that licensing costs are higher than budgeted.

You need to recommend a solution to address the issues. What should you recommend?

A. Perform a fit-gap analysis. Implement service order management and manufacturing business processes and license changes.

B. Use the Lifecycle Services business process modeler to create service order management and manufacturing tasks in the BPM Library.

C. Configure all users as Business Central Essentials users.

D. Ensure that the service order management and manufacturing processes steps are documented in a flow chart.

E. Configure all users as Business Central Premium users.

Answer: (SHOW ANSWER)

NEW QUESTION: 254

A company plans to implement Dynamics 365 Supply Chain Management. The company has the following requirements:

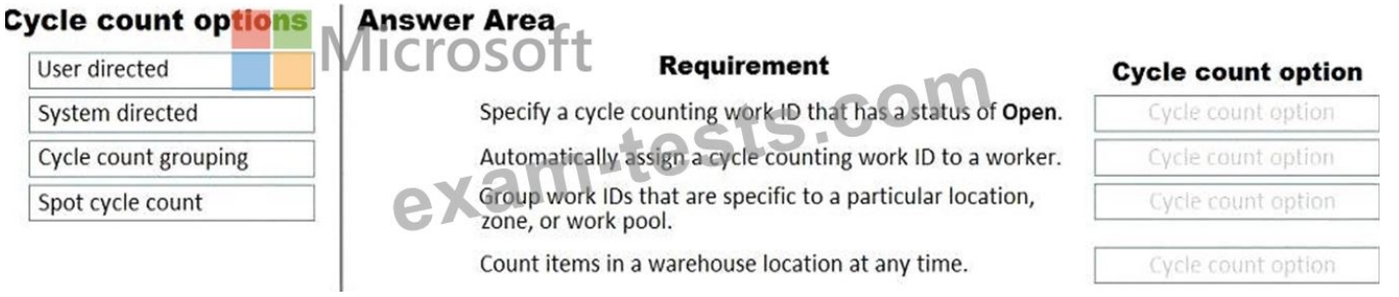

* Use mobile devices for warehouse activities including cycle counting.
* Set up automatic cycle counting work IDs and assign the IDs to workers.
* Ensure that workers can group work IDs that are specific to a particular location, zone, or work pool.
* Ensure that workers can specify a cycle counting work ID that has a status of Open.
* Ensure that workers can count items in a warehouse location at any time.

You need to recommend cycle counting options that meet the company's requirements.

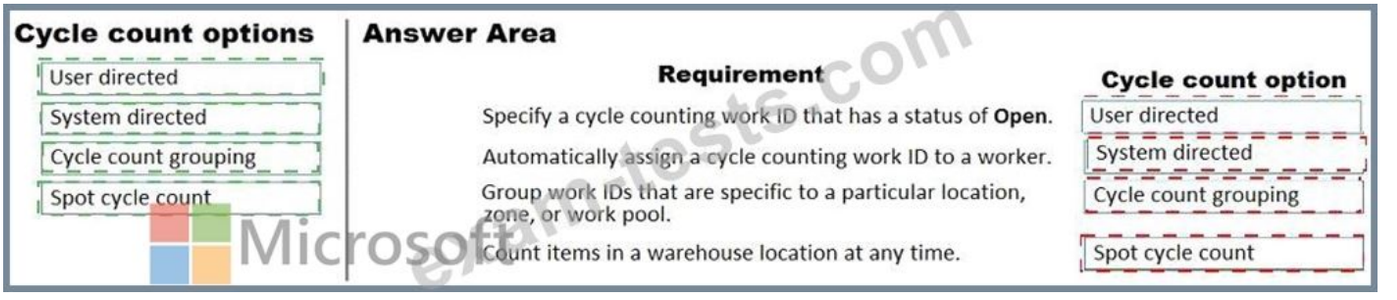

What should you recommend? To answer, drag the appropriate counting options to the correct requirements.

Each counting option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

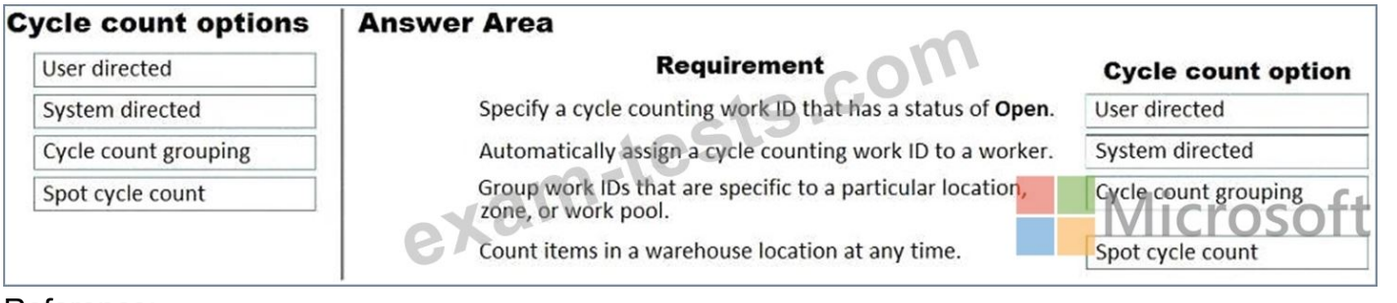

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

https://docs.microsoft.com/en-us/dynamics365/supply-chain/warehousing/cycle-counting

NEW QUESTION: 255

A company is evaluating licensing for Dynamics 365 Finance.

The company requires expense management functionality that enables expense reports to be submitted by various users. Expense approvals will be a back-office function.

You need to determine the license type for each role.

Which license types are required? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Role	License type
Expense creator	Device Dynamics 365 Finance Team Member
Expense approver	Dynamics 365 Finance Dynamics 365 Project Operations Dynamics 365 Supply Chain Management

Answer:

Role	License type
Expense creator	Device Dynamics 365 Finance Team Member
Expense approver	Dynamics 365 Finance Dynamics 365 Project Operations Dynamics 365 Supply Chain Management

Explanation

NEW QUESTION: 256
A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. You create a security role named ReadOnlyUserAR and add the role to users.
You create a custom duty named
You need to recommend how to implement the privileges.
Which three actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Add the Customers privilege to the CustCustomer.
B. Add the CustCustomerMasterInquire duty to ReadOnlyUserAR.
C. Add the Customers privilege to CustCustomerMasterInquire.
D. Add CustomerViewList to ReadOnlyUserAR.
E. Add ReadOnlyUserAR to users.
F. Add the Customers privilege to CustomerViewList.
Answer: (SHOW ANSWER)
Topic 2, City Power and Light Case Study
This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

City Power and Light is a publicly traded electric utility company. The company has a corporate office, four regional field offices, two subsidiary companies that produce solar energy, and one wind power subsidiary.

City Power and Light has 50 percent ownership in the solar energy company. The company fully owns the wind power company but operates it separately from other businesses.

City Power and Light currently operates with varying integrated legacy systems and has difficulty assembling company financials. Migrating these systems and workloads to a common platform would improve visibility into the business and inform decision making. The company plans to implement Dynamics 365.

Legacy systems

* The legacy system does not have audit capability of configurable workflow based on business logic
* The legacy paper-based purchasing system does not allow parent-child relationships for vendors. Two signatures are required for purchase requisitions.
* Purchase orders are entered into the system manually based on signed purchase requisitions printed to PDF and then emailed to the vendor.
* The legacy procurement system does not have a parent-child relationship for master data management.

Financials

* All financial consolidate up to City Power and Light Holding, LLC.
* The finance department employees are currently able to create as well as pay invoices.

Customers

Sales orders from the website are uploaded into the system manually once a day .

International and domestic customers currently post to the same receivable account. At the end of the month, these have to be separated into domestic and international receivable accounts.

Other information

* There are multiple active acquisitions expected during trie implementation timeline.
* The item master data for solar panel configurations has multiple variables and variants. As a complex.

General

* Flexible implementation approach to support frequently changing business needs and requirements.
* A phased roll-out is needed due to the complexity of the business.

* Any offsite Travel meals submitted on an expense report without corresponding flight and hotel expenses need to be reviewed.
* Ten percent of vendor invoices should be reviewed to ensure they meet company policy.
* Testing of business processes needs to be automated.
* Customer surveys must be sent out after email customer service interactions. Surveys must contain a rating system and a way for customers to add comments.
* Employees require one central tool for internal communication, phone calls, and file sharing.
* Sales representatives need an enterprise quoting tool for solar panel customers.

Technical

* A cloud-based financial and operational system, accessible on mobile devices.
* The ability to keep a legacy meter reading application with the ability to use the data in aggregated operating reports.
* Business processes should be tested with different variables for the same process as part of the testing plan.

Functional

* Establish and document business processes to assist with on-boarding new employees more efficiently.
* Parent-child relationships need to be established for vendors with regional offices. Purchasing locations vary from invoicing locations.
* The ability to create automated wire payments.

Requisitions

* All purchase requisitions over $50 need to be approved by a manager.
* All purchase requisitions over $1,000 require senior manager approval.
* Multiple purchase requisitions to the same vendor should be combined.

Sales

The item master data for solar panel configurations have multiple variables and variants. This leads to complex quoting and sales orders.

Sales representatives must be able to create automated wire payments.

Issues

* A limited number of users are available for testing.
* User1 reports that the date fields are not saving during formula entry with saved variables functionality in the RSAT tool.
* The purchasing department is seeing duplicate vendor records during data conversion.
* Audit notes from the prior year indicate improvement is needed in roles and responsibilities related to financial management and security roles.
* User2 reports that parts ordered on P0123 were never received and the vendor has said they never received the PO.
* User3 provides feedback that important steps during journal entry are being forgotten and new users need hands-on guidance.
* Service technicians report that they do not always have the appropriate tools or parts with them requiring multiple service calls.

NEW QUESTION: 261

A telecom provider uses Microsoft SharePoint to track and manage mobile phones that are issued to employees.

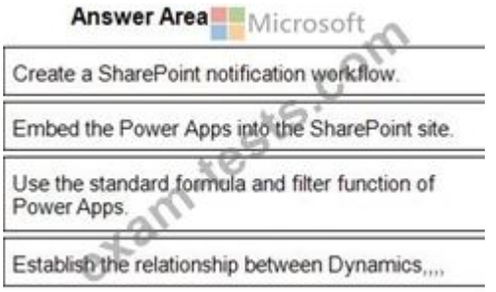

All information about employee-issued mobile phones be visible in Dynamics 365. Managers must be able to issue new phones directly from the system.

You need to design an integration solution using Dynamics 365 and SharePoint.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

1 - Create a SharePoint notification workflow.

2 - Embed the Power Apps into the SharePoint site.

3 - Use the standard formula and filter function of Power Apps.

4 - Establish the relationship between Dynamics,,,,

NEW QUESTION: 262

A company plans to build Power Apps apps as part of their digital transformation strategy.

App makers require access to individual environments to learn how to build apps through the Community Plan. Tenant users require access to an environment in which they can test apps as well as have database backup and restore capabilities.

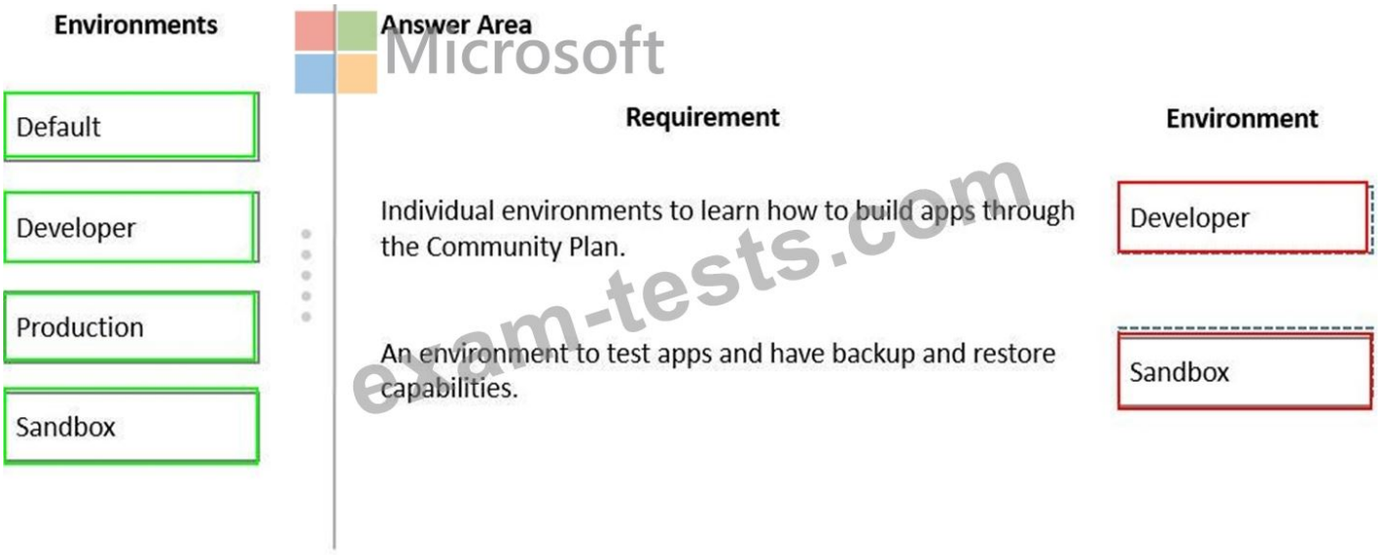

You need to recommend appropriate environments for the company.

What should you recommend? To answer, drag the appropriate environments to the correct requirements. Each environment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

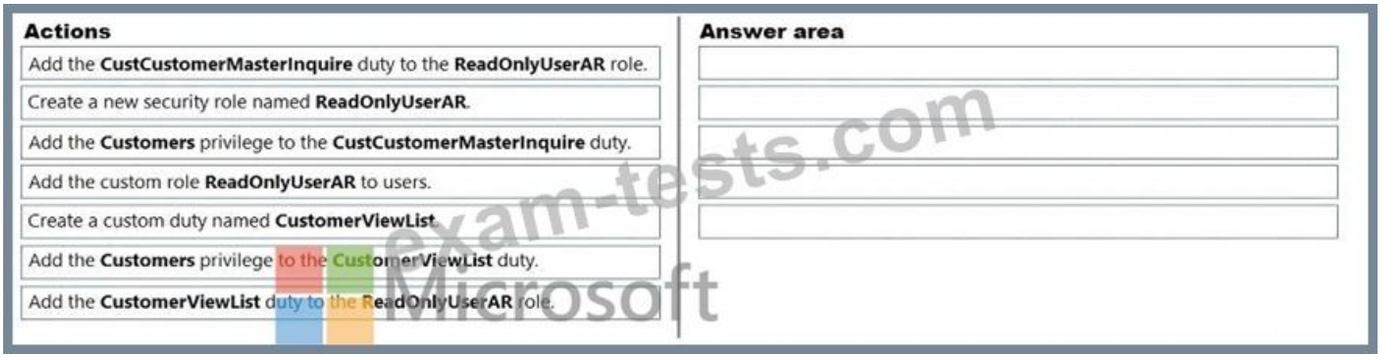

NEW QUESTION: 263

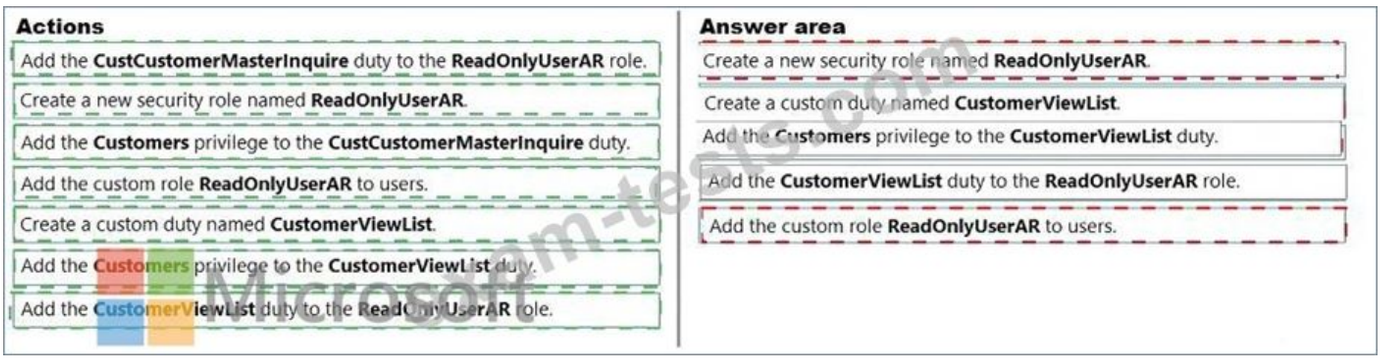

A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. It must be accurately reported during a security audit.

You need to recommend how to implement the privileges.

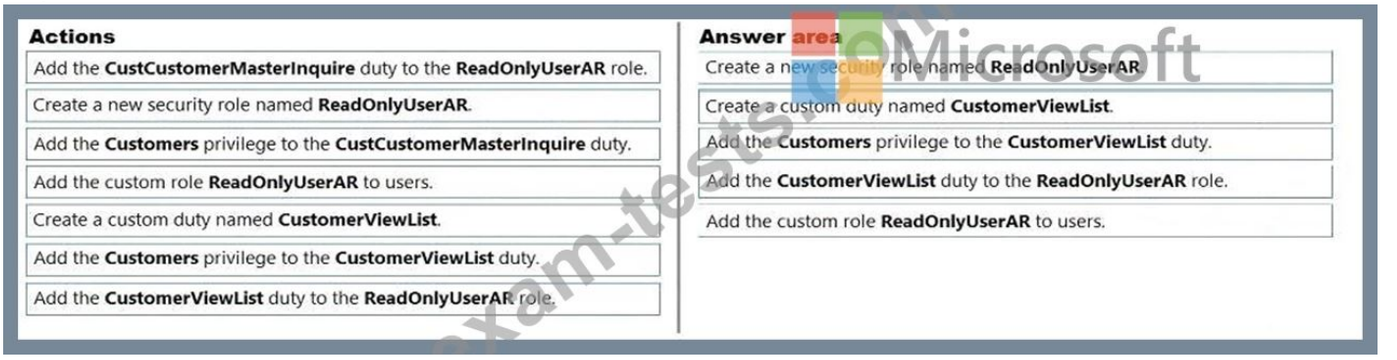

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 264

A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).

Development environments must be licensed for the duration of the implementation.

You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements.

Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

exam-tests.com

Explanation:

Box 1: Server and Cloud Enrollment (SCE)

The Server and Cloud Enrollment (SCE) is a licensing vehicle under the Microsoft Enterprise Agreement that enables organizations to standardize on one or more Microsoft Server and Cloud technologies.

To enroll, an installed base-wide commitment, or monetary commitment in the case of Azure, is required to one or more of the following four SCE components:

* Core Infrastructure
* Application Platform
* Developer Platform
* Microsoft Azure

Enrolling in SCE requires the following:

* Enterprise Agreement: Although you need to sign an Enterprise Agreement, an Enterprise Enrollment for Desktop is not needed to qualify.
* Annuity coverage: 100 percent Software Assurance or Subscription coverage is required on your install base for each product family that you commit to. This includes those licenses that were not covered by Software Assurance when you entered the program.

Box 2: Azure Subscription Environment

NEW QUESTION: 265

A company plans to implement Dynamics 365 Finance.

The company's current system contains sales tax-related data.

You need to design a solution that sequences the transfer of sales tax codes and sales tax groups.

What should you do?

A. Design a data migration scenario.

B. Write customization requirements.

C. Analyze data integration points.

D. Design user acceptance testing processes.

Answer: (SHOW ANSWER)

Section: Design solution components

NEW QUESTION: 266
You need to recommend a solution for the business process testing plan. What should you recommend?
A. SysTest framework
B. Chain test cases
C. Derived test cases
D. LCS Business process library
Answer: D (LEAVE A REPLY)

NEW QUESTION: 267
A company is implementing Dynamics 365 Finance.
A series of related data packages must be migrated.
You need to define the sequence of the data packages migration. Which Lifecycle Services tool should you use?
A. Solution management
B. Business process modeler
C. Process data package in the Asset library
D. Software deployable package in the Asset library.
Answer: (SHOW ANSWER)

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lcs-solutions/process-data-packages-lcs- solutions

NEW QUESTION: 268
You need to recommend solutions for City Power and Light's new system.
What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

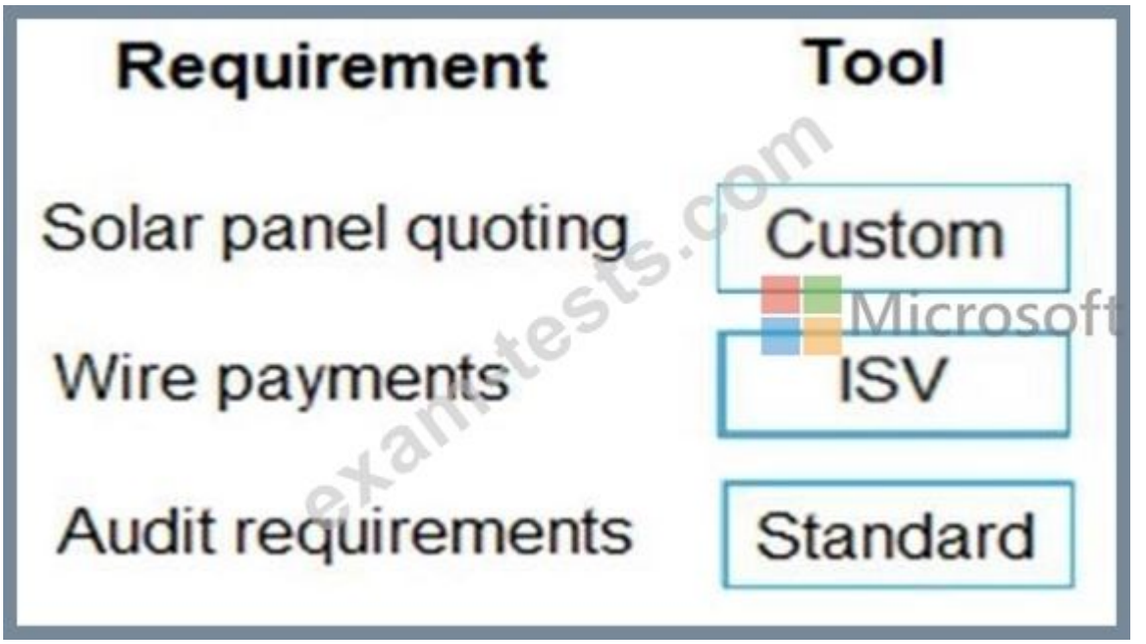

Answer:

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION: 269

A midsize company is enrolled in the self-guided FastTrack program. The company is preparing a Dynamics

365 Supply Chain Management implementation to go Irve.

You need to complete the prerequisites for the Go-live checklist.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: Perform user acceptance testing

Go-live Readiness Review prerequisites

The project team should validate solution readiness. The following prerequisites must be met before the Go-live Readiness Review with Microsoft can be initiated. The production environment can be deployed after the Go-live Readiness Review with Microsoft has been successfully completed.

* User acceptance testing (UAT) and performance testing have been completed or almost completed in a Tier-2 (or higher) environment.

* Etc.

Box 2: Enter a Go-live date

The go-live date in LCS correctly represents the go-live date that you're targeting. This date is the date when end users will start live operations, not cutover activities.

Reference: https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/imp-lifecycle/prepare-go-live

NEW QUESTION: 270

A company is using Dynamics 365 Finance.

You need to ensure that the production environment always uses the latest service updates from Microsoft.

What should you recommend?

A. Deploy a production environment.

B. Set update settings for continuous updates.

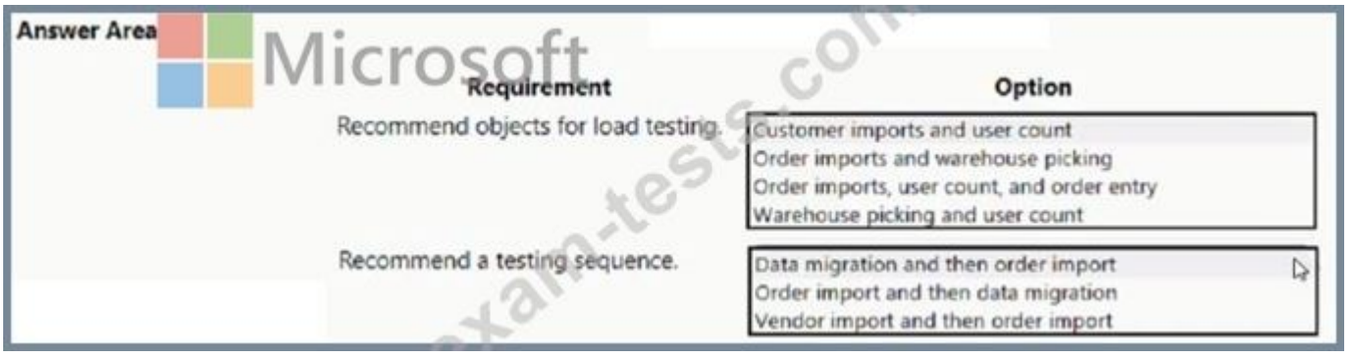

C. Request the update through a service request.

D. Run the code upgrade service to analyze the code.
Answer: (SHOW ANSWER)
Section: Define solution testing and management strategies
Explanation/Reference:

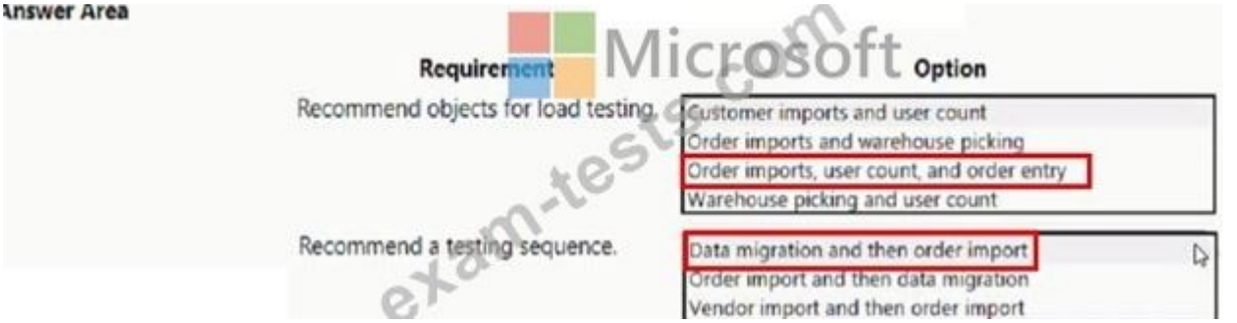

NEW QUESTION: 271
Note: This question is pan of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to is. As a result, these questions will not appear in the review screen.
A company is implementing Dynamics 365 Finance. The company uses Microsoft 365 apps.
The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance.
You need to identify the underlying technology that is required.
Solution: Azure Active Directory (Azure AD)
Does the solution meet the goal?
A. Yes
B. No

NEW QUESTION: 274

A distribution company uses Dynamics 365 Supply Chain Management.

The company has one buyer group for paper products and another buyer group for chemicals.

Each buyer group purchases from separate vendors.

The buyers print individual purchase order confirmations to PDF files and then send the PDF files to their desktop printer.

The company purchases two network printers. Each buyer group receives one printer.

Each buyer group must send PDF files to their own printer.

You need to configure Dynamics 365 Supply Chain Management to support the requirement.

Which two features should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Document Routing Agent

B. Power Automate

C. Print management

D. Electronic reporting tool

E. Power BI

Answer: A,C (LEAVE A REPLY)

A: Install the Document Routing Agent to enable network printing.

The Document Routing Agent is a downloadable application that you can use to enable network printing scenarios. You can enable network printers for specific companies by using in-client administrative pages.
C: Print management is the framework in Dynamics 365 Finance and Operations that allows users to configure print settings for various business documents, including sending emails and archiving. Print management setups are typically separated by module and include nodes for all business documents that are available to be printed.
