NEW QUESTION: 4
You have a Microsoft 365 subscription.
You are planning a threat management solution for your organization.
You need to minimize the likelihood that users will be affected by the following threats:
* Opening files in Microsoft SharePoint that contain malicious content
* Impersonation and spoofing attacks in email messages
Which policies should you create in the Security & Compliance admin center? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Box 1: ATP Safe Attachments

ATP Safe Attachments provides zero-day protection to safeguard your messaging system, by checking email attachments for malicious content. It routes all messages and attachments that do not have a virus/malware signature to a special environment, and then uses machine learning and analysis techniques to detect malicious intent. If no suspicious activity is found, the message is forwarded to the mailbox.

Box 2: ATP anti-phishing

ATP anti-phishing protection detects attempts to impersonate your users and custom domains. It applies machine learning models and advanced impersonation-detection algorithms to avert phishing attacks.

ATP Safe Links provides time-of-click verification of URLs, for example, in emails messages and Office files. Protection is ongoing and applies across your messaging and Office environment. Links are scanned for each click: safe links remain accessible and malicious links are dynamically blocked.

NEW QUESTION: 8

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear In the review screen.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

You create an Azure Advanced Threat Protection (ATP) workspace named Workspace1.

The tenant contains users shown in the following table.

Name	Member of group	Azure AD role
User1	Azure ATP Workspace1 Administrators	*None*
User2	Azure ATP Workspace1 Users	*None*
User3	*None*	Security administrator
User4	Azure ATP Workspace1 Users	Global administrator

You need to modify the configuration of the Azure ATP sensors.

Solution: You instruct User1 to modify the Azure ATP sensor configuration.

Does this meet the goal?

A. Yes

B. No

Answer: A (LEAVE A REPLY)

Explanation
Only Azure ATP administrators can modify the sensors.

NEW QUESTION: 9
You have the Microsoft Azure Active Director (Azure AD) users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

Your company uses Microsoft Intune.

Several devices are enrolled in Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption (BitLocker)	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group4

The device compliance policies in Intune are configured as shown in the following table.

Name	Require BitLocker	Assigned to
Policy1	Not configured	Group3
Policy2	Require	Group4

You create a conditional access policy that has the following settings:
* The Assignments settings are configured as follows:
* Users and groups: Group1
* Cloud apps: Microsoft Office 365 Exchange Online
* Conditions: Include All device state, exclude Device marked as compliant
* Access controls is set to Block access.

NEW QUESTION: 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain. The domain contains 2,000 computers that run Windows 8.1 and have applications installed as shown in the following table.

Name	Application count	Used by
App1	20	Finance department, sales department
App2	100	Marketing department

You enroll all the computers in Upgrade Readiness.

You need to ensure that App1 and App2 have an UpgradeDecision status of Ready to upgrade.

Solution: You set the ReadyForWindows status of App1 to Highly adopted.

Does this meet the goal?

A. Yes

B. No

Answer: B (LEAVE A REPLY)

App1 has a "low install count" (2% or less) so will be Ready to upgrade. We need to change the setting for App2.

The company has the employees and devices shown in the following table.

Location	Employees	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an on-premises Active Directory forest named contoso.com. The forest contains the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Member server
Server3	Network Policy Server (NPS) server
Server4	Remote access server
Server5	Microsoft Azure AD Connect server

All servers run Windows Server 2016. All desktops and laptops run Windows 10 Enterprise and are joined to the domain.

The mobile devices of the users in the Montreal and Seattle offices run Android. The mobile devices of the users in the New York office run iOS.

The domain is synced to Azure Active Directory (Azure AD) and includes the users shown in the following table.

Name	Azure AD role
User1	*None*
User2	Application administrator
User3	Cloud application administrator
User4	Global administrator
User5	Intune administrator

The domain also includes a group named Group1.

Requirements

Planned Changes

Contoso plans to implement the following changes:
* Implement Microsoft 365.
* Manage devices by using Microsoft Intune.
* Implement Azure Advanced Threat Protection (ATP).
* Every September, apply the latest feature updates to all Windows computers. Every March, apply the latest feature updates to the computers in the New York office only.

Technical Requirements

Contoso identifies the following technical requirements:
* When a Windows 10 device is joined to Azure AD, the device must enroll in Intune automatically.
* Dedicated support technicians must enroll all the Montreal office mobile devices in Intune.
* User1 must be able to enroll all the New York office mobile devices in Intune.
* Azure ATP sensors must be installed and must NOT use port mirroring.
* Whenever possible, the principle of least privilege must be used.
* A Microsoft Store for Business must be created.

Compliance Requirements

Contoso identifies the following compliance requirements:
* Ensure that the users in Group1 can only access Microsoft Exchange Online from devices that are enrolled in Intune and configured in accordance with the corporate policy.
* Configure Windows Information Protection (WIP) for the Windows 10 devices.

NEW QUESTION: 37

Topic 2, A . Datum

Overview

Existing Environment

This is a case study Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.
Current Infrastructure
A . Datum recently purchased a Microsoft 365 subscription.
All user files are migrated to Microsoft 365.
All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, user1@us.adatum.com or user2#uk.ad3tum.com.
Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors.
A . Datum uses and processes Personally Identifiable Information (PII).
Problem Statements
Requirements
A . Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365.
Business Goals
A . Datum warns to be fully compliant with all the relevant data privacy laws in the regions where it operates.
A . Datum wants to minimize the cost of hardware and software whenever possible.
Technical Requirements
* Centrally perform log analysis for all offices.
* Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.
* Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.
* Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.
* Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.
* If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.
* A security administrator requires a report that shows which Microsoft 36S users signed in Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.
* Ensure that the users in the New York office can only send email messages that contain sensitive US. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data.

Topic 1, Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The company has the employees and devices shown in the following table.

Location	Employees	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 ES subscription.

Existing Environment

Requirement

The network contains an on-premises Active Directory forest named contoso.com. The forest contains the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Member server
Server3	Network Policy Server (NPS) server
Server4	Remote access server
Server5	Microsoft Azure AD Connect server

All servers run Windows Server 2016. All desktops and laptops are Windows 10 Enterprise and are joined to the domain.

The mobile devices of the users in the Montreal and Seattle offices run Android. The mobile devices of the users in the New York office run iOS.

The domain is synced to Azure Active Directory (Azure AD) and includes the users shown in the following table.

Name	Azure AD role
User1	*None*
User2	Application administrator
User3	Cloud application administrator
User4	Global administrator
User5	Intune administrator

The domain also includes a group named Group1.

Planned Changes

Contoso plans to implement the following changes:

* Implement Microsoft 365.
* Manage devices by using Microsoft Intune.
* Implement Azure Advanced Threat Protection (ATP).
* Every September, apply the latest feature updates to all Windows computers. Every March, apply the latest feature updates to the computers in the New York office only.

Technical Requirements

Contoso identifies the following technical requirements:

* When a Windows 10 device is joined to Azure AD, the device must enroll in Intune automaticaiy.
* Dedicated support technicians must enroll all the Montreal office mobile devices in Intune.
* User1 must be able to enroll all the New York office mobile devices in Intune.
* Azure ATP sensors must be installed and must NOT use port mirroring.
* Whenever possible, the principle of least privilege must be used.
* A Microsoft Store for Business must be created.

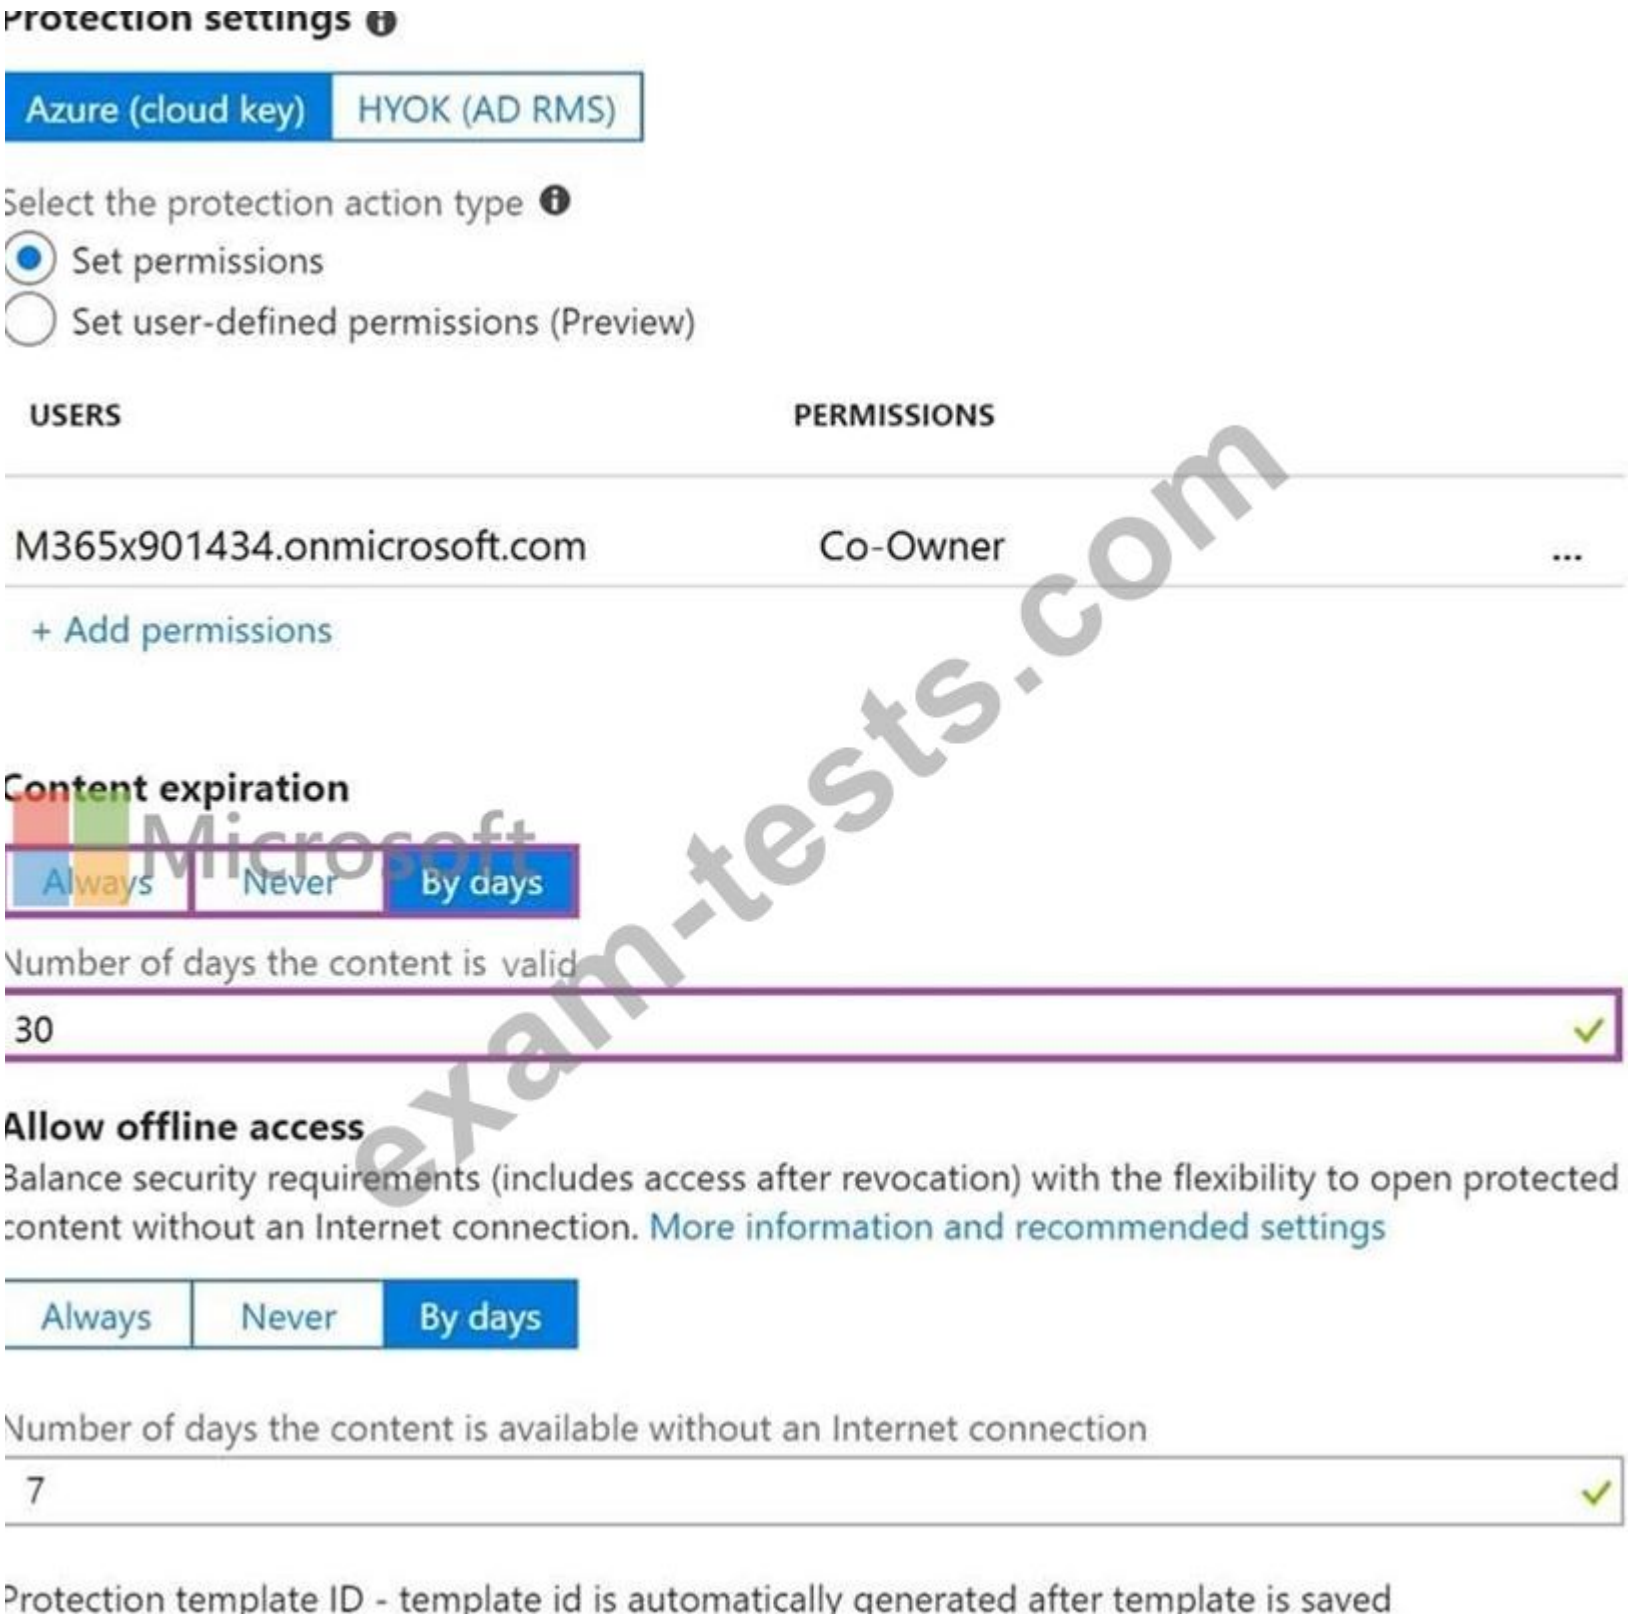

Compliance Requirements

Contoso identifies the following compliance requirements:

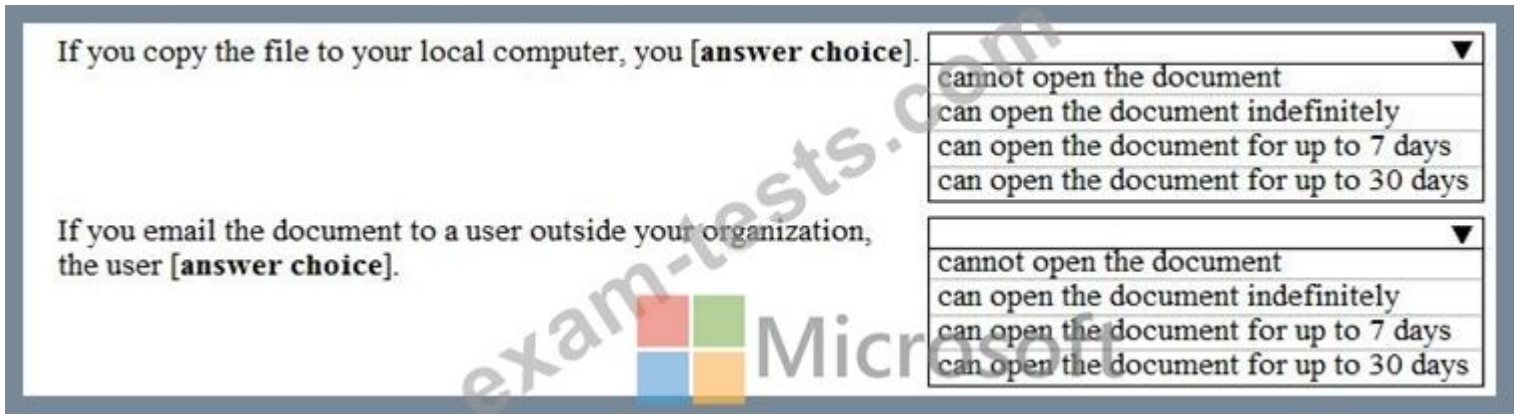

* Ensure that the users in Group1 can only access Microsoft Exchange Online from devices that are enrolled in Intune and configured in accordance with the corporate policy.

* Configure Windows Information Protection (W1P) for the Windows 10 devices.

NEW QUESTION: 71

You have a Microsoft 365 subscription.

You are planning a threat management solution for your organization.

You need to minimize the likelihood that users will be affected by the following threats:

* Opening files in Microsoft SharePoint that contain malicious content

* Impersonation and spoofing attacks in email messages

Which policies should you create in the Security & Compliance admin center? To answer, select the appropriate options in the answer area.

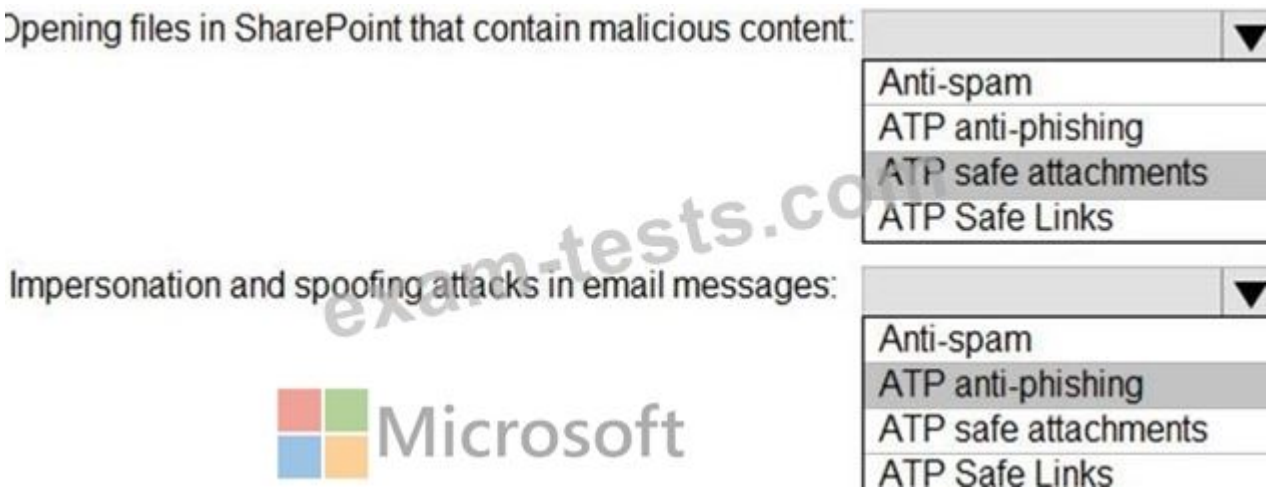

NOTE: Each correct selection is worth one point.

Answer:

Explanation

Box 1: ATP Safe Attachments

ATP Safe Attachments provides zero-day protection to safeguard your messaging system, by checking email attachments for malicious content. It routes all messages and attachments that do not have a virus/malware signature to a special environment, and then uses machine learning and analysis techniques to detect malicious intent. If no suspicious activity is found, the message is forwarded to the mailbox.

Box 2: ATP anti-phishing

ATP anti-phishing protection detects attempts to impersonate your users and custom domains. It applies machine learning models and advanced impersonation-detection algorithms to avert phishing attacks.

ATP Safe Links provides time-of-click verification of URLs, for example, in emails messages and Office files.
Protection is ongoing and applies across your messaging and Office environment. Links are scanned for each click: safe links remain accessible and malicious links are dynamically blocked.

D. From the Security & Compliance admin center, start a message trace.
E. From the Exchange admin center, start a mail flow message trace
Answer: (SHOW ANSWER)
Explanation
A DLP policy contains a few basic things:
Where to protect the content: locations such as Exchange Online, SharePoint Online, and OneDrive for Business sites, as well as Microsoft Teams chat and channel messages.
When and how to protect the content by enforcing rules comprised of:
Conditions the content must match before the rule is enforced. For example, a rule might be configured to look only for content containing Social Security numbers that's been shared with people outside your organization.
Actions that you want the rule to take automatically when content matching the conditions is found. For example, a rule might be configured to block access to a document and send both the user and compliance officer an email notification.

NEW QUESTION: 164
Your company has 10 offices.
The network contains an Active Directory domain named contoso.com. The domain contains 500 client computers. Each office is configured as a separate subnet.
You discover that one of the offices has the following:
Computers that have several preinstalled applications
Computers that use nonstandard computer names
Computers that have Windows 10 preinstalled
Computers that are in a workgroup
You must configure the computers to meet the following corporate requirements:
All the computers must be joined to the domain.
All the computers must have computer names that use a prefix of CONTOSO.
All the computers must only have approved corporate applications installed.
You need to recommend a solution to redeploy the computers. The solution must minimize the deployment time.
What should you recommend?
A. a provisioning package
B. wipe and load refresh
C. Windows Autopilot
D. an in-place upgrade
Answer: A (LEAVE A REPLY)
By using a Provisioning, IT administrators can create a self-contained package that contains all of the configuration, settings, and apps that need to be applied to a device.
Incorrect Answers:
C: With Windows Autopilot the user can set up pre-configure devices without the need consult their IT administrator.
D: Use the In-Place Upgrade option when you want to keep all (or at least most) existing applications.

You have an Azure Active Directory (Azure AD) tenant that contains a user named User1.
Your company purchases a Microsoft 365 subscription.
You need to ensure that User1 is assigned the required role to create file policies and manage alerts in the Cloud App Security admin center.

Solution: From the Security & Compliance admin center, you assign the Security Administrator role to User1.
Does this meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Current Infrastructure

A . Datum recently purchased a Microsoft 365 subscription.

All user files are migrated to Microsoft 365.

All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, user1@us.adatum.com or user2#uk.ad3tum.com.

Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors.
A . Datum uses and processes Personally Identifiable Information (PII).
Problem Statements
Requirements
A . Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365.
Business Goals
A . Datum warns to be fully compliant with all the relevant data privacy laws in the regions where it operates.
A . Datum wants to minimize the cost of hardware and software whenever possible.
Technical Requirements
* Centrally perform log analysis for all offices.
* Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.
* Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.
* Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.
* Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.
* If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.
* A security administrator requires a report that shows which Microsoft 36S users signed in Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.
* Ensure that the users in the New York office can only send email messages that contain sensitive US. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data.

Which users will receive the weekly digest email automatically?
A. Admin2, Admin3, and Admin4 only
B. Admin1, Admin2, Admin3, and Admin4
C. Admin2 and Admin3 only
D. Admin3 only
E. Admin1 and Admin3 only
Answer: E (LEAVE A REPLY)
Explanation
By default, all Global Admins receive the email. Any newly created Global Admins, Security Readers or Security Administrators will automatically be added to the recipients list.

NEW QUESTION: 191
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an on-premises Active Directory domain. The domain contains 2,000 computers that run Windows 8.1 and have applications installed as shown in the following table.

Name	Application count	Used by
App1	20	Finance department, sales department
App2	100	Marketing department

You enroll all the computers in Upgrade Readiness.
You need to ensure that App1 and App2 have an UpgradeDecision status of Ready to upgrade.
Solution: You set the ReadyForWindows status of App2 to Highly adopted.
Does this meet the goal?
A. Yes
B. No

Answer: A (LEAVE A REPLY)

App1 has a "low install count" (2% or less) so will be Ready to upgrade. We just need to change the setting for App2.

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

NEW QUESTION: 284
You have a Microsoft 365 subscription that uses a default domain named contoso.com.
Three files were created on February 1, 2019, as shown in the following table.

Name	Stored in
File1	Microsoft OneDrive
File2	A Microsoft SharePoint library
File3	Microsoft Exchange Online email

On March 1, 2019, you create two retention labels named Label1 and Label2.

The settings for Lable1 are configured as shown in the Label1 exhibit. (Click the Label1 tab.)

The settings for Lable2 are configured as shown in the Label2 exhibit. (Click the Label2 tab.)

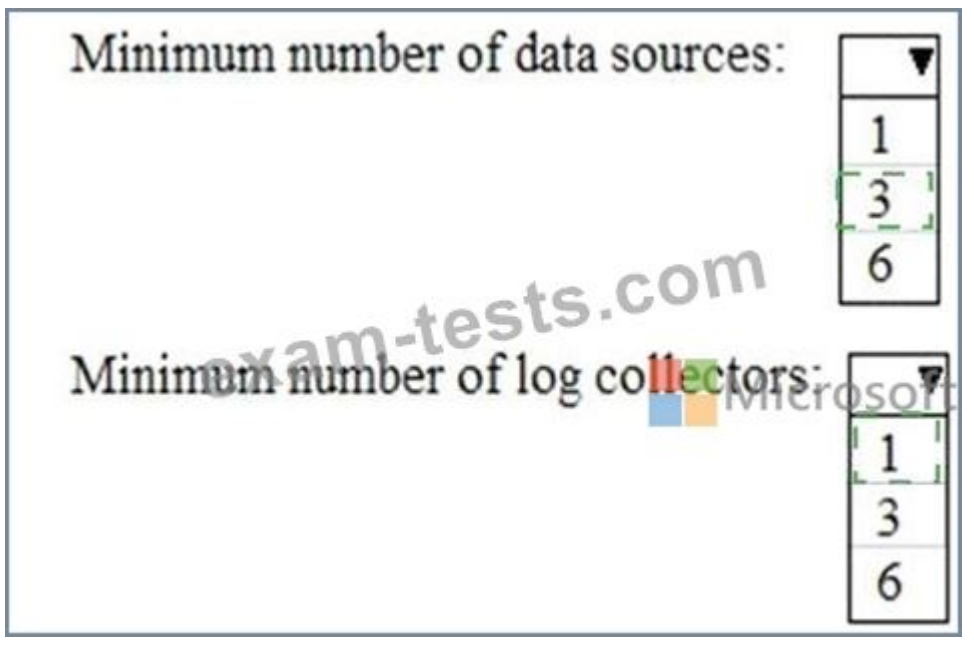

You apply the retention labels to Exchange email, SharePoint sites, and OneDrive accounts.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
File1 will be deleted automatically on February1, 2020.	○	○
If User1 does not complete the disposition review within 90 days of receiving the notification, File2 will be deleted automatically after February 1, 2021.	○	○
File3 will be deleted automatically after February 1, 2021.	○	○

Answer:

Explanation

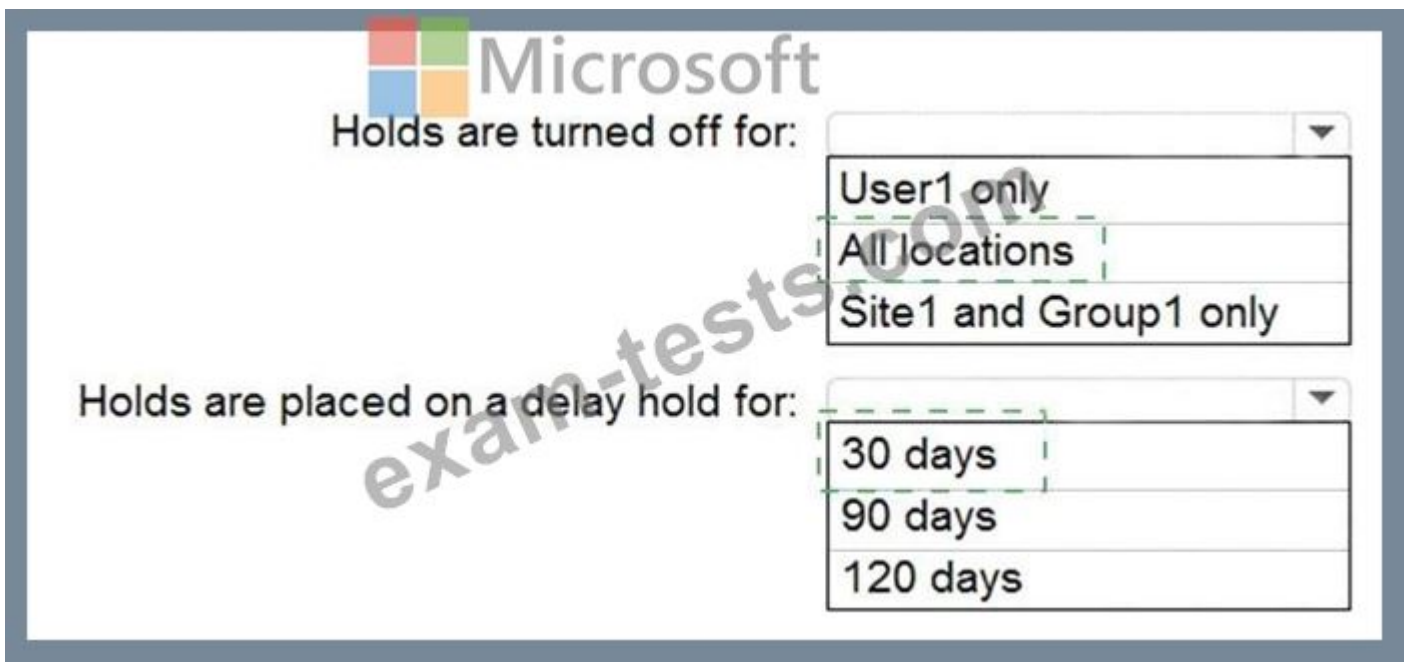

Statements	Yes	No
File1 will be deleted automatically on February1, 2020.	○	○
If User1 does not complete the disposition review within 90 days of receiving the notification, File2 will be deleted automatically after February 1, 2021.	○	○
File3 will be deleted automatically after February 1, 2021.	○	○

Box 1: No
Retention overrides deletion.
Box 2: No
Content in a document library will be moved to the first-stage Recycle Bin within 7 days of disposition, and then permanently deleted another 93 days after that. Thus 100 days in total.
Box 3: No
Items in an Exchange mailbox will be permanently deleted within 14 days of disposition.

Requirements

Planned Changes

Contoso plans to implement the following changes:

* Implement Microsoft 365.
* Manage devices by using Microsoft Intune.
* Implement Azure Advanced Threat Protection (ATP).
* Every September, apply the latest feature updates to all Windows computers. Every March, apply the latest feature updates to the computers in the New York office only.

Technical Requirements

Contoso identifies the following technical requirements:

* When a Windows 10 device is joined to Azure AD, the device must enroll in Intune automatically.
* Dedicated support technicians must enroll all the Montreal office mobile devices in Intune.
* User1 must be able to enroll all the New York office mobile devices in Intune.
* Azure ATP sensors must be installed and must NOT use port mirroring.
* Whenever possible, the principle of least privilege must be used.
* A Microsoft Store for Business must be created.

Compliance Requirements

Contoso identifies the following compliance requirements:

* Ensure that the users in Group1 can only access Microsoft Exchange Online from devices that are enrolled in Intune and configured in accordance with the corporate policy.
* Configure Windows Information Protection (WIP) for the Windows 10 devices.

Case Study

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The company has the employees and devices shown in the following table.

Location	Employees	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an on-premises Active Directory forest named contoso.com. The forest contains the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Member server
Server3	Network Policy Server (NPS) server
Server4	Remote access server
Server5	Microsoft Azure AD Connect server

All servers run Windows Server 2016. All desktops and laptops run Windows 10 Enterprise and are joined to the domain.

The mobile devices of the users in the Montreal and Seattle offices run Android. The mobile devices of the users in the New York office run iOS.

The domain is synced to Azure Active Directory (Azure AD) and includes the users shown in the following table.

Name	Azure AD role
User1	*None*
User2	Application administrator
User3	Cloud application administrator
User4	Global administrator
User5	Intune administrator

The domain also includes a group named Group1.

Requirements

Planned Changes

Contoso plans to implement the following changes:

* Implement Microsoft 365.
* Manage devices by using Endpoint Manager.
* Implement Azure Advanced Threat Protection (ATP).
* Update computers in Seattle and Montreal with the fall Semi-Annual Channel feature update.
* Update computers in the New York office with the spring Semi-Annual Channel feature update.

Technical Requirements

Contoso identifies the following technical requirements:

* When a Windows 10 device is joined to Azure AD, the device must enroll to Endpoint Manager automatically.
* Dedicated support technicians must enroll all the Montreal office mobile devices in Endpoint Manager.
* Each dedicated support technician must be assigned only a single Device Enrollment Manager (DEM) account.
* User1 must be able to enroll all the New York office mobile devices in Endpoint Manager.
* Azure ATP sensors must be installed and must NOT use port mirroring.
* Whenever possible, the principle of least privilege must be used.
* A Microsoft Store for Business must be created.

Compliance Requirements

Contoso identifies the following compliance requirements:

* Ensure that the users in Group1 can only access Microsoft Exchange Online from devices that are enrolled in Endpoint Manager and configured in accordance with the corporate policy.
* Configure Windows Information Protection (WIP) for the Windows 10 devices.

NEW QUESTION: 327
Your company has 10 offices.
The network contains an Active Directory domain named contoso.com. The domain contains 500 client computers. Each office is configured as a separate subnet.
You discover that one of the offices has the following:
Computers that have several preinstalled applications
Computers that use nonstandard computer names
Computers that have Windows 10 preinstalled
Computers that are in a workgroup
You must configure the computers to meet the following corporate requirements:
All the computers must be joined to the domain.
All the computers must have computer names that use a prefix of CONTOSO.
All the computers must only have approved corporate applications installed.
You need to recommend a solution to redeploy the computers. The solution must minimize the deployment time.
What should you recommend?
A. a provisioning package
B. wipe and load refresh
C. Windows Autopilot
D. an in-place upgrade
Answer: A (LEAVE A REPLY)
By using a Provisioning, IT administrators can create a self-contained package that contains all of the configuration, settings, and apps that need to be applied to a device.
Incorrect Answers:
C: With Windows Autopilot the user can set up pre-configure devices without the need consult their IT administrator.
D: Use the In-Place Upgrade option when you want to keep all (or at least most) existing applications.

* Computers that use nonstandard computer names
* Computers that have Windows 10 preinstalled
* Computers that are in a workgroup
You must configure the computers to meet the following corporate requirements:
* All the computers in the office must be joined to the domain.
* All the computers in the office must have computer names that use a prefix of CONTOSO.
* All the computers in the office must only have approved corporate applications installed.
You need to recommend a solution to redeploy the computers. The solution must minimize the deployment time.
Which deployment method should you recommend?
A. a provisioning package
B. wipe and load refresh
C. Windows Autopilot
D. an in-place upgrade
Answer: (SHOW ANSWER)
By using a Provisioning, IT administrators can create a self-contained package that contains all of the configuration, settings, and apps that need to be applied to a device.
Incorrect Answers:
C: With Windows Autopilot the user can set up pre-configure devices without the need consult their IT administrator.
D: Use the In-Place Upgrade option when you want to keep all (or at least most) existing applications.
