NEW QUESTION: 1

A company uses Microsoft Teams.

You need to configure email channel settings for the company.

Where should you perform each task? To answer, drag the appropriate locations to the correct requirement. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Locations	Task	Location
<input type="text" value="Team admin center"/>	Enable channel emails for members only.	<input type="text" value="Location"/>
<input type="text" value="Channel settings"/>	Whitelist specific domains for all teams.	<input type="text" value="Location"/>
<input type="text" value="Microsoft 365 admin center"/>	Enable channel emails for all teams	<input type="text" value="Location"/>

Answer:

Locations	Task	Location
<input type="text" value="Team admin center"/>	Enable channel emails for members only.	<input type="text" value="Channel settings"/>
<input type="text" value="Channel settings"/>	Whitelist specific domains for all teams.	<input type="text" value="Team admin center"/>
<input type="text" value="Microsoft 365 admin center"/>	Enable channel emails for all teams	<input type="text" value="Team admin center"/>

<https://docs.microsoft.com/en-us/microsoftteams/enable-features-office-365>

NEW QUESTION: 2

An organization has E5 licenses without audio conferencing.

When a user sends a chat message from the Microsoft Teams desktop app the messages are not delivered to recipients. When the user sends a chat message by using the Teams mobile app the messages are delivered.

You need to resolve the issue.

Which three actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A.** Deactivate and reactivate the user's Teams license.
- B.** Update the Teams desktop app to the latest version.
- C.** Sign out of Teams and the sign back in to Teams.
- D.** Clear the Teams app local cache and the Windows credentials cache.

Answer: B,C,D (LEAVE A REPLY)

Topic 1, Fabrikam

Current environment

Active Directory

The network contains an on-premises Active Directory domain. All user accounts are assigned to departmental organizational units (OUs).

Microsoft 365

You assign all employees a Microsoft Office 365 E3 license. Fabrikam has recently migrated from Skype for Business server to Microsoft Teams.

Network environment

The company uses a combination of IPv4 and IPv6 addresses.

Calling

The company plans to use a Session Border Controller (SBC) connected to Phone System Direct Routing for their telephony solution. The company registers the SBC domain name, sip.contoso.com, in as tenant domain.

Requirements

Emergency calling

You must configure a tenant trusted IP list for emergency address locations.

Security

Sales interns must not have the ability to share files in one-on-one chats. Teams and channels must meet following compliance requirements:

You must create the following groups for teams and channels: Team Owners, Team Members and Team Visitors.

The Team Visitors group is for internal UserX that does not have access to the Private channels chats, but does have access to SharePoint sites for auditing the files within the private channels. Channels for the different departments must not inherit permissions from the parent sites.

Permissions for each channel must be unique.

ProjectNextGenApp

The R&D team has a private channel named ProjectNextGenApp. The members of the channel need to collaborate on files with an external user, but they do not want the external user to be able to read and send messages in the channel.

Legal department

You must ensure that users in the legal department can view the files uploaded by owners within one channel or access SharePoint.

Issues

CEO

The company's CEO reports that they do not receive notifications for chat messages in the desktop version of Microsoft Teams.

AdministratorA

AdministratorA is configuring Direct Routing. The administrator runs following PowerShell command to pair the SBC to the tenant or add the SBC from the Teams admin center.

```
PS C:\Windows\system32> New- CSONlinePSTNGateway -Fqdn sbc.Fabrikam.com -MediaBypass $false -SipSignallingPort 5061 -MaxConcurrentSessions 10 -Enabled $true
```

The following error message displays:

```
Cannot use domain "sbcsbc.fabrikam.com" as it was not configured for this tenant.
+ CategoryInfo : InvalidArgument: (Fqdn=sbc.fabrikam...diaBypass=False:Trunkconfig) [New-
CSONlinePSTNGateway],
ArgumentException
+ FullyQualifiedErrorId : CustomValidationFailed,
Microsoft.Rtc.Management.Internal.NewCSONlinePSTNGatewayCmdlet
+ PSComputerName : admin3a.online.lync.com
```

Human resources manager

The human resources manager is unable to access the files in a Private channel named StaffRecruiters. He gets an error message when they select the Files tab that the Item does not exist or no longer available.

Audit team

Users who are part of the audit team report that they were unable to access the Files tab of a channel in the team. The following error message displays when they attempt to access files:

Error
Couldn't load your files. Let's try again.

This item might not exist or is no longer available

This item might have been deleted, expired, or you might not have permission to view it. Contact the owner of this item for more information.

Retry

User1

User1 reports high CPU usage while using the Teams application and would like to know more on how Teams uses resources.

A screenshot of Windows Task Manager showing the Performance tab. The table below represents the data visible in the screenshot.

Name	Status	CPU	Memory	Disk	Network
> Microsoft Teams (6)		33.1%	1,617.7 MB	1,1 MB/s	0 Mbps
> Google Chrome (29)		2.7%	1,322.5 MB	0,1 MB/s	1.7 Mbps

User2

User2 reports that automatic updates for the Teams client are not working.

User3

User3 reports that they are not able to download a file that was shared with them in a one-to-one chat within the Files tab. The following error message displays:

"This item might not exist or is no longer available."

User4

User4 reports that the following message displays when they navigate to the SharePoint Site for the private channel:

"Access denied"

User5

User5 has multiple groups and contacts but none of the groups or users appear in the Teams app. The Contact List Provider for User5 is listed as Unified Contact Store (UCS).

User6

User6 reports that they are not able to download a file that was shared with them in a one-to-one chat within the Files tab and receives the follow error message:

"This item might not exist or is no longer available."

Emergency calling

Users report that the Teams app does not display an emergency address in the calls section of client settings. No emergency address is listed when placing a call. You collect Teams debug logs from a user. A representative section of the log is shown below:

```
callingService: [setLocationInfo] set with [locationInfoType=1] [content=
  {"endpointNetwork":"Unknown","networkSiteId":null,"enableLocationBasedRouting":false,
  "siteAddress":null,"subnetId":null}][context=locationResponse][mediaOptimization]
```

Reports

Users within the company report poor quality when they make Teams calls and dial telephone numbers. You must generate the following reports to troubleshoot the issues:

Report1: Show Public Switched Telephone Network (PSTN) calls for the last 28 days.

Report2: Compare usage and quality across users.

NEW QUESTION: 3

A company configures external access for suppliers in the Microsoft Teams admin center.

Users can chat only with external users from VendorA.

You need to ensure that users can chat externally with users from VendorB.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add the VendorB domain as a remote domain to the Connectors list.
- B. Modify the CNAME for SIP federation.
- C. Add the VendorB domain to the federation Allowed Domains list.
- D. Ask the VendorB tenant to add your domain to their Allowed Domains list.

Answer: C,D (LEAVE A REPLY)

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/manage-external-access>

NEW QUESTION: 4

A company has a Microsoft Teams environment. The sales department and the support department set up teams with standard channels.

Users from the sales department report that the Files tab in one of the channels is not accessible.

The following message displays:

Item might not exist or is no longer available.

You need to identify and resolve the issue.

What should you do?

- A. Revert the renamed folder to the original channel folder name.
- B. Recover all the deleted items from the recycle bin of the corresponding Teams site.
- C. Create a separate document library with the same name as the channel.

Answer: A (LEAVE A REPLY)

The SharePoint folder name must match the channel name. Renaming the SharePoint folder breaks the link between the channel and the folder.

NEW QUESTION: 5

A company uses Microsoft Teams.

The company defines the following normalization rule:

Rank	Name	Pattern	Translation
1	Normalization rule	^0\d{7}\$	+142551

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Answer Area

Which values match the normalization rule?

- only eight-digit numbers that start with 0 (zero)
- only seven-digit numbers that start with 0 (zero)
- all seven-digit numbers
- only eight-digit numbers that start with 0 (zero)
- all 8-digit numbers

The company reports that the normalization rule must match seven-digit phone numbers. Which pattern should you use for the normalization rule?

- ^0\d{7}\$
- ^0\d{7}\$
- ^\d{7}\$
- ^1\d{7}\$
- ^1\d{7}\$

Answer:

Answer Area

Which values match the normalization rule?

- only eight-digit numbers that start with 0 (zero)
- only seven-digit numbers that start with 0 (zero)
- all seven-digit numbers
- only eight-digit numbers that start with 0 (zero)
- all 8-digit numbers

The company reports that the normalization rule must match seven-digit phone numbers. Which pattern should you use for the normalization rule?

- ^0\d{7}\$
- ^0\d{7}\$
- ^\d{7}\$
- ^1\d{7}\$
- ^1\d{7}\$

NEW QUESTION: 6

An administrator for a tenant in Australia assigns direct routing numbers to cloud auto-attendants (AA).

Whenever a call is received by an AA, there is a delay of more than 10 seconds before the welcome message plays.

You need to review the SBC logs to determine the cause of the delay.

Which log entry identifies the cause of the delay?

A. SERVER: Microsoft.PSTNHub.SIPProxy v.2019.4.24.4 i.USEA.1

- B. SERVER: Microsoft.PSTNHub.SIPProxy v.2019.4.24.4 i.ASSE.1
- C. SERVER: Microsoft.PSTNHub.SIPProxy v.2019.4.24.4 i.ASEA.1
- D. SERVER: Microsoft.PSTNHub.SIPProxy v.2019.4.24.4 i.ASEA.2

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

You are a Microsoft Teams administrator for a company. The company uses active calling plans and dynamic emergency calling.

One of the company's offices is moving to a new physical location.

You need to use the Teams admin center to update the emergency address for the new office location.

What should you do?

- A. From Emergency Addresses, edit the current address.
- B. From Emergency Addresses, delete the current address and create a new location with the new address.
- C. From Network and Locations, edit the current address.
- D. From Network and Locations, delete the current address and create a new location with the new address.

Answer: B ([LEAVE A REPLY](#))

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/add-change-remove-emergency-location-organization>

NEW QUESTION: 8

Users report call delay during Microsoft Teams audio conferences.

You run a network trace from a user's device during an audio conference. You review the following trace results:

```
Frame Details:
Checksum: 0 (0x0)
SourceAddress: 10.10.10.110
DestinationAddress: 52.114.188.31
0-TCP: Flags=. . .A. . . ., SrcPort=50008, DstPort=HTTPS (443), PayloadLen=0,
SrcPort: 50008
DstPort: HTTPS (443)
SequenceNumber: 4077031237 (0xF3028F45)
E AcknowledgmentNumber: 223214542 (0xD4DFD5E)
E B DataOffset: 80 (0x50)
O Flags: . . .A
Window: 1025 (scale factor 0x8) = 262400
Checksum: 0x254, Disregarded
UrgentPointer: 0 (0x)
```

You need to identify the cause of delay.

What is the cause?

- A. The source port for audio is above 50.000.
- B. The source port range for audio is too narrow.
- C. The UDP traffic is being limited.
- D. The TLS traffic is being limited.

Answer: C (LEAVE A REPLY)

<https://docs.microsoft.com/en-us/MicrosoftTeams/quality-of-experience-review-guide#quality-investigations>

NEW QUESTION: 9

You need to configure the Microsoft Teams environment for guest users.

Which actions are required? To answer, drag the appropriate required options to the correct actions. Each required option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Required	Answer Area	Required
<input type="checkbox"/>	 <p>Action</p> <p>In the Teams admin center, modify the global meeting policy.</p> <p>Run the following PowerShell cmdlets: <code>New-AzureADPolicy</code> <code>Set-AzureADPolicy</code></p> <p>In Azure Active Directory, modify the external collaboration settings.</p> <p>In the Teams admin center, modify the external access settings.</p>	<input type="checkbox"/>
<input type="checkbox"/>		<input type="checkbox"/>
		<input type="checkbox"/>
		<input type="checkbox"/>

Answer:

Required	Answer Area	Required
<input checked="" type="checkbox"/>	 <p>Action</p> <p>In the Teams admin center, modify the global meeting policy.</p> <p>Run the following PowerShell cmdlets: <code>New-AzureADPolicy</code> <code>Set-AzureADPolicy</code></p> <p>In Azure Active Directory, modify the external collaboration settings.</p> <p>In the Teams admin center, modify the external access settings.</p>	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/>		<input type="checkbox"/>

NEW QUESTION: 10

You are managing a Microsoft Teams environment.

Users report the following audio quality issues:

Voices sound robotic or are garbled.

Attendees cannot hear other participants well or at all.

You need to troubleshoot the issues.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Question

Where should you investigate the issues?

1001

Microsoft

▼

- Call Analytics
- Call Quality Dashboard

Which report should you use?

▼

- Meetings & Calls report
- Quality – Audio – Conferencing report
- Overall Media Usage report

Which option should you use to filter the data?

▼

- Audio quality column
- Poor stream
- Poor stream rate
- Audio stream

What is the value at which you should consider troubleshooting quality issues?

▼

- More than 1 percent
- More than 3 percent
- More than 25 percent

Answer:

Question	Tool

NEW QUESTION: 11

You need to identify the root cause of the issue that was reported by User6.

What is the cause of the issue?

- A. The sharing permissions for the organization are set to internal only.
- B. Sharing permissions for the file have been revoked.
- C. The external sharing permissions have been set to existing external users only.
- D. The file link is expired.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

A company uses Direct Routing.

Users report that they are not able to dial out to specific numbers. You have been provided with the tenant's dial plan that has the following normalization rule:

* Pattern: A0?(\d{7})\$

* Translation: +1250S1

The administrator is unsure if the normalization rule is causing this issue and needs help understanding it. You need to provide the administrator with the correct normalization of two dialed telephone numbers.

You need to provide the administrator with the correct normalization of two dialed telephone numbers. What should you identify? To answer, select the appropriate translated numbers in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION: 13

UserA works at CompanyA and UserB works at CompanyB. CompanyA configures Microsoft Teams to use Islands mode. CompanyB configures Teams to use TeamsOnly mode. UserA sends a Teams message to UserB.

UserB receives the message. The following notification displays:

Due to org policy changes, some chat and calling features are no longer available. [Continue your conversation here.](#)

UserB selects the Continue your conversation here link. The following message displays in the new chat window:

You need to provide a solution so that the two users can successfully communicate with each other.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Ask UserA to use Skype for Business to chat with UserB.
- B. Ask UserA to change their coexistence mode to TeamsOnly.
- C. Add UserB domain to the allowed list.
- D. Ask UserB to sign out and sign in to Teams.
- E. Ask UserB to use Skype for Business to chat with UserA.

Answer: ([SHOW ANSWER](#))

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/teams-and-skypeforbusiness-coexistence-and-interoperability>

Topic 2, Contoso, Ltd

Current environment

Active directory

The network contains an on-premises Active Directory domain. All user accounts are assigned to departmental organizational units (OUs).

Network environment

All traffic is routed through a VPN solution.

Average network bandwidth on Wi-Fi is 3.2 mbps.

Microsoft 365

You assign all employees a Microsoft Office 365 E5 license. You enable the following services for all users:

Microsoft Exchange Online

Microsoft SharePoint Online

Microsoft OneDrive for Business

Azure AD dynamic group membership

Azure Active Directory (Azure AD)

Microsoft Teams

The Microsoft Teams upgrade policy is set to Islands coexistence mode.

Requirements

Calling

You must create auto attendants and call queue groups for the sales department and the support department. You must configure the following numbers:

Number	Comment
+1 4254567890	This is the secondary number for the sales department.
+1 4253642069	This is the secondary number for the support department.
+1 4254598760	This is the primary number. Both the sales and support departments must be reachable with this number.

Sales department employees must be able to dial international numbers. Other department employees must be prevented from dialing international numbers.

The secondary number for the sales department must always be displayed whenever a sales department employee makes an outbound call.

Calls to support team members must be distributed in such a way that each agent gets the same number of calls.

Emergency calling

You must configure the following normalization rules for emergency calls:

Sales department users need to use 4-digit extension calling.

Support department users need to use 5-digit extension calling.

All local calls for Redmond (country code and region code is +1425) should be dialed without having to put the +1425 in front of the number.

Security

You must implement dynamic group membership and use the department's attribute.

Users must change their password every 60 days.

You must implement a new security policy that has the following requirements:

Only guest users from the approved partner domains must be allowed to connect to collaborate by using Microsoft Teams.

Guest users must be prevented from inviting other guests.

Guest users must be prevented from making private calls.

The sales and the technical support department should be able to dial out using the corresponding number.

Guest users should only be allowed to chat from their own accounts.

Teams channels

Teams and channels must meet the following compliance requirements:

Each team must expire 365 days after it is created.

All team content must be deleted when the team expires

An administrator must be able to restore deleted team content within 30 days.

Group names must not change once they are created.

Meetings and live events

You identify the following requirements for meetings and live events:

All meetings facilitated by employees must be hosted on Microsoft Teams.

Guest users must be able to join live events.

Guest users must always wait in a meeting lobby.

Employees must always bypass the meeting lobby when they join meeting by using the Microsoft Teams client.

You must record all live events.

Issues

User1

User1 starts an important meeting by using Microsoft Teams. The call drops unexpectedly. User1 provides you with the following log data after reproducing the issue:

```
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 6 => 7
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 8 => 6
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 10 => 8
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 1 => 10
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 0 => 1
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: undefined => 0
```

User2

Administrators report that User2 can sign in to Teams. Most policies are assigned to User2, but you are not able to assign a phone number to User2. You run the following PowerShell command and review the output:

```
PS C:\Windows\system32> get-CsOnlineuser -Identity
```

```
ProvisioningStamp           :  
SubProvisioningStamp       : 0  
SubProvisioningStamp       :  
UpgradeRetryCounter        : 0  
SyncingCounter             :  
ProvisioningCounter        : 0  
SubProvisioningCounter     : 0  
PublishingStamp            :  
PublishingCounter          : 0  
OnPremHostingProvider      :  
OnPremOptionFlags         : 0  
OnPremEnterpriseVoiceEnabled : False  
OnPremSIPEnabled          :  
OnPremSipAddress           :  
OnPremLineURI              :  
OnPremLineURIManuallySet  :
```

User3

User3 reports an authentication issue while signing in to Teams. You troubleshoot the issue by reviewing the Teams desktop app logs. You identify the following authentication error message: 0xCA82EE7 The server name could not be resolved.

User4

User4 reports that they receive multiple email messages about missed chat conversations.

Sales team

You create a Team named Test is used by the sales team.

All users report that an error message displays when they view the Files tab in the general channel for the team.

You view the following error in the debug logs:

```
2021-05-14T14:56:54.001Z Err items-view error:
```

```
singleOperationHandler.spFolderItemSet.getItems - File Not Found.
```

Conditional Access policy

Users report a variety of issues accessing resources. You run the following PowerShell cmdlets:

```
$CA = Get-AzureADMSConditionalAccessPolicy -Identity
```

\$CA.ToJson()

You review the output from the cmdlets:

```
"displayName": "Teams",
  "state": "enabled",
  "conditions": {
    "applications": { "includeApplications": [ "cc15fd57-2c6c-4117-a88c-83b1d56b4bbe" ] },
    "users": {
      "includeUsers": [ "GuestsOrExternalUsers" ],
      "excludeUsers": [],
      "includeGroups": [],
      "excludeGroups": [],
      "includeRoles": [],
      "excludeRoles": []
    },
  },
  "platforms": {
    "includePlatforms": [ "all" ],
    "excludePlatforms": []
  },
  "userRiskLevels": [],
  "signInRiskLevels": [],
  "clientAppTypes": [ "mobileAppAndDesktopClients" ],

},
```

Teams performance

After recent network changes, users report the following issues that impact all users:

Messages arrive to recipients after significant delays.

The Teams app loads slowly.

The quality of audio and video during meetings is poor.

Calls drop unexpectedly and it takes a long time to rejoin meetings.

You review the following log entries:

```

Relay : 52.114.62.1      is reachable using Protocol UDP and Port 3478
Relay : 52.114.62.1      is not reachable using Protocol TCP and Port 443

NEW QUESTION: 14

A company uses multiple private channels in a team named Projects.

When users in a specific private channel try to access the Files tab, they receive an error saying that they do not have permissions.

You need to get the link to the private channels SharePoint site to verify permissions.

What should you do?

- A. Open the private channels document library from the Projects SharePoint site.
- B. Click on the Open in SharePoint button in the private channel's Posts tab.
- C. Click on the Open in SharePoint button in the private channels Files tab.
- D. Open the SharePoint site from the SharePoint admin center.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 15

A company uses Microsoft Teams.

You receive reports from users that they are unable to perform specific actions as guests.

You need to determine which actions can be performed by guest users and which actions can be performed by Teams users in the organization.

Which configuration should you use to validate each failed action? To answer, drag the appropriate roles to the correct actions. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 16

You are an administrator in an organization. You share files in chats with other users.

The users report that they are unable to access the files. Users see an error message as shown in the image:

You need to resolve the issue by updating the OneDrive for Business settings for the users. You navigate to the settings page for the Team's SharePoint site collection.

What should you do?

- A. Enable Limited-access user permission lockdown mode.
- B. Enable document sets.
- C. Disable Limited-access user permission lockdown mode.
- D. Disable site policy.

Answer: (SHOW ANSWER)

NEW QUESTION: 17

You manage the Microsoft Teams environment for a company. You configure direct routing telephony.

A user reports that the dial pad does not appear in their Teams app.

You need to resolve the issue. You assign the user a phone system license.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Statement	Value
Configure the OnlineVoiceRoutingPolicy.	<input type="checkbox"/> Null <input checked="" type="checkbox"/> Non-null value
Ensure the user is homed.	<input checked="" type="checkbox"/> On-premises <input checked="" type="checkbox"/> Online
Ensure that the HostingProvider parameter uses the following value	<input checked="" type="checkbox"/> A value that starts with sipfed.online. <input type="checkbox"/> A value that does not start with sipfed.online.
Ensure that the user's effective TeamsCallingPolicy includes the following parameter and value.	<input checked="" type="checkbox"/> AllowCallForwardingtoUser set to true. <input checked="" type="checkbox"/> AllowPrivateCalling set to true. <input checked="" type="checkbox"/> AllowWebSPTNCalling set to true. <input type="checkbox"/> AllowCallForwardingtoPhone set to true.

Answer:

statement

value

Configure the OnlineVoiceRoutingPolicy.

▼
Null
Non-null value

Ensure the user is homed.

▼
On-premises
Online

Ensure that the HostingProvider parameter uses the following value

▼
A value that starts with sipfed.online.
A value that does not start with sipfed.online.

Ensure that the user's effective TeamsCallingPolicy includes the following parameter and value.

▼
AllowCallForwardingtoUser set to true.
AllowPrivateCalling set to true.
AllowWebSPTNCalling set to true.
AllowCallForwardingtoPhone set to true.

NEW QUESTION: 18

Contoso uses Microsoft Teams.

Users in the tenant have access to third-party applications that they are not supposed to in Microsoft Teams.

You need to block a small group of users from using the app in the Microsoft Teams app store. Which steps should you take to achieve this goal? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

In the Microsoft Teams admin center, create a custom policy in **Permission policies**.

Under Third-party apps, choose **Block specific apps and allow all others**.

Assign the policy to the group of users.

Answer:

Answer Area

Topic 2, Contoso, Ltd

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Background

Contoso, Ltd. is a telecommunications company that has offices in Bulgaria, Italy, Canada, and the United States. The company has 5,000 employees. The company has the following departments:

IT

Sales

Human resources (HR)

Research and development (R&D)

Technical support

Legal

The company does a lot of business with the following partner companies. Contoso employees are not able to communicate with these partners by using Microsoft Teams.

Microsoft.com

PartnerCompanyLTD.com

The company currently uses Skype for Business (SfB) as a collaboration tool. The company wants to migrate to Microsoft Teams. Contoso is beginning a pilot project as part of a Microsoft Teams upgrade. You determine that some offices do not have calling plan licenses.

Current environment

Active directory

The network contains an on-premises Active Directory domain. All user accounts are assigned to departmental organizational units (OUs).

Network environment

All traffic is routed through a VPN solution.

Average network bandwidth on Wi-Fi is 3.2 mbps.

Microsoft 365

You assign all employees a Microsoft Office 365 E5 license. You enable the following services for all users:

Microsoft Exchange Online

Microsoft SharePoint Online

Microsoft OneDrive for Business

Azure AD dynamic group membership

Azure Active Directory (Azure AD)

Microsoft Teams

The Microsoft Teams upgrade policy is set to Islands coexistence mode.

Requirements

Calling

You must create auto attendants and call queue groups for the sales department and the support department. You must configure the following numbers:

Number	Comment
+1 4254567890	This is the secondary number for the sales department.
+1 4253642069	This is the secondary number for the support department.
+1 4254598760	This is the primary number. Both the sales and support departments must be reachable with this number.

Sales department employees must be able to dial international numbers. Other department employees must be prevented from dialing international numbers.

The secondary number for the sales department must always be displayed whenever a sales department employee makes an outbound call.

Calls to support team members must be distributed in such a way that each agent gets the same number of calls.

Emergency calling

You must configure the following normalization rules for emergency calls:

Sales department users need to use 4-digit extension calling.

Support department users need to use 5-digit extension calling.

All local calls for Redmond (country code and region code is +1425) should be dialed without having to put the +1425 in front of the number.

Security

You must implement dynamic group membership and use the department's attribute.

Users must change their password every 60 days.

You must implement a new security policy that has the following requirements:

Only guest users from the approved partner domains must be allowed to connect to collaborate by using Microsoft Teams.

Guest users must be prevented from inviting other guests.

Guest users must be prevented from making private calls.

The sales and the technical support department should be able to dial out using the corresponding number.

Guest users should only be allowed to chat from their own accounts.

Teams channels

Teams and channels must meet the following compliance requirements:

Each team must expire 365 days after it is created.

All team content must be deleted when the team expires

An administrator must be able to restore deleted team content within 30 days.

Group names must not change once they are created.

Meetings and live events

You identify the following requirements for meetings and live events:

All meetings facilitated by employees must be hosted on Microsoft Teams.

Guest users must be able to join live events.

Guest users must always wait in a meeting lobby.

Employees must always bypass the meeting lobby when they join meeting by using the Microsoft Teams client.

You must record all live events.

Issues

User1

User1 starts an important meeting by using Microsoft Teams. The call drops unexpectedly. User1 provides you with the following log data after reproducing the issue:

```
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 6 => 7
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 8 => 6
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 10 => 8
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 1 => 10
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: 0 => 1
ExtendedCallStateMixin[callId=2375664e-a2e7-4570-b89e-5b1d485fe516 :teamsCallId=10]:
extendedCallState changed: undefined => 0
```

User2

Administrators report that User2 can sign in to Teams. Most policies are assigned to User2, but you are not able to assign a phone number to User2. You run the following PowerShell command and review the output:

```
PS C:\Windows\system32> get-CsOnlineuser -Identity

ProvisioningStamp           :
SubProvisioningStamp        : 0
SubProvisioningStamp        :
UpgradeRetryCounter         : 0
SyncingCounter              :
ProvisioningCounter         : 0
SubProvisioningCounter      : 0
PublishingStamp             :
PublishingCounter           : 0
OnPremHostingProvider       :
OnPremOptionFlags           : 0
OnPremEnterpriseVoiceEnabled : False
OnPremSIPEnabled            :
OnPremSipAddress            :
OnPremLineURI               :
OnPremLineURIManuallySet    :
```

User3

User3 reports an authentication issue while signing in to Teams. You troubleshoot the issue by reviewing the Teams desktop app logs. You identify the following authentication error message: 0xCA82EE7 The server name could not be resolved.

User4

User4 reports that they receive multiple email messages about missed chat conversations.

Sales team

You create a Team named Test is used by the sales team.

All users report that an error message displays when they view the Files tab in the general channel for the team.

You view the following error in the debug logs:

```
2021-05-14T14:56:54.001Z Err items-view error:
singleOperationHandler.spFolderItemSet.getItems - File Not Found.
```

Conditional Access policy

Users report a variety of issues accessing resources. You run the following PowerShell cmdlets:

```
$CA = Get-AzureADMSConditionalAccessPolicy -Identity
$CA.ToJson()
```

You review the output from the cmdlets:

```
"displayName": "Teams",
  "state": "enabled",
  "conditions": {
    "applications": { "includeApplications": [ "cc15fd57-2c6c-4117-a88c-83b1d56b4bbe" ] },
    "users": {
      "includeUsers": [ "GuestsOrExternalUsers" ],
      "excludeUsers": [],
      "includeGroups": [],
      "excludeGroups": [],
      "includeRoles": [],
      "excludeRoles": []
    },
  },
  "platforms": {
    "includePlatforms": [ "all" ],
    "excludePlatforms": []
  },
  "userRiskLevels": [],
  "signInRiskLevels": [],
  "clientAppTypes": [ "mobileAppAndDesktopClients" ],
  "locations": null,
  "deviceStates": null,
  "devices": null,
  "clientApplications": null
},

  "operator": "AND",
  "builtInControls": [
    "mfa",
    "compliantDevice",
    "domainJoinedDevice"
  ]
},
"customAuthenticationFactors": [],
"termsOfUse": []
},
```

Teams performance

After recent network changes, users report the following issues that impact all users:

Messages arrive to recipients after significant delays.

The Teams app loads slowly.

The quality of audio and video during meetings is poor.

Calls drop unexpectedly and it takes a long time to rejoin meetings.

You review the following log entries:

```

NEW QUESTION: 19

A company uses Microsoft Teams.

Users report that pinned apps disappear if they sign out of Teams.

You need to troubleshoot the issue.

Which policy should you check?

- A. App permission
- B. Conditional access
- C. App setup
- D. Manage apps

Answer: A (LEAVE A REPLY)

NEW QUESTION: 20

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

An IT company has a Microsoft 365 subscription.

The company has a main office in one region. The company opens a new office in another region.

You must relocate 400 users to the new office.

Solution: Add an emergency address and then modify the outbound calling settings for each user.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A (LEAVE A REPLY)

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/assign-change-emergency-location-user>

NEW QUESTION: 21

A company assigns Microsoft 365 E3 licenses to all users. The company configures a Conditional Access policy.

UserA initiates a one-to-one Microsoft Teams chat with UserB. UserA reports that they cannot share files with UserB. All other users within the company can share files in one-to-one chats.

You need to resolve the issue.

What should you do?

- A. Check permissions and sign in access for UserA's OneDrive account.
- B. Turn off the Conditional Access policy for UserA.
- C. Assign UserA a Microsoft 365 E5 license to replace the E3 license.
- D. Disable and re-enable the SharePoint online license assigned to UserA.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

An IT company has a Microsoft 365 subscription.

The company has a main office in one region. The company opens a new office in another region.

You must relocate 400 users to the new office.

Solution: Create a configuration profile with the emergency address and assign the profile to the device for each user.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

You manage the Microsoft Teams environment for a company. A user tries to sign in to the Teams web client. The following error message displays:

CONTOSO demo

User1@contoso.com

You can't get there from here

This application contains sensitive information and can only be accessed from:

- Devices or client applications that meet Contoso management compliance policy.

You need to be signed in to Microsoft Edge with the work or school account shown above. To sign in, click on your account image. [Learn More](#)

[Sign out and sign in with a different account](#)

[More details](#)

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

ANSWER AREA

What is the cause of the error?

Multi-factor authentication for the user has failed.
The web-based application access is blocked by a Conditional Access policy.
The Teams web-based application will not correctly sign in if Teams is not allowed as a trusted site.
The user is trying to sign in to a new device. Windows Information Protection tool blocked the user from signing in.

What should you use to investigate the issue?

Azure Active Directory.
Windows Event Viewer.
Windows Information Protection.

Which action should you perform so that the user can sign in?

Clear user's browser cache.
Advise user to sign in by using the desktop app.
Advise user to enroll the device with Microsoft Intune.
Advise the user to sign in by using a different account.
Add <https://login.microsoftonline.com> and https://*.teams.microsoft.com URLs as trusted sites.

NEW QUESTION: 29

A company uses a Session Border Controller (SBC) with Teams Direct Routing.

A user reports that they cannot initiate outbound calls to the following number +41 44 123 45 67.

The user can receive incoming calls. You observe that the user is assigned an OnlineVoiceRoutingPolicy that uses the following number pattern: $^(\backslash+41[0-9]{10})\$$.

You need to resolve the issue.

Which pattern should you use?

A)

$^(\backslash+41[0-9]{8})\$$

B)

$^(\backslash+30[0-9]{10})\$$

C)

$^(\backslash+1[0-9]{10})\$$

D)

A. Option C

B. Option D

C. Option A

D. Option B

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 30

An organization has E5 licenses without audio conferencing.

When a user sends a chat message from the Microsoft Teams desktop app the messages are not delivered to recipients. When the user sends a chat message by using the Teams mobile app the messages are delivered.

You need to resolve the issue.

Which three actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Update the Teams desktop app to the latest version.

B. Deactivate and reactivate the user's Teams license.

C. Clear the Teams app local cache and the Windows credentials cache.

D. Sign out of Teams and the sign back in to Teams.

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 31

A company uses Microsoft Teams. A user reports that they are unable to sign in to Teams. The user is able to reproduce the issue on multiple devices. The user provides you with the following screenshot that shows the error message.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which logs should you investigate for more information about the error?

▼
SBC logs
Fiddler logs
Event viewer log
Desktop logs

What should you do to troubleshoot the issue?

▼
Re-add the user's work or school account in Windows settings.
Recreate the registry key HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Run.

Which additional action should you perform?

▼
Disable Active Directory Authentication Library (ADAL).
Delete the contents of the Ngc folder.

Answer:

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 33

You manage the Microsoft Teams environment for a company.

You need to configure the system to ensure that users can view data from an external app within a Teams channel.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- Enable interaction with custom apps for the company's tenant.
- Navigate to the channel where you want to share content from the external app.
- Select Apps and create an incoming webhook.
- Enable third-party apps for the company's tenant.
- Use the unique URL for the channel to post messages.
- Select the appropriate team and then select Manage team.
- Select Connectors and select a webhook.

Answer Area

Empty boxes for the answer.

Answer:

Answer Area

- Enable interaction with custom apps for the company,s tenant.
- Navigate to the channel where you want to share content from the external app.
- Select Connectors and select a webhook.
- Use the unique URL for the channel the post messages.

- 1 - Enable interaction with custom apps for the company,s tenant.
- 2 - Navigate to the channel where you want to share content from the external app.
- 3 - Select Connectors and select a webhook.
- 4 - Use the unique URL for the channel the post messages.

NEW QUESTION: 34

A company limits users that are authorized to create Microsoft 365 groups. A user reports that they do not have the option to create new teams in the Microsoft Teams app. You need to ensure that the user can create teams.

What should you do?

- A. Add the user to a security group.
- B. Clear the Teams cache for the user and restart the Microsoft Teams client app.
- C. Add the user to a distribution group.
- D. Disable Conditional Access policies.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 35

A company has a Microsoft 365 subscription.

A user reports that they cannot add a guest user to a team.

You need to resolve this issue.

Which action you should perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Admin center	Action
Microsoft Teams admin center	<ul style="list-style-type: none">Enable guest access.Add the guest's domain to the Allowed Domains list.Add the guest to the team from the Teams admin center.
SharePoint admin center	<ul style="list-style-type: none">Set unique permission for the team site.Set inherited permission for the team site.Set organization-level external sharing settings.
Azure Active Directory admin center	<ul style="list-style-type: none">Enable external collaboration settings.Create a guest user account in Azure Active Directory.Assign privileges using Azure Active Directory Privileged Identity Management (PIM).

Answer:

Admin center	Action
Microsoft Teams admin center	<ul style="list-style-type: none">Enable guest access.Add the guest's domain to the Allowed Domains list.Add the guest to the team from the Teams admin center.
SharePoint admin center	<ul style="list-style-type: none">Set unique permission for the team site.Set inherited permission for the team site.Set organization-level external sharing settings.
Azure Active Directory admin center	<ul style="list-style-type: none">Enable external collaboration settings.Create a guest user account in Azure Active Directory.Assign privileges using Azure Active Directory Privileged Identity Management (PIM).

NEW QUESTION: 36

You are the global administrator of a tenant.

An account is blocked due to suspicious user activities.

You need to investigate the user activities.

Where should you investigate activities? To answer, drag the appropriate portals to the correct activities. Each portal may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Portals

- Security and Compliance
- Azure Active Directory
- Microsoft 365 admin center

Activity

- User logged in.
- User sent emails.
- User downloaded files.

Portal

- Portal
- Portal
- Portal

Answer:

Portals

- Security and Compliance
- Azure Active Directory
- Microsoft 365 admin center

Activity

- User logged in.
- User sent emails.
- User downloaded files.

NEW QUESTION: 37

You need to resolve the issue for the legal department employees.

What should you do?

- A. Grant the org-wide Teams Member group permissions to the parent site of the Team.
- B. Grant the org-wide Teams Member group unique permission to the document library.
- C. Set external sharing to Only people in your organization
- D. Set external sharing to Anyone.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 38

You are managing a Microsoft Teams environment for a company. You are setting up direct routing on a partner-hosted session border controller (SBC).

The SIP proxy does not receive SIP options from the SBC.

You need to resolve the issue.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Ensure that the Secure Real-Time Transport Protocol (SRTP) is enabled.
- B. Replace the partner-hosted SBC with a self-deployed SBC.
- C. Ensure that the SBC certificate is from a trusted Certificate Authority (CA).
- D. Modify the FQDN in the SIP profile to match the SBC certificate.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 39

A company has their headquarters in France and stores all over the world. The company wants to organize live events in China.

Meeting organizers in China cannot create Microsoft Teams live events.

You need to determine the cause of the issue.

What are two possible causes? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. The company already has 15 Teams live events running concurrently.
- B. Azure content delivery networks (CDNs) are not accessible in China.
- C. The company has not configured a VPN for connecting to the corporate network.
- D. Users do not have valid Advanced Communication licenses.

Answer: B,C ([LEAVE A REPLY](#))

Event team members and attendees will not be able to use Teams live events because Azure CDN is not accessible in China. A workaround is to use a company VPN connection, which gets the client connected to CDN via the customer's corporate network.

Note: The maximum number of concurrent live events per Microsoft 365 or Office 365 organization is 15.
