NEW QUESTION: 1

Exhibit.

You are designing a NetApp Cloud Backup solution for your on-premises ONTAP clusters to Azure Blob storage.

Referring to the exhibit, which two statements are true? (Choose two.)

- A. An outbound connection is required to the Connector.
- B. A connection between the cluster and the Cloud Backup service is not required.
- C. An inbound connection is required from the Connector.
- D. A connection between the cluster and the Cloud Backup service is required.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

Your customer wants to move from hosting all workloads in a public cloud to infrastructure-as-a-service (IaaS) on-premises.

In this scenario, which two benefits would you present to the customer? (Choose two.)

- A. data security
- B. data sovereignty
- C. agility
- D. scalability

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

Which two domain service providers are supported for authentication of Azure NetApp Files SMB shares?

(Choose two.)

- A. Azure Active Directory Domain Services (AADDS)
- B. Azure Active Directory (Azure AD)
- C. Azure Active Directory External Identities
- D. Active Directory Domain Services (ADDS)

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 4

You must configure data replication between a NetApp Cloud Volumes ONTAP system in AWS and a In this scenario, what is a cost-effective way to accomplish this goal?

- A. You must configure ExpressRoute and Direct Connect with your on-premises data center.
- B. You must configure a VPN connection between the AWS VPC and the Azure VNet.
- C. You must allow NetApp Cloud Manager to configure the network communication between the working environments during the cluster peering setup wizard.
- D. Set up an Internet gateway on the AWS VPC that is hosting the Cloud Volumes ONTAP instance.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

Exhibit.

Software-defined Storage Service Levels
 NetApp ONTAP designed with over 350 service providers and enterprises globally

Application-Aligned Storage Service Levels

Service Level	Value	Performance	Extreme
Minimum "SLA" (IOPS/TB allocated)	128	2048	6144
Maximum "SLO" (QoS Limit in IOPS/TB Stored)	512	4096	12288
Latency (ms)	17	2	1

Flash-accelerated, SAN and NAS, non-stop availability and durability, non-disruptive movement

NetApp

Referring to the exhibit, a volume in the Value storage service level is storing 10 TB of data. What is the maximum number of IOPS that the volume would receive?

- A. 5120
- B. 512
- C. 1280
- D. 128

Answer: C (LEAVE A REPLY)

NEW QUESTION: 6

One volume on your NetApp Cloud Volumes ONTAP High-Availability (HA) cluster has reached a capacity limit.

Which two actions would address this issue? (Choose two.)

- A. Create another storage virtual machine (SVM) on your Cloud Volumes ONTAP node.
- B. Move volumes to another aggregate on the same system.
- C. Move volumes to another Cloud Volumes ONTAP system.
- D. Migrate aggregates to the standby node in your Cloud Volumes ONTAP cluster.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 7

Your customer wants to migrate from an on-premises backup and recovery architecture to a public cloud target solution.

Which two factors should be considered when designing this solution? (Choose two.)

- A. recovery time objective
- B. mean time to repair
- C. recovery point objective
- D. media format

Answer: (SHOW ANSWER)

NEW QUESTION: 8

You are designing a multicloud architecture using Microsoft Azure and Amazon Web Services (AWS). The objective is to deploy NetApp Cloud Volumes ONTAP in both clouds and use SnapMirror for replication. You already deployed NetApp Cloud Manager and an associated Connector in Microsoft Azure. To connect your Cloud Manager to AWS, you are instructed to establish a site-to-site VPN between Microsoft Azure and AWS.

In this scenario, which two components are required to provision the AWS endpoint for the VPN connection?

(Choose two.)

- A. a virtual private gateway in AWS
- B. a VPN connection in AWS
- C. AWS Direct Connect
- D. firewall rules to unblock UDP port 4500

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 9

A customer wants to migrate workloads to Cloud Volumes ONTAP.

In this scenario, which two test cases would you design in your proof of concept to demonstrate the solution?

(Choose two.)

- A. test HA resiliency
- B. test storage efficiencies
- C. test FCoE
- D. test RAID DP

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

A customer is using AWS for their production environment. One of their applications uploads data into an AWS S3 bucket and the customer wants to duplicate this data into NetApp Cloud Volumes ONTAP.

In this scenario, how would the customer copy their data from AWS S3 to Cloud Volumes ONTAP?

- A. Use Cloud Sync service.
- B. Use Cloud Tiering.
- C. Use SaaS Backup.
- D. Use Cloud Backup service.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 11

Your team is deploying a containerized application on Kubernetes. The developers are currently collecting metrics for application response times.

d Insights to augment their

In this scenario, what are three ways that you would monitoring? (Choose three.)

- A. Automatically adjust the size of the cluster based on the workload.
- B. Provide an overall health view of the Kubernetes cluster.
- C. Curate application metrics and other Kubernetes monitoring into a single dashboard.
- D. Collect pod metrics.
- E. Provide automatic Snapshot copies of the containerized application.

Answer: A,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 12

You are designing a solution that will use NetApp Cloud Volumes ONTAP for Azure. The deployment and ongoing management of the solution should be able to be automated. In this scenario, which three automation methods would you include? (Choose three.)

- A. Rest API
- B. Ansible
- C. CloudFormation
- D. NetApp Manageability SDK
- E. ARM

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 13

You re-engineer your on-premises Infrastructure and migrating workloads to the cloud. You are asked to consider a hybrid cloud deployment.

Which two scenarios would highlight that a hybrid cloud deployment would be more appropriate for the workload in this situation? (Choose two.)

- A. when used as a transition platform during a longer-term migration to a fully cloud-native solution
- B. when used to reduce management between your on-premises data center and remote locations by hosting part of your architecture in the cloud
- C. when specific data in your solution is not permitted to be moved to the cloud due to regulations or policies
- D. when used to provide a guaranteed low latency solution for your analytics workloads

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 14

A customer wants to design a solution that provides unique persistent storage when scaling a StatefulSet application. The customer proposes using a volume claim template in the StatefulSet definition to generate a unique persistent volume and use NetApp Trident to automate the provisioning of the persistent volume.

Which Kubernetes object would be used in this scenario?

- A. ConfigMap
- B. CronJob

Answer: ([SHOW ANSWER](#))

Valid NS0-603 Dumps shared by BraindumpsPass.com for Helping Passing NS0-603 Exam! BraindumpsPass.com now offer the **newest NS0-603 exam dumps**, the BraindumpsPass.com NS0-603 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com NS0-603 dumps with Test Engine here: <https://www.braindumpspass.com/NetworkAppliance/NS0-603-practice-exam-dumps.html> (62 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 17

Your customer needs assistance developing a cloud storage solution that allows access from both NFSv3 and SMBv3 clients. You recommend Azure NetApp Files.

In this scenario, which two satisfy the requirements? (Choose two.)

- A. DNS servers that are reachable from the Azure NetApp files delegated subnet
- B. Azure Active Directory Domain Services (AADD) |
- C. Active Directory Domain Services (ADDS)
- D. Azure Active Directory (AAD)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

A customer has a multi-cloud environment and wants to deploy Cloud Volumes ONTAP in both AWS and Azure.

In this scenario, which two statements are true? (Choose two.)

- A. The customer must provide outbound Internet access for any Connector.
- B. The customer must deploy one Connector for AWS and a second Connector for Azure.
- C. The customer must deploy a single Connector for either AWS or Azure and create a VPN connection to the other cloud.
- D. The customer must provide a private subnet with only VPC or VNet routing for any Connector.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 19

You are asked to design a monitoring solution for your Cloud Volumes ONTAP environment for AWS. You decide to enable the Monitoring service in Cloud Manager.

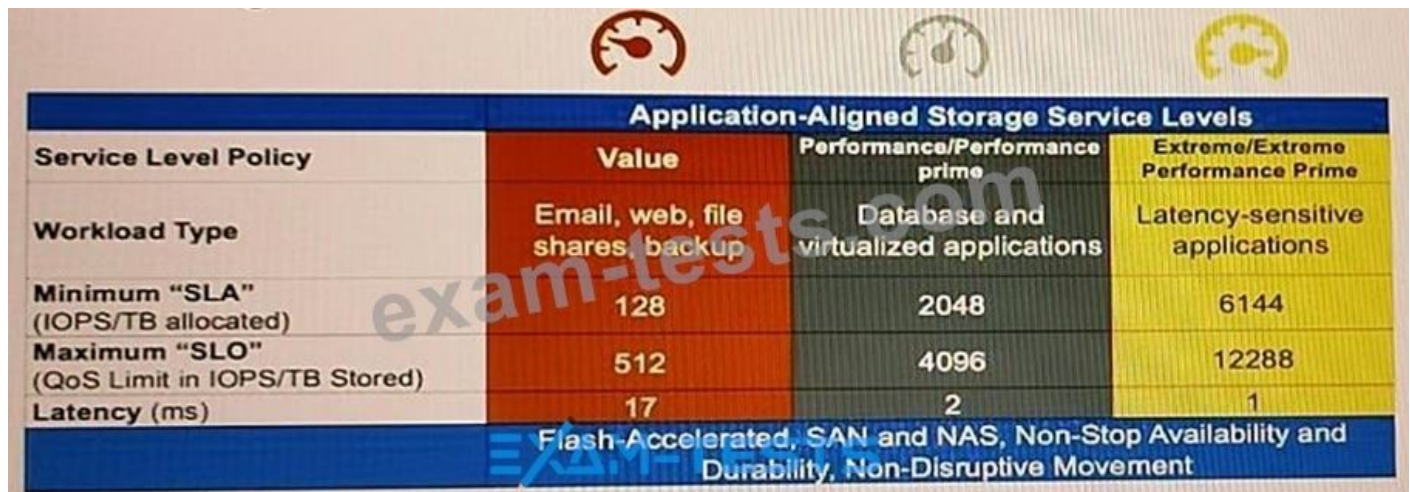

In this scenario, which two statements are correct? (Choose two.)

- A. You must configure alerts through the Cloud Insights user interface.
- B. The Monitoring service deploys a virtual machine into your VPC.
- C. The Monitoring service displays the performance of clusters using the Active IQ page in NetApp Cloud Manager.
- D. You must have a pre-existing NetApp Cloud Insights tenant to enable the Monitoring service.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 20

Exhibit.

The table is titled "Application-Aligned Storage Service Levels" and is divided into three columns: "Value", "Performance/Performance prime", and "Extreme/Extreme Performance Prime". The rows represent different metrics: "Service Level Policy", "Workload Type", "Minimum 'SLA' (IOPS/TB allocated)", "Maximum 'SLO' (QoS Limit in IOPS/TB Stored)", and "Latency (ms)". The "Value" column is red, "Performance/Performance prime" is grey, and "Extreme/Extreme Performance Prime" is yellow. A blue footer bar contains the text: "Flash Accelerated, SAN and NAS, Non-Stop Availability and Durability, Non-Disruptive Movement".

Service Level Policy	Value	Performance/Performance prime	Extreme/Extreme Performance Prime
Workload Type	Email, web, file shares, backup	Database and virtualized applications	Latency-sensitive applications
Minimum "SLA" (IOPS/TB allocated)	128	2048	6144
Maximum "SLO" (QoS Limit in IOPS/TB Stored)	512	4096	12288
Latency (ms)	17	2	1

Flash Accelerated, SAN and NAS, Non-Stop Availability and Durability, Non-Disruptive Movement

You are implementing storage-as-a-service using the service levels that are shown in the exhibit. In your implementation plan, which metric is used for the SLA and SLO?

- A. I/O density
- B. throughput
- C. latency
- D. RAID level

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

You deployed a custom application on AWS that uses MongoDB as the backend. The database files of MongoDB reside on an iSCSI volume hosted on NetApp Cloud Volumes ONTAP in high availability mode.

In this scenario, what is required to provide fault tolerance for applications when one of the storage nodes fails?

- A. Fabric Pool
- B. ONTAP only
- C. iSCSI multipath I/O on the client
- D. load balancer

Answer: D ([LEAVE A REPLY](#))
