NEW QUESTION: 1

Where can you NOT include a paragraph?

- A. Correspondence
- B. Section
- C. Flow
- D. Paragraph

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 2

An online shopping application collects and displays the user's shipping address. An address contains a street number, city, state, and zip code. This information is always presented together in a group, whether it is used for an order confirmation or for invoice billing.

Which UI component is appropriate for displaying the address information?

- A. Section
- B. Skin
- C. Portal
- D. Control

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

How do you replace the Pega logo with the appropriate logo for each operating subsidiary?

- A. Create a portal header for each division.
- B. Create a skin for each division.
- C. Create a portal record for each division.
- D. Create a harness for each division.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 4

You want to display an error message to the user if the data page fails to retrieve data. The data page is sourced by a REST connector. How do you detect the error?

- A. Use the error handler flow on the connector.
- B. Use a transition condition in the activity step invoking the connector.
- C. Apply the standard `pxErrorHandlingTemplate` data transform in the response data transform.
- D. Use a when condition in the response data transform configured for the connector.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 5

In your organization, employees work between 8:00 AM and 5:00 PM EST only. Some Assignments are sent to the employee Work Queue between 5:01 PM and 07:59 AM, but work does not begin until regular business hours start. For Assignments that come in after hours, which Assignment Ready option do you use to delay the start of Service-Level Agreements until 8:00 AM each day?

- A. Time delay
- B. No configuration needed
- C. Dynamically defined on a property
- D. Immediately

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 6

You want to improve the user experience for an application for users on mobile devices. Which three configuration options improve the user's ability to select and operate controls?

(Choose Three)

- A. Place controls in a Fixed layout to avoid screen wrapping.
- B. Use links instead of a menu for navigation.
- C. Use standard Pega controls rather than custom controls.
- D. Configure the display of a Date Time field to use a native control.
- E. Size clickable items no smaller than 44 x 44 pixels.

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 7

The primary purpose of a production ruleset is to allow rules to be _____.

- A. migrated to a production environment
- B. reused in multiple production environments
- C. tested in a production environment
- D. updated in a production environment

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 8

A requirement states that when a case is assigned to a user for review, its work status is set to Open-Review. Which two steps do you perform to implement this requirement?

(Choose two.)

- A. Add Open-Review as an allowed status on the case type record.
- B. Create a field value record for the Open-Review status.
- C. Apply the Open-Review status to the appropriate assignments.
- D. Configure a data transform to apply the Open-Review status on the appropriate assignments.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 9

Which element do you configure to create a reusable text style in a skin to apply to both button labels and list entries?

- A. A component
- B. A layout
- C. A mixin
- D. A format

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 10

If a customer reports an issue with their online order, an Investigation case is created. All assignments for Investigation cases are higher priority than assignment Which configuration supports the requirements to have a greater default urgency on Investigation case assignments?

- A. Create a SLA rule and increase the initial urgency.
- B. Configure an optional action to enable manual changes to case urgency.
- C. Create a SLA rule and ensure that the assignment is ready immediately.
- D. Increase the initial urgency on the case type settings.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which two of the following statements represent the benefits of using a template?

(Choose Two)

- A. The template automatically sets up all user IDs and accounts for your application.
- B. You can use the Search all types option to find an application template that matches your business requirements.
- C. You do not need to test applications that you create using a template.
- D. A template provides reusable case types and data types that are set up for you.
- E. You can add custom Java code to your new application.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

Which of the following is least likely to impact the runtime experience of a report?

- A. Changing fitter criteria
- B. Disabling Paging

- C. Including a class join
- D. Column Exposure
- E. The order of the columns in the report

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 13

Business users are not able to update a delegated business rule. Select two possible causes.
(Choose Two)

- A. The availability of the delegated business rule is set to Blocked.
- B. The business users do not have appropriate privileges in the access group.
- C. The delegated business rule is not in an unlocked production ruleset.
- D. The delegated business rule is currently being executed by another user.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 14

When multiple users attempt to save the same Case, the Allow multiple users Case-locking strategy gives each user the choice of which version to save.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

What are the minimum components of a user interface (UI) action set?

- A. One action, one event, and one condition
- B. One action and one condition
- C. One action and one event
- D. Two actions and one event

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 16

A user has the following rulesets in their ruleset list: TGB:01-01 TGBInt:01-01 LoanShrk:01-01 LoanShrkPrime:01-01
LoanShrkInt:01-01 There are six instances of Collect Borrower Details in the rules cache as indicated in the table below:

Instance	Apply to:	Ruleset	Availability
One	TGB-FW-LoanShrk-Work	TGB:01-01-05	Withdrawn
Two	TGB-FW-LoanShrk-Work	TGB:01-01-03	Yes
Three	TGB-FW-LoanShrk-Work	LoanShrkPrime:01-01-05	Withdrawn
Four	TGB-FW-LoanShrk-Work	LoanShrkPrime:01-01-01	Yes
Five	TGB-FW-LoanShrk	TGBSubPrime:01-01-03	Yes
Six	TGB-FW-LoanShrk	LoanShrkPrime:01-01-01	Yes

A rule with an Apply to: class of TGB-FW-LoanShrk-Work-AutoLoan calls CollectBorrowerDetails. Which rule is selected from the rules cache during rule resolution?

- A. Instance Two
- B. Instance Three
- C. Instance Five
- D. Instance One
- E. Instance Six
- F. Instance Four

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 17

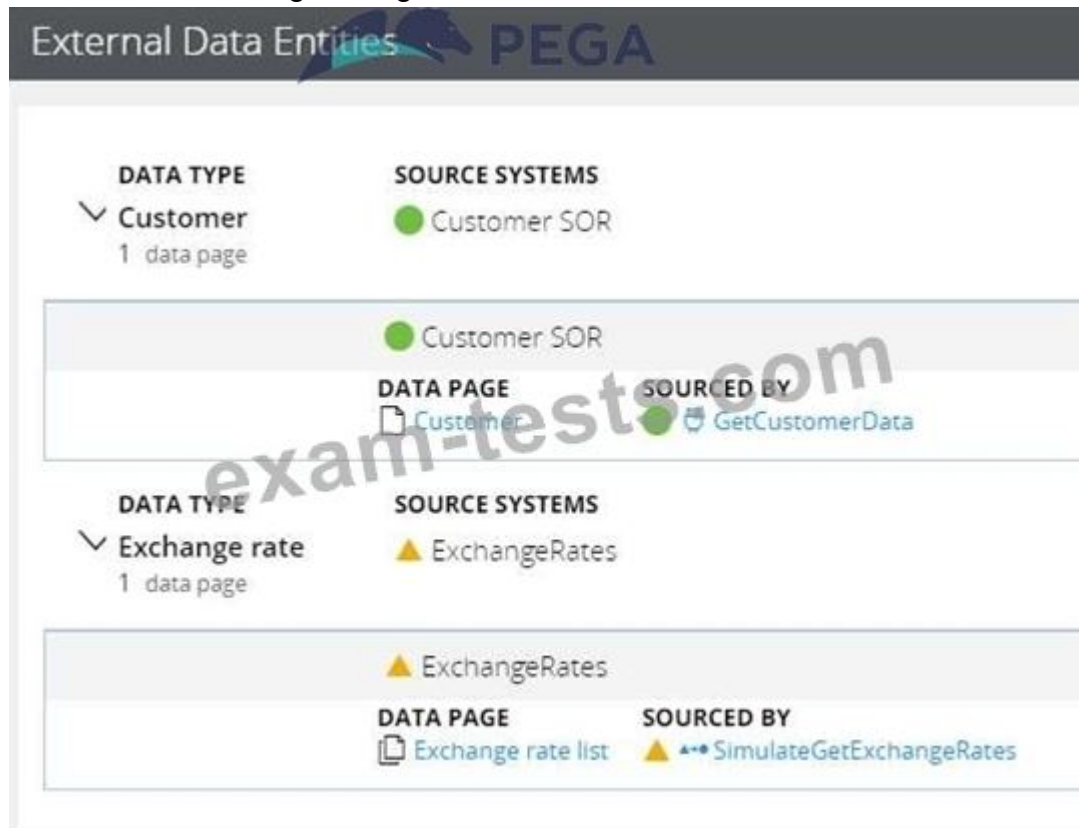

How do you configure the field to support this requirement?

- A. Configure a validate rule to test the tax identification number pattern.
- B. Set the minimum and maximum values to "10" in a text field.
- C. Use an edit validate rule that validates the tax identification number pattern.
- D. Use a decimal property type and make the field required.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 18

What does the orange triangle in this screen indicate?

- A. The service returned an error
- B. The service could not be reached
- C. The data page source system is simulated
- D. The data page's connector is not properly configured

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 19

You want to write all errors detected when loading a data page to a log file. How would you do that?

- A. Invoke the error handler from the post processing activity in a data page.
- B. Use the error handling flow.
- C. Use a transition condition.
- D. Use an existing function in the error handling data transform.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 20

The following rule and record types are invoked to determine the endpoint for a connector.

1. A data page property is referenced.
2. The value is used by the SOAP connector to invoke the service.
3. The SOAP Connector is invoked.
4. The data transform for the data page is executed if the page is not already available on the clipboard.

5. The data transform invokes a utility function to obtain the value of a dynamic system setting.
Select the order in which these rules and records are executed.

- A. 3, 1, 4, 5, 2
- B. 5, 4, 3, 2, 1
- C. 3, 2, 4, 1, 5
- D. 3, 4, 1, 5, 2

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 21

A hospital uses a Patient visit case type to track Emergency Room (ER) visits. The case type can create Lab analysis and Diagnostic imaging child cases. While the child cases are active, the doctor must be able to update the Patient visit case with notes.

In the Answer Area, select the three configurations that allow a doctor to update the parent case while staff perform assignments on their respective child cases.

Case Types	Configuration
Patient visit	Allow multiple users Allow other users to open the parent case type Allow one user
Lab analysis	Allow multiple users Allow other users to open the parent case type Allow one user
Diagnostic imaging	Allow multiple users Allow other users to open the parent case type Allow one user

Answer:

Case Types	Configuration
Patient visit	Allow multiple users Allow other users to open the parent case type Allow one user
Lab analysis	Allow multiple users Allow other users to open the parent case type Allow one user
Diagnostic imaging	Allow multiple users Allow other users to open the parent case type Allow one user

NEW QUESTION: 22

A user is processing a case and receives an error message that the system could not find an appropriate rule to use. Select two possible reasons rule resolution failed to find a rule to execute.

(Choose Two)

- A.** The user does not have appropriate privilege to access the rule chosen by rule resolution.
- B.** The context of the rule chosen by rule resolution does not match the context of the referencing rule.
- C.** The availability of the rule chosen by rule resolution is set to Blocked.
- D.** The rule chosen by rule resolution is in a ruleset that is not in the application's ruleset list.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 23

In which two situations do you use the PegaRULES Log Analyzer to analyze application performance?

(Choose Two)

- A.** Before migrating an application to a testing system
- B.** During User Acceptance Testing
- C.** After the application is deployed to a production system
- D.** Throughout the application development life cycle

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 24

Which statement best describes the difference between optimizing a top-level property and an embedded property?

- A.** A Declare Index rule is created when optimizing a top-level property, but is not created when optimizing an embedded property.
- B.** Optimization only provides a performance benefit for embedded properties.
- C.** Optimizing a top-level property does not require a schema change to the database. Optimizing an embedded property does require a schema change.
- D.** A top-level property is exposed in the table that contains the BLOB. An embedded property is exposed in a different table.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 25

You perform a major skim on the ruleset ABC:02-02 to ABC:03-01. In the Answer area, select the ruleset versions that the skim operation uses.

Ruleset version	Does the skim operation use the ruleset version?
01-01-01	 Yes No
02-01-01	 Yes No
02-02-01	 Yes No
02-01-05	 Yes No

Answer:

Ruleset version	Does the skim operation use the ruleset version?
01-01-01	 Yes No
02-01-01	 Yes No
02-02-01	 Yes No
02-01-05	 Yes No

NEW QUESTION: 26

Which statement demonstrates a well-written requirement?

- A. Eliminate order processing delays due to incorrect routing of requests.
- B. System displays "Authorization History and Summary" for the last 12 months.
- C. User must be able to select "Add Temporary Member" when "Authorization is Required" notice is displayed.
- D. A user should be able to cancel an order at any time.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 27

You are updating an application that is comprised of a number of ruleset versions. How do you copy the highest version of each rule in the different ruleset versions into a higher ruleset version?

- A. Use the Ruleset Maintenance wizard and skim the rulesets to collect the highest version of every rule into the new ruleset version.
- B. Use the Application rule form to create a branched ruleset, then merge the rulesets into the new branch.

C. Use the Application Structure landing page to lock the current ruleset versions and increment the application to a new ruleset version.

D. Use the Ruleset Maintenance wizard to move the rules from the existing rulesets into the new ruleset.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

You have a connector that fetches a list of currency exchange rates from an external system. Where do you invoke the connector from?

A. Activity

B. Data page

C. Integrator shape in a flow

D. Flow action

Answer: **B** ([LEAVE A REPLY](#))

NEW QUESTION: 29

A client wants to replace the Pega logo in the Case Manager and Case Worker portals. Instead of using the company logo, the client wants you to use the logos for each of the company's operating subsidiaries - a user in the ABC subsidiary sees the logo for ABC, and a user in the XYZ subsidiary sees the XYZ logo.

How do you add the logos to the application?

A. Upload each logo to a unique binary file record.

B. Upload each logo to a unique section.

C. Upload each logo to the portal record.

D. Reference each logo in a skin.

Answer: **C** ([LEAVE A REPLY](#))

NEW QUESTION: 30

A given user interaction takes five seconds. You need to investigate why it is taking so long. Which tool do you use to start the investigation?

A. Pega Log Analyzer (PLA)

B. Performance Analyzer (PAL)

C. Database Trace

D. Performance Profiler

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

Drag the words from below into the correct boxes.

The [] is for traditional development and not recommended when creating a new application. To create an up-to-date-application with many built-in automations and efficient updates, choose[]. Early adopters might consider [], for the latest client-side graphical interface.

1. Theme UI Kit

2. Theme cosmos

3. Cosmos React

A. 1, 2, 3

B. 3, 2, 1

C. 2, 3, 1

D. 2, 1, 3

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 32

A connector is used to _____.

(Choose Three)

A. Identify the order of events in a process.

B. Identify an outcome of a decision.

C. Indicate an automated action performed by the application.

D. Indicate an event handled by a user.

E. Indicate possible branches of a process.

Answer: A,B,E ([LEAVE A REPLY](#))

NEW QUESTION: 33

Your online shopping application serves international customers. You need to define a Data Page that holds currency exchange rates. All users accessing the application need to use the information.

The Scope of this Data Page should be set to _____.

A. Application

B. Thread

C. Node

D. Requestor

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 34

Select two benefits of adopting a rule delegation strategy.

(Choose Two)

A. Adopting a rule delegation strategy can help improve the business' ability to adapt to changing business conditions.

- B.** Adopting a rule delegation strategy can help lower the overall costs of building and maintaining business applications because fewer architects are required if business users can make changes to the application on their own.
- C.** Adopting a rule delegation strategy allows business users and architects to focus on their specific tasks related to application development and maintenance.
- D.** Adopting a rule delegation strategy allows business users to change business policies more quickly by avoiding long approval processes.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 35

In the following example, the Purchasing, PurchasingInt, and Inventory rulesets are configured for application validation. MyCo and MyCoInt are configured for ruleset validation. The prerequisites for MyCo are MyCoInt and Inventory. The prerequisite for MyCoInt is Pega-ProcessCommander.

Ruleset	Validation mode	Prerequisites
Purchasing	Application	N/A
PurchasingInt	Application	N/A
MyCo	Ruleset	MyCoInt, Inventory
MyCoInt	Ruleset	Pega-ProcessCommander
Inventory	Application	N/A

Which of the following two statements are correct? (Choose Two)

- A.** Rules in MyCoInt can reference rules in MyCo.
- B.** Rules in Inventory can reference rules in MyCo.
- C.** Rules in Purchasing can reference rules in Inventory.
- D.** Rules in MyCo can reference rules in Purchasing.

Answer: **B,C** ([LEAVE A REPLY](#))

NEW QUESTION: 36

You have a connector that creates a new customer record in an external system. Where do you invoke the connector from?

- A.** Activity
- B.** Integrator shape in a flow
- C.** Flow action
- D.** Data page

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 37

What is the difference between a requirement and specification?

- A.** A requirement describes what the business need is, and specifications describe how the application will meet the business need.
- B.** A requirement provides a blueprint for how the application will meet the goals defined in a specification.
- C.** There is no difference between a requirement and a specification.

D. A requirement defines a specific step in a process; a specification defines a complete process.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 38

When a user selects a product in a list, the application displays data about that product. Data is copied to a page property using the Copy data from a data page option. After the data has been copied to the property, when is the data copied to the property again?

- A.** The next time the case is opened
- B.** Never
- C.** The next time the property is accessed
- D.** When the product is changed

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 39

In an online shopping application, the primary case type PurchaseOrder has two child case types: Payment and Packaging. In processing PurchaseOrder case PO-11, Payment case Pay-37 and Packaging case Pac-56 are created.

Which of the following statements about the processing of PO-11, Pay-37, and Pac-56 is correct?

- A.** Both Pay-37 and Pac-56 have to be resolved before PO-11 is resolved.
- B.** PO-11 can be resolved when either of Pay-37 and Pac-56 is resolved.
- C.** Pac-56 has to be resolved before Pay-37 is resolved.
- D.** PO-11 has to be resolved before either of Pay-37 and Pac-56 be resolved.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 40

What two steps are necessary to configure a report definition join?

(Choose Two)

- A.** Create a meaningful filter to reference from the columns you want to display
- B.** Determine the type of join you need to perform (inner, outer, left)
- C.** Select the proper columns to join from each table
- D.** Configure an association rule to join multiple databases

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 41

Which of the following statements is true about the relationship between base rules and circumstanced rules?

- A.** The name of circumstanced rule remains same as the base rule.
- B.** A base rule is created by removing circumstancing condition from a rule.
- C.** A new circumstanced rule always gets created in next higher ruleset version.
- D.** A base rule is needed as a backup if a circumstanced rule gets deleted.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 42

Which two of the following steps are required to create a Pega Web Mashup?

(Choose Two)

- A. Configure a list of approved sites for the site origin.
- B. Generate the mashup code.
- C. Set the data-peg-resizetype attribute to customize the mashup width.
- D. Define attributes to defer for the default action.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 43

Customers under the age of 18 must provide the name and ID number of a consenting parent as part of an enrollment process. Which decision rule is best suited to determine whether to display entry fields when a consenting parent is needed?

- A. Map Value
- B. Decision tree
- C. Predictive model
- D. When

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 44

Which of the following two statements about Attribute-based access control (ABAC) are true?

(Choose Two)

- A. ABAC control access to objects by comparing attributes assigned to users and an objects.
- B. Once you disable ABAC, you cannot re-enable it and must use Role-based attribute control (RBAC).
- C. ABAC allows you to control access based on a user's membership in access groups.
- D. ABAC can leverage inheritance.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 45

Depending upon the purchase request amount, approvals cascade from the user to a loan officer, then to a directory and finally to a vice president. The loan officer is the user's manager. The director is the loan officer's manager. The vice president is the director's manager.

Which two approaches can you use to configure the cascading approval?

(Choose Two)

- A. Approval based on Authority Matrix, with a Decision Table rule to determine the approver(s)
- B. Approval based on Reporting Structure, using the Workbasket manager to determine the approver(s)
- C. Approval based on Reporting Structure and when conditions, using each operator's Reporting To manager to determine the approver(s)
- D. Approval based on Authority Matrix, with a Decision Tree rule to determine the approver(s)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

A data page is used to retrieve data from an external system. If an error occurs, you want to display a message to the user and send an email to the system administrator. How do you implement this requirement?

- A. Create a custom error handler flow that displays the error message and sends an email.
- B. Invoke the connector from an activity and use standard Obj- methods to add an error message end send an email.
- C. Create an error handler data transform that adds an error message to the data page and sends an email.
- D. Configure an error handling process that displays the error message and sends an email.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 47

Which two of the following are prerequisites for creating a branch rule for parallel development?

(Choose Two)

- A. Create an access group that references the team application. Add developers to the access group.
- B. Create a team application.
- C. Save a copy of the original rule into the base ruleset.
- D. Circumstance the original rule.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 48

An application must support two case types. The case types are released into production on separate schedules. Given these requirements, which specialization approach do you use?

- A. The case types are organized in unique classes. Each case type is managed with a unique ruleset.
- B. All rules are managed in the same ruleset and circumstanced by case type.
- C. The case types are organized in the same class. Each case type is managed with a unique ruleset.
- D. The case types are organized in unique classes. Both case types are managed with a single ruleset.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 49

In a purchase request case type, you have the following requirement: Purchase requests should automatically go to a manager of an employee. To meet this requirement, you design a case with a _____.

- A. stage to route requests to the manager
- B. step that routes to the manager
- C. process that routes to the manager

D. change stage step to allow the employee to route to the manager

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 50

Identify three true statements about accessing databases through external classes.

(Choose Three)

A. External classes map Pega properties to database columns.

B. External classes contain a BLOB for faster processing.

C. External classes do not contain the pzinsKey property.

D. External classes require a Pega-generated composite key.

E. External classes cannot belong to a class group.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 51

Which two of the following options are good uses of Connect SQL rules?

(Choose Two)

A. Execute SQL statements that contain database vendor specific syntax.

B. Update an external table as part of a distributed transaction.

C. Execute a complex SQL statement such as a join or stored procedure against an external database.

D. Execute custom SQL statements to improve performance of queries and updates to the PegaRULES database.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 52

A travel reservation servicing case includes a service level for responding to requests. The service level intervals vary according to passenger status, class of service, and fare type. Which implementation satisfies this requirement?

A. Create a multivariate circumstanced rule, a circumstance definition, and a circumstance template.

B. Create a single property circumstanced rule.

C. Create a single property circumstanced rule and a when rule.

D. Create a multivariate circumstanced rule and a when rule.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 53

Select two actions can you do with the Pega API?

(Choose Two)

A. Update a decision table.

B. Access data from a data page

C. Add a property to a data class.

D. Create a new case

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 54

One concern about integrating with external systems is managing connection information as the application migrates from one server to another. You address this concern using _____.

- A. Dynamic Class References
- B. Global Resource Settings
- C. Branches
- D. Circumstances

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 55

Which three options enable you to populate the list of approvers for a cascading approval using an authority matrix?
(Choose Three)

- A. Data transform
- B. When rule
- C. Decision Tree
- D. Activity
- E. Decision table

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 56

pyWorkPage stores which type of information?

- A. Data cached from an outside system.
- B. Information about the Pega server.
- C. Information about the current operator.
- D. Information about a case.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 57

Select two benefits of using Application Settings.

(Choose Two)

- A. Application Settings affords greater flexibility for changing values between environments when working with external systems.
- B. Application Settings allows you to define settings for your different environments in one location.
- C. Application Settings improves the performance for integration with the external system.
- D. Application Settings allow you to manage settings throughout the application's page views and channel interfaces.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 58

A requirement states that when an assignment is in review, its work status is set to Open-Review. Which two steps do you perform to implement this requirement?

(Choose Two)

- A. Apply the Open-Review status to the appropriate assignments.

- B. Add a data transform to the process to apply the Open-Review status before reaching the appropriate assignment.
- C. Create a field value rule for the Open-Review status.
- D. Add Open-Review as an allowed status on the case type rule.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 59

Select the case type relationship that satisfies the requirement.

- A. Configure checkout request as a child case of hotel review.
- B. Configure hotel review as a child case of the checkout request.
- C. Configure hotel review as a spin-off case of the checkout request.
- D. Configure both checkout request and hotel review as top-level cases.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 60

You configure a child case to override the location strategy of the parent case. The parent case has a time-out value of one hr. Which time-out value option is recommended for the child case?

- A. Set the Access time-out value greater than the parent case time-out value.
- B. The Access time-out value on the child case cannot be changed.
- C. Set the Access time-out value less than the parent case time-out value.
- D. Set the Access time-out value equal to the parent case time-out value.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 61

An agent runs every 300 seconds. You have been asked to update the agent so that it runs every Friday at 12:00 A.M. How do you modify the agent schedule to meet this requirement?

- A. Change the Recurring pattern to Periodic and enter the Interval value.
- B. Keep the Recurring pattern and update the Interval value.
- C. Keep the Periodic pattern. In the Parameters dialog, update the schedule.
- D. Change the Periodic pattern to Recurring. Open the Parameters dialog and update the schedule.

NEW QUESTION: 62

You want to create a new minor version of an application ruleset to add a new feature to your application. The new feature will be made available to users in a phased rollout. How do you update the application to add the new ruleset version?

- A. Lock and roll the existing ruleset, and update the existing application version.
- B. Create a new application version and add the new ruleset version as a production ruleset.
- C. Create a branch ruleset and a new application, and add the branch ruleset to the application.
- D. Lock and roll the existing ruleset, and create a new application version.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 63

Consider this business use case:

Responses to customer service requests are required within 24 hours of receipt. Due to seasonal fluctuations, response times may be adjusted at the discretion of business managers. You create a service level agreement (SLA) to monitor response times.

Which solution allows adjusting the response times on demand?

- A. Delegate the SLA to the business managers so they can configure seasonal adjustments.
- B. Plan a release cycle for updating the SLA for each of the expected seasonal adjustments.
- C. Create multiple circumstances of the SLA to account for the seasonal adjustments.
- D. Define the response times using property values that are circumstanced to account for the seasonal adjustments.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 64

An application change goes into effect on June 15, 2016. Due to this change, two fields are added to a user form, to collect information for compliance purposes. Assuming that today is April 30, 2016, how should you configure circumstancing for the form?

- A. Update the existing form to apply a circumstance; specify June 15th, 2016, as the end date.
- B. Circumstance the form by property and date; test that the creation date for the case is on or after June 15, 2016.
- C. Circumstance the form by template and definition; in the definition, specify June 15, 2016, as the cut-off date.
- D. Circumstance the form by property and date; specify June 15, 2016, as the start date.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 65

What is the purpose of the Enterprise Class Structure (ECS)?

- A. ECS provides a structure supporting rule reuse.
- B. ECS is used to alter the performance of the Pega Platform.
- C. ECS references single-value properties and complex properties
- D. ECS documents industry or enterprise standards that applications must contain.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 66

Drag the words into the correct boxes.

Answer:

NEW QUESTION: 67

Which two steps do you perform to update the logo in a portal header?

(Choose Two)

- A. Reference the image in the application record.
- B. Upload the new image to a binary file record.
- C. Reference the image in the portal skin.
- D. Update the portal header to reference the new image.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 68

As a developer for an online shopping application, you decide to encrypt credit card details that customers enter in an order case type. Which data encryption approach do you choose to encrypt the data?

- A. Case level
- B. Property level
- C. Class level
- D. Application level

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 69

Multiple teams need to update the same application version during a development cycle. Which two actions do you perform so that the teams do not affect each other's work?

(Choose Two)

- A. Create a separate production ruleset for each team.
- B. Create a new ruleset version for the base application.
- C. Create branches in each team's application.

D. Create a new application for each team built on the base application.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 70

While testing a business process to approve an expense report, you receive an error. Which tool allows you to review the rule execution to determine the source of the error?

- A.** The Clipboard tool
- B.** The Application Profiler
- C.** The Dependency Analyzer
- D.** The Tracer

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 71

The risk premium for a property insurance quote is based upon the location, size, and age of a house. Which two types of decision rules are best suited to configuring this decision?

(Choose Two)

- A.** Strategy
- B.** Decision tree
- C.** When
- D.** Decision Table

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 72

Which two of the following steps are needed to implement Global Resource Settings?

(Choose Two)

- A.** Create a property for each environment
- B.** Create a data transform
- C.** Create a report definition
- D.** Create a data page

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 73

You are configuring a declarative network that contains eleven declare expressions, which are used to calculate the interest rate for a home mortgage. For example, the target value Property Tax Assessment is used a source value when calculating the Assessed Property Value. The declare expressions use target values from other expressions to calculate their target values. The field displaying the interest rate appears on the approval form. To reduce the number of calculations in order to optimize performance, how would you configure the declare expressions?

- A.** Specify backward chaining in the total interest rate declare expression.
- B.** To calculate the total interest rate value, add the all the declare expression target property values.
- C.** Apply the declare expression in the approval flow action.
- D.** Specify forward chaining in the declare expression that calculates the total interest rate value.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 74

When you configure a flow action with a preprocessing action, the system performs the action_____.

- A. when the user updates the details in the assignment
- B. if the flow action is the default action for the assignment
- C. each time the user initiates the flow action
- D. when the user enters data in the form

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 75

The TGB organization structure has a Sales unit, and it belongs to a Marketing division. TGB plans to add new units for the East, Central, and West geographical sales regions. These regional units report to the Sales unit.

How do you configure the organizational hierarchy to support the new structure?

- A. Add the regional units to the Marketing division.
- B. Add the regional units to the TGB organization.
- C. Add the regional units as sub-units to the Sales unit.
- D. Add a new Regional unit to the Marketing division and add the East, Central, and West regional units as child units to the Regional unit.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 76

You have a requirement to update account information in an external database. Account information is stored in a single table.

What are the two necessary steps to read and write data to the database table?

(Choose Two)

- A. Configure activities to read and write data using Obj- methods.
- B. Create a local storage to hold the data.
- C. Run the External Database Table Class Mapping wizard.
- D. Configure a data page to use SQL connect rules.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 77

Select two configuration options that enable you to use the same data page for populating a list and looking up information based on the selected item in the list.

(Choose Two)

- A. Use page list keys on the data page to identify the selected list item.
- B. Set the data page Edit mode to editable so the list of values can be updated.
- C. Use the Access pages with user defined keys option on the data page.
- D. Add parameters to the data page to store the value of the selected list item.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 78

You are asked to build a report listing customer order cases with an Order Total value over USD10000 sorted by Creation date (pxCreateDate). The report should display the following three fields:

Case ID (pyID), Customer ID, and Order Total.

Which property or property combination should you optimize to improve performance?

- A. pxCreateDate and Order Total
- B. pxCreateDate
- C. Customer ID and Order Total
- D. Order Total

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 79

Which two requirements demonstrate the need to configure correspondence?

(Choose Two)

- A. Assign a new insurance claim to a case worker to process.
- B. Text the customer with status changes in an insurance claim.
- C. Fax a new insurance claim to the auto repair shop.
- D. Phone a customer for additional information about the case.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 80

Users can select a check box to subscribe to a messaging service. Selecting the check box displays a field for a user to enter a mobile phone number. How do you configure the application to display a field for entering a mobile phone number only when the check box is selected?

- A. Use a when condition in the UI form to determine whether to show the mobile phone number field.
- B. Use a when condition in a data transform to determine whether to show the mobile phone number field.
- C. Use a when condition in the flow to branch the flow based on case data.
- D. Use a circumstance on the check box property to create a rule variant that is effective when the check box is selected.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 81

You are working on an update to an application which only affects some rules for a certain case type. The customer has requested that a patch update be released. How do you create the new ruleset version?

- A. Use the Ruleset Maintenance wizard to merge the existing rules in the relevant rulesets to the new version.
- B. Create a branched ruleset, then copy the affected rules into the new branched ruleset.
- C. Use the Ruleset Maintenance wizard to skim the relevant rulesets to copy the highest version of existing rules to the new version.
- D. Use the Lock & Roll functionality to lock the current ruleset and increment the ruleset version.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 82

Which two statements identify why you should automate correspondence?

(Choose Two)

- A. Automating correspondence keeps all interested parties informed of the current status of a case.
- B. Automating correspondence allows for sending consistent information to users.
- C. Automating correspondence allows you to advance a case.
- D. Automating correspondence allows you to send timely communication.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 83

The primary purpose of a service level is to _____.

- A. Generate service level reports
- B. Help ensure timely completion of assignments
- C. Track assignment status over time
- D. Assign cases to the appropriate case worker

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 84

Select two record types that are involved when configuring a production ruleset.

(Choose Two)

- A. Work group
- B. Operator
- C. Organization
- D. Access group
- E. Application

Answer: D,E ([LEAVE A REPLY](#))

NEW QUESTION: 85

Using Live UI, you must reorder the position of fields on a user form. How do you use the tool in order to complete this task?

- A. In the hierarchy tree, copy the original element and paste it in the new position.
- B. On the user form, copy the original element and paste it in the new position.
- C. On the user form, drag and drop the field in the new position.

D. In the hierarchy tree, drag and drop the element in the new position.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 86

An agent in your system is running on three nodes. You have been asked to update the agent's schedule interval. How would you make your update?

- A. Open the agent schedule for each node the agent is running on and update the interval.
- B. In SMA, select a node, then select the agent, and finally update the interval.
- C. Open the agents rule and update the interval.
- D. For each node, copy the agent schedule instance and modify the interval.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 87

A page property contains product information that is accurate as of the time the product is ordered. This information is stored in an external system and accessed by a data page. How do you implement this requirement?

- A. Select Refer to a data page on the page property.
- B. Select Copy from a data page on the page property.
- C. Configure the page property to refer to a keyed data page.
- D. Define a reference property that refers to the data page.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 88

A claim case records the items of loss. The property reference to the description of an item of loss looks like this: .ItemOfLoss(1).Description. The property reference .ItemOfLoss(1).Description is an example of a _____ property?

- A. Page
- B. page list
- C. page group
- D. value list

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 89

Use _____ to use conditional logic to determine which data should be propagated.

- A. the property mapper
- B. a data page
- C. a decision tree
- D. a data transform

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 90

Which of the following options can you use along with system alerts to determine if your application performance needs optimization?

- A. Performance Profiler
- B. Database Trace
- C. Performance Analyzer (PAL)
- D. Live UI tool

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 91

You are troubleshooting a performance issue with a user interaction that exceeds the maximum time of five seconds. The elapsed time shown in the performance report indicates a total of two seconds.

Which tool do you use to determine what is adding the additional three seconds to the performance measure?

- A. Log Analyze
- B. Performance Profiler
- C. Database Trace
- D. System Management Application

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 92

The [] appender records system events such as errors, while the [] appender records events that affect performance.

Solution:

PEGA

ALERT

Determine whether the given solution is correct?

Response:

- A. Incorrect
- B. Correct

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 93

A manager wants to use resources from two different units to process onboarding cases. You create a record to meet this requirement.

- A. Access group

- B. Work pool
- C. Work group
- D. Class group

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 94

A flow action calls a pre-processing data transform to initiate values. There are several flow actions available for the assignment. You want to make sure that the values are only initiated once for each flow action.

How do you implement a solution?

- A. Make sure that the flow action does not have the highest likelihood since it will always be invoked.
- B. Add logic to the pre-processing data transform to test if values were already initiated.
- C. Configure the data transform as post-processing instead of pre-processing.
- D. Do nothing. The pre-processing data transform is only called once for each assignment.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 95

In Pega Decision Management, how do you prevent repeating an offer to a customer?

- A. Add a customer interaction segment to the campaign.
- B. Add a volume constraint to the campaign.
- C. Add a decision shape to the offer flow.
- D. Add a filter component to the decision strategy.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 96

Which performance tool would you use to collect performance data for individual steps in a data transform?

- A. Performance Profiler
- B. Performance Analyzer (PAL)
- C. Database Trace
- D. Clipboard

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 97

Which statement demonstrates a well-written specification?

- A. The product catalog should be easy to navigate.
- B. Reduce time needed for time-off approvals from three weeks to one.
- C. User passwords shall be encrypted using AES-256 encryption.
- D. If the complainant type is "Provider," then provider information must be populated during the Triage Stage in the Basic Research Step.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 98

You are configuring an application to use Get Next Work. The requirement states that operators must always work on the next highest priority assignment from workbaskets.

Which two configuration options do you use to implement this requirement?

(Choose Two)

- A. Use a ToWorkGroup router for the assignments.
- B. Select the Operator is available to receive work in the operator ID records.
- C. Use a ToWorkbasket router for the assignments.
- D. Select the Get from workbaskets first option in the operator ID records.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 99

An issue prevents an agent activity from committing entries. You want to troubleshoot the activity in the System Management Application (SMA) to determine which step or steps are producing errors.

Which approach do you take to locate the issue?

- A. Run the Tracer tool for a specific agent.
- B. Review the exception information in the list of all agents.
- C. Run the requeue option for a specific agent.
- D. Examine the items in the Broken Process queue.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 100

You are configuring an application to process travel reservations. The reservation case creates child cases for each booking component: flight, hotel stay, and vehicle rental.

How do you update the total cost of the reservation as users update each child case?

- A. Define a case calculation to update the reservation total with the total of each child case.
- B. Configure the Create Case shape to propagate the total cost from each child case to the reservation.
- C. Create and declare expression to update the reservation total when the cost of each component changes.
- D. Add the Update Case shape to the Reservation case type to capture changes to each component cost.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 101

The Report Browser allows users to _____.

(Choose Two)

- A. Delete reports
- B. Create process metrics
- C. Create reports
- D. Create business metrics

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 102

You are preparing to create a new major version of an application ruleset in which there are multiple minor and patch versions. How do you create the new ruleset version?

- A.** Use the Ruleset Maintenance wizard to merge the existing rules in the relevant ruleset versions to the new version.
- B.** Use the Ruleset Maintenance wizard to skim the relevant ruleset versions to copy the highest version of existing rules to the new ruleset version.
- C.** Create a new application ruleset using the appropriate version number, then copy the highest version of existing rules into the new ruleset version.
- D.** Use the Application Structure landing page to lock and roll the existing ruleset versions to the new version.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 103

Which two tasks do system architects perform on a Pega project?

(Choose Two)

- A.** Define application requirements
- B.** Identify business objectives for an application
- C.** Configure UI forms
- D.** Develop feature prototypes

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 104

Consider the business use case: You create a service level agreement (SLA) to monitor response times. Which solution allows adjusting the response times on demand?

- A.** Plan a release cycle for updating the SLA for each of the expected seasonal adjustments.
- B.** Define the response times using property values that are circumstanced to account for the seasonal adjustments.
- C.** Delegate the SLA to the business managers so they can configure seasonal adjustments.
- D.** Create multiple circumstances of the SLA to account for the seasonal adjustments.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 105

Which requirement do you satisfy with an Access When record?

- A.** Government regulations require that you explicitly block user access to personally identifiable information.
- B.** Accountants can edit a purchase request only if the case was created by a member of their assigned department.
- C.** Company policies require that you only allow managers to run reports on purchase requests.
- D.** Managers can perform an optional action to transfer a case to another workbasket, but users cannot.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 106

Drag the Enterprise Class Structure (ECS) layers on the left to the appropriate rules on the right.

ECS layer	Answer
Organization	
Division	
Implementation	

ECS layer	Rule
	An email confirmation that is unique to mortgage applications, rather than applicable to all account openings
	A service-level rule that defines an expected response time for approvals throughout a line of business
	A property that defines a standard customer account number that is used throughout an organization

Answer:

ECS layer	Answer
Organization	
Division	
Implementation	

ECS layer	Rule
Implementation	An email confirmation that is unique to mortgage applications, rather than applicable to all account openings
Division	A service-level rule that defines an expected response time for approvals throughout a line of business
Organization	A property that defines a standard customer account number that is used throughout an organization

NEW QUESTION: 107

Which rule availability setting can you use to force the system to look for an instance of the rule in the next highest class or ruleset?

- A. Withdrawn
- B. Blocked
- C. Final
- D. Not Available

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 108

Which configuration controls the access to an attachment category?

- A. Configure the privilege DeleteOwn, and then assign it to a user so that a user can delete their own attachments.
- B. Configure client-based access control on the class where the attachment exists to restrict access to the attachment.
- C. Configure a visible when rule, IsDocumentPrivate to allow users to view an attachment if the rule returns as false.
- D. Configure a when rule to allow users to delete an attachment if the rule returns as false.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 109

A user reports that your application requires more than 10 seconds to load and display the contents of a form. The performance threshold for displaying the contents of a form is one second.

Which option allows you to determine the cause of the performance issue experienced by the user?

- A. The Clipboard tool
- B. The Tracer tool
- C. The PEGA log
- D. The My Alerts display

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 110

An accident claim case creates a vehicle claim case for each vehicle involved in an accident. Which two configurations prevent the accident claim case from resolving before all vehicle claims are resolved?

(Choose Two)

- A. Add a wait shape to the accident claim case to wait until all vehicle claims have a status of Resolved.
- B. Add each vehicle claim as a child case of the accident claim.
- C. Add a manual approval step to the accident claim case.
- D. Add an optional process to pause the accident case until the vehicle claims are paid.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 111

You have been asked to configure a service level agreement for an assignment. Which two requirements require you to configure the service level agreement using the rule form?

- A. Add behavior for an assignment that is considered late.
- B. Establish a performance goal for the assignment.
- C. Configure a greater initial urgency for assignments in one case type than another.
- D. Delay the availability of the assignment until a condition is satisfied.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 112

Select two reasons for organizing delegated rules in a separate, unlocked ruleset.

(Choose Two)

- A. A separate, unlocked ruleset allows you to organize the business users responsible for managing the delegated rules.

B. A separate, unlocked ruleset allows for versioning control of the individual delegated rules in case you want to roll back changes.

C. A separate, unlocked ruleset is necessary because changes cannot be made to rules in a locked ruleset.

D. A separate ruleset can help prevent accidental or unauthorized changes to critical elements of the application.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 113

Which statement describes a benefit of parallel development with branches?

A. Developers cannot check in an updated rule until the rule is unit tested.

B. Updated rules are reviewed for guardrail warnings before they can be checked in.

C. A team of developers can implement application functionality without impacting developers in other teams.

D. Developers cannot update rules in rulesets that have been released to production.

Answer: **C** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 114

Which two components does the Application Packaging wizard prompt you to include when you generate an archive file?

(Choose Two)

A. Data types

B. Product rules

C. Data instances

D. Checked-out rules

Answer: **A,C** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 115

The Static Assembler is used to address rules assembly issues due to which cause?

A. The application record lists several branch rulesets.

B. A new application is migrated to the production system.

C. Access groups contain multiple production rulesets.

D. The server is managing a large number of rules caches.

Answer: **D** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 116

Which two options do you consider when creating a pre-processing data transform?

(Choose Two)

A. The timing of the commit for the flow action

B. The potential reuse of the flow action

C. The effect if the flow action is reloaded

D. The security setting for the flow action

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 117

Decision Management is used to _____.

- A. determine how to retain a customer and the budget to spend
- B. determine the cause of a customer's problem
- C. determine why response rates for a campaign are below average in one region
- D. determine how to optimize the product portfolio to increase market share

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 118

A new system architect questions the value of allowing attachments to cases. What would be your best response?

- A. Adding attachments to cases is the method of choice for storing case documentation.
- B. Case flow is dependent on attachments because attachments provide information essential to a case.
- C. Pega provides attachment functionality out-of-the-box, so it must be important.
- D. Attachments can provide additional information required to process a case.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 119

A manager requests a report that contains the following columns: Create Date, Case ID, Create Operator, and Work Status. You must sort the Case ID values so the case with the highest ID value appears at the top of the list and descends in order. How would you design the report definition to support this requirement?

- A. Add a filter condition where Case ID is greater than one.
- B. For the Case ID property, select Highest to Lowest sort type.
- C. For the Case ID property, select Count in the Summarize column.
- D. Make sure that the Case ID is the first column in the report.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 120

An application contains five instances of the same rule. The only differences between the instances are the circumstance settings and ruleset version. All the rulesets are in the same ruleset list.

Ruleset Version	Circumstance
MyCoSelfService:01-01-01	None
MyCoSelfService:01-01-02	.Country = Japan
MyCoSelfService:01-01-03	None, <i>Base Rule</i> checkbox
MyCoSelfService:01-01-04	.Country = Japan
MyCoSelfService:01-02-01	None

Which ruleset version is chosen by rule resolution when .Country = Japan?

- A. MyCoSelfService:01-01-04
- B. MyCoSelfService:01-01-03
- C. MyCoSelfService:01-01-02
- D. MyCoSelfService:01-02-01

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 121

You are creating the assets for a generalized, reusable application. In which layer of the Enterprise Class Structure (ECS) do you create the assets?

- A. Implementation layer
- B. Pega Platform layer
- C. Division layer
- D. Framework layer

Which three of the following represent Pega Platform™ logging levels?

(Choose Three)

- A. Trace
- B. Alert
- C. Fatal
- D. Warn
- E. Comment

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 123

A subset of users is allowed to attach a scanned document to a case. Which attachment feature do you leverage to implement your solution?

- A. Enable attachment level security.
- B. Configure an attachment category
- C. Define a specific access group.
- D. Configure an attachment type.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 124

Which three types of information can represent an attribute in attribute-based access control (ABAC)?

(Choose Two)

- A. Single string
- B. Boolean
- C. List of strings
- D. Numerical value

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 125

What is the difference between using the Call and Branch methods in an activity step to invoke other activities?

- A. Branch overrides the security restrictions of the called activity allowing you to easily test code; it will not run in production.
- B. Call returns to the originating activity, while Branch skips the remainder of the originating activity.
- C. Branch creates a new thread to allow asynchronous processing, while Call runs in the thread from it was invoked.
- D. Call provides more robust debugging capability than Branch, while Branch provides better run-time performance.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 126

The design document of an application states that the application must be implemented with UI responsiveness. Which behavior does the design require for the application?

- A. An application can respond to voice command.
- B. An application can deliver email notification to users in a timely fashion.
- C. Different groups of users have access to different content and functions.
- D. The placement of the screen content adjusts to different screen sizes and devices automatically.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 127

What application do you use to perform remote logging?

- A. Database trace
- B. Performance Profiler
- C. System Management Application (SMA)
- D. Logging Level Settings tool

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 128

You have been asked to create a report definition that includes information about the sales offices and sales representatives.

The manager wants to access the report in the Report Browser in the user portal. The manager also wants to include the report in a new report category specifically for the sales group.

What two configurations are required to support this request?

(Choose Two)

- A. Create a report category rule for sales office reports.
- B. Select the option in the Report Browser that allows users to view your report.
- C. Select the report definition option that displays your report in the Report Browser.

D. Add a category for sales group reports in the Report Browser.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 129

How do you identify if a result in a decision rule cannot be returned?

A. Test the rule using a unit test

B. Test for conflicts

C. Test for completeness

D. Test for missing conditions

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 130

Which of the following allows you to write all errors that are detected when loading a data page to a log file?

A. Use a transition condition.

B. Use the error handling flow.

C. Invoke the error handler from the post-processing activity in a data page.

D. Use an existing function in the error handling data transform.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 131

An application includes the following rulesets, with the corresponding validation modes and prerequisites.

Ruleset	Validation mode	Prerequisites
MyApp	Application	N/A
MyAppInt	Application	N/A
MyCo	Ruleset	MyCoInt
MyCoInt	Ruleset	Pega-ProcessCommander

Which statement is correct?

A. Rules in MyCo can reference rules in MyApp.

B. Rules in Pega-ProcessCommander can reference rules in MyCoInt.

C. Rules in MyCoInt can reference rules in MyCo.

D. Rules in MyAppInt can reference rules in MyApp.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 132

You create a product rule to generate an application archive file for export. Which two actions do you perform before creating the archive file?

(Choose Two)

A. Check in the rules that are in the application's rulesets.

B. Create a new version of the application.

C. Associate application data instances with application rulesets.

D. Unlock the application rulesets.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 133

In the Answer area, identify the type of data measured in each report.

<u>Report</u>	<u>Type of Data</u>	
	Business Data	Process Data
Deliveries per month versus damaged goods	☐	☐
Customer support cases handled per month	☐	☐
Profit margin by types of goods sold monthly	☐	☐
Sales training investment versus annual revenue	☐	☐
Average number of days for customer deliveries	☐	☐

Answer:

Answer Area

<u>Report</u>	<u>Type of Data</u>	
	Business Data	Process Data
 Deliveries per month versus damaged goods	☒	☐
Customer support cases handled per month	☐	☒
Profit margin by types of goods sold monthly	☒	☐
Sales training investment versus annual revenue	☒	☐
Average number of days for customer deliveries	☐	☒

NEW QUESTION: 134

Which feature would you use to implement the System of Record (SoR) pattern?

- A. The copy data from a data page option on a property
- B. The Property-Ref activity method
- C. No specific feature - just use a data page directly in the application
- D. The refer to a data page option on a property

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 135

A case type includes the following security requirement: After a transaction dispute enters the Review stage, only the customer or the case manager assigned to the dispute can cancel the dispute. Before the Review stage, the customer or the customer service representative who created the case can cancel the transaction dispute.

Which three types of rules are needed to configure the security requirement?

(Choose Three)

- A. Access control policy
- B. Access control policy condition
- C. Access when
- D. Privilege

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 136

Consider the following table where a correspondence is circumstanced based on country.

Version	Circumstance
1-01-01	None
1-01-01	.Country = CAN
1-01-10	.Country = USA
1-01-15	None
1-01-20	.Country = USA
1-01-30	.Country = USA, Withdrawn
1-01-30	.Country = CAN

If .Country=USA, which version of the correspondence will run?

- A. 01-01-1930
- B. 01-01-2020
- C. 01-01-2010
- D. 01-01-2015

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 137

Using the following Refund case life cycle, how do you design this case to skip the Item Return stage if the item will not be returned?

- A. Replace the Wait step in the Item Return stage with a Change Stage step.
- B. Add a condition to skip the Item Return stage when a return is not necessary.
- C. Add a decision in the Item Return process to change the stage when a return is not necessary.

D. Add an Item Retention alternate stage and define a process for retention of item.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 138

Which two of the following steps do you perform after you develop branch rules and before you merge a ruleset?

(Choose Two)

A. Use DB trace to identify conflicts

B. Check in rules to merge

C. Review conflicts and warnings

D. Check out rules to merge

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 139

In which of the following RuleSets is it most appropriate to define connector rules integrating with an Enterprise Service Bus?

A. The Enterprise Int RuleSet (MyCoInt)

B. The Enterprise RuleSet (MyCo)

C. The Framework Int RuleSet (MyCoSelfServiceFWInt)

D. The Framework RuleSet (MyCoSelfServiceFW)

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 140

An insurance company collects fees for claims that exceed a specific claim amount. Fees and claim amount thresholds vary by location.

Select the method you use to create specialized rules so that fees are correctly processed for each location.

A. Specialize by multivariate circumstance

B. Specialize by ruleset

C. Specialize by class

D. Specialize by property circumstance

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 141

What three ways can a developer designate a rule as a relevant record?

(Choose Three)

A. Create the rule in App Studio

B. Add the rule on the Application Inventory landing page

C. Add the rule to a production ruleset

D. Mark the rule as a relevant record

E. Create the rule in Dev Studio

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 142

You are building an application with several development teams. Requirements state that the respective support contact name from each team appears on the header of the application as it moves through the various development phases.

What configuration best allows you to accomplish this requirement?

- A.** Configure a data transform to populate the appropriate support contact name for each respective development phase. Update the data transform as each production phase changes and direct the application's header to use the name value sourced from the data transform.
- B.** Configure a When condition to update the the support contact name depending on what production phase the application is in. Have your application display the appropriate name value sourced from conditional logic.
- C.** Create a new Application Settings configuration entering the appropriate support contact names for each respective development phase. Direct the header to reference the Application Settings to display the support contact name.
- D.** Create multiple applications, one for each development phase that lists the appropriate support contact name on the header. Release a new application for each development phase.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 143

Which three items are generated and displayed in the compliance score of an application?

(Choose Three)

- A.** Rules with warnings in the application
- B.** Unweighted compliance score out of 100
- C.** Percentage of compliant rules in the application
- D.** Rules with unjustified warnings in the application
- E.** Total core rules used in the application

Answer: **B,C,D** [\(LEAVE A REPLY\)](#)

NEW QUESTION: 144

Which two design configurations limit the need for horizontal scrolling when an application is used on a mobile device?

(Choose two.)

- A.** Set the width for layouts in percentages.
- B.** Use grid layouts rather than repeating dynamic layouts to display tabular data.
- C.** Limit text fields to a width of 200 pixels.
- D.** Set the importance for columns in repeating dynamic layouts.

Answer: **A,D** [\(LEAVE A REPLY\)](#)
