NEW QUESTION: 1

Your customer needs different processors for material master data depending on the material group. Which options do you have?

- A.** Use a separate change request type per material group and use a context-based adaptation (CBA) to control the user determination depending on the chosen material group and the current processor.
- B.** Use the same change request type and control the material group maintenance via authorizations and dynamic user agent determination.
- C.** Use the same change request type and use a custom feeder class to control the Material Group field in the user interface depending on the processor's authorizations.
- D.** Use a separate change request type per material group and implement validation checks, that only the dedicated material groups can be maintained in each change request type.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

What are the use cases and implementation styles of the consolidation process in SAP Master Data Governance? Note: There are 3 correct answers to this question.

- A.** Correctness and accuracy for initial load before central governance
- B.** Monitor data quality for remediation
- C.** Financial control in Central Finance integration (cFIN) projects
- D.** Data consistency for analytical purposes
- E.** Consolidation for mergers and acquisitions

Answer: A,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 3

What are the features of logical action?

- A. It provides a high-level process definition not tied to any business object.
- B. It provides enhanced determination of business activities.
- C. MDG-S, MDG-C: Business Partner (BP)
- D. It allows flexible navigation between UIs.

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 4

You are customizing the material data model governance scope under process modeling and have set the governed flag to "No" for some attributes within an entity. What happens to these attributes? Note: There are 3 correct answers to this question.

- A. They can be changed in a material consolidation process.
- B. They are temporarily removed from the material data model.
- C. They are displayed as read-only within the UI.
- D. They cannot be changed in mass processing of material.
- E. They can still be loaded to active area without central governance.

Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 5

The SAP Master Data Governance data model offers you the flexibility mode (flex mode). Which statements are correct? Note: There are 2 correct answers to this question.

- A. Flex mode (generated active area) is an option for custom objects, to store your data.
- B. Tables as defined in the SAP MDG data model are used to store only active data.
- C. Flex mode means all data (active and inactive) is stored in the generated MDG tables.
- D. With flex mode, the system decides where to store your data (active and inactive).

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 6

What is the correct order of mass processing steps in SAP Master Data Governance consolidation and mass processing? Choose the correct answer.

- A. Scope. Selection. Edit. Matching. Validation. Activation
- B. Scope. Selection. Best Record Calculation. Validation. Activation
- C. Scope. Selection. Edit. Validation. Activation
- D. Scope. Edit. Matching. Update. Activation

Answer: C (LEAVE A REPLY)

NEW QUESTION: 7

Your workflow engine is not running properly. Which actions can you perform to investigate? Note: There are

2 correct answers to this question.

- A. Check the default workflow batch user (SAP_WFRT or WF_BATCH).
- B. Switch on the workflow engine business function in SWF5.
- C. Run the semi-automatic workflow setup using transaction SWU3.
- D. Run the relevant business configuration set using transaction SCPR20.

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 8

What are the advantages of having SAP Master Data Governance deployed as a hub system? Note: There are 2 correct answers to this question.

- A. No latency for data replication and no cross-system monitoring
- B. Increased flexibility for master data lifecycle management
- C. No system integration required
- D. Higher flexibility with mapping

Answer: (SHOW ANSWER)

NEW QUESTION: 9

What are the hints for checking and activating the data model MM?

- A. It is a root object of type Material (ID 194) [see also customizing activity: Define Entity Type to Be Used by Business Object Type].
- B. Since EhP6, you can check and activate data models using the Configuration Workbench, which offers a more intuitive user interface.
- C. It does not support hierarchies.
- D. You can visualize the data model in a tabular format.

Answer: (SHOW ANSWER)

NEW QUESTION: 10

When calculating the best record within the master data consolidation of source records, which survivorship rules are relevant? Note: There are 2 correct answers to this question.

- A. Table level rules to check source system reliability, BRFplus, and recency
- B. Table level rules to filter records
- C. Field level rules for checking completeness
- D. Table and field level rules for checking completeness

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 11

The figure, MDG - Generic Services Value Mapping Framework, depicts the architecture of this framework, what is the following features?

- A. Manual maintenance in UI.
- B. None of the above.
- C. Maintenance supported via file connector.

D. Upload/Download capability.

E. (Code-)GDT based content.

Answer: A,C,D,E (LEAVE A REPLY)

NEW QUESTION: 12

What are the following further basics about defining key mappings?

A. Review and enhance the basic mapping rules in customizing if required or you created your own Business Objects.

B. Support for ID-mapping, including key mapping of master data and value mapping of organizational data

C. Key mapping can be used without any Customizing.

D. Key mapping is required in communication if you work with unharmonized keys in your system landscape.

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 13

What are the change request process enhanced flexibility?

A. Enter the data, as shown in you see in the figure.

B. In the activity enter the data from the table in the step. See the second part of the next figure

C. In the IMG choose Process Modeling Workflow Define Change Request Actions. See first part of the next figure.

D. The updated change request process features enhanced flexibility

Answer: D (LEAVE A REPLY)

NEW QUESTION: 14

What can you determine with the change request status and the workflow step used in process logic of the rule-based workflow? Note: There are 3 correct answers to this question.

A. The next change request status

B. The next workflow step

C. Possible actions in the user interface

D. Predecessor steps in the workflow

E. User responsible for the next workflow step.

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 15

You set FPM expert and admin mode as shown in the figure, Setting FPM Expert and Admin Mode. Specify your user with the parameter for FPM_CONFIG_EXPERT as follows:

A. A - Admin Mode (= Customizing)

- B. X - Expert Mode (= Configuration)
- C. M- Import Mode (= Configuration)
- D. All of the above

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 16

You want to configure the properties of the change request step to ensure that validations occur. What activities would you perform? Note: There are 2 correct answers to this question.

- A. Enable edition for the required entity type in the data model.
- B. Configure properties of the change request step for a rule-based workflow.
- C. Configure checks and enrichment spot properties for a standard business workflow.
- D. Create a new business activity and use it in the change request type configuration.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 17

What are the transaction sale?

- A. Create RFC Connections (SM59)
- B. Maintain Distribution Model (MD64)
- C. Business system
- D. Define and Assign Logical Systems
- E. Generate Partner Profiles (WE20)

Answer: A,B,D,E (LEAVE A REPLY)

NEW QUESTION: 18

You want to configure the Filter and Remove (FAR) process step in SAP Master Data Governance consolidation and mass processing. Immediately before/after which other process steps should it be configured? Note: There are 3 correct answers to this question.

- A. After the best record calculation step
- B. After the data load step
- C. After the validation step

- D. After the matching step
 - E. Before the standardization step
- Answer: A,C,D (LEAVE A REPLY)**

NEW QUESTION: 19

You are customizing the change request type in process modeling in SAP Master Data Governance. What properties can you assign to the new change request type? Note: There are 3 correct answers to this question.

- A. Business activities
- B. Workflow templates
- C. Actions
- D. Entity types
- E. Change request steps

Answer: A,B,E (LEAVE A REPLY)

NEW QUESTION: 20

You need to connect the SAP Master Data Governance (MDG) hub system to the system landscape. Which activities do you perform?

There are 2 correct answers to this question.

- A. Define a process to provide customizing and non-governed reference data to the SAP MDG hub
- B. Configure the UIs so that systems in the landscape have the same view on the master data
- C. Configure data replication to send master data from the SAP MDG hub to connected systems and optionally receive key mapping information
- D. Configure the workflow to distribute the data from SAP MDG to the system landscape

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 21

How is the material in SAP Master Data Governance (MDG) for material activated in a typical MDG setup to the underlying client of the same system?

Please choose the correct answer.

- A. Automatically due to the reuse mode via the pre-delivered standard handler class
- B. Automatically due to the flex mode via replication using IDocs or Web services
- C. Automatically due to the reuse mode via replication using IDocs or Web services
- D. Automatically due to the flex mode via the pre-delivered standard handler class

Answer: A (LEAVE A REPLY)

NEW QUESTION: 22

Why does SAP recommend to synchronize SAP ERP customizing settings (reference data) between the SAP Master Data Governance (MDG) system and the target system(s)?

There are 2 correct answers to this question

- A.** If reference data only exists in the SAP MDG system, the replication to the target system(s) can fail
- B.** If reference data only exists in the target system, this reference data CANNOT be chosen within the SAP MDG change request processing
- C.** If reference data only exists in the SAP MDG system, this reference data CANNOT be chosen within the SAP MDG change request processing
- D.** If reference data only exists in the target system, the corresponding attributes are automatically removed from the governance scope

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

You want to reduce the impact on system performance after a mass data load by avoiding the non-intentional replication of large amounts of data. Which replication modes are applicable? Note: There are 2 correct answers to this question.

- A.** Limit changes using time interval
- B.** Filters and change pointers
- C.** DRFLOG transaction
- D.** SOA-based replication

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

You want to manage ERP vendors and customers using the standard business partner data model in SAP Master Data Governance (MDG). Which of the following statements are correct? Note: There are 3 correct answers to this question.

- A.** SAP MDG has separate data models to manage vendors and customers.
- B.** The Vendor/Customer account group can be derived as per the configuration of the BP grouping.
- C.** Multiple ERP vendors and ERP customers can be assigned to one business partner (BP).
- D.** SAP MDG uses the business partner data model to manage both vendors and customers.
- E.** Customer vendor integration (CVI) configuration is not required.

Answer: **B,C,D** ([LEAVE A REPLY](#))

NEW QUESTION: 25

Your customer uses SAP Master Data Governance in a co-deployment scenario with NO additional target systems for the governed master data. Financial data is NOT included. What are the advantages?

There are 2 correct answers to this question.

- A.** Data Replication configuration and monitoring is NOT required

- B. Customizing synchronization is NOT required
- C. Additional authorization concept is NOT required
- D. Change request configuration effort is reduced

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 26

What are the properties of the data replication framework?

- A. To deal with business deviation, complex deviation and cross-unit derivatives
- B. Supports Peer-to-Peer (P2P) or mediated communication.
- C. Integrates into existing integration technologies e.g. Application Link Enabling (ALE) especially Intermediated Documents (IDoc).
- D. Allows for an easy "growth path" from existing technology to SOA because it wraps the different communication channels.
- E. Supports integration scenarios based on a Service Oriented Architecture (SOA) especially used WEB-Services,

Answer: B,C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 27

Which of the following capabilities are supported out of the box by SAP Master Data Governance (MDG) using the data replication framework (DRF)? Note: There are 2 correct answers to this question.

- A. Various communication channels, including ALE/IDoc, RFC, Web services, and files are available.
- B. Cross-system monitoring is possible using System Landscape Directory (SLD).
- C. Key mapping of master data and value mapping of organizational and or reference data is supported.
- D. Replication to non-SAP systems is possible using the Enrichment Framework.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 28

In the SAP Master Data Governance consolidation process, you want to configure the adapter for the Filter and Remove (FAR) process step for material. What are the possible options available to you? Note: There are 3 correct answers to this question.

- A. FAR can be configured as successor to the validation process step to move the erroneous single records to a new duplicate process.
- B. FAR can be configured as successor to the matching process step to move records from open match groups to a new duplicate process.
- C. Best record calculation can be configured as successor to the FAR process step to move records to a new duplicate process.

D. FAR can be configured as successor to the best record calculation process step to move updated records to a new duplicate process.

E. Matching process step can be configured as successor to the FAR process step to delete duplicate records.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 29

Master data replication has which properties?

A. Different and commonly used replication technologies

B. Consider Data Export and Data Import via Transfer

C. Support for ID-mapping, including key mapping of master data and value mapping of organizational data

D. Support for peer-to-peer or mediated communication

E. Flexibility to replicate selected data to specific systems by defining filters

Answer: A,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 30

What are the includes in FPM OVP floorplan configuration?

A. High volume exports from MDG to client systems.

B. Pages, sections, toolbars, wiring, and more

C. A reference to the application controller, the generic MDG Web Dynpro component USMD_GEN_OCP

D. Export Master Data

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 31

How can you make an optional field mandatory for user input? There are 2 correct answers to this question.

A. Implement a custom validation (for example via ABAP or Business Rule Framework plus) on the corresponding field.

B. Adjust the change request customizing for the corresponding field to mandatory.

C. Change the display settings of the field in the UI configuration.

D. Adjust the data model by selecting the required check box for the corresponding field.

Answer: ([SHOW ANSWER](#))

Valid C-MDG-1909 Dumps shared by BraindumpsPass.com for Helping Passing C-MDG-1909 Exam! BraindumpsPass.com now offer the **newest C-MDG-1909 exam dumps**, the BraindumpsPass.com C-MDG-1909 exam **questions have been updated** and **answers have been corrected** get the **newest** BraindumpsPass.com C-

MDG-1909 dumps with Test Engine here: <https://www.braindumps.com/SAP/C-MDG-1909-practice-exam-dumps.html> (80 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 32

Depending on the release used in the SAP client system, different scenarios apply for data transfer. The method of export master data for the import of MDG lists three common scenarios. You should take note of what are the points about these scenarios:

- A.** MDG-F does not use data export / data import framework. Instead, it uses file upload / file download functionality. For more information, see the initial load of MDG-F system and documents working with Master Data governance / financial / file uploads and downloads.
- B.** For business partners, transaction BUPA_SEND is available, which includes complete address data.
- C.** SAP BusinessObjects Data Services). These might be sufficient for loading data in non-SOA based format (such as csv-files or, IDoc-XML) into the active area.
- D.** SAP MDG stores data in one of two persistencies: staging area or active area. Data in the staging area is not ready for consumption and usually has to be approved by a master data steward to be sent to the active area.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 33

How does SAP Master Data Governance (MDG) ensure that the same object on an entity levels NOT processed in different change requests?

Please choose the correct answer.

- A.** The object is locked when it is assigned to a change request until the change request step defined in SAP MDG customizing as 'unlocking step' is executed.
- B.** The object is locked when it is assigned to a change request until the object is successfully saved and validated.
- C.** The object is locked when it is assigned to a change request until the current change request processor forwards the change request to the next processor in the governance process.
- D.** The object is locked when it is assigned to a change request until the corresponding change request is withdrawn or finally approved.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 34

What is the purpose of the Define Governance Scope customizing in SAP Master Data Governance (MDG)?

Please choose the correct answer.

- A.** Define which fields should be governed in which change request step of your process
- B.** Define which processes for your SAP MDG applications should be executed

- C. Define which fields are required to be maintained in the governance processes
- D. Define which fields are governed in the data model for your SAP MDG application

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 35

What is DRF SAP GUI Transactions?

- A. DRFCC: Check customizing for DRF
- B. DRFSUB: Subscribe business objects for replication
- C. DRFIMG: Customizing for DRF
- D. Consists of business objects to be replicated
- E. DRFF: Define filter criteria

Answer: A,B,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 36

Which of the following steps need to be performed to set up a parallel change request type for material? Note:

There are 2 correct answers to this question.

- A. Assign the scope on entity level per entity type with business activity to process material.
- B. Create a new change request type and enable the request as a single object with business activity to create material.
- C. Assign the scope on entity level per entity type with business activity to create material.
- D. Create a new change request type and enable the request as parallel with business activity to process material.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 37

You want to improve the quality of business partner data in SAP Master Data Governance central governance using SAP and non-SAP external solutions. Which data quality improvement check can you implement?

Choose the correct answer.

- A. Implement address validation checks using the Enrichment Framework.
- B. Configure the value added tax (VAT) check using the Service Mapping Tool (SMT).
- C. Implement a credit-worthiness check using the Dun & Bradstreet interface and the Data Import Framework.
- D. Configure duplicate checks using customer vendor integration(CVI) and SAP microservices.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 38

One FPM OVP Floorplan configuration, with at least a main page, what is included in these?

- A. SAP MDG stores data in one of two persistencies: staging area or active area. Data in the staging area is not ready for consumption and usually has to be approved by a master data steward to be sent to the active area.
- B. SAP BusinessObjects Data Services). These might be sufficient for loading data in non-SOA based format (such as csv-files or, IDoc-XML) into the active area.
- C. A Change Request section that includes the Change Request UIBB, both automatically added by MDG Communicator.
- D. For business partners, transaction BUPA_SEND is available, which includes complete address data.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 39

In which case must you use a referencing relationship from entity type E1 to entity type E2?

Please choose the correct answer.

- A. Entity type E1 is part of the key of the entity type E2
- B. Entity type E1 is of storage/use type 4
- C. Entity type E2 is of storage/use type 1
- D. Entity type E1 is an attribute of the entity type E2

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 40

How do you ensure an attribute is mandatory when an entity is governed? Note: There are 2 correct answers to this question.

- A. Create a new business activity and select the field as mandatory.
- B. Implement a custom validation (for example via ABAP or BRFplus) on the corresponding field.
- C. Adjust the data model by selecting the Required check box for the corresponding field.
- D. Adjust the change request customizing for the corresponding field to mandatory.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

What object models are pre-delivered within the SAP Master DataGovernance for Business Partner data model? Note: There are 3 correct answers to this question.

- A. Supplier attributes
- B. Customer attributes
- C. Internal order
- D. Logistics data
- E. Contract account attributes

Answer: (SHOW ANSWER)

NEW QUESTION: 42

You want to configure duplicate checks for business partners in SAP Master Data Governance. Which of the following steps are necessary? Note: There are 3 correct answers to this question.

- A. Assign search object connector templates to business object types.
- B. Set low and high thresholds for an entity type and search mode.
- C. Define recency and source system reliability.
- D. Ensure duplicate check is set as relevant in change request step configuration.
- E. Set up the sort method for the data model at entity type.

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 43

What are the features of MDG communicator configuration?

- A. On a technical level, it creates a wire from this UIBB to the Change Request UIBB (using the same parameters as for other wires in the OVP).
- B. Add a reason for your change request type with the pattern b) SFZ## by adding them and specify a reason.
- C. Call transaction a) MDGIMG. Find under General Settings Process Modeling Change Requests Define Rejection Reasons for Change Requests
- D. It includes a reference to an UIBB of the OVP that supplies the MDG Communicator at runtime with the information about the main entity.

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 44

Your customer has a custom entity in the business partner data model. Some of the attributes from the entity are to be excluded from the governance scope. What activity would you perform?

- A. Define governance status for the attributes in the governance scope.
- B. Define a new change request step type and specify which fields should be governed.
- C. Define the attributes on a new user interface building block to be hidden manually by the user.
- D. Define validations to exclude the attributes from change request processing.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 45

What are the enhancements to generic single-object processing?

- A. Personalization features, including layout, defaulting, and more
- B. Specify the httpurloc table entries if needed to enable transactions like NWBC and SOAMANAGER will be forwarded to the proper link from MDG system.

- C. Validity information included, if editions are used
- D. Uniform assignment block for change request information

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 46

What are the major enhancements in generic search?

- A. For edition-based data, validity time can be used as search criteria, and is displayed in the result list.
- B. The data model and entity type can be selected directly (this can also be preset by customizing or configuration).
- C. The result list is more versatile. For example, you can filter by value, or personalize it.
- D. FPM-based customizing and configuration are available.
- E. Their visibility depends on customizing and selected entity type.

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 47

MDG for Materials makes reuse of existing technologies for the replication of the materials and related data to other connected business systems.

- A. ALE for connected SAP ERP or third-party systems.
- B. CIF to connect to SAP SCM.
- C. None of the above.
- D. SOA to connect to third-party systems, but also to import data.

Answer: (SHOW ANSWER)

NEW QUESTION: 48

Which actions can you perform in the Edit step of the mass processing process flow?

There are 3 correct answers to this question.

- A. Modify key fields
- B. Update individual fields
- C. Apply changes to multiple fields
- D. Activate changed data

E. Filter and sort data

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 49

Where can you customize service level agreements (days and hours by priority)? Choose the correct answer.

- A. Process Modelling > Service Level Agreement
- B. Type of Change Request > Service Level Agreement
- C. Business Activity > Service Level Agreement
- D. Entity Types > Service Level Agreement

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 50

You want to upload and change master data in SAP Master Data Governance mass processing using a CSV or Open Office XML file (XLSX workbook). Which of the following statements are correct? Note: There are 3 correct answers to this question.

- A. The first line in an XLSX worksheet defines the columns.
- B. All key fields in an XLSX workbook must be listed in the first worksheet.
- C. Long Text fields such as MARA_STXL are not supported by XLSX workbooks.
- D. Each worksheet refers to a table in an XLSX workbook.
- E. Creating or deleting rows in the root table is allowed.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

What are the principles of MVC paradigm used by web Dynpro?

- A. Views define the layout.
- B. The model holds and provides the business logic.
- C. The controller handles the user input and steers the application.
- D. Standard MVC allows for nested view controllers.

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 52

In which SAP Master Data Governance customizing activity can you define the SLAs (days and hours by priority)?

Please choose the correct answer.

- A. Define Change Request Actions
- B. Create Change Request Type
- C. Configure Properties of Change Request Step
- D. Define Priorities for Change Request

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 53

How do you configure customer-specific processes with parallel branches, step-specific user interfaces, and dynamic step management?

There are 2 correct answers to this question.

- A. Set up the flex mode to configure the parallel workflow branches.
- B. Use the rule-based workflow and standard workflow in parallel for the same change request type.
- C. Create separate business activities and assign them to the relevant change request types.
- D. Assign different UIs to each individual change request step.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 54

The status of the change request and the workflow step are used in the process logic of the workflow in order to determine the following:

- A. None of the above.
- B. The possible actions in the UI.
- C. The next workflow step.
- D. The next change request status.

Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 55

Which properties do you assign for the Create Change Request Type customizing in SAP Master Data Governance?

There are 3 correct answers to this question

- A. Assign business activities to the change request type
- B. Assign change request steps to the change request
- C. Assign the change request type to a workflow template
- D. Assign actions to the change request type
- E. Assign entity types to the change request type

Answer: A,C,E (LEAVE A REPLY)

NEW QUESTION: 56

You need to validate data across multiple entities. You use the relevant cross-entity BAdI. Which actions do you perform to define the required validations?

There are 2 correct answers to this question.

- A. Define the enrichment spots.
- B. Define the derivation rules.
- C. Configure the required BAdI call in Business Rule Framework plus.
- D. Adapt the relevant check and validation method.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 57

Which of the following is an advantage to use the Floorplan Manager to design SAP Master Data Governance (MDG) Web Dynpro UIs?

Please choose the correct answer.

- A. SAP MDG Web Dynpro UIs can be enhanced by the enrichment framework
- B. SAP MDG Web Dynpro UIs can be used for all SAP MDG domains
- C. SAP MDG Web Dynpro personalization features are made available automatically
- D. SAP MDG Web Dynpro components run without feeder classes

Answer: A (LEAVE A REPLY)

NEW QUESTION: 58

Why is the context based adaptation (CBA) a relevant option for a flexible SAP Master Data Governance UI?

Please choose the correct answer.

- A. It runs with ABAP and Java Web Dynpro technology
- B. It automatically takes data model enhancements into account
- C. It reduces the number of application configurations
- D. It enables the UI personalization feature

Answer: D (LEAVE A REPLY)

NEW QUESTION: 59

For a custom data model what steps are required to create a simple user interface to maintain the data? Note:

There are 3 correct answers to this question.

- A. Assign your application configuration to data model.
- B. Create MDG communicator settings.
- C. Generate implementation classes (BAdI) using Floorplan Manager.
- D. Create a deep copy of the application configuration template.
- E. Generate implementation classes (BAdI) based on the custom data model.

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 60
