NEW QUESTION: 1

Universal Containers has just completed several projects, including new custom objects and custom fields.

Administrators are having difficulty maintaining the application due to not knowing how objects and fields are being used. Which two options should an Architect recommend?

Choose 2 answers

- A. Create Design standards to consistently use the description field on custom objects.
- B. Create Design standards to require help text on all custom fields and custom objects.
- C. Create Design standards to consistently use the description field on custom fields.
- D. Create Design standards with a document to store all custom objects and custom fields
- E. Create Design standards to require all custom fields on all custom object page layouts

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 2

Universal Containers (UC) is embarking on a large program of work, with different projects and different vendors. UC created a center of excellence (COE) that is struggling with scope creep between the different projects.

What role should the architect suggest be added to the COE?

- A. Release managers
- B. Product owner
- C. Change managers

D. Scrum master

Answer: A (LEAVE A REPLY)

NEW QUESTION: 3

Northern Trail Outfitters (NTO) recently acquired Eastern Trail Outfitters (ETO). NTO's sales leadership team had hands-on experience with the ETO's Sales Optimization app and have given the feedback that the app would benefit NTO's sales team.

Which option should the architect recommend for having ETO's Sales Optimization app in NTO's Salesforce org in the shortest possible time?

- A. Create an unmanaged package of the app and deploy in NTO's org.
- B. Create a core team and build the Sales Optimization app in NTO's org.
- C. Create users in ETO's org and provide access to NTO's sales team.
- D. Create a managed package of the app and deploy in NTO's org.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 4

Universal Containers (UC) has four different business units (BUS) with different processes that shares global customers. They have implemented a multi-org strategy with one org consolidating customer 360-degree view, and four orgs for the different BUS. Each of the BU orgs read and write customer information from/to the customer 360-degree view org in real time. UC is now launching a new BU that will use Salesforce. It does not share customers with the other BUS and needs flexibility in their Business processes.

What should an architect recommend as org strategy for this new BU

- A. Use a new Salesforce org for the new BU, and customize integration so that it reads and writes customer information from the customer data org
- B. Deploy the new BU in customer 360-degree view org, and read and write customer information from it without need of custom integration.
- C. Use a new stand-alone Salesforce org for the new BU, not integrated with the others.
- D. Use the same Salesforce org of another BU that shares geographical localization with the new BU.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 5

UC's scale of Salesforce deployment has increased over time, leading to complexities. UC is finding too many bugs in the deployed code, which has become a challenge to the delivery team. The team wants to reduce the amount of bugs by ensuring all the developed code is reviewed, tested, and validated in the upstream deployment process.

Which three development practices will be best suited to address UC's concerns? Choose

3

- A. Enable developer teams to do peer code review.
- B. Encourage the development team to be self-organizing.

- C. Incorporate test-driven deployment into the project structure.
- D. Enable a short and timely feedback loop with customers
- E. Use continuous integration with automation testing.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Universal Containers (UC) is planning for a huge data migration as part of their Service Cloud implementation. UC, has approximately 15million customers, 30 million contacts, and 30 million active cases.

Which two keyareas of UC's data migration test plan should be included? Choose 2 answers

- A. Manual and Automated data validationapproaches.
- B. Target Salesforce Server and Source system IP address.
- C. Success criteria for data migration.
- D. API's to be used for data migration.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 7

Universal Containers (UC) is implementing a governance framework and has asked the Architect to make recommendations regarding release planning. Which two decisions should the Architect make when planning for releases? Choose 2 answers

- A. How to test existing functionality to ensure no regressions are introduced.
- B. How to roll back to the previous Salesforce release if there are issues.
- C. When to test a new UC feature release if there are issues.
- D. Whether Salesforce will wait to upgrade the pod until after a UC release is complete.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

Universal containers have recently replaced a custom service center application with Salesforce Service Cloud.

Administrators are now confused about which fields and classes are actively being utilized and how future implementations can be maintained. Choose 2 answers

- A. Create a standard method for deprecating classes and fields using design standards.
- B. Create an adoption plan for end users using Salesforce dashboards and reports.
- C. Create a design standard requiring integration to use declarative configurations patterns
- D. Create a governance process requiring all projects to create project deliverable documentation.
- E. Create a governance framework focused on high-level business strategy and goals.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 9

Universal Containers (UC) operates globally from different geographical locations. UC is revisiting their current org strategy. Which three factors should an Architect consider for a single strategy? Choose 3 answers

- A. Fewer inter Dependencies.
- B. Tailored implementation.
- C. Centralized data location.
- D. Consistent processes across the business.
- E. Increased ability to collaborate.

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 10

Universal Containers has a large call center that has a limited inventory and must ensure there is product availability before an Opportunity is marked as Closed. Custom Apex has been implemented to check inventory levels before an Opportunity is saved. What should an architect consider before recommending Performance testing?

- A. Number of debug log entries
- B. Number of concurrent transactions
- C. Number of Apex Hammer failures
- D. Number of unit tests

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

At Universal Containers, Salesforce administrators are making changes to the permission sets under instruction from the business. Randomly, various SOQL statements are failing. What strategy could be advised to bring this issue to the developer's attention earlier?

- A. Ask administrators to only make changes to profiles instead.
- B. Extract each permission set, commit and merge to source control, and run through CI checks.
- C. Advise developers to switch to SOSL queries that are more robust instead.
- D. Create a sandbox refresh strategy to ensure each sandbox is refreshed every day.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 12

Universal Containers (UC) uses a managed package to install an internal Sales app in five orgs. Within each org there are integrations and local processes with the objects of the managed package. UC wants to use unlocked packages for better integration with CI/CD processes.

What would the Salesforce architect recommend for this migration?

- A. Export all data from objects/fields of the managed package, uninstall it, install the unlocked package with the same namespace as the Managed package and restore all data.

B. Migrate all classes, Visualforce, and components from the managed package to the unlocked package. Install the new version of the managed package (objects/fields only) and the unlocked package with the other components.

C. Export all data from objects/fields of the managed package, uninstall it, install the unlocked package without namespace and restore all data.

D. Do not change to unlocked package as it is possible to perform all CI/CD processes with the managed package.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 13

Universal Containers has five development teams. The performance of the teams has been good, but the number of bugs has been increasing. After each sprint, they need more time to understand the code and make changes.

What are two ways to improve the performance?

Choose 2 answers

A. Version control system to identify who is generating the bugs.

B. Define a team that will analyze/approve all changes.

C. Sprint review process.

D. Define and follow code standards.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 14

Universal Containers has just initiated a project to implement a partner community. The application will be deployed into a production environment currently in use by a large Salesforce user base. The project manager has insisted that the development and testing team use a single developer sandbox.

What is the risk with this approach?

A. Testers will experience functional changes throughout testing due to NOT having isolation from development.

B. Testers will encounter platform limits due to developer sandbox capacity limits.

C. Testers will hit governor limits due to the large volume of users in the developer sandbox.

D. Refreshing the developer sandbox will take significant time.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 15

Universal Containers (UC) is working on a major project and has determined that its approach to a certain feature will no longer work with an upcoming Salesforce platform release (e.g., Winter to Spring). What should a Technical Architect recommend to address this issue?

- A.** Determine the developer sandbox upgrade schedule, and have the developer refactor the approach to the feature in the upgraded sandbox
- B.** Submit a request to Salesforce to enable the 'delay upgrade' feature in their org. Have the UC administrator schedule the upgrade for a later date
- C.** Continue with the current approach, since Salesforce will rectify the issue prior to updating the production environment to the new platform release
- D.** Continue development in a non -upgraded sandbox, and have the developer update the API version of the code to the upcoming API version for testing purposes

Answer: A (LEAVE A REPLY)

NEW QUESTION: 16

The opportunity Service and opportunity Service Test classes are in package A but are used only in package B.

Both second-generation packages have the same namespace. Therefore, they should be moved to package B for better organization and control.

What should the architect recommend for this process?

- A.** Move the classes of package A to package B and create new package versions.
- B.** Move the classes of package A to package 8 and change the code for package B that called this class from package A.
- C.** Set the classes as deprecated in package A and recreate them in package B.
- D.** Set the classes as deprecated in package A and recreate them in package B with new names.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 17

Universal Containers has just initiated a project to implement a custom container tracking application with a large development team. The project manager is concerned that the large number of developers in a single developer pro sandbox could lead to challenges

with code being overwritten. Which two methods should be used to mitigate this risk?

Choose 2 answers

- A.** Replace the developer pro sandbox with a Partial copy sandbox
- B.** Provide each developer their own sandbox developer org, and implement managed packages to deploy to the merge
- C.** Use a single sandbox and strictly coordinate development across shared components, and implement a code repository to allow developers to merge code into a common repository
- D.** Provide each developer their own sandbox developer org and implement a code repository and continuous integration to merge code into the developer pro sandbox

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 18

What are three advantages of using a Source Control system alongside a multi -sandbox development strategy?

Choose 3 answers

- A.** Keep a history of changes made by each developer
- B.** Act as a backup in case of catastrophic data loss
- C.** Perform code reviews before promoting to a pre -production sandbox
- D.** Automatically deploy changes from sandbox to production
- E.** Create a branching strategy that tracks each feature or change separately

Answer: A,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 19

Universal Containers (UC) is implementing Salesforce and wants the custom code to be unit tested for all the adverse conditions. Which two best practices should an Architect recommend while implementing Test Classes? Choose 2 answers

- A.** Execute test classes under various profiles
- B.** Test classes should not create custom setting data.
- C.** Test classes must use existing data in the environment.
- D.** Test data must have positive as well as negative data.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 20

A Salesforce Administrator has initiated a deployment using a change set. The deployment has taken more time than usual.

What is a potential reason for this?

- A.** The change set performance is independent of included components.
- B.** The change set includes changes to permission sets and profiles.
- C.** The change set includes field type changes for some objects.
- D.** The change set includes new custom objects and custom fields.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 21

Universal Containers has decided on a single-org strategy, despite having to deal with the complexity of having multiple lines of business (LOBs) inside a single org.

What are two common challenges in single-org strategy for multiple LOBs? (Choose two.)

- A.** Lack of declarative sharing and visibility capabilities to ensure correct visibility of objects and records
- B.** Apex design will need to be mature and adhere to strict guidelines to support a large enterprise model
- C.** The data model becomes more complex the scope in the org increases
- D.** Making Salesforce work with multiple currencies

Answer: B,C ([LEAVE A REPLY](#))

Explanation/Reference: <https://developer.salesforce.com/blogs/developer-relations/2014/10/enterprise-architecture-multi-org-strategy.html>

NEW QUESTION: 22

Product owners at Universal Containers want to ensure that all the requirements have test cases associated with them so that no functionality is left untested during user acceptance testing.

What project artifact can help meet the needs of the business?

- A.** Testing strategy
- B.** Test execution plan
- C.** Requirement traceability matrix
- D.** User acceptance test scripts

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

All AppExchange products are subject to Salesforce security reviews.

What is the most common reason that the prospect AppExchange products fail the security review?

- A.** CRUD/FLS (field level security)
- B.** SOQL injection
- C.** Session hacking
- D.** Cross-site scripting

Answer: A ([LEAVE A REPLY](#))

Explanation/Reference: <https://evontech.com/component/easyblog/what-are-the-security-and-privacy-implications-of-building-salesforce-apps.html?Itemid=159>

NEW QUESTION: 24

Universal Containers CUC) has developed extensions of Salesforce Service Cloud for the use of its customer service teams using the change set development model.

Recently, UC acquired a company that develops extensions of an AppExchange app. The development team of the acquired company uses the org development model. The Universal Containers CTO wants both teams to work on a single org and follow the same set of processes.

Which development model should the architect recommend to be used by the consolidated development team?

- A.** Org development model, because the acquired company's team is already using it, and it is better than the change set development model.
- B.** Package development model, so teams can build release artifacts that can be tested and released independently from artifacts for other projects.
- C.** Change set development model, because UC is already using it, so it will face less resistance.
- D.** Package development model, because it allows packages to be created and deployed using declarative (point-and-click) development tools, without writing code.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 25

Which are two key benefits of fully integrating an agile issue tracker with software testing and continuous integration tools? Choose 2 answers?

- A.** Developers can see automated test statuses post code commit on a specific user story.
- B.** Developers can use the committed code's build status directly on the user story record.
- C.** Developers can observe their team velocity on the burn chart report in the agile tool.
- D.** Developers can collaborate and communicate effectively on specific user stories.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 26

Universal Containers (UC) is on the Unlimited Edition of Salesforce orgs. Currently, there are four Developer Pro sandboxes used by dev teams for various purposes, one partial copy sandboxes used for training, one full sandbox used for user acceptance testing. There is another full sandbox used for performance testing during the initial launch, and it is no longer being actively used.

A system administrator had reported yesterday that none of the sandboxes can be refreshed.

What is the most probable action an architect can help the system administrator with?

- A.** It appears the org is using more sandboxes than the license permits. The Partial Copy sandbox shouldn't be used.
- B.** Create a Salesforce support case, someone should know what is wrong.
- C.** Delete the full sandbox used for performance testing.
- D.** Contact the Salesforce Account Team to do a sandbox License Count.

Answer: (SHOW ANSWER)

NEW QUESTION: 27

Universal Containers' (UC) deployment of Salesforce customizations has increased over time, leading to complexities. UC is finding too many bugs in the deployed code, which has become a challenge to the delivery team. The team wants to reduce the amount of bugs by ensuring all the developed code is reviewed, tested, and validated in the upstream deployment process.

Which three development practices will be best suited to address UC's concerns? (Choose three.)

- A. Enable developer teams to do peer code review.
- B. Encourage the development team to be self-organizing.
- C. Use continuous integration with automated testing.
- D. Incorporate test-driven development into the project structure.
- E. Enable a short and timely feedback loop with customers.

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 28

An architect is working on a Universal Containers (UC) project, and due to security concerns, the UC security team cannot provide the Architect with production access. Instead, a central release management team will be responsible for performing production deployments for all development teams.

How should an architect leverage the Metadata API to ensure any metadata components necessary to deploy the project's functionality are properly communicated to the release management team?

- A. Communicate the unlocked package version to the release management team.
- B. Provide a spreadsheet of all components and utilize the metadata API's readMetadata() call.
- C. Create a change set in each sandbox and download the package.xml file for the release management team.
- D. Provide the release management team a copy of the audit trail from the sandbox you wish to deploy from.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 29

Universal Containers (UC) is preparing for the new Salesforce release in a couple of months, and has several ongoing development projects that may be affected. Which three steps should the team at UC take to prepare for this release? Choose 3 answers

- A. Refresh a Sandbox during the Release Preview Window to ensure they have the upcoming release.
- B. Review the release notes for automatically-enabled features and technical debt.

- C. Run regression tests in an upgraded sandbox to detect any issues with the Upgrade.
- D. Contact Salesforce to schedule a time to upgrade the full Sandbox.
- E. Upgrade any SOAP integrations to the newest WSDL as early as possible

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 30

Universal Containers (UC) is looking at implementing a large number of features using an AppExchange product. This product uses Subjects to store and configure important business logic within the application.

Which two options should an architect recommend, as the source of truth for storing this reference data?

Choose 2 answers

- A. Use a third-party product to manage these records.
- B. Store the records in sandboxes and production.
- C. Store the records in a version control system.
- D. Attach CSV files to the user stories in a project management system.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 31

Universal Containers has decided on a single-org strategy, despite having to deal with the complexity of having multiple lines of business (LOBs) inside a single org.

What are two common challenges in single-org strategy for multiple LOBs?

Choose 2 answers

- A. The data model becomes more complex the scope in the org increases.
- B. Lack of declarative sharing and visibility capabilities to ensure correct visibility of objects and records.
- C. Apex design will need to be mature and adhere to strict guidelines to support a large enterprise model.
- D. Making Salesforce work with multiple currencies.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 32

Universal Containers (UC) is a high-tech company using SFDX tools and methodologies for its Salesforce development. T UC has moved some of its code and configuration to Unlocked Packages.

Which two best practices should an architect recommend to support UC's new package development strategy?

Choose 2 answers

- A. Consult the metadata coverage report to identify features supported by packages.
- B. Test developed packages in test environments before installing to production.
- C. Move everything in the existing codebase to a single monolithic package.
- D. Version control does not need to be used, as packages manage all the code and configuration.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 33

Universal Containers (UC) innovative apps division is releasing an application that can be installed in its trading partners Salesforce environments. The application lets the trading partners book containers from UC directly without leaving their own Salesforce environment.

The partners can then build on top of the application with process builders and triggers so the container booking process can be integrated with the trading partners' own processes. What is the recommended mechanism for releasing the application considering the innovative apps division wants to keep the application up to date in various environments?

- A. Managed package
- B. Change sets
- C. Zip file deployable by SFDX or ANT
- D. Unmanaged package

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 34

Universal containers has proposed using a Developer Edition org to stage changes to their Customer Community, which includes multiple custom Visualforce pages and components.

Which three risks should a Technical Architect consider in this strategy? Choose 3 answers

- A. Code changes cannot be deployed from a Developer Sandbox to Production.
- B. Developer Edition orgs have limited user counts and low data volume limits, which will make User Testing difficult.

- C. Changes Sets cannot be used to deploy from Developer Edition to Production which will make deployment more complex
- D. Developer Edition orgs do not run on production servers and will not perform well during testing.
- E. Developer Edition orgs cannot have sandboxes, which will make team development difficult.

Answer: B,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 35

Universal Containers is in the final stages of building a new application to track custom containers. During a review of the application, a business subject Matter Expert mentioned that it would be nice to be able to track additional container types beyond what was originally scoped during the plan and design phase. Which two actions should be performed to mitigate the risk? Choose 2 answers.

- A. Escalate and communicate to stakeholders the risk and mitigate it by allocating additional resources to support the new requirement based on stakeholders input.
- B. Have a discussion with the business subject Matter Expert and communicate that a new developer environment will be needed to mitigate the risk.
- C. Have a discussion with the business subject Matter Expert and communicate that the Salesforce has limitations in supporting such a feature to mitigate the risk.
- D. Escalate and communicate to stakeholders the risk and mitigate it by extending the timeline of the project to support the new requirement based on stakeholders input.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 36

Universal Containers CUC) has been on the org development model with scratch orgs are already enabled, but they haven't been taking advantage of the scratch orgs.

Now UC is ready to move to the package development model.

What step must be done by an administrator?

- A. In setup, switch the Enable Dev Hub to Enabled, then switch the Enable Source Tracking for Scratch Orgs to Enabled.
- B. In setup, switch both the Enable Dev Hub and Enable 2nd-Generation Managed Packages to Enabled.
- C. In setup, switch the Enable Unlocked Packages and Second-Generation Managed Packages to Enabled.
- D. In setup, switch the Enable Unlocked Packages to Enabled, keep the Enable Second-Generation Managed Packages as disabled.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 37

Universal Containers wants to implement a release strategy with major releases every four weeks and minor releases every week. Major releases follow Development, System Testing (SIT), User Acceptance Testing (UAT) and Training Minor releases follow Development and User Acceptance Testing (UAT) stages. What represents a valid environment strategy consideration for UAT?

- A. Minor releases use Developer and Major releases Full copy
- B. Minor and Major releases use same Full copy.
- C. Minor and Major releases use separate Developer pro
- D. Minor releases use Partial copy and Major releases use Full copy

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 38

Which are two characteristics of an effective communication plan? Choose 2 answers

- A. Requesting feedback for outstanding architectural questions
- B. Reporting project status, timelines, and impacts
- C. Consistent communication to a pre -defined list of stakeholders
- D. Communication to stakeholders on a "need -to -know" basis

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 39

Universal Containers CUC) is embarked on a large Salesforce transformation journey, UC's DevOps team raised a question about tracking Salesforce metadata throughout the development lifecycle across sandboxes all the way to production.

As the deployment architect of the project, what should be the recommendation to track which version of each feature in different environments?

- A. Use an AppExchange or third-party tool that is specialized in Salesforce deployment.
- B. Use an Excel sheet to track deployment steps and document the SFDX commands.
- C. Use Salesforce SFDX commands to deploy to different sandboxes.
- D. Use ChangeSet to track deployed customizations.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 40

Universal Containers is about to begin Development work on a new project in their Salesforce org that will take many months to complete. UC is concerned about how critical bugs will be addressed for existing live functionality. What is the recommended release management strategy to address this concern?

- A. Include fixes for critical bugs on the ongoing devl sandboxes so that they will be released with the other code.
- B. Utilize a dedicated Hotfix sandbox to address critical bugs and release to production.
- C. Keep teams separate until the end of the project and create a Full Copy Sandbox to merge their work time.

D. Address critical bugs in the development sandboxes and push those changes to production separately.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 41

Universal Containers has a deadline to retire a business -critical application that will no longer be supported on a specific date. What should an Architect recommend?

- A. Business Continuity Plan
- B. Executive Leadership
- C. Requirements Traceability Matrix
- D. Agile Methodology

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 42

What are two limitations an architect should consider when designing a strategy for managing technical reference data, with multiple related objects? (Choose two.)

- A. Apex CPU limits
- B. Depth of nested relationships
- C. Circular relationships
- D. HTTP response size

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 43

Universal Containers is about to begin Development work on a new project in their Salesforce org that will take many months to complete. UC is concerned about how critical bugs will be addressed for existing live functionality. What is the recommended release management strategy to address this concern?

- A. Utilize a dedicated developer pro sandbox to address critical bugs and release to production.
- B. Include fixes for critical bugs in the ongoing Development sandboxes so that they will be released with the other code.
- C. Keep teams separate until the end of the project and create a Full Copy sandbox to merge their work then.
- D. Address critical bugs in the Development sandboxes and push those changes to production separately.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 44

Universal Containers (UC) has used Salesforce for the last 6 years with 50% custom code. UC has recently implemented continuous integration. UC wants to improve old test classes

whenever new functionality invalidates tests. UC also wants to reduce the deployment time required.

What should an Architect recommend?

- A.** Execute all test classes in sandboxes and selected test classes in Production.
- B.** Test classes CANNOT be executed in sandboxes.
- C.** Do NOT execute test classes in sandboxes and all test classes in Production.
- D.** Do NOT execute all test classes in sandboxes and Production.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 45

Universal Containers has multiple projects being developed in parallel. One of the projects is in the testing phase and the testing team found a list of issues on the items that will be deployed to production. As the project deadline is short, the customer team proposes that the fixes be done in the test sandbox and then deployed to production. What should be the Architect recommend?

- A.** Recommend fixing the issues in the development environment and deploying the changes to production.
- B.** Recommend the customer team's proposal to fix the issues in the testing env and deploy them to production.
- C.** Recommend fixing the issues in the test environment and migrating the changes to the development sandbox.
- D.** Recommend fixing the issues in the development sandbox, migrating them to testing, and deploy to production after testing.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 46

Universal Containers has just initiated a project involving a large distributed development and testing team.

The development team members need access to a tool to manage requirements and the testing team needs access to a tool to manage defects. Additionally, stakeholders are requesting ad-hoc status reports. What tool should an Architect recommend to support the project?

- A.** Wave
- B.** Code Repository
- C.** Spreadsheets
- D.** Port management

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 47

Which are two recommended methods of creating test data in Salesforce?

Choose 2 answers

- A. Host a mock endpoint to produce sample information from an endpoint.
- B. Load a CSV as a static resource and reference it in a test class.
- C. Reference data from middleware directly within your test class.
- D. Utilize Heroku Connect to provide test class data.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 48

Universal Containers (UC) has a large backlog of work. They have noticed that despite their best efforts, valuable enhancements and updates are not being completed because they do not have the bandwidth to get them done. Many of these items are low effort and would not require experienced resources.

What should the architect recommend that will minimize additional costs and allow UC to accomplish more from the

- A. UC should start a citizen development program.
- B. UC should eliminate low-value items from the backlog.
- C. UC should hire a partner to complete the needed backlog items.
- D. UC should hire additional resources to reduce the backlog.

Answer: (SHOW ANSWER)

NEW QUESTION: 49

Universal Containers (UC) has created a custom REST web service. This web service receives Orders and Order Line Items data from an external endpoint and runs business logic and validations on it before inserting it into the database. UC is expecting to receive more than 100K orders a day and each order can have up to 10 line items. Each inbound request will contain only one order and its corresponding line items.

What two testing types should an architect recommend to ensure users don't face platform slowdowns during peak business hours? Choose 2 answers

- A. Performance Testing
- B. Load Testing
- C. Stress Testing
- D. Unit Testing

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 50

Universal Containers CUC) is an enterprise financial company that operates in EMEA, AMER, and APAC.

Because of regulatory requirements, UC has a separate Salesforce org for each region. Each org has its own customizations that fit for the region needs, but there are also standard processes that apply to all regions requirements.

As the deployment architect, what should be considered for the multi-org deployment strategy?

- A. Deploy metadata to production orgs using change sets.
- B. Deploy metadata to production orgs using unmanaged packages.
- C. Deploy metadata to production orgs using managed packages.
- D. Deploy metadata to production orgs using package development model.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 51

What are three advantages of using the SFDX?

Choose 3 answers

- A. Can Install application metadata from a central repository.
- B. Can store code on a local machine, or a version control system.
- C. Can create scratch orgs.
- D. Can quickly deploy metadata using Execute Anonymous.
- E. Can use native Deployment Rollback Tool to quickly revert to prior state.

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 52

Universal Containers has three types of releases in their release management strategy: daily, minor (monthly), and major (quarterly). A user has requested a new report be created quickly to support an urgent client request.

What release strategy would an Architect recommend?

- A. Utilize the major release process to create the report directly in production, bypassing the full sandbox.
- B. Utilize the major release process to create the report in a full sandbox and then deploy it to production.

C. Utilize the daily release process to create the report in a full sandbox and then deploy it to production.

D. Utilize the minor release process to create the report directly in production, bypassing the full sandbox.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 53

Universal Containers business users often observe that newly released features are resulting in other previously existing and stable functionality being broken. Which approach should an Architect recommend to prevent regression?

A. Freeze development of new features and re -architect the system to remove the bugs

B. Utilize unit and functional test automation as part of a continuous integration strategy

C. Utilize Salesforce Apex Hammer to automatically test all functionality

D. Utilize the developer console to run test suites for the affected functionality

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 54

8. Universal Containers CUC) is embarked on an enterprise salesforce transformation journey, UC would like to streamline and automate deployment to different sandboxes during the build phase. Upon customer acceptance in UAT, the company requested to automate the production deployment as well.

As the deployment architect, what is the recommendation to satisfy the customer requirements?

A. Recommend using an AppExchange solution that packages the deployment components and you can run the deployment wizard to track deployment result.

B. Recommend using the Continues integration and the Continues deployment tool and build the pipeline to deploy to sandboxes and production.

C. Recommend using SFDX and documents the deployment commands with steps to be executed for each environment.

D. Recommend using the ANT script and build a custom application to run the script and use change sets to deploy supported metadata.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 55

Universal Containers CUC) has multiple teams working on different projects. Multiple projects will be deployed to many production orgs. During code reviews, the architect finds inconsistently named variables and lack of best practices.

What should an architect recommend to improve consistency?

A. Use static code analysis to enforce coding standards.

B. Execute regression testing before code can be committed.

C. Require pull requests to be reviewed by two developers before merging.

D. Create a Center of Excellence for release management.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 56

Ursa Major Solar (UMS) has used Aura components significantly in its Salesforce application development. UMS has established a robust test framework and the development team follows the Salesforce recommended testing practices. UMS team uses Salesforce's test tool To check for common accessibility issues.

In which two environments the UMS team can call Aura accessibility tests?

Choose 2 answers

A. ACCTEST

B. AuraDriver Test

C. JSTEST

D. WebDriver Test

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 57

Universal Containers is using Salesforce for their sales organization. The sales users have created several dashboards using multiple running users. The admins have also added a few workflow rules that send email notifications to some sales users.

What should an Architect consider while planning the deployment of such components? (Choose two.)

A. User fields are preserved during metadata deployments and Salesforce attempts to locate a matching user in the target org during deployment.

B. User fields are ignored during metadata deployments and all such users need to be manually created in the target org before starting the deployment.

C. If the username in the source org doesn't exist in the target org, the deployment will stop until the usernames are resolved or removed.

D. If the username in the source org doesn't exist in the target org, the deployment will continue and Salesforce will automatically create the username in the target org.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 58

Universal Containers (UC) has received feedback from the field on several new feature requests that in business goals, UC is looking for a way to quickly get feedback and prioritize these requests. Which two options should an Architect recommend? Choose 2 answers

A. Present the feature requests at a Center of Excellence meeting.

B. Send the requests to IT for a formal review at the end of the year.

C. Create the backlog or priority list in a project management tool.

D. Bring the feature request to the Test Manager to gain quality checks.

E. Create design standards around the new features being requested.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 59

Universal Containers have just acquired Planetary storage. Both companies use salesforce.com to manage their sales activities. The two companies have many customers in common and the company plans to merge the two sales organizations, but the products and sales processes between the two original companies will remain different and distinct. What factor should the company consider in merging the two Salesforce.com orgs into a single org?

- A. Customer data could be merged with modifications using standardization and de - duplication
- B. Salespersons selling both product lines would need two logins, once for each product line
- C. Transactional sales data could be combined without modification since standard objects are used
- D. Business processes on standard objects can be merged without modifications

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 60

Cloud Kicks is switching to Salesforce from a different CRM. They have existing datasets for all standard Salesforce objects. In which optimized order should the architect recommend these objects be loaded?

- A. Leads, Accounts, Contacts, Products, Opportunities, Opportunity Line Items
- B. Accounts, Contacts, Leads, Products, Opportunities, Opportunity Line Items
- C. Leads, Contacts, Accounts, Opportunities, Products, Opportunity Line Items
- D. Accounts, Contacts. Opportunities, Products, Opportunity Line Items, Leads

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 61

What are two limitations an architect should consider when designing a strategy for managing technical reference data, with multiple related objects?

Choose 2 answers

- A. Circular relationships
- B. HTTP response size
- C. Apex CPU limits
- D. Depth of nested relationships

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 62

Which statement is true for the Staging sandbox in the following diagram?

- A. Salesforce major releases (e.g., Winter to Spring) always occur in Staging and Production at the same time
- B. The Staging environment can only be updated once every two weeks
- C. The Staging sandbox is automatically refreshed on a schedule set by the administrator
- D. When created or refreshed, the Staging sandbox is a full replica of Production

Answer: D (LEAVE A REPLY)

NEW QUESTION: 63

Northern Trail Outfitters (NTO) has well-defined release management processes for both large and small projects. NTO's development team created a workflow and a trigger for the changes in its opportunity renewal process.

What should the architect recommend for release planning of these changes?

- A. Plan this as a major release and align with a Salesforce major release
- B. Plan this as a minor release with training and change management

C. Plan this as a patch release and align with the Salesforce patch release

D. Plan this as an interim release after checking with Salesforce support

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 64

All AppExchange products are subject to Salesforce security reviews.

What is the most common reason that the prospect AppExchange products fail the security review?

A. Session hacking

B. CRUD/FLS (field level security)

C. SOQL injection

D. Cross-site scripting

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 65

Universal Containers (UC) is implementing Service Cloud for their contact centers for 3000 users. They have

~10 million customers. The average speed response time expected is less than 5 seconds with 1,500 concurrent users. What type of testing will help UC measure the page response time?

A. Unit Testing.

B. Load testing.

C. System Integration Testing.

D. Stress Testing.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 66

Universal Containers has proposed using a Developer Edition org to stage changes to their Customer Community, which includes multiple custom Visualforce pages and components.

Which three risks should a Technical Architect consider in this strategy? (Choose three.)

A. Change Sets CANNOT be used to deploy from Developer Edition to Production, which will make deployment more complex.

B. Developer Edition orgs do NOT run on production servers, and will NOT perform well during testing,

C. Developer Edition orgs CANNOT have sandboxes, which will make team development difficult.

D. Developer Edition orgs have limited user counts and low data volume limits, which will make User Testing difficult.

E. Code changes CANNOT be deployed from a Developer Sandbox to Production.

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 67

Cloud Kicks is considering using an automated testing tool to help manage deployments between environments.

When should the architect recommend the use of an automated testing tool?

- A.** Automated tests should be run daily in all Developer Orgs, and when branches are merged.
- B.** Automated tests should be run only when merging into Full or Partial Copy sandboxes.
- C.** Automated tests should be run daily in all Developer Orgs.
- D.** Automated tests should be run when branches are merged.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 68

Which two statements are accurate about why Mock objects are needed when writing test classes? (Choose two.)

- A.** Mock can also be used on the classes that extend the batchable interface to bypass the batch jobs.
- B.** Using a Mock allows the test class to bypass the dependencies of other objects, methods, state, or behaviors. Therefore, the developer has total control of his own code.
- C.** A Mock is needed whenever the code makes an HTTP callout.
- D.** Some methods are invoking long running processes, using Mock is a shortcut of bypassing the long executions.

Answer: B,D ([LEAVE A REPLY](#))

Explanation/Reference: <https://trailhead.salesforce.com/en/content/learn/v/modules/unit-testing-on-the-lightning-platform/mock-stub-objects>

NEW QUESTION: 69

Universal Containers is in the process of testing their integration between salesforce and their on-premise ERP systems. The testing team has requested a sandbox with up to 10,000 records in each object to benchmark the integration performance. What is the fastest approach an Architect should recommend?

- A.** Spin off a Developer pro sandbox, migrate the metadata and load the data using data loader.
- B.** Spin off a full copy sandbox with all the objects that are required for testing the integration.
- C.** Spin off a partial copy sandbox using a sandbox template with all the objects required for testing the integration.
- D.** Spin off a Development sandbox, migrate the metadata and load the data using data loader.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 70

Universal Containers' org is complex but well-organized in unlocked packages with their dependencies. The development team was asked for a new feature, and the package that will be changed has already been identified.

Which environment should be used for this development?

- A.** A Developer Pro sandbox with the package code that will be changed and its dependencies installed.
- B.** A scratch org with all installed packages.
- C.** A Developer Pro sandbox with all packages installed.
- D.** A scratch org with the package code that will be changed and its dependencies

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 71

Universal Containers wants to implement a release strategy with major releases every four weeks and minor releases every week. Major releases follow Development, System Integrated Testing (SIT), User Acceptance Testing (UAT) and Training. Minor releases follow Development and UAT stages.

What represents a valid environment strategy consideration for UAT?

- A.** Minor and Major releases use the same Full copy.
- B.** Minor releases use Developer and Major releases use Full copy.
- C.** Minor releases use Partial copy and Major releases use Full copy.
- D.** Minor and Major releases use separate Developer pro.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 72

Universal Containers (UC) currently uses the org development model and utilizes the Salesforce CLI as the deployment tool. After the feature release artifact (a .zip file) has been tested in a lower sandbox, it is being deployed to the full sandbox for performance testing and production deployment readiness check-Since quick deployment options are not being used, what is the correct way to deploy the artifact to the full sandbox?

- A.** Authorize to the Fullsandbox org; Validate with sfdx:mdapi:deploy; On successful validation, deploy with sfdx:source:deploy
- B.** Authorize to the Full sandbox org; Validate with sfdx:source:deploy; On successful validation, deploy with sfdx:source:deploy
- C.** Authorize to the Fullsandbox org; Validate with sfdx:mdapi:deploy; On successful validation, deploy with sfdx:mdapi:deploy
- D.** Authorize to the Full sandbox; validate with sfdx: source: deploy; On successful validation, deploy with sfdx;mdapi;deploy

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 73

Universal Containers (UC) is implementing Service Cloud UC's contact center receives 100 phone calls per hour and operates across North America ,Europe and APAC regions. UC wants the application to be responsive and scalable to support 150 calls considering future growth. what should be recommended test load consideration

- A. Testing load considering 10xthe current call volume.
- B. Testing load considering 50% more call volume.
- C. Testing load considering current call volume.
- D. Testing load considering half the call volume.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 74

Universal Containers (UC) wants to shorten their deployment time to production by controlling which tests to run in production .UC's Architect has suggested that they run only subsets of tests. Which two statements are true regarding running specific tests during deployments? Choose 2 answers

- A. To run a subset of tests, set the Run Specified Tests test level on the DeployOptions objects and pass it as an argument to deploy() call.
- B. run a subset of tests ,set the RunLocalTests test level on the DeployOptions object and pass it as an argument to deploy() call.
- C. Specify both test classes and individual test methods that are required to be executed as both are supported in DeployOptions.
- D. Specifying the test method is supported in DeployOptions, therefore specify only the test classes that are required to be executed.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 75

5. Universal Containers (UC) is planning to move to Salesforce Sales Cloud and retire its homegrown on-premise system. As part of the project, UC will need to migrate 5 million Accounts, 10 million Contacts, and 5 million Leads to Salesforce.

Which three areas should be tested as part of data migration?

Choose 3 answers

- A. Account and Lead ownership
- B. Lead assignment
- C. Page layout assignments
- D. Data transformation against source system
- E. Contact association with correct Account

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 76

Universal Containers requires its developers to develop and test code in one sandbox per developer before deploying to a common sandbox for code review. Which deployment strategy should be used in this environment?

- A. Refresh the developer's sandbox, develop changes, test changes, refresh the developer's sandbox, deploy to the common sandbox
- B. Refresh the common sandbox, develop changes, refresh the developer sandbox, deploy to the common sandbox, test changes
- C. Refresh the developer's sandbox, develop changes, refresh the developer's sandbox, deploy to the common sandbox, test changes
- D. Refresh the developer's sandbox, develop changes, refresh the common sandbox, deploy to the common sandbox, test changes

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 77

What are three advantages of using the SFDX?

Choose 3 answers

- A. Can store code on a local machine, or a version control system.
- B. Can Install application metadata from a central repository.
- C. Can use native Deployment Rollback Tool to quickly revert to prior state.
- D. Can create scratch orgs.
- E. Can quickly deploy metadata using Execute Anonymous.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 78

Universal Containers (UC) had added a Service team to the Salesforce Platform. The Service team would like to have a few dozen of the service centers entered into the system as technical reference data. The service centers are made searchable in many different web forms and rather independent from all other business entities. In the past, they had to

manually add any new service centers in each sandbox in the code migration path, they would like to eliminate the manual work if it is possible.

What is an optimal way to accomplish this requirement?

- A.** Add the service centers to a hierarchical custom settings.
- B.** Define a brand-new custom object with a picklist field to host all of the service centers.
- C.** Add the service centers to a list custom settings.
- D.** Add all of the service centers to a custom metadata type.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 79

Universal Containers CUC) is using Salesforce Performance Edition. They are planning to host weekly training sessions for the next four weeks. Each training will be five days long and a new set of trainees will attend every week. UC wants to train these users on samples of production data and delete all the data generated during the training session at the end of the week.

What optimal option should a technical architect recommend?

- A.** Refresh a Partial Copy sandbox every weekend and load data needed using data loader.
- B.** Refresh a Developer Pro sandbox every weekend and include an appropriate sandbox template.
- C.** Refresh a Partial Copy sandbox every weekend and include an appropriate sandbox template.
- D.** Refresh a Developer Pro sandbox every weekend and load data needed using data loader.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 80

Universal Containers (UC) is implementing Salesforce for the first time. Their legacy CRM system is an on premise home-grown application written in Java. UC plans to implement a continuous integration process that mirrors their current standard. Under what conditions should an Architect recommend against continuous integration?

- A.** Test scripts will be generated as part of the testing phase
- B.** The Salesforce instance has only standard functionality
- C.** There isn't a full sandbox available to leverage
- D.** The client does not have budget for additional software

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 81

Cloud Kicks (CK) is launching a new sneaker line during the upcoming holiday season and needs to do a thorough batch data testing before Go-Live. CK is using Salesforce unlimited edition.

What two sandbox types should the architect recommend for batch data testing? (Choose two.)

- A. Partial Copy sandbox
- B. Full sandbox
- C. Developer sandbox
- D. Developer Pro sandbox

Answer: A,B (LEAVE A REPLY)

Explanation/Reference: <https://www.appfrontier.com/blog/how-to-test-in-a-salesforce-sandbox/>

NEW QUESTION: 82

Due to several issues, Universal Containers wants to have better control over the changes made in the production org and to be able to track them. Which two options will streamline the process? Choose 2 answers

- A. Use Metadata API to automate deployment to the production.org
- B. Make all code/configuration changes directly in the production org.
- C. Allow no code/configuration changes directly in the production.org
- D. Use the Force.com IDE to automate deployment to the production.org

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 83

Universal Containers has written several validation rules and workflow rules for the lead object. Which two test types should an Architect suggest to ensure that a large inbound call center does not experience platform slowdowns under high call volume for the Lead object? Choose 2 answers

- A. Unit Test
- B. Performance Test
- C. Stress Test
- D. Load Test

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 84

Universal Containers (UC) is implementing Service Cloud. UC's contact center receives 100 phone calls per hour and operates across North America, Europe, and APAC regions. UC wants the application to be responsive and scalable to support 150 calls, considering future growth.

What should be a recommended test load consideration?

- A. Testing load considering current call volume.
- B. Testing load considering 50% more call volume.
- C. Testing load considering half the call volume.
- D. Testing load considering 10x the current call volume.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 85

Universal Containers's architect is documenting the application lifecycle management (ALM) process to communicate it to the development teams from different implementation partners.

Which three steps apply to any Salesforce development project?

Choose 3 answers

- A. Continuous Integration
- B. Test
- C. Build Release
- D. Change Sets
- E. Develop

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 86

Universal Containers (UC) is considering updating their Salesforce Production Deployment as a part of their Release Mgmt process. Which three best practices should UC consider for Production Deployment? Choose 3 ans.

- A. Define a rollback strategy.
- B. Lert all users on the day of deployment.
- C. Announce the maintenance window ahead of time.
- D. Schedule releases with Salesforce upgrades.
- E. Temporarily suspend configuration changes in production.

Answer: A,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 87

Universal Containers is using Salesforce for Order Management and has integrated with an in-house Enterprise Resource Planning (ERP) system for order fulfillment. There is an urgent requirement to include a new order status value from the ERP system into the Order Status picklist in Salesforce.

Which two considerations should be made when addressing the above requirement? (Choose two.)

- A. Existing Apex test classes may start failing in Production.
- B. Integration with the ERP system may NOT function as expected.
- C. Implement the change in the sandbox, validate, and release to Production.
- D. The change can be performed in Production, as it is a configuration change.

Answer: B,D ([LEAVE A REPLY](#))

Explanation/Reference:

NEW QUESTION: 88

Salesforce has three major releases a year.

Which type of change introduced by a release can cause automated browser tests to need updating?

- A. New standard fields
- B. Metadata schema changes
- C. New Apex methods
- D. DOM changes

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 89

Universal Containers (UC) started to use the GitHub workflow. For the current minor release, an Experience Cloud developer and a Service Cloud developer both need to work on the Case object and codes that reference the Case object. Both developers branched off the same UCDev branch (maps to the Dev sandbox for Release Build) and started working. The Experience Cloud development team had Finished early, and the change was successfully merged into the UCDev branch. The local Git branch used by the Service Cloud developer is called ServiceCase At what point will the Service Cloud developer see the conflict and need to resolve the conflict?

- A. At command: git commit -m "Service Cloud Notes"
- B. At Command: git add force-app/main/default
- C. At command: git push origin ServiceCase
- D. The conflict would show in GitHub when a pull request is created from ServiceCase to UCDev.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 92

Which two actions will contribute to an improvement of code security? (Choose two.)

- A. Use two developers to review and fix current code vulnerabilities
- B. Hire a company specialized in secure code review the current code
- C. Implement a pull request and secure code review
- D. Integrate a static code security analysis tool in the CI/CD process

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 93

By to What three tools should an architect recommend to support application lifecycle methodology Choose 3 answers

- A. Database management systems
- B. Issue tracking Ttool
- C. Continuous integration tool
- D. Middleware
- E. Version control repository

Answer: C,E (LEAVE A REPLY)

NEW QUESTION: 94

Universal Containers (UC) is using Sales and Service Cloud. They have two major releases and four minor releases every year. They have development (dev), integration, user acceptance (UAT), staging, and hotfix sandboxes.

- A. Fix the issue in hotfix, test, and deploy to production.
- B. Follow the release management process to move to production.
- C. Fix the issue in staging and deploy it to production.
- D. Fix the issue in development, test in UAT, and deploy to production.

Answer: A (LEAVE A REPLY)

Explanation/Reference:

NEW QUESTION: 95

Universal Containers has 80% code coverage. Despite the creation of a test plan for each sprint, the number of defects is large.

What two items should the architect recommend to reduce defects?

Choose 2 answers

- A. The acceptance criteria should have more details.
- B. The test script should be used to define the test classes.
- C. The test analyst who creates the test plan must also create the test classes.
- D. The code coverage should be increased to 95%.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 96

Universal Containers (UC) has developed extensions of Salesforce Service Cloud for the use of its customer service teams using the change set development model.

Recently, UC acquired a company that develops extensions of an AppExchange app. The development team of the acquired company uses the org development model. The Universal Containers CTO wants both teams to work on a single org and follow the same set of processes.

Which development model should the architect recommend to be used by the consolidated development team?

- A. Package development model, because it allows packages to be created and deployed using declarative (point-and-click) development tools, without writing code
- B. Package development model, so teams can build release artifacts that can be tested and released independently from artifacts for other projects
- C. Change set development model, because UC is already using it, so it will face less resistance
- D. Org development model, because the acquired company's team is already using it, and it is better than the change set development model

Answer: B (LEAVE A REPLY)

NEW QUESTION: 97

Universal Containers (UC) is planning for a huge data migration from a homegrown on-premise system to Salesforce as part of their Service Cloud implementation. UC has approximately 5 million customers, 10 million contacts, and 30 million active cases. Which three key areas should be tested as part of Data Migration? (Choose three.)

- A. Data transformation against the source system.
- B. Case Ownership, along with associated entitlement and milestones.
- C. Page Layout assignment to the profiles.
- D. Case assignment rules and escalation rules.
- E. Case association with correct Contact and Account.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 98

What are two advantages of using an Agile Project Management tool? Choose 2 answers

- A. Better relationships with business stakeholders
- B. Consolidate project artifacts to a common repository
- C. Increased visibility into sprint and project status
- D. Improve governance with gate steps in development

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 99

Universal containers is looking to install a new application to enable advanced quoting in its current Professional Edition org. The org is near capacity with object and tab limits. Which two solutions should the Architect recommend? Choose 2 answers

- A. Install an Aloha certified App
- B. Buy more user licenses to increase org limits
- C. Upgrade to an Enterprise Edition org
- D. Create and install an unmanaged package

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 100

A team has completed a sprint and intends to deploy these changes after business approval, but they will immediately begin the next sprint.

What strategy should an architect recommend?

- A. Using Git, create a release branch from the develop branch. All fixes must be made in the release branch.

After deployment, merge release with develop.

- B. Commit upcoming changes to the features branch without merging into the develop branch. Deploy from the develop branch and then merge new sprint features into the develop branch.

C. Migrate the current code to the UAT sandbox. Begin new sprint development in the Dev sandbox. Make fixes in the UAT environment and deploy UAT for production after business approval

D. The first task of the new sprint must be the deployment approval. After that, the other tasks of the sprint can be performed in the environments and Git

Answer: C (LEAVE A REPLY)

NEW QUESTION: 101

Universal Containers (UC) have developed a managed package targeted for AppExchange. The product includes some Apex code to customize and create layouts. UC is in the testing phase of the package, so it's not certified yet. During testing on the target org, the Apex code for the layouts fails.

Why are the Apex classes not able to access the metadata of the target org during testing?

A. The solution is flawed. UC should utilize the Tooling API from a web service call to modify the layouts.

B. Apex Settings to allow the access to metadata is not switched on.

C. UC needs to turn on Apex Settings within the custom metadata type.

D. UC needs to get the managed package certified by the Salesforce security review.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 102

Universal Containers (UC) is embarking on a large program of work, with different projects and different vendors. UC created a center of excellence (COE) that is struggling with scope creep between the different projects.

What role should the architect suggest be added to the COE?

A. Release managers

B. Product owner

C. Change managers

D. Scrum master

Answer: C (LEAVE A REPLY)

NEW QUESTION: 103

Universal Containers (UC) is a high-tech company using SFDX tools and methodologies for its Salesforce development. T UC has moved some of its code and configuration to Unlocked Packages.

Which two best practices should an architect recommend to support UC's new package development strategy?

(Choose two.)

A. Version control does not need to be used, as packages manage all the code and configuration

- B.** Test developed packages in test environments before installing to production
- C.** Consult the metadata coverage report to identify features supported by packages
- D.** Move everything in the existing codebase to a single monolithic package

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 104

Universal Containers has an active production org; and they are planning to release some new features to it next month. The team is working to prepare .1 deployment plan and reached out to the technical architect for inputs on rollback strategy.

What should a technical architect recommend?

- A.** Create a sandbox from production to take the backup of existing metadata. To roll back deployment, manually delete new components and then deploy again to production using metadata from this sandbox.
- B.** Backup the existing metadata using the ANT Migration Tool. To roll back deployment, deploy again to production using backed up metadata.
- C.** Create a sandbox from production to take the backup of existing metadata. To roll back deployment, use destructivechanges.xml to delete new components and then deploy again to production using metadata from this sandbox.
- D.** Backup the existing metadata using ANT Migration Tool. To roll back deployment, manually delete new components and deploy again to production using backed up metadata.

Answer: **C** ([LEAVE A REPLY](#))

NEW QUESTION: 105

Universal Containers (UC) currently uses the org development model and utilizes the Salesforce CLI as the deployment tool. After the feature release artifact (a .zip file) has been tested in a lower sandbox, it is being deployed to the full sandbox for performance testing and production deployment readiness check-Since quick deployment options are not being used, what is the correct way to deploy the artifact to the full sandbox?

- A.** Authorize to the Full sandbox org; Validate with sfdx:mdapi:deploy; On successful validation, deploy with sfdx:mdapi:deploy
- B.** Authorize to the Full sandbox; validate with sfdx: source: deploy; On successful validation, deploy with sfdx;mdapi;deploy
- C.** Authorize to the Full sandbox org; Validate with sfdx:mdapi:deploy; On successful validation, deploy with sfdx:source:deploy
- D.** Authorize to the Full sandbox org; Validate with sfdx:source:deploy; On successful validation, deploy with sfdx:source:deploy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 106

Universal Containers (UC) operates globally from different geographical locations. UC is revisiting their current org strategy.

Which three factors should an Architect consider for a single org strategy? (Choose three.)

- A. Centralized data location
- B. Increased ability to collaborate
- C. Tailored implementation
- D. Fewer interdependencies
- E. Consistent processes across the business

Answer: A,B,E (LEAVE A REPLY)

NEW QUESTION: 107

Universal Containers has asked the salesforce architect to establish a governance framework to manage all of those Salesforce initiatives within the company. What is the first step the Architect should take?

- A. Identify relevant Stakeholders from within Universal Containers to obtain governance goals and objectives
- B. Implement a comprehensive DevOps framework for all initiatives within Universal Containers
- C. Implement a project management tool to manage all change requests on the project
- D. Establish a global Center of Excellence to define and manage Salesforce development standards across the organization

Answer: A (LEAVE A REPLY)

NEW QUESTION: 108

Universal Containers CUC) has multi-cloud architecture in a single org. The Sales Cloud dev team is working in a Dev Pro sandbox (DevProl) of delivering a release In three months. The business requirements from Service Cloud warrant a quicker release in four weeks, but need part of the Sales Cloud work that is completed in DevProl. The decision of

using a separate Dev Pro sandbox (DevPro2) is still pending. The DevProl was upgraded to preview for next salesforce major release two weeks ago.

What should an Architect recommend?

- A.** Ask the second work stream team to work on the same DevProl sandbox.
- B.** Push back on the requirements because adding another work stream will bring some risks with it.
- C.** DevPro1 cannot be cloned because it is on a different version from Production. Just create a new DevPro2, and migrate metadata from DevPro1.
- D.** Clone the DevPro1 sandbox and name It DevPro2 for the second work stream to work on the Service Cloud requirements.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 109

What are two roles a project Steering Committee plays in determining what methodologies are used? Choose 2 answers

- A.** Approving deviations from the chosen methodology, when required to address project issues
- B.** Setting the criteria for selecting Agile or Waterfall methodology to be used on internal projects
- C.** Designing a methodology that will meet a particular project's requirements
- D.** Enforcing that corporate project stage gates are part of the chosen methodology

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 110

Which two statements are accurate about why Mock objects are needed when writing test classes?

Choose 2 answers

- A.** A Mock is needed whenever the code makes an HTTP callout.
- B.** Mock can also be used on the classes that extend the batchable interface to bypass the batch jobs.
- C.** Using a Mock allows the test class to bypass the dependencies of other objects, methods, state, or behaviors. Therefore, the developer has total control of his own code.
- D.** Some methods are invoking long running processes, using Mock is a shortcut of bypassing the long executions.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 111

Which two actions will contribute to an improvement of code security?

Choose 2 answers

- A.** Use two developers to review and fix current code vulnerabilities.
- B.** Implement a pull request and secure code review.

- C. Hire a company specialized in secure code review the current code.
- D. Integrate a static code security analysis tool in the CI/CD process.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 112

Which two project situations favor a waterfall methodology? Choose 2 answers

- A. An application in post-production, with incremental changes made by a small team.
- B. An application with many systems and inter-dependencies between components.
- C. An application with regulatory compliance requirements to be validated by outside agencies.
- D. An in-house application with a fixed team size, but an open timeline and flexible requirements.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 113

Universal Containers is validating an outbound change set from the Developer Sandbox to the production org.

Which two locking behaviors will occur during a deployment? Choose 2 answers

- A. The sandbox org will be locked. Administrators cannot modify metadata
- B. The production org will be locked. Users will still be able to Read/Write data to the org
- C. The production org will be locked. Users can only Read data during this time
- D. The production org will be locked. Administrators cannot modify metadata during this time

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 114

Universal Containers has development teams working on multiple projects. They are exploring a source control tool to track and manage their code/configuration.

Which two benefits does a source control tool provide? (Choose two.)

- A. Provides automated code/configuration deployments.
- B. Provides the ability to back up code/configuration changes.
- C. Provides the ability for distributed teams to work in isolation.
- D. Provides the ability to automatically identify issues in code/configuration.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 115

Universal Containers (UC) has a large user base (>300 users) and was originally implemented eight years ago by a Salesforce Systems Integration Partner. Since then, UC has made a number of changes to their Visual force pages and Apex classes in response to customer requirements, made by a variety of Vendors and internal teams. Which three

issues would a new Technical Architect expect to see when evaluating the code in the Salesforce org? Choose 3 answers

- A. Multiple unit test failures would be encountered.
- B. Broken functionality due to Salesforce upgrades.
- C. Duplicated logic across Visual force pages and Apex classes performing similar tasks.
- D. Multiple triggers on the same object, making it hard to understand the order of operations.
- E. Custom built JSON and String manipulation Classes that are no longer required.

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 116

Northern Trail Outfitter's development team has built new features for its sales team in the Asia-Pacific region. While testing the Apex classes, the developers are constantly hitting the governor limits.

What should the architect recommend during the review to address this issue?

- A. Use the auto reset property to automatically reset governor limits during off-hours.
- B. Use test.setLimit() and test.resetLimit() methods to reset governor limits.
- C. Use an AppExchange product which can temporarily increase the governor limits.
- D. Use test.startTest() and test.stopTest() methods to reset governor limits.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 117

There has been an increase in the number of defects. Universal Containers (UC) found the root cause to be decreased quality of code.

Which two options can enforce code quality in UC's continuous integration process? (Choose two.)

- A. Introduce manual code review before deployment to the production org.
- B. Increase the size of the testing team assigned to the project.
- C. Introduce manual code review before deployment to the testing sandbox.
- D. Introduce static code analysis before deployment to the testing sandbox.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 118

Universal Containers (UC) is developing a new Customer Community. Requirements for the Community are not fully defined. UC is planning on using an Agile methodology for this work and has promised delivery of the complete system in three months. What are two risks associated with this approach? Choose 2 answers

- A. The functionality that can be delivered in 3 months is unknown, and may not meet the needs of the business
- B. Agile is not an appropriate development methodology for Customer Community implementations

- C. Agile does not allow for changes to requirements, so customers might not like the resulting solution
- D. Given the lack of requirements and the three-month timeline commitment, the project may not be feasible

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 119

Universal Containers has just completed several projects, including new custom objects and custom fields.

Administrators are having difficulty maintaining the application due to not knowing how objects and fields are being used.

Which two options should an Architect recommend? (Choose two.)

- A. Create design standards to require all custom fields on all custom object page layouts.
- B. Create design standards to consistently use the description field on custom fields.
- C. Create design standards to require help text on all custom fields and custom objects.
- D. Create design standards with a document to store all custom objects and custom fields.
- E. Create design standards to consistently use the description field on custom objects.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 120

Universal Containers (UC) just started configuration and customization of its Salesforce organization.

The architect suggested the definition of an application lifecycle management (ALM) process.

What are three benefits of following an ALM process?

Choose 3 answers

- A. Training new users after each minor and major release.
- B. Avoiding defects from being deployed to production.
- C. Defining metrics for application development project success.
- D. Preventing existing working functionality from stopping
- E. Releasing new features on a consistent schedule.

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 121

Universal Containers (UC) had implemented two full sandboxes. One, known as Stage, is used for performance, regression testing, and production readiness check. The other is used primarily for user acceptance testing (UAT). Both full sandboxes were refreshed two months ago. Currently, UC is targeting to start user acceptance testing in two weeks, and do production release in four weeks. An admin also realized Salesforce will have a major release in six weeks.

UC needs to release on the current Salesforce version, but also wants to make sure the new Salesforce release does not break anything What should an architect recommend?

A. Use the Sandbox Preview Guide to check if there is any necessary action needed. UC might have to prepare, refresh, and redeploy to UAT.

B. Refresh Stage now, and do not refresh UAT. This way, Stage will be on preview and UAT will not.

C. Refresh Stage from UAT now. After preview cutoff, use the upgraded one for regression test, use the non-upgraded one for user acceptance Test.

D. Visit trust.salesforce.com to figure out the preview cutoff dates, if the dates had passed, work with support to get on the preview instance.

NEW QUESTION: 122

Universal Containers uses multiple Salesforce orgs for its different lines of business (LOBs). In a recent analysis, the architect found that UC could have a more complete view of its customers by gathering customer data from different orgs.

What two options can an architect recommend to accomplish the customer 360-degree view?

Choose 2 answers

A. Migrate from multi-org to single-org strategy, consolidating customer data in the process.

B. Implement a Complete Graph multi-org strategy by allowing each org to connect directly to every other, reading and writing customer data from the orgs where it has been originally created.

C. Implement a Single Package multi-org strategy by developing and deploying to all orgs a managed package which reads and consolidates customer 360-degree view from the different orgs.

D. Implement a Hub-and-Spoke multi-org strategy by consolidating customer data In a single org, which will be the master of customer data, and using integration strategies to let the LOBs orgs read and write from it.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 123

Universal Containers wants to do weekly releases to production. What approach will mitigate the risk of bugs being inadvertently introduced to production?

- A.** Use of an Agile Methodology
- B.** Automated Testing
- C.** User Acceptance Testing
- D.** Requirements Traceability

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 124

Universal Containers has an active production org and they are planning to release some new features to it next month. The team is working to prepare a deployment plan and reached out to the technical architect for inputs on rollback strategy.

What should a technical architect recommend?

- A.** Create a sandbox from production to take the backup of existing metadata. To roll back deployment, use destructivechanges.xml to delete new components and then deploy again to production using metadata from this sandbox.
- B.** Backup the existing metadata using the ANT Migration Tool. To roll back deployment, deploy again to production using backed up metadata.
- C.** Create a sandbox from production to take the backup of existing metadata. To roll back deployment, manually delete new components and then deploy again to production using metadata from this sandbox.
- D.** Backup the existing metadata using ANT Migration Tool. To roll back deployment, manually delete new components and deploy again to production using backed up metadata.
