NEW QUESTION: 1
In an SP-Initiated SAML SSO setup where the user tries to access a resource on the Service Provider, What HTTP param should be used when submitting a SAML Request to the Idp to ensure the user is returned to the intended resourse after authentication?
A. DisplayState
B. RedirectURL
C. StartURL
D. RelayState
Answer: C (LEAVE A REPLY)

NEW QUESTION: 2
Universal containers wants to implement SAML SSO for their internal salesforce users using a third-party IDP. After some evaluation, UC decides not to set up my domain for their salesforce.org. How does that decision impact their SSO implementation?
A. Neithersp - nor IDP - initiated SSO will work
B. IDP - initiated SSO will not work
C. Either sp - or IDP - initiated SSO will work
D. Sp-Initiated SSO will not work
Answer: (SHOW ANSWER)

NEW QUESTION: 3
Universal containers (UC) is building a mobile application that will make calls to the salesforce REST API. Additionally UC would like to provide the optimal experience for its mobile users. Which two OAuth scopes should UC configure in the connected App? Choose 2 answers
A. Web
B. API

C. full
D. Refresh token
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 4
A leading fitness tracker company is getting ready to launch a customer community. The company wants its customers to login to the community and connect their fitness device to their profile. Customers should be able to obtain exercise details and fitness recommendation In the community.
Which should be used to satisfy this requirement?
A. Login Flows
B. Single Sign-On Settings
C. OAuth Device Plow
D. Named Credentials
Answer: C (LEAVE A REPLY)

NEW QUESTION: 5
The CIO of universal containers(UC) wants to start taking advantage of the refresh token capability for the UC applications that utilize Oauth 2.0. UC has listed an architect to analyze all of the applications that use Oauth flows to. See where refresh Tokens can be applied. Which two OAuth flows should the architect consider in their evaluation? Choose 2 answers
A. Web server
B. User-Agent
C. Jwt bearer token
D. Username-password
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 6
Northern Trail Outfitters (NTO) uses a Security Assertion Markup Language (SAML)-based Identity Provider (idP) to authenticate employees to all systems. The IdP authenticates users against a Lightweight Directory Access Protocol (LDAP) directory and has access to user information. NTO wants to minimize Salesforce license usage since only a small percentage of users need Salesforce.
What is recommended to ensure new employees have immediate access to Salesforce using their current IdP?
A. Build an integration that queries LDAP periodically and creates new active users in Salesforce.
B. Build an integration that queries LDAP and creates new inactive users in Salesforce and use a login flow to activate the user at first login.
C. Install Salesforce Identity Connect to automatically provision new users in Salesforce the first time they attempt to login.
D. Configure Just-in-Time provisioning using SAML attributes to create new Salesforce users as necessary when a new user attempts to login to Salesforce.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 7
The CIO of Universal Containers (UC) wants to start taking advantage of the refresh token capability for the UC applications that utilize OAuth 2.0. UC has enlisted an Architect to analyze all of the applications that use OAuth flows to see where refresh tokens can be applied.
Which two OAuth flows should the Architect consider in their evaluation? (Choose two.)
A. JWT Bearer Token
B. User-Agent
C. Username-Password
D. Web Server
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 8
Universal Containers (UC) has a Customer Community that uses Facebook for of authentication. UC would like to ensure that changes in the Facebook profile are 65. reflected on the appropriate Customer Community user. How can this requirement be met?
A. Use information in the Signed Request that is received from Facebook.
B. Use SAML Just-In-Time Provisioning between Facebook and Salesforce.
C. Develop a scheduled job that calls out to Facebook on a nightly basis.
D. Use the updateUser() method on the Registration Handler class.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 9
A manufacturer wants to provide registration for an Internet of Things (IoT) device with limited display input or capabilities.
Which Salesforce OAuth authorization flow should be used?
A. OAuth 2.0 JWT Bearer How
B. OAuth 2.0 Asset Token Flow
C. OAuth 2.0 User-Agent Flow
D. OAuth 2.0 Device Flow
Answer: (SHOW ANSWER)

NEW QUESTION: 10
Northern Trail Outfitters (NTO) leverages Microsoft Active Directory (AD) for management of employee usernames, passwords, permissions, and asset access. NTO also owns a third-party single sign-on (SSO) solution. The third-party party SSO solution is used for all corporate applications, including Salesforce.
NTO has asked an architect to explore Salesforce Identity Connect for automatic provisioning and deprovisiorung of users in Salesforce.
What role does identity Connect play in the outlined requirements?
A. User Management
B. Service Provider
C. Identity Provider

D. Single Sign-On
Answer: A (LEAVE A REPLY)

NEW QUESTION: 11
Universal containers wants salesforce inbound Oauth-enabled integration clients to use SAML-BASED single Sign-on for authentication. What Oauth flow would be recommended in this scenario?
A. User-Token Oauth flow
B. Web server Oauth flow
C. User-Agent Oauth flow
D. SAML assertion Oauth flow
Answer: B (LEAVE A REPLY)

NEW QUESTION: 12
A group of users try to access one of Universal Containers' Connected Apps and receive the following error message: " Failed: Not approved for access." What is the most likely cause of this issue?
A. The Salesforce Administrators have revoked the OAuth authorization.
B. The User of High Assurance sessions are required for the Connected App.
C. The Users do not have the correct permission set assigned to them.
D. The Connected App settings "All users may self-authorize" is enabled.
Answer: C (LEAVE A REPLY)

NEW QUESTION: 13
Universal Containers (UC) wants its closed Won opportunities to be synced to a Data Warehouse in near real time. UC has implemented Outbound Message to enable near real-time data sync. UC wants to ensure that communication between Salesforce and Target System is Secure. What Certificate is sent along with the Outbound Message?
A. The Self-Signed Certificates from the Certificate & Key Management menu.
B. The default Client Certificate from the Develop--> API Menu.
C. The CA-Signed Certificate from the Certificate and Key Management menu.
D. The default Client Certificate or a Certificate from Certificate and Key Management menu.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 14
Universal Containers (UC) is looking to build a Canvas app and wants to use the corresponding Connected App to control where the app is visible. Which two options are correct in regards to where the app can be made visible under the Connected App setting for the Canvas app? Choose 2 answers
A. The sidebar of a Salesforce Console as a console component.
B. In the mobile navigation menu on Salesforce for Android.
C. Included in the Call Control Tool that's part of Open CTI.
D. As part of the body of a Salesforce Knowledge article.
Answer: (SHOW ANSWER)

NEW QUESTION: 15
Universal Containers (UC) wants to build a custom mobile app for their field reps to create orders in salesforce. After the first time the users log in, they must be able to access salesforce upon opening the mobile app without being prompted to log in again. What Oauth flows should be considered to support this requirement?
A. User Agent flow with a Refresh Token.
B. Web Server flow with a Refresh Token.
C. Mobile Agent flow with a Bearer Token.
D. SAML Assertion flow with a Bearer Token.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 16
A client is planning to rollout multi-factor authentication (MFA) to its internal employees and wants to understand which authentication and verification methods meet the Salesforce criteria for secure authentication.
Which three functions meet the Salesforce criteria for secure mfa?
Choose 3 answers
A. Third-party single sign-on with Mobile Authenticator app
B. Certificate-based Authentication
C. Lightning Login
D. username and password + SMS passcode
E. Username and password + secunty key
Answer: (SHOW ANSWER)

NEW QUESTION: 17
The security team at Universal Containers (UC) has identified exporting reports as a high-risk action and would like to require users to be logged into Salesforce with their Active Directory (AD) credentials when doing so. For all other users of Salesforce, users should be allowed to use AD Credentials or Salesforce credentials. What solution should be recommended to prevent exporting reports except when logged in using AD credentials while maintaining the ability to view reports when logged in with Salesforce credentials?
A. Use SAML Federated Authentication and Custom SAML JIT Provisioning to dynamically and or remove a permission set that grants the Export Reports Permission.

B. Use SAML federated Authentication with a Login Flow to dynamically add or remove a Permission Set that grants the Export Reports Permission.
C. Use SAML Federated Authentication andblock access to reports when accessed through a Standard Assurance session.
D. Use SAML federatedAuthentication, treat SAML Sessions as High Assurance, and raise the session level required for exporting reports.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 18
Which two capabilities does My Domain enable in the context of a SAML SSO configuration? Choose 2 answers
A. Resource deep linking
B. App Launcher
C. SSO from Salesforce Mobile App
D. Login Forensics
Answer: C (LEAVE A REPLY)

NEW QUESTION: 19
Northern Trail Outfitters (NTO) is setting up Salesforce to authenticate users with an external identity provider. The NTO Salesforce Administrator is having trouble getting things setup.
What should an identity architect use to show which part of the login assertion is fading?
A. Connected App Manager
B. Security Assertion Markup Language Validator
C. SAML Metadata file importer
D. Identity Provider Metadata download
Answer: B (LEAVE A REPLY)

NEW QUESTION: 20
Northern Trail Outfitters (NTO) employees use a custom on-premise helpdesk application to request, approve, notify, and track access granted to various on-premises and cloud applications, including Salesforce. Salesforce is currently used to authenticate users.
How should NTO provision Salesforce users as soon as they are approved in the helpdesk application with the approved profiles and permission sets?
A. Use Salesforce Connect to integrate with the helpdesk application.
B. Use a login flow to query the helpdesk to validate user status.
C. Have the helpdesk initiate an IdP-initiated Just-m-Time provisioning Security Assertion Markup Language flow.
D. Build an integration that performs a remote call-in to the Salesforce SOAP or REST API.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 21

Universal containers (UC) has implemented ansp-Initiated SAML flow between an external IDP and salesforce. A user at UC is attempting to login to salesforce1 for the first time and is being prompted for salesforce credentials instead of being shown the IDP login page. What is the likely cause of the issue?
A. The "Redirect to identity provider" option has not been selected the SAML configuration.
B. The user has not configured the salesforce1 mobile app to use my domain for login
C. The user has not been granted the "Enable single Sign-on" permission
D. The "Redirect to Identity Provider" option has been selected in the my domain configuration.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 22
Northern Trail Outfitters (NTO) believes a specific user account may have been compromised. NTO inactivated the user account and needs U perform a forensic analysis and identify signals that could Indicate a breach has occurred.
What should NTO's first step be in gathering signals that could indicate account compromise?
A. Review the User record and evaluate the login and transaction history.
B. Download the Identity Provider Event Log and evaluate the details of activities performed by the user.
C. Download the Login History and evaluate the details of logins performed by the user.
D. Download the Setup Audit Trail and review all recent activities performed by the user.
Answer: C (LEAVE A REPLY)

NEW QUESTION: 23
Universal Containers (UC) has an existing e-commerce platform and is implementing a new customer community. They do not want to force customers to register on both applications due to concern over the customers experience. It is expected that 25% of the e-commerce customers will utilize the customer community . The e-commerce platform is capable of generating SAML responses and has an existing REST-ful API capable of managing users. How should UC create the identities of its e-commerce users with the customer community?
A. Use SAML JIT in the Customer Community to create users when a user tries to login to the community from the e-commerce site.
B. Use the standard Salesforce API to create users in the Community When a User is Created in the e-Commerce platform and use SAML to allow SSO.
C. Use a nightly batch ETL job to sync users between the Customer Community and the e-commerce platform and use SAML to allow SSO.
D. Use the e-commerce REST API to create users when a user self-register on the customer community and use SAML to allow SSO.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 24
universal containers wants to build a custom mobile app connecting to salesforce using Oauth, and would like to restrict the types of resources mobile users can access. What Oauth feature of Salesforce should be used to achieve the goal?
A. Mobile PINS
B. Refresh Tokens
C. Access Tokens

D. Scopes
Answer: (SHOW ANSWER)

NEW QUESTION: 25
An Architect has configured a SAML-based SSO integration between Salesforce and an external Identity provider and is ready to test it. When the Architect attempts to log in to Salesforce using SSO, the Architect receives a SAML error.
Which two optimal actions should the Architect take to troubleshoot the issue?
A. Use a browser that has an add-on/extension that can inspect SAML.
B. Paste the SAML Assertion Validator in Salesforce.
C. Use the browser's Development tools to view the Salesforce page's markup.
D. Ensure the Callback URL is correctly set in the Connected Apps settings.
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 26
A farming enterprise offers smart farming technology to its farmer customers, which includes a variety of sensors for livestock tracking, pest monitoring, climate monitoring etc. They plan to store all the data in Salesforce. They would also like to ensure timely maintenance of the Installed sensors. They have engaged a salesforce Architect to propose an appropriate way to generate sensor Information In Salesforce.
Which OAuth flow should the architect recommend?
A. OAuth 2.0 Asset Token Flow
B. OAuth 2.0 Device Authentication Row
C. OAuth 2.0 JWT Bearer Token Flow
D. OAuth 2.0 SAML Bearer Assertion Flow
Answer: (SHOW ANSWER)

NEW QUESTION: 27
A global fitness equipment manufacturer is planning to sell fitness tracking devices and has the following requirements:
1) Customer purchases the device.
2) Customer registers the device using their mobile app.
3) A case should automatically be created in Salesforce and associated with the customers account in cases where the device registers issues with tracking.
Which OAuth flow should be used to meet these requirements?
A. OAuth 2.0 Asset Token Flow
B. OAuth 2.0 User-Agent Flow
C. OAuth 2.0 SAML Bearer Assertion Flow
D. OAuth 2.0 Username-Password Flow
Answer: A (LEAVE A REPLY)

NEW QUESTION: 28
A multinational industrial products manufacturer is planning to implement Salesforce CRM to manage their business.
They have the following requirements:

1. They plan to implement Partner communities to provide access to their partner network .
2. They have operations in multiple countries and are planning to implement multiple Salesforce orgs.
3. Some of their partners do business in multiple countries and will need information from multiple Salesforce communities.
4. They would like to provide a single login for their partners.
How should an Identity Architect solution this requirement with limited custom development?
A. Register partners in one org and access information from other orgs using APIs.
B. Allow partners to choose the Salesforce org they need information from and use login flows to authenticate access.
C. Consolidate Partner related information in a single org and provide access through Salesforce community.
D. Create a partner login for the country of their operation and use SAML federation to provide access to other orgs.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 29
Universal containers (UC) has an e-commerce website while customers can buy products, make payments, and manage their accounts. UC decides to build a customer Community on Salesforce and wants to allow the customers to access the community for their accounts without logging in again. UC decides to implement ansp-Initiated SSO using a SAML-BASED complaint IDP. In this scenario where salesforce is the service provider, which two activities must be performed in salesforce to make sp-Initiated SSO work? Choose 2 answers
A. Set up my domain
B. Create a connected App
C. Configure SAML SSO settings.
D. Configure Delegated Authentication
Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 30
An architect has successfully configured SAML-BASED SSO for universal containers. SSO has been working for 3 months when Universal containers manually adds a batchof new users to salesforce. The new users receive an error from salesforce when trying to use SSO. Existing users are still able to successfully use SSO to access salesforce. What is the probable cause of this behaviour?
A. The new users do not have the SSO permission enabled on their profiles.
B. The Federation ID field on the new user records is not correctly set
C. The my domain capability is not enabled on the new user's profile.
D. The administrator forgot to reset the new user's salesforce password.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 31
Universal Containers (UC) has Active Directory (AD) as their enterprise identity store and would like to use it for Salesforce user authentication. UC expects to synchronize user data between Salesforce and AD and Assign the appropriate Profile and Permission Sets based on AD group membership. What would be the optimal way to implement SSO?
A. Use Active Directory Federation Service (ADFS) as the Identity Provider.

B. Use Salesforce Identity Connect as the Identity Provider.
C. Use Microsoft Access control Service as the Authentication provider.
D. Use Active Directory with Reverse Proxy as the Identity Provider.
Answer: (SHOW ANSWER)

NEW QUESTION: 32
A security architect is rolling out a new multi-factor authentication (MFA) mandate, where all employees must go through a secure authentication process before accessing Salesforce. There are multiple Identity Providers (IdP) in place and the architect is considering how the "Authentication Method Reference" field (AMR) in the Login History can help.
Which two considerations should the architect keep in mind?
Choose 2 answers
A. High-assurance sessions must be configured under Session Security Level Policies.
B. Both OIDC and Security Assertion Markup Language (SAML) are supported but AMR must be implemented at IdP.
C. Dependency on what is supported by OpenID Connect (OIDC) implementation at IdP.
D. AMR field shows the authentication methods used at IdP.
Answer: (SHOW ANSWER)

NEW QUESTION: 33
When designing a multi-branded Customer Identity and Access Management solution on the Salesforce Platform, how should an identity architect ensure a specific brand experience in Salesforce is presented?
A. Provide a brand picker that the end user can use to select its sub-brand when they arrive on salesforce.
B. The Audience ID, which can be set in a shared cookie.
C. Add a custom parameter to the service provider's OAuth/SAML call and implement logic on its login page to apply branding based on the parameters value.
D. The Experience ID, which can be included in OAuth/Open ID flows and Security Assertion Markup Language (SAML) flows as a URL parameter.
Answer: (SHOW ANSWER)

NEW QUESTION: 34
Universal Containers (UC) plans to use a SAML-based third-party IdP serving both of the Salesforce Partner Community and the corporate portal. UC partners will log in 65* to the corporate portal to access protected resources, including links

to Salesforce resources. What would be the recommended way to configure the IdP so that seamless access can be achieved in this scenario?
A. Set up the corporate portal as a Connected App in Salesforce and use the User Agent OAuth flow.
B. Set up the corporate portal as a Connected App in Salesforce and use the Web server OAuth flow.
C. Configure SP-initiated SSO that passes the SAML token upon Salesforce resource access request.
D. Configure IdP-initiated SSO that passes the SAML token upon Salesforce resource access request.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 35
A global company is using the Salesforce Platform as an Identity Provider and needs to integrate a third-party application with its Experience Cloud customer portal.
Which two features should be utilized to provide users with login and identity services for the third-party application?
Choose 2 answers
A. Use the App Launcher with single sign-on (SSO).
B. Use Delegated Authentication.
C. External a Data source with Named Principal identity type.
D. Use a connected app.
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 36
Universal Containers (UC) has a custom, internal-only, mobile billing application for users who are commonly out of the office. The app is configured as a connected App in Salesforce. Due to the nature of this app, UC would like to take the appropriate measures to properly secure access to the app. Which two are recommendations to make the UC? Choose 2 answers
A. Set Login IP Ranges to the internal network for all of the app users Profiles.
B. Use Google Authenticator as an additional part of the login process
C. Require High Assurance sessions in order to use the Connected App.
D. Disallow the use of Single Sign-on for any users of the mobile app.
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 37
Universal Containers (UC) rolling out a new Customer Identity and Access Management Solution will be built on top of their existing Salesforce instance.
Several service providers have been setup and integrated with Salesforce using OpenID Connect to allow for a seamless single sign-on experience. UC has a requirement to limit user access to only a subset of service providers per customer type.
Which two steps should be done on the platform to satisfy the requirement?
Choose 2 answers
A. Use Profiles and Permission Sets to assign user access to Admin Pre-Approved Connected Apps.
B. Set each of the Connected App access settings to Admin Pre-Approved.
C. Manage which connected apps a user has access to by assigning authentication providers to the users profile.

D. Assign the connected app to the customer community, and enable the users profile in the Community settings.
Answer: (SHOW ANSWER)

NEW QUESTION: 38
Universal containers (UC) is setting up their customer Community self-registration process. They are uncomfortable with the idea of assigning new users to a default account record. What will happen when customers self-register in the community?
A. The self-registration process will create a person Account record.
B. The self-registration page will create a new account record.
C. The self-registration page will ask user to select an account.
D. The self-registration process will produce an error to the user.
Answer: (SHOW ANSWER)

NEW QUESTION: 39
Universal Containers (UC) has decided to replace the homegrown customer portal with Salesforce Experience Cloud. UC will continue to use its third-party single sign-on (SSO) solution that stores all of its customer and partner credentials. The first time a customer logs in to the Experience Cloud site through SSO, a user record needs to be created automatically.
Which solution should an identity architect recommend in order to automatically provision users in Salesforce upon login?
A. Custom login flow and Apex handler
B. Custom middleware and web services
C. Just-in-Time (JIT) provisioning
D. Third-party AppExchange solution
Answer: C (LEAVE A REPLY)

NEW QUESTION: 40
An Architect has successfully configured SAML-based SSO for Universal Containers. SSO has been working for 3 months when Universal Containers manually adds a batch of new users to Salesforce. The new users receive an error from Salesforce when trying to use SSO. Existing users are still able to successfully use SSO to access Salesforce.
What is the likely cause of this behavior?
A. The My Domain capability is NOT enabled on the new user's profile.
B. The Federation ID field on the new User records is NOT correctly set.
C. The administrator forgot to reset the new user's Salesforce password.
D. The new users do NOT have the SSO permission enabled on their profiles.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 41
Universal containers (UC) is planning to deploy a custom mobile app that will allow users to get e-signatures from its customers on their mobile devices. The mobile app connects to salesforce to upload the e-signatures as a file

attachment and uses Oauth protocol for both Authentication and authorization. What is the most recommended and secure Oauth scope setting that an architect should recommend?
A. Web
B. Custom_permissions
C. Id
D. API
Answer: D (LEAVE A REPLY)

NEW QUESTION: 42
Which two are valid choices for digital certificates when setting up two-way SSL between Salesforce and an external system. Choose 2 answers
A. Use a trusted CA-signed certificate for salesforce and a self-signed cert for the external system
B. Use a self-signed certificate for salesforce and a self-signed cert for the external system
C. Use a trusted CA-signed certificate for salesforce and a trusted CA-signed cert for the external system
D. Use a self-signed certificate for salesforce and a trusted CA-signed cert for the external system
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 43
Universal Containers (UC) has an existing e-commerce platform and is implementing a new customer community. They do not want to force customers to register on both applications due to concern over the customers experience. It is expected that 25% of the e-commerce customers will utilize the customer community . The e-commerce platform is capable of generating SAML responses and has an existing REST-ful API capable of managing users. How should UC create the identities of its e-commerce users with the customer community?
A. Use SAML JIT in the Customer Community to create users when a user tries to login to the community from the e-commerce site.
B. Use the e-commerce REST API to create users when a user self-register on the customer community and use SAML to allow SSO.
C. Use a nightly batch ETL job to sync users between the Customer Community and the e-commerce platform and use SAML to allow SSO.
D. Use the standard Salesforce API to create users in the Community When a User is Created in the e-Commerce platform and use SAML to allow SSO.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 44
Containers (UC) has implemented SAML-based single Sign-on for their Salesforce application and is planning to provide access to Salesforce on mobile devices using the Salesforce1 mobile app. UC wants to ensure that Single Sign-on is used for accessing the Salesforce1 mobile App. Which two recommendations should the Architect make? Choose 2 Answers
A. Configure the Embedded Web Browser to use My Domain URL.
B. Use the existing SAML-SSO flow along with User Agent Flow.
C. Configure the Salesforce1 App to use the MY Domain URL.

D. Use the existing SAML SSO flow along with Web Server Flow.
Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 45
Universal containers (UC) has decided to use identity connect as it's identity provider. UC uses active directory(AD) and has a team that is very familiar and comfortable with managing ad groups. UC would like to use AD groups to help configure salesforce users. Which three actions can AD groups control through identity connect? Choose 3 answers
A. Role Assignment
B. Permission sets assignment
C. Granting report folder access
D. Custom permission assignment
E. Public Group Assignment
Answer: A,B,E (LEAVE A REPLY)

NEW QUESTION: 46
An Identity architect works for a multinational, multi-brand organization. As they work with the organization to understand their Customer Identity and Access Management requirements, the identity architect learns that the brand experience is different for each of the customer's sub-brands and each of these branded experiences must be carried through the login experience depending on which sub-brand the user is logging into.
Which solution should the architect recommend to support scalability and reduce maintenance costs, if the organization has more than 150 sub-brands?
A. Use Audiences to customize the login experience for each sub-brand and pass an audience ID to the community during the OAuth and Security Assertion Markup Language (SAML) flows.
B. Assign each sub-brand a unique Experience ID and use the Experience ID to dynamically brand the login experience.
C. Create a community subdomain for each sub-brand and customize the look and feel of the Login page for each community subdomain to match the brand.
D. Create a separate Salesforce org for each sub-brand so that each sub-brand has complete control over the user experience.
Answer: (SHOW ANSWER)

NEW QUESTION: 47

Which two statements are capable of Identity Connect? Choose 2 answers

A. Synchronization of Salesforce Permission Set Licence Assignments.

B. Automated user synchronization and de-activation.

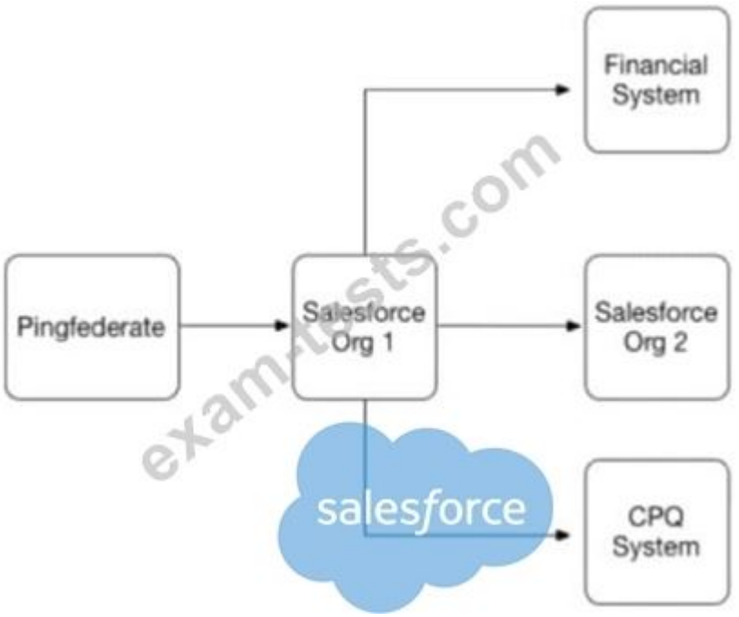
C. Supports both Identity-Provider-Initiated and Service-Provider-Initiated SSO.

D. Support multiple orgs connecting to multiple Active Directory servers.

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 48

Universal Containers (UC) has implemented SAML-based Single Sign-On to provide seamless access to its Salesforce Orgs, financial system, and CPQ system. Below is the SSO implementation landscape.



What role combination is represented by the systems in this scenario"

A. Salesforce Org1 and PingFederate are acting as Identity Providers.

B. Financial System and CPQ System are the only Service Providers.

C. Salesforce Org1 and Salesforce Org2 are the only Service Providers.

D. Salesforce Org1 and Salesforce Org2 are acting as Identity Providers.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 49

Universal Containers (UC) is planning to deploy a custom mobile app that will allow users to get e-signatures from its customers on their mobile devices. The mobile app connects to Salesforce to upload the e-signature as a file attachment and uses OAuth protocol for both authentication and authorization. What is the most recommended and secure OAuth scope setting that an Architect should recommend?

A. Api

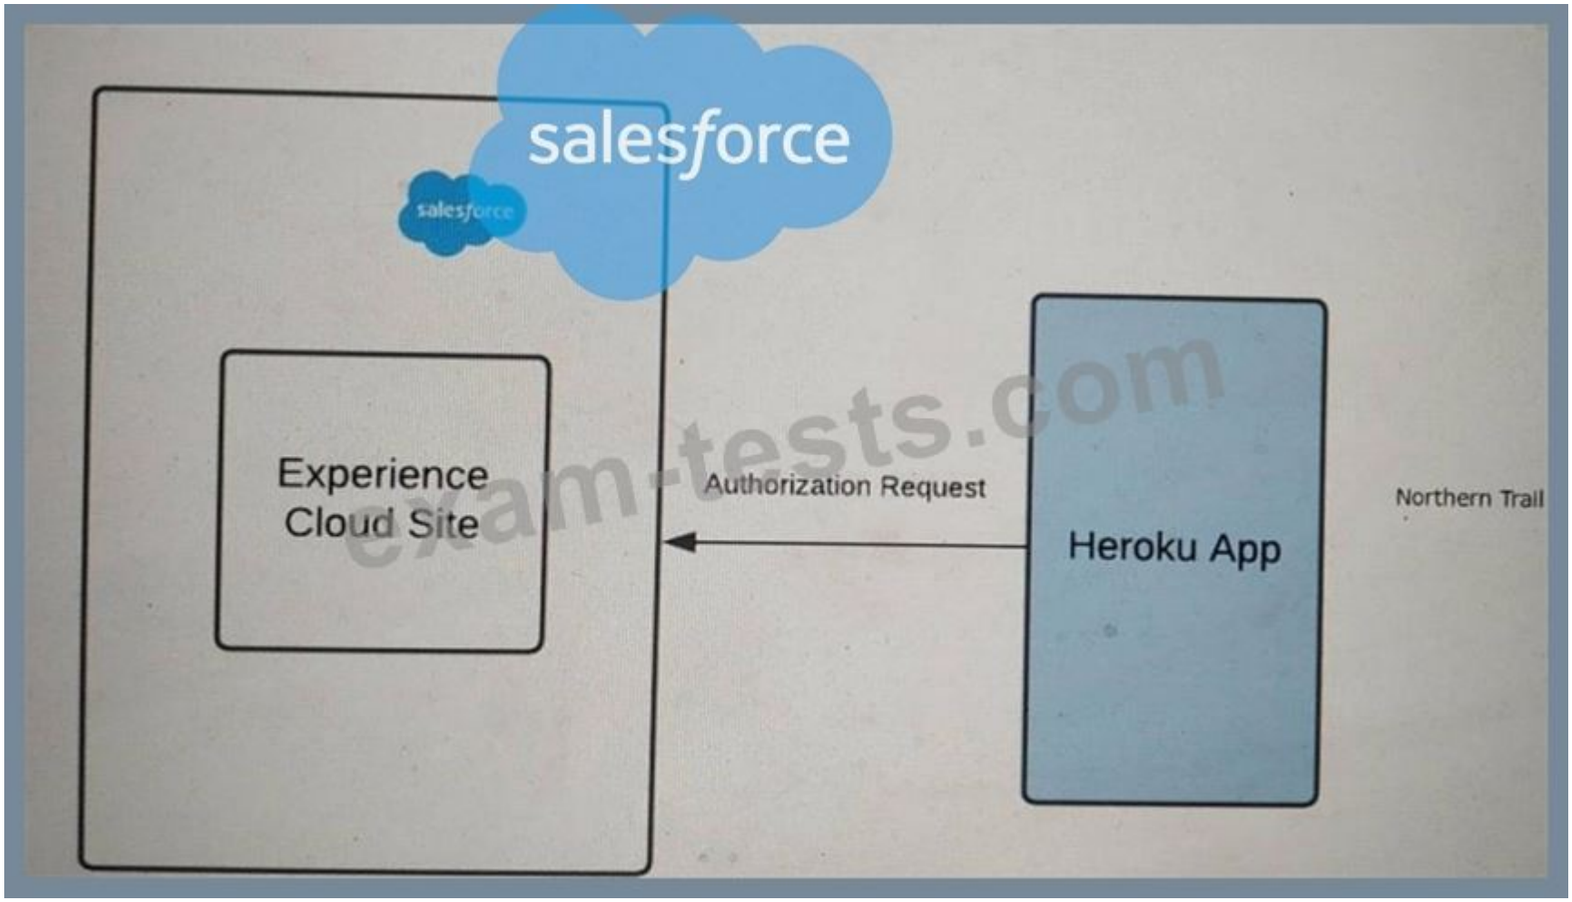
B. Web

C. Custom_permissions

D. Id

Answer: C (LEAVE A REPLY)

NEW QUESTION: 50
Refer to the exhibit.



Outfitters (NTO) is using Experience Cloud as an Identity for its application on Heroku. The application on Heroku should be able to handle two brands, Northern Trail Shoes and Northern Trail Shirts.
A user should select either of the two brands in Heroku before logging into the community. The app then performs Authorization using OAuth2.0 with the Salesforce Experience Cloud site.
NTO wants to make sure it renders login page images dynamically based on the user's brand preference selected in Heroku before Authorization.
what should an identity architect do to fulfill the above requirements?
A. Authorize third-party service by sending authorization requests to the community-url/services/oauth2/authonze/expid_value.
B. For each brand create different communities and redirect users to the appropriate community using a custom Login controller written in Apex.
C. Authorize third-party service by sending authorization requests to the community-url/services/oauth2/authorize/cookie_value.
D. Create multiple login screens using Experience Builder and use Login Flows at runtime to route to different login screens.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 51
A leading fitness tracker company is getting ready to launch a customer community. The company wants its customers to login to the community and connect their fitness device to their profile. Customers should be able to obtain exercise details and fitness recommendation in the community.
Which should be used to satisfy this requirement?
A. OAuth Device Flow
B. Single Sign-On Settings
C. Login Flows
D. Named Credentials
Answer: A (LEAVE A REPLY)

NEW QUESTION: 52
Universal Containers (UC) has a mobile application for its employees that uses data from Salesforce as well as uses Salesforce for Authentication purposes. UC wants its mobile users to only enter their credentials the first time they run the app. The application has been live for a little over 6 months, and all of the users who were part of the initial launch are complaining that they have to re-authenticate. UC has also recently changed the URI Scheme associated with the mobile app. What should the Architect at UC first investigate?Universal Containers (UC) has a mobile application for its employees that uses data from Salesforce as well as uses Salesforce for Authentication purposes. UC wants its mobile users to only enter their credentials the first time they run the app. The application has been live for a little over 6 months, and all of the users who were part of the initial launch are complaining that they have to re-authenticate. UC has also recently changed the URI Scheme associated with the mobile app. What should the Architect at UC first investigate?
A. Verify that the Callback URL is correctly pointing to the new URI Scheme.
B. Check the Refresh Token policy defined in the Salesforce Connected App.
C. Confirm that the access Token's Time-To-Live policy has been set appropriately.
D. Validate that the users are checking the box to remember their passwords.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 53
An identity architect is setting up an integration between Salesforce and a third-party system. The third-party system needs to authenticate to Salesforce and then make API calls against the REST API.
One of the requirements is that the solution needs to ensure the third party service providers connected app in Salesforce mini need for end user interaction and maximizes security.
Which OAuth flow should be used to fulfill the requirement?
A. JWT Bearer Flow
B. Username-Password Flow
C. User Agent Flow
D. Web Server Flow
Answer: (SHOW ANSWER)

NEW QUESTION: 54

Universal Containers (UC) would liketo enable self-registration for their Salesforce Partner Community Users.
UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate Profile and Account values.
Which two actions should the Architect recommend to UC1
Choose 2 answers
A. Modify the CommunitiesSelfRegController to assign theProfile and Account.
B. Configure Registration for Communities to use a custom Apex Controller.
C. Configure Registration for Communities to use a custom Visualforce Page.
D. Modify the SelfRegistration trigger to assign Profile and Account.
Answer: (SHOW ANSWER)

NEW QUESTION: 55
Universal Containers (UC) is building an integration between Salesforce and a legacy web application using the Canvas framework. The security team for UC has determined that a signed request from Salesforce is not an adequate authentication solution for the third-party app. Which two options should the Architect consider for authenticating the third-party app using the Canvas framework? Choose 2 answers
A. Utilize the Canvas OAuth flow to allow the third-party application to authenticate itself against Salesfore as the IdP
B. Utilize Authorization Providers to allow the third-party application to authenticate itself against Salesforce as the IdP.
C. Create a registration handler Apex class to allow the third-party application to authenticate itself against Salesforce as the IdP.
D. Utilize the SAML Single Sign-on flow to allow the third-party to authenticate itself against UC's IdP.
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 56
Universal containers wants to implement single Sign-on for a salesforce org using an external identity provider and corporate identity store. What type of Authentication flow is required to support deep linking?
A. Identity-provider-initiated SSO
B. Start URL on identity provider
C. Web server Oauth SSO flow.
D. Service-provider-initiated SSO
Answer: D (LEAVE A REPLY)

NEW QUESTION: 57
which three are features of federated Single Sign-on solutions? Choose 3 answers
A. It establishes trust between Identity store and service provider.
B. It solves all identity and access management problems.
C. It improves affiliated applications adoption rates.
D. It enables quick and easy provisioning and deactivating of users.
E. It federates credentials control to authorized applications.
Answer: (SHOW ANSWER)

NEW QUESTION: 58
Universal Containers (UC) uses Salesforce to allow customers to keep track of the order status. The customers can log in to Salesforce using external authentication providers, such as Facebook and Google. UC is also leveraging the App Launcher to let customers access an of platform application for generating shipping labels.
The label generator application uses OAuth to provide users access. What license type should an Architect recommend for the customers?
A. Customer Community Plus license
B. Identity license
C. External Identity license
D. Customer Community license
Answer: C (LEAVE A REPLY)

NEW QUESTION: 59
The security team at Universal Containers (UC) has identified exporting reports as a high-risk action and would like to require users to be logged into Salesforce with their Active Directory (AD) credentials when doing so. For all other users of Salesforce, users should be allowed to use AD Credentials or Salesforce credentials. What solution should be recommended to prevent exporting reports except when logged in using AD credentials while maintaining the ability to view reports when logged in with Salesforce credentials?
A. Use SAML federated Authentication, treat SAML Sessions as High Assurance, and raise the session level required for exporting reports.
B. Use SAML Federated Authentication and Custom SAML JIT Provisioning to dynamically and or remove a permission set that grants the Export Reports Permission.
C. Use SAML federated Authentication with a Login Flow to dynamically add or remove a Permission Set that grants the Export Reports Permission.
D. Use SAML Federated Authentication and block access to reports when accessed through a Standard Assurance session.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 60
Universal containers (UC) uses an internal company portal for their employees to collaborate. UC decides to use salesforce ideas and provide the ability for employees to post ideas from the company portal. They use SAML-BASED SSO to get into the company portal and would like to leverage it to access salesforce. Most of the users don't exist in salesforce and they would like the user records created in salesforce communities the first time they try to access salesforce. What recommendation should an architect make to meet this requirement?
A. Use on-the-fly provisioning
B. Use salesforce APIs to create users on the fly
C. Use just-in-time provisioning
D. Use Identity connect to sync users
Answer: C (LEAVE A REPLY)

NEW QUESTION: 61

Northern Trail Outfitters (NTO) recently purchased Salesforce Identity Connect to streamline user provisioning across Microsoft Active Directory (AD) and Salesforce Sales Cloud.
NTO has asked an identity architect to identify which salesforce security configurations can map to AD permissions.
Which three Salesforce permissions are available to map to AD permissions?
Choose 3 answers
A. Field-Level Security
B. Profiles and Permission Sets
C. Public Groups
D. Roles
E. Sharing Rules
Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 62
Universal Containers wants to set up SSO for a selected group of users to access external applications from Salesforce through App Launcher.
Which three steps must be completed in Salesforce to accomplish the goal? (Choose three.)
A. Associate User profiles with the Connected Apps.
B. Complete My Domain and Identity Provider setup.
C. Create Connected Apps for the external applications.
D. Complete Single Sign-on Settings in Security Controls.
E. Create Named Credentials for each external system.
Answer: (SHOW ANSWER)
Explanation/Reference:

NEW QUESTION: 63
Northern Trail Outfitters would like to use a portal built on Salesforce Experience Cloud for customer self-service. Guests of the portal be able to self-register, but be unable to automatically be assigned to a contact record until verified.
External Identity licenses have bee purchased for the project.
After registered guests complete an onboarding process, a flow will create the appropriate account and contact records for the user.
Which three steps should an identity architect follow to implement the outlined requirements?

Choose 3 answers
A. Select the "Configurable Self-Reg Page" option under Login & Registration.
B. Set jp an external login page and call Salesforce APIs for user creation.
C. Customize the self-registration Apex handler to temporarily associate the user to a shared single contact record.
D. Customize me self-registration Apex handler to create only the user record.
E. Enable "Allow customers and partners to self-register".
Answer: (SHOW ANSWER)

NEW QUESTION: 64
A real estate company wants to provide its customers a digital space to design their interior decoration options. To simplify the registration to gain access to the community site (built in Experience Cloud), the CTO has requested that the IT/Development team provide the option for customers to use their existing social-media credentials to register and access.
The IT lead has approached the Salesforce Identity and Access Management (IAM) architect for technical direction on implementing the social sign-on (for Facebook, Twitter, and a new provider that supports standard OpenID Connect (OIDC)).
Which two recommendations should the Salesforce IAM architect make to the IT Lead?
Choose 2 answers
A. For supporting OIDC it is necessary to enable Security Assertion Markup Language (SAML) with Just-in-Time provisioning (JIT) and OAuth 2.0.
B. Use declarative registration handler process builder/flow to create, update users and contacts.
C. Authentication provider configuration is required each social sign-on providers; and enable Authentication providers in community.
D. Apex coding skills are needed for registration handler to create and update users.
Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 65
Universal Containers (UC) wants its users to access Salesforce and other SSO-enabled applications from a custom web page that UC magnets. UC wants its users to use the same set of credentials to access each of the applications. what SAML SSO flow should an Architect recommend for UC?
A. User-Agent
B. SP-Initiated
C. IdP-Initiated
D. SP-Initiated with Deep Linking
Answer: (SHOW ANSWER)

NEW QUESTION: 66
Northern Trail Outfitters (NTO) has an off-boarding process where a terminated employee is first disabled in the Lightweight Directory Act Protocol (LDAP) directory, then requests are sent to the various application support teams to finish user deactivations. A terminated employee recently was able to login to NTO's Salesforce instance 24 hours after termination, even though the user was disabled in the corporate LDAP directory.

What should an identity architect recommend to prevent this from happening in the future?
A. Create a Just-in-Time provisioning registration handler to ensure users are deactivated in Salesforce as they are disabled in LDAP.
B. Setup an identity provider (IdP) to authenticate users using LDAP, set up single sign-on to Salesforce and disable Login Form authentication.
C. use a login flow to make a callout to the LDAP directory before authenticating the user to Salesforce.
D. Configure an authentication provider to delegate authentication to the LDAP directory.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 67
What information does the 'Relaystate' parameter contain in sp-Initiated Single Sign-on?
A. Reference to a URL redirect parameter at the identity provider.
B. Reference to the login address URL of the service provider.
C. Reference to the login address URL of the identity Provider.
D. Reference to a URL redirect parameter at the service provider.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 68
Northern Trail Outfitters (NTO) is setting up Salesforce to authenticate users with an external identity provider. The NTO Salesforce Administrator is having trouble getting things setup.
What should an identity architect use to show which part of the login assertion is fading?
A. Connected App Manager
B. Security Assertion Markup Language Validator
C. Identity Provider Metadata download
D. SAML Metadata file importer
Answer: A (LEAVE A REPLY)

NEW QUESTION: 69
Universal Containers (UC) wants to build a few applications that leverage the Salesforce REST API. UC has asked its Architect to describe how the API calls will be authenticated to a specific user. Which two mechanisms can the Architect provide? Choose 2 Answers
A. Refresh Token
B. Authentication Token
C. Session ID
D. Access Token
Answer: (SHOW ANSWER)

NEW QUESTION: 70
In a typical SSL setup involving a trusted party and a trusting party, what consideration should an Architect take into account when using digital certificates?

A. Use of self-signed certificate leads to lower maintenance for trusting party because there is no trusted CA cert to maintain.
B. Use of self-signed certificate leads to higher maintenance for trusting party because the cert needs to be added to their truststore.
C. Use of self-signed certificate leads to higher maintenance for trusted party because they have to act as the trusted CA.
D. Use of self-signed certificate leads to lower maintenance for trusted party because multiple self-signed certs need to be maintained.
Answer: (SHOW ANSWER)

NEW QUESTION: 71
Universal containers (UC) would like to enable self - registration for their salesforce partner community users. UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate profile and account values. Which two actions should the architect recommend to UC? Choose 2 answers
A. Configure registration for communities to use a custom visualforce page.
B. Modify the communitiesselfregcontroller to assign the profile and account.
C. Configure registration for communities to use a custom apex controller.
D. Modify the selfregistration trigger to assign profile and account.
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 72
Universal Containers (UC) uses middleware to integrate multiple systems with Salesforce. UC has a strict, new requirement that usernames and passwords cannot be stored in any UC system. How can UC's middleware authenticate to Salesforce while adhering to this requirement?
A. Create a Connected App that supports the Refresh Token OAuth Flow
B. Create a Connected App that supports the Web Server OAuth Flow.
C. Create a Connected App that supports the User-Agent OAuth Flow.
D. Create a Connected App that supports the JWT Bearer Token OAuth Flow.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 73
Universal Containers (UC) is both a Salesforce and Google Apps customer. The UC IT team would like to manage the users for both systems in a single place to reduce administrative burden. Which twooptimal ways can the IT team provision users and allow Single Sign-on between Salesforce and Google Apps ? Choose 2 answers
A. Build a custom app running on Heroku as the Identity Provider that can sync user information between Salesforce and Google Apps.
B. Use Salesforce as the Identity Provider and Google Apps as a Service Provider and configure User Provisioning for Connected Apps.
C. Use a third-party product as the Identity Provider for both Salesforce and Google Apps and manage the provisioning from there.

D. Use Identity Connect as the Identity Provider for both Salesforce and Google Apps and manage the provisioning from there.
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 74
A farming enterprise offers smart farming technology to rts farmer customers, which includes a variety of sensors for livestock tracking, pest monitoring, climate monitoring etc. They plan to store all the data in Salesforce. They would also like to ensure timely maintenance of the Installed sensors. They have engaged a salesforce Architect to propose an appropnate way to generate sensor Information In Salesforce.
Which OAuth flow should the architect recommend?
A. OAuth 2.0 JWT Bearer Token Flow
B. OAuth 2.0 SAML Bearer Assertion Flow
C. OAuth 2.0 Device Authentication Row
D. OAuth 2.0 Asset Token Flow
Answer: D (LEAVE A REPLY)

NEW QUESTION: 75
Northern Trail Outfitters (NTO) has an existing custom business-to-consumer (B2C) website that does NOT support single sign-on standards, such as Security Assertion Markup Language (SAMi) or OAuth. NTO wants to use Salesforce Identity to register and authenticate new customers on the website.
Which two Salesforce features should an identity architect use in order to provide username/password authentication for the website?
Choose 2 answers
A. Embedded Login
B. Delegated Authentication
C. Identity Connect
D. Connected Apps
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 76
The security team at Universal Containers (UC) hasidentified exporting reports as a high-risk action and would like to require users to be logged into Salesforce with their Active Directory (AD) credentials when doing so.
For all other users of Salesforce, users should be allowed to use AD Credentials orSalesforce credentials. What solution should be recommended to prevent exporting reports except when logged in using AD credentials while maintaining the ability to view reports when logged in with Salesforce credentials?
A. Use SAML Federated Authentication and block access to reports when accessed through a Standard Assurance session.
B. Use SAML federated Authentication, treat SAML Sessions as High Assurance, and raise the session level required for exporting reports.
C. Use SAML Federated Authentication and Custom SAML JIT Provisioning to dynamically and or remove a permission set that grants the Export Reports Permission.

D. Use SAML federated Authentication with a Login Flow to dynamically add or remove a Permission Set that grants the Export Reports Permission.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 77
Containers (UC) has an existing Customer Community. UC wants to expand the self-registration capabilities such that customers receive a different community experience based on the data they provide during the registration process.
What is the recommended approach an Architect Should recommend to UC?
A. Modify the existing Communities registration controller to assign different profiles.
B. Modify the Community pages to utilize specific fields on the User and Contact records.
C. Create separate login flows corresponding to the different community user personas.
D. Create an After Insert Apex trigger on the user object to assign specific custom permissions.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 78
The CIO of Universal Containers (UC) wants to start taking advantage of the refresh token capability for the UC applications that utilize OAuth 2.0. UC has enlisted an Architect to analyze all of the applications that use OAuth flows to see where refresh tokens can be applied.
Which two OAuth flows should the Architect consider in their evaluation? (Choose two.)
A. JWT Bearer Token
B. Web Server
C. Username-Password
D. User-Agent
Answer: B,D (LEAVE A REPLY)
Explanation/Reference:

NEW QUESTION: 79
What are three capabilities of Delegated Authentication? Choose 3 answers
A. It can be assigned by Profiles.
B. It can connectto REST services.
C. It can connect to SOAP services.

D. It can be assigned by Permission Sets.
E. It can be assigned by Custom Permissions.
Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 80
Universal Containers (UC) is using Active Directory as its corporate identity provider and Salesforce as its CRM for customer care agents, who use SAML based sign sign-on to login to Salesforce. The default agent profile does not include the Manage User permission. UC wants to dynamically update the agent role and permission sets.
Which two mechanisms are used to provision agents with the appropriate permissions?
Choose 2 answers
A. Use SAML Just-m-Time (JIT) Handler class run as current user to update role and permission sets.
B. Use Login Flow in User Context to update role and permission sets.
C. Use SAML Just-in-Time (JIT) handler class run as an admin user to update role and permission sets.
D. Use Login Flow in System Context to update role and permission sets.
Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 81
Containers (UC) has multiple Salesforce Orgs and would like to use a single Identity Provider to access all of their orgs.
How should UC's Architect enable this behaviour?
A. Ensure that users have the same Alias value in their user records in all of UC's Salesforce orgs.
B. Ensure that users have the same Federation ID value in their User records in all of UC's Salesforce orgs
C. Ensure the same username is allowed in multiple orgs by contacting Salesforce Support.
D. Ensure that users have the same Email Value in their user records in all of UC's Salesforce orgs.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 82
An identity architect has been asked to recommend a solution that allows administrators to configure personalized alert messages to users before they land on the Experience Cloud site (formerly known as Community) homepage.
What is recommended to fulfill this requirement with the least amount of customization?
A. Build a Lightning web Component (LWC) for a homepage that shows custom alerts.
B. Use Login Flows to add a screen that shows personalized alerts.
C. Create custom metadata that stores user alerts and use a LWC to display alerts.
D. Customize the registration handler Apex class to create a routing logic navigating to different home pages based on the user profile.
Answer: (SHOW ANSWER)

NEW QUESTION: 83
An Architect needs to advise the team that manages the Identity Provider how to differentiate Salesforce from other Service Providers. What SAML SSO setting in Salesforce provides this capability?
A. Issuer.
B. Identity Provider Login URL.

C. SAML Identity Location.
D. Entity Id
Answer: C (LEAVE A REPLY)

NEW QUESTION: 84
An architect needs to set up a Facebook Authentication provider as login option for a salesforce customer Community.
What portion of the authentication provider setup associates a Facebook user with a salesforce user?
A. User info endpoint URL
B. Federation ID
C. Consumer key and consumer secret
D. Apex registration handler
Answer: D (LEAVE A REPLY)

NEW QUESTION: 85
Universal Containers (UC) would like to enable self-registration for their Salesforce Partner Community Users.
UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate Profile and Account values.
Which two actions should the Architect recommend to UC? (Choose two.)
A. Configure Registration for Communities to use a custom Visualforce Page.
B. Modify the CommunitiesSelfRegController to assign the Profile and Account.
C. Modify the SelfRegistration trigger to assign Profile and Account.
D. Configure Registration for Communities to use a custom Apex Controller.
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 86
Northern Trail Outfitters (NTO) wants to give customers the ability to submit and manage issues with their purchases. It is important for to give its customers the ability to login with their Facebook and Twitter credentials.
Which two actions should an identity architect recommend to meet these requirements?
Choose 2 answers
A. Create a custom external authentication provider for Facebook.
B. Create a custom external authentication provider for Twitter.
C. Configure a predefined authentication provider for Twitter.
D. Configure a predefined authentication provider for Facebook.
Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 87
Containers (UC) has an existing Customer Community. UC wants to expand the self-registration capabilities such that customers receive a different community experience based on the data they provide during the registration process.
What is the recommended approach an Architect Should recommend to UC?
A. Modify the existing Communities registration controller to assign different profiles.
B. Create an After Insert Apex trigger on the user object to assign specific custom permissions.

C. Create separate login flows corresponding to the different community user personas.
D. Modify the Community pages to utilize specific fields on the User and Contact records.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 88
universal container plans to develop a custom mobile app for the sales team that will use salesforce for authentication and access management. The mobile app access needs to be restricted to only the sales team.
What would be the recommended solution to grant mobile app access to sales users?
A. Use the permission set license to assign the mobile app permission to sales users
B. Add a new identity provider to authenticate and authorize mobile users.
C. Use a custom attribute on the user object to control access to the mobile app
D. Use connected apps Oauth policies to restrict mobile app access to authorized users.
Answer: D (LEAVE A REPLY)

NEW QUESTION: 89
Universal Containers (UC) is building an integration between Salesforce and a legacy web applications using the canvas framework. The security for UC has determined that a signed request from Salesforce is not an adequate authentication solution for the Third-Party app. Which two options should the Architect consider for authenticating the third-party app using the canvas framework? Choose 2 Answers
A. Utilize the SAML Single Sign-on flow to allow the third-party to authenticate itself against UC's IdP.
B. Create a registration handler Apex class to allow the third-party appliction to authenticate itself against Salesforce as the Idp.
C. Utilize Canvas OAuth flow to allow the third-party appliction to authenticate itself against Salesforce as the Idp.
D. UtilizeAuthorization Providers to allow the third-party appliction to authenticate itself against Salesforce as the Idp.
Answer: (SHOW ANSWER)

NEW QUESTION: 90
Universal Containers (UC) uses an internal company portal for their employees to collaborate. UC decides to use Salesforce Ideas and provide the ability for employees to post ideas from the company portal. They use SAML-based SSO to get into the Company portal and would like to leverage it to access Salesforce.
Most of the users don't exist in Salesforce and they would like the user records created in Salesforce Communities the first time they try to access Salesforce.
What recommendation should an Architect make to meet this requirement?
A. Use Salesforce APIs to create users on the fly.
B. Use On-the-Fly provisioning.
C. Use Just-in-Time provisioning.
D. Use Identity Connect to sync users.
Answer: C (LEAVE A REPLY)

NEW QUESTION: 91

Universal Containers (UC) uses Global Shipping (GS) as one of their shipping vendors. Regional leads of GS need access to UC's Salesforce instance for reporting damage of goods using Cases. The regional leads also need access to dashboards to keep track of regional shipping KPIs. UC internally uses a third-party cloud analytics tool for capacity planning and UC decided to provide access to this tool to a subset of GS employees.
In addition to regional leads, the GS capacity planning team would benefit from access to this tool. To access the analytics tool, UC IT has set up Salesforce as the Identity provider for Internal users and would like to follow the same approach for the GS users as well. What are the most appropriate license types for GS Tregional Leads and the GS Capacity Planners? Choose 2 Answers
A. Identity Licence for GS Regional Leads and External Identity license for GS capacity Planners.
B. Customer Community license for GS Regional Leads and Identity license for GS Capacity Planners.
C. Customer Community Plus license for GS Regional Leads and Customer Community license for GS Capacity Planners.
D. Customer Community Plus license for GS Regional Leads and External Identity for GS Capacity Planners.
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 92
Universal Containers (UC) wants to integrate a web application with Salesforce. The UC team has implemented the OAuth Web-Server Authentication Flow for authentication purposes.
Which two considerations should an Architect point out to UC? (Choose two.)
A. The web application should be hosted on a secure server.
B. The web server must be able to protect consumer secret.
C. The flow involves passing the user credentials back and forth.
D. The flow will NOT provide an OAuth Refresh Token back to the server.
Answer: (SHOW ANSWER)

NEW QUESTION: 93
Universal Containers (UC) is both a Salesforce and Google Apps customer. The UC IT team would like to manage the users for both systems in a single place to reduce administrative burden.
Which two recommended ways can the IT team provision users and allow Single Sign-on between Salesforce and Google Apps? (Choose two.)

A. Use a third-party product as the Identity Provider for both Salesforce and Google Apps and manage the provisioning from there.
B. Build a custom app running on Heroku as the Identity Provider that can sync user information between Salesforce and Google Apps.
C. Use Salesforce as the Identity Provider and Google Apps as a Service Provider and configure User Provisioning for Connected Apps.
D. Use Identity Connect as the Identity Provider for both Salesforce and Google Apps and manage the provisioning from there.
Answer: (SHOW ANSWER)

NEW QUESTION: 94
Universal Containers (UC) is implementing Salesforce and would like to establish SAML SSO for its users to log in. UC stores its corporate user identities in a Custom Database. The UC IT Manager has heard good things about Salesforce Identity Connect as an Idp, and would like to understand what limitations they may face if they decided to use Identity Connect in their current environment. What limitation Should an Architect inform the IT Manager about?
A. Identity connect is not compatible with UC's current identity environment.
B. Identity Connect will not support user provisioning in UC's current environment.
C. Identity Connect will only support Idp-initiated SAML flows in UC's current environment.
D. Identity Connect will only support SP-initiated SAML flows in UC's current environment.
Answer: B (LEAVE A REPLY)

NEW QUESTION: 95
Universal containers (UC) does my domain enable in the context of a SAML SSO configuration? Choose 2 answers
A. Login forensics
B. Resource deep linking
C. App launcher
D. SSO from salesforce1 mobile app.
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 96
Which three are features of federated Single Sign-on solutions? (Choose three.)
A. It federates credentials control to authorized applications.
B. It enables quick and easy provisioning and deactivating of users.
C. It solves all identity and access management problems.
D. It establishes trust between Identity Store and Service Provider.
E. It improves affiliated applications adoption rates.
Answer: B,D,E (LEAVE A REPLY)

NEW QUESTION: 97

Universal containers wants to implement SAML SSO for their internal salesforce users using a third-party IDP. After some evaluation, UC decides not to set up my domain for their salesforce.org. How does that decision impact their SSO implementation?

A. Neithersp - nor IDP - initiated SSO will work

B. Sp-Initiated SSO will not work

C. Either sp - or IDP - initiated SSO will work

D. IDP - initiated SSO will not work

Answer: B (LEAVE A REPLY)

NEW QUESTION: 98

The security team at Universal containers(UC) has identified exporting reports as a high-risk action and would like to require users to be logged into salesforce with their active directory (AD) credentials when doing so.

For all other uses of Salesforce, Users should be allowed to use AD credentials or salesforce credentials. What solution should be recommended to prevent exporting reports except when logged in using AD credentials while maintaining the ability to view reports when logged in with salesforce credentials?

A. Use SAML Federated Authentication with a login flow to dynamically add or remove a permission set that grants the export reports permission.

B. Use SAML Federated Authentication and block access to reports when accesses through a standard assurance session.

C. Use SAML Federated Authentication, treat SAML sessions as high assurance, and raise the session level required for exporting reports.

D. Use SAML Federated Authentication and Custom SAML jit provisioning to dynamically add or remove a permission set that grants the Export Reports permission.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 99

Sales users at Universal containers use salesforce for Opportunity management. Marketing uses a third-party application called Nest for Lead nurturing that is accessed using username/password. The VP of sales wants to open up access to nest for all sales uses to provide them access to lead history and would like SSO for better adoption.

Salesforce is already setup for SSO and uses Delegated Authentication. Nest can accept username/Password or SAML-based Authentication. IT teams have received multiple password-related issues for nest and have decided to set up SSO access for Nest for Marketing users as well. The CIO does not want to invest in a new IDP solution and is considering using Salesforce for this purpose. Which are appropriate license type choices for sales and marketing users, giving salesforce is using Delegated Authentication?

Choose 2 answers

A. Salesforce license for sales users and External Identity license for Marketing users

B. Identity license for sales users and Identity connect license for Marketing users

C. Salesforce license for sales users and platform license for Marketing users.

D. Salesforce license for sales users and Identity license for Marketing users

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 100
Universalcontainers wants salesforce inbound Oauth-enabled integration clients to use SAML-BASED single Sign-on for authentication. What Oauth flow would be recommended in this scenario?
A. User-Agent Oauth flow
B. User-Token Oauth flow
C. SAML assertion Oauth flow
D. Web server Oauth flow
Answer: C (LEAVE A REPLY)

NEW QUESTION: 101
Universal Containers (UC) would like its community users to be able to register and log in with Linkedin or Facebook Credentials. UC wants users to clearly see Facebook &Linkedin Icons when they register and login.
What are the two recommended actions UC can take to achieve this Functionality? Choose 2 answers
A. Create custom Registration Handlers to link Linkedin and facebook accounts to user records.
B. Enable Facebook and Linkedin as Login options in the login section of the Community configuration.
C. Create custom buttons for Facebook and inkedin using JAVAscript/CSS on a custom Visualforce page.
D. Store the Linkedin or Facebook user IDs in the Federation ID field on the Salesforce User record.
Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 102
A Salesforce customer is implementing Sales Cloud and a custom pricing application for its call center agents. An Enterprise single sign-on solution is used to authenticate and sign-in users to all applications. The customer has the following requirements:
1. The development team has decided to use a Canvas app to expose the pricing application to agents.
2. Agents should be able to access the Canvas app without needing to log in to the pricing application.
Which two options should the identity architect consider to provide support for the Canvas app to initiate login for users? Choose 2 answers
A. Select "Enable as a Canvas Personal App" in the connected app settings.
B. Enable OAuth settings in the connected app with required OAuth scopes for the pricing application.
C. Enable SAML in the connected app and Security Assertion Markup Language (SAML) Initiation Method as Service Provider Initiated.
D. Configure the Canvas app as a connected app and set Admin-approved users as pre-authorized.
Answer: (SHOW ANSWER)

NEW QUESTION: 103
Universal Containers (UC) wants to integrate a third-party Reward Calculation system with Salesforce to calculate Rewards. Rewards will be calculated on a schedule basis and update back into Salesforce. The integration between Salesforce and the Reward Calculation System needs to be secure. Which are two recommended practices for using OAuth flow in this scenario. choose 2 answers
A. OAuth Username-Password Flow
B. OAuth Refresh Token FLow

C. OAuth SAML Bearer Assertion FLow
D. OAuth JWT Bearer Token FLow
Answer: (SHOW ANSWER)

NEW QUESTION: 104
Universal Containers (UC) uses Salesforce to allow customers to keep track of the order status. The customers can log in to Salesforce using external authentication providers, such as Facebook and Google. UC is also leveraging the App Launcher to let customers access an of platform application for generating shipping labels. The label generator application uses OAuth to provide users access. What license type should an Architect recommend for the customers?
A. Customer Community Plus license
B. Identity license
C. Customer Community license
D. External Identity license
Answer: B (LEAVE A REPLY)

NEW QUESTION: 105
Universal containers (UC) wants to implement a partner community. As part of their implementation, UC would like to modify both the Forgot password and change password experience with custom branding for their partner community users. Which 2 actions should an architect recommend to UC? Choose 2 answers
A. Build a community builder page for both the change password and Forgot password experiences.
B. Build a community builder page for the change password experience and Custom Visualforce page for the Forgot password experience.
C. Build a custom visualforce page for both the change password and Forgot password experiences.
D. Build a custom visualforce page for the change password experience and a community builder page for the Forgot password experience.
Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 106
Northern Trail Outfitters (NTO) is launching a new sportswear brand on its existing consumer portal built on Salesforce Experience Cloud. As part of the launch, emails with promotional links will be sent to existing customers to log in and claim a discount. The marketing manager would like the portal dynamically branded so that users will be directed to the brand link they clicked on; otherwise, users will view a recognizable NTO-branded page.
The campaign is launching quickly, so there is no time to procure any additional licenses. However, the development team is available to apply any required changes to the portal.
Which approach should the identity architect recommend?
A. Implement Experience ID in the code and extend the URLs and endpomts, as required.
B. Configure an additional community site on the same org that is dedicated for the new brand.
C. Create a full sandbox to replicate the portal site and update the branding accordingly.
D. Use Heroku to build the new brand site and embedded login to reuse identities.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 107
Which two considerations should be made when implementing Delegated Authentication?
Choose 2 answers
A. It can be used to authenticate API clients and mobile apps.
B. Salesforce servers receive but do not validate a user's credentials.
C. Just-in-time Provisioning can be configured for new users.
D. It requires trusted IP ranges at the User Profile level.
E. The authentication web service can include custom attributes.
Answer: (SHOW ANSWER)

NEW QUESTION: 108
Universal Containers (UC) is using its production org as the identity provider for a new Experience Cloud site and the identity architect is deciding which login experience to use for the site.
Which two page types are valid login page types for the site?
Choose 2 answers
A. Experience Builder Page
B. Embedded Login Page
C. Login Discovery Page
D. lightning Experience Page
Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 109
Northern Trail Outfitters is implementing a busmess-to-business (B2B) collaboration site using Salesforce Experience Cloud. The partners will authenticate with an existing identity provider and the solution will utilize Security Assertion Markup Language (SAML) to provide single sign-on to Salesforce. Delegated administration will be used in the Expenence Cloud site to allow the partners to administer their users' access.
How should a partner identity be provisioned in Salesforce for this solution?
A. Create a contactless user.
B. Create only a contact.
C. Create a user and a related contact.
D. Create a person account.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 110
An Identity and Access Management (IAM) Architect is recommending Identity Connect to integrate Microsoft Active Directory (AD) with Salesforce for user provisioning, deprovisioning and single sign-on (SSO).
Which feature of Identity Connect is applicable for this scenano?
A. If the number of provisioned users exceeds Salesforce licence allowances, identity Connect will start disabling the existing Salesforce users in First-in, First-out (FIFO) fashion.
B. When Identity Connect is in place, if a user is deprovisioned in an on-premise AD, the user's Salesforce session Is revoked Immediately.
C. Identity Connect can be deployed as a managed package on salesforce org, leveraging High Availability of Salesforce Platform out-of-the-box.
D. When configured, Identity Connect acts as an identity provider to both Active Directory and Salesforce, thus providing SSO as a default feature.
Answer: (SHOW ANSWER)

NEW QUESTION: 111
Universal containers wants to set up SSO for a selected group of users to access external applications from salesforce through App launcher. Which three steps must be completed in salesforce to accomplish the goal?
A. Complete single Sign-on settings in security controls.
B. Create named credentials for each external system.
C. Create connected apps for the external applications.
D. Complete my domain and Identity provider setup.
E. Associate user profiles with the connected Apps.
Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 112
A financial services company uses Salesforce and has a compliance requirement to track information about devices from which users log in. Also, a Salesforce Security Administrator needs to have the ability to revoke the device from which users log in.
What should be used to fulfill this requirement?
A. Use multi-factor authentication (MFA) to meet the compliance requirement to track device information.
B. Use Login Flows to capture device from which users log in and store device and user information in a custom object.
C. Use the Login History object to track information about devices from which users log in.
D. Use the Activations feature to meet the compliance requirement to track device information.
Answer: (SHOW ANSWER)

NEW QUESTION: 113
Universal Containers (UC) would like to enable SAML based SSO for a Salesforce Partner Community. UC has an existing LDAP identity store and a third-party portal. They would like to use the existing portal as the primary site these

users access, but also want to allow seamless access to the partner community. What SSO flow should an Architect recommend?

A. SP-Initiated.

B. Web Server.

C. Idp-Initiated.

D. User- Agent.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 114

Northern Trail Outfitters (NTO) is planning to roll out a partner portal for its distributors using Experience Cloud. NTO would like to use an external identity provider (idP) and for partners to register for access to the portal. Each partner should be allowed to register only once to avoid duplicate accounts with Salesforce.

What should a identity architect recommend to create partners?

A. Create a custom web page in the Portal and create users in the IdP and Experience Cloud using published APIs.

B. On successful creation of Partners using Self Registration page in Experience Cloud, create identity in Ping.

C. Create a custom page m Experience Cloud to self register partner with Experience Cloud and Ping identity store.

D. Allow partners to register through the IdP and create partner users in Salesforce through an API.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 115

Universal Containers is creating a mobile application that will be secured by Salesforce Identity using the OAuth 2.0 user-agent flow. Application users will authenticate using username and password. They should not be forced to approve API access in the mobile app or reauthenticate for 3 months.

Which two connected app options need to be configured to fulfill this use case?

Choose 2 answers

A. Set Permitted Users to "Admin approved users are pre-authorized".

B. Set the Refresh Token Policy to expire refresh token after 3 months.

C. Set Permitted Users to "All users may self-authorize".

D. Set the Session Timeout value to 3 months.

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 116

What item should an Architect consider when designing a Delegated Authentication implementation?

A. The Web service should be secured with TLS using Salesforce trusted certificates.

B. The Web service should be able to accept one to four input method parameters.

C. The web service should use the Salesforce Federation ID to identify the user.

D. The Web service should implement a custom password decryption method.

Answer: (SHOW ANSWER)

NEW QUESTION: 117

An identity architect is implementing a mobile-first Consumer Identity Access Management (CIAM) for external users. User authentication is the only requirement. The users email or mobile phone number should be supported as a username.
Which two licenses are needed to meet this requirement?
Choose 2 answers
A. SMS verification Credits
B. External Identity Licenses
C. Email Verification Credits
D. Identity Connect Licenses
Answer: (SHOW ANSWER)

NEW QUESTION: 118
A global company's Salesforce Identity Architect is reviewing its Salesforce production org login history and is seeing some intermittent Security Assertion Markup Language (SAML SSO) 'Replay Detected and Assertion Invalid' login errors.
Which two issues would cause these errors?
Choose 2 answers
A. The subject element is missing from the assertion sent to salesforce.
B. The current time setting of the company's identity provider (IdP) and Salesforce platform is out of sync by more than eight minutes.
C. The certificate loaded into SSO configuration does not match the certificate used by the IdP.
D. The assertion sent to 5alesforce contains an assertion ID previously used.
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 119
Which two roles of the systems are involved in an environment where salesforce users are enabled to access Google Apps from within salesforce through App launcher and connected App set up? Choose 2 answers
A. Salesforce is the service provider
B. Google is the service provider
C. Salesforce is the identity provider
D. Google is the identity provider
Answer: A (LEAVE A REPLY)

NEW QUESTION: 120
Universal Containers (UC) is concerned that having a self-registration page will provide a means for "bots" or unintended audiences to create user records, thereby consuming licenses and adding dirty data.
Which two actions should UC take to prevent unauthorized form submissions during the self-registration process? (Choose two.)
A. Use open-ended security questions and complex password requirements.
B. Primarily use lookup and picklist fields on the self-registration page.
C. Use hidden fields populated via JavaScript events in the self-registration page.

D. Require a CAPTCHA at the end of the self-registration process.
Answer: (SHOW ANSWER)

NEW QUESTION: 121
The CMO of an advertising company has invited an Identity and Access Management (IAM) specialist to discuss Salesforce out-of-box capabilities for configuring the company*s login and registration experience on Salesforce Experience Cloud.
The CMO is looking to brand the login page with the company's logo, background color, login button color, and dynamic right-frame from an external URL.
Which two solutions should the IAM specialist recommend?
Choose 2 answers
A. Use Experience Builder to build branded Reset and Forgot Password pages.
B. Build custom site pages for reset and forgot password features.
C. Build custom pages for branding requirements in Experience Cloud.
D. Login & Registration pages can be branded in the Community Administration settings.
Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 122
Universal containers wants to build a custom mobile app connecting to salesforce using Oauth, and would like to restrict the types of resources mobile users can access. What Oauth feature of Salesforce should be used to achieve the goal?
A. Access Tokens
B. Mobile pins
C. Refresh Tokens
D. Scopes
Answer: D (LEAVE A REPLY)

NEW QUESTION: 123
Universal Containers (UC) is looking to purchase a third-party application as an Identity Provider. UC is looking to develop a business case for the purchase in general and has enlisted an Architect for advice. Which two capabilities of an Identity Provider should the Architect detail to help strengthen the business case? Choose 2 answers
A. The Identity Provider can authenticate multiple applications.

B. The Identity Provider can authenticate multiple social media accounts.
C. The Identity Provider can centralize enterprise password policy.
D. The Identity provider can store credentials for multiple applications.
Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 124
Universal containers(UC) wants to integrate a third-party reward calculation system with salesforce to calculate rewards. Rewards will be calculated on a schedule basis and update back into salesforce. The integration between Salesforce and the reward calculation system needs to be secure. Which are the recommended best practices for using Oauth flows in this scenario? Choose 2 answers
A. Oauth refresh token flow
B. Oauth SAML bearer assertion flow
C. Oauth Username-password flow
D. Oauthjwt bearer token flow
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 125
Universal Containers (UC) uses a home-grown Employee portal for their employees to collaborate. UC decides to use Salesforce Ideas to allow employees to post Ideas from the Employee portal. When users click on some of the links in the Employee portal, the users should be redirected to Salesforce, authenticated, and presented with the relevant pages. What OAuth flow is best suited for this scenario?
A. User-Agent flow
B. SAML Bearer Assertion flow
C. Web Server flow
D. Web Application flow
Answer: C (LEAVE A REPLY)

NEW QUESTION: 126
Which three types ofattacks would a 2-Factor Authentication solution help garden against?
A. Phishing attacks
B. Man-in-the-middle attacks
C. Key logging attacks
D. Network perimeter attacks
E. Dictionary attacks
Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 127
Universal containers (UC) would like to enable SSO between their existing Active Directory infrastructure and salesforce. The it team prefers to manage all users in Active Directory and would like to avoid doing any initial setup of users in salesforce directly, including the correct assignment of profiles, roles and groups. Which two optimal solutions should UC use to provision users in salesforce? Choose 2 answers

A. Use the salesforce REST API to sync users from active directory to salesforce
B. Use Active Directory Federation Services to sync users from active directory to salesforce.
C. Use an app exchange product to sync users from Active Directory to salesforce.
D. Use Identity connect to sync users from Active Directory to salesforce
Answer: C,D (LEAVE A REPLY)
