NEW QUESTION: 1

You are troubleshooting a Carbon Black Cloud Sensor issue.

What repcli command will gather the needed logs and package them in a .zip file?

- A. repcli gather
- B. repcli logs
- C. repcli capture
- D. repcli collect

Answer: C (LEAVE A REPLY)

NEW QUESTION: 2

A consulting security firm was hired to inspect your infrastructure for vulnerabilities.

The firm inspected these items:

badge readers to enter the datacenter

locks on server racks

security cameras in the datacenter

What type of infrastructure are they inspecting?

- A. Personnel Infrastructure
- B. Logical Infrastructure
- C. Virtual Infrastructure
- D. Physical Infrastructure

Answer: D (LEAVE A REPLY)

NEW QUESTION: 3

An administrator has added a new ESXi host to a vCenter Server Cluster with NSX-T Data Center already working. The administrator installed NSX-T Data Center components in the new ESXi. When the administrator deploys a new VM in the host, connectivity tests good with ping, but SSH session traffic is erratic. The VDS and NSX-T Data Center configuration

is the same as each ESXI in the Cluster, but only VMs in the new ESXI are having problems.

What should the administrator do to address the problem?

- A. Change VDS MTU to 2000 in each physical uplink.
- B. Verify MTU configuration in each physical uplink.
- C. Change VDS MTU to 1500 in each physical uplink.
- D. Verify VLAN connection in each physical uplink.

Answer: (SHOW ANSWER)

NEW QUESTION: 4

A company has just implemented new security guidelines in regards to device management. All iOS devices must now require a passcode to unlock the device.

An administrator must implement these requirements:

all iOS devices must have a passcode

minimum passcode length of 6 numerals

auto-lock after 2 minutes

What type of profile in Workspace ONE UEM would the administrator create to accomplish this task?

- A. User Profile
- B. Access Profile
- C. Device Profile
- D. Compliance Profile

Answer: (SHOW ANSWER)

NEW QUESTION: 5

Which are two use cases for NSX Intelligence? (Choose two.)

- A. Perform day 2 network operations and troubleshooting.
- B. Simplify rule recommendation and deployment.
- C. Identify security vulnerabilities and automatically quarantine affected workloads.
- D. Gain insight about micro-segmentation traffic flows.
- E. Provide end-to-end network visibility for physical, virtual, and third-party environments.

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 6

For Carbon Black Cloud two-factor authentication, which of the following is true?

- A. At least two registered users are required.
- B. Only Google Authentication is supported.
- C. It is enabled once the organization passes 100 users.
- D. It is required at first login by default.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 7

When creating a Windows Update Policy for a Workspace ONE solution, which option allows an administrator to utilize local network traffic only for peer traffic?

- A. use internet peers
- B. use peers on the same local network domain
- C. simple download mode
- D. use peers on same NAT only

Answer: B (LEAVE A REPLY)

NEW QUESTION: 8

In what order are NSX-T Distributed Firewall rules processed?

- A. Top-to-bottom, left-to-right, finding a rule match the packet is processed per the rule and continues to next rule.
- B. Top-to-bottom, left-to-right, finding a rule match the packet is processed per the rule and stops.
- C. Left-to-right, top-to-bottom, finding a rule match the packet is processed per the rule and stops.
- D. Left-to-right, top-to-bottom, finding a rule match the packet is processed per the rule and continues to next rule.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 9

Which two options are available for Windows Update Source when creating a Windows Profile for patch management in a Workspace ONE deployment? (Choose two.)

- A. WSUS
- B. Microsoft Update Service
- C. VMware Update Service
- D. Cloud Update Service
- E. VMware Update Manager

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 10

Which is the built-in two factor authentication method in Workspace ONE Access?

- A. VMware Verify
- B. VMware SMS
- C. VMware Push
- D. VMware Auth

Answer: A (LEAVE A REPLY)

NEW QUESTION: 11

Which three tasks are completed during the installation of NSX-T Data Center Workflow for vSphere? (Choose three.)

- A. install the NSX Manager, configure a compute manager, deploy additional NSX Manager nodes to form a cluster
- B. create transport zones and set type to VXLAN and VLAN; create host transport nodes and standard or enhanced N-VDS/VDS as needed
- C. create transport zones and set type to Overlay and VLAN; create host transport nodes and standard or enhanced N-VDS/VDS as needed
- D. install NSX Edges, then create an NSX Edge cluster
- E. install NSX Tier-0 or Tier-1 gateways, then create an NSX Edge cluster

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 12

How does an NSX-T Data Center firewall rule handle an Apply To setting for the firewall policy and firewall rule?

- A. The policy Apply To will take precedent.
- B. The rule Apply To will take precedent.
- C. The last Apply To created will take precedent.
- D. The first Apply To created will take precedent.

Answer: (SHOW ANSWER)

NEW QUESTION: 13

Which three options are valid unattended installation options for Carbon Black Cloud Sensors? (Choose three.)

- A. LICENSE_CODE=
- B. GROUP_NAME=
- C. COMPANY_CODE=
- D. AUTO_UPDATE=
- E. UPDATESOURCE=

Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 14

Where in the NSX UI does an administrator add an Active Directory Domain?

- A. Go to Security > Configuration > Identity Firewall AD > ADD ACTIVE DIRECTORY
- B. Go to Home > Configuration > Identity Firewall AD > ADD ACTIVE DIRECTORY
- C. Go to System > Configuration > Identity Firewall AD > ADD ACTIVE DIRECTORY
- D. Go to Inventory > Configuration > Identity Firewall AD > ADD ACTIVE DIRECTORY

Answer: C (LEAVE A REPLY)

NEW QUESTION: 15

In a Workspace ONE deployment, what two commands are available for a Windows policy when sending a command action as part of a compliance policy? (Choose two.)

- A. Enterprise Wipe
- B. Apply Baseline
- C. Request Device Checkin
- D. Apply Profile
- E. Device Wipe

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 16

When creating a new Identity Provider (IdP) in Workspace ONE Access, which two methods are used to identify users? (Choose two.)

- A. SAML Response
- B. NameID Element
- C. SAML Attribute
- D. UserID Element
- E. User Attribute

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 17

An administrator has been asked to install Guest Introspection Thin Agent using VMware Tools on a Windows 10 VDI solution.

Which statement is correct for enabling the Identity Firewall feature?

- A. Select Guest Introspection Drivers to install File Introspection (vsepfilt) and Network Introspection (vnetflt) drivers.
- B. Guest Introspection drivers are included with VMware Tools for Windows and a reboot of the VM is required to initialize the drivers
- C. Guest Introspection drivers are available from third-party providers and can be initialized without a VM reboot.
- D. To install Guest Introspection on a Windows VM, you must perform a custom install and select the drivers.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

An administrator is updating NSX Distributed Firewall rules. The administrator did the Publish a few minutes ago and is now receiving calls about lost connections. The administrator has decided to roll-back the configuration.

Where can the administrator see past saved configurations to perform the rollback?

- A. Go to Inventory > Distributed Firewall > ACTIONS > Configurations - View
- B. Go to System > Distributed Firewall > Configurations > View
- C. Go to Security > Distributed Firewall > ACTIONS > Configurations - View
- D. Go to System > Distributed Firewall > Rolling back > View

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

When designing NSX-T for high availability with Layer 2 adjacency, what is the recommended number of NSX Managers that should be deployed?

- A. 3 NSX Managers using a VIP address for Management
- B. 2 NSX Managers deployed using a load balancer
- C. 2 NSX Managers using a VIP address for Management
- D. 1 NSX Manager using vSphere for high availability

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

An organization is expanding NSX to deploy the NSX Distributed Firewall on an AWS VPC and Azure VNET.

Which statement is true concerning the expansion?

- A. NSX can choose native security components on AWS and Azure or agent based mode.
- B. The request is not possible because NSX works only in VMware environments.
- C. NSX can only do an agent based mode on AWS and Azure.
- D. NSX can only manage native security components on AWS and Azure with agent based mode.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

When creating a sensor group in VMware Carbon Black Cloud, which three are valid criteria? (Choose three.)

- A. Organizational Username
- B. Active Directory Organizational Unit
- C. Location Name
- D. Subnet
- E. Device Name

Answer: B,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 22

Which is the name of the default policy that is applied to all applications in Workspace ONE Access?

- A. default_access_policy_set
- B. default_application_policy
- C. default_policy
- D. primary_policy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

In the NSX Manager UI, which tab is selected to manage firewall rules?

- A. Networking tab
- B. Plan & Troubleshoot tab
- C. Inventory tab
- D. Security tab

Answer: ([SHOW ANSWER](#))
