NEW QUESTION: 1

A system administrator needs to perform an image based backup of SDDC Manager using VMware vSphere Storage APIs - Data Protection Which type of backup must be performed to reduce the backup time and storage cost?

- A. Differential
- B. Synthetic full
- C. Incremental
- D. Mirror

Answer: D (LEAVE A REPLY)

NEW QUESTION: 2

Which two prerequisites are required to create vSphere with Tanzu namespace? (Choose two.)

- A. A cluster with vSphere with Tanzu must be configured.
- B. A local content library must be created and configured-
- C. The Primary Workload Network must be available
- D. Kubemetes clusters and objects must have access to the company NTP and company DNS.
- E. Verify that the administrator has the prrilegeNamespaces. Manage label on the Supervisor Cluster

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 3

An administrator is tasked with creating a federation between five VMware Cloud Foundation instances. What is the number of SDDC Manager instances that must be assigned the controller role to enable HA?

- A. 2

- B. 3
- C. 1
- D. 5

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 4

Which two components are included in the NSX-T upgrade process within VMware Cloud Foundation? (Choose two.)

- A. NSX-T Upgrade Coordinator service
- B. Virtual Distributed Switch (vDS)
- C. NSX-T Controllers
- D. NSX-T VIBs installed on ESXi hosts
- E. VMware vCenter Server

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 5

An administrator has been tasked with deploying a VMware Cloud Foundation Workload Domain Stretched Cluster that consists of eight (8) hosts four (4) hosts have been successfully deployed and commissioned in Availability Zone 1 (AZ1).

All other required prerequisites have been met The administrator has started the procedure of stretching the VMware vSAN cluster by creating a new network pool in Availability Zone 2 (AZ2) What is the next step in the procedure?

- A. Get the UID of the Cluster in AZ1 using the API Explorer
- B. Get the UIDs of the hosts in AZ1 using the API Explorer.
- C. Commission the four (4) hosts within SDDC Manager
- D. Stretch the VMware vSAN Cluster using the API.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 6

Which sizing tool is available for calculating management domain storage requirements?

- A. VMware Configuration Maximums
- B. VMware Compatibility Guide
- C. Virtualization Assessment Package
- D. vSAN ReadyNode Sizer

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 7

Which prerequisite is correct for vRealize Automation when deploying vRealize Suite components using vRealize Suite Lifecycle Manager?

- A. Deploy Workspace ONE Access before vRealize Automation
- B. Deploy vRealize Operations Manager before vRealize Automation.

C. Configure the vRealize Suite Lifecycle Manager appliance to use the ESXi host as a NTP source.

D. Run an external vRealize Orchestrator workflow.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

What is the benefit of placing vRealize Suite Lifecycle Manager on the cross-region Application Virtual Network?

A. SDDC Manager uses the cross-region network to deploy vRealize Log Insight and vRealize Automation Proxy Servers, and this is not configurable.

B. After a recovery, an administrator can continue using the same IP address, DNS record, and routing configuration

C. vRealize Suite Lifecycle Manager cannot be placed on the cross-region network as it is reserved for Workload VMs only.

D. vRealize Suite Lifecycle Manager can be deployed in cluster mode

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

While assessing an environment for VMware Cloud Foundation, it was relayed that the enterprise is expanding their global presence with multiple data centers in order to simplify their IT operations without increasing their IT staff. How can this goal be achieved?

A. SDDC Manager Cluster

B. Centrally via 1 LCM Deployment

C. Multi-Instance Federation

D. Leverage L2 VPN

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 10

An administrator has deleted an NSX manager application from the management domain by accident and now needs to restore the NSX Manager application as soon as possible.

Which three steps are necessary to accomplish this goal? (Choose three)

A. Refresh the SSH Keys that are stored in the SDDC Manager inventory

B. Configure the new NSX Manager appliance with SFTP server settings.

C. Download and decrypt the encrypted backup file from the SF IP server

D. Deploy a new NSX Manager appliance.

E. Create a JSON file containing the NSX Manager configuration, and insert an API access token

F. Restore a known good configuration.

Answer: C,E,F ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which two statements are correct about VMware Cloud Foundation (VCF) license editions" (Choose two)

- A. VCF Advanced Edition allows large-scale migrations from old environments to VCF
- B. All VCF license editions include automated deployment and lifecycle management of VCI components
- C. VCF Starter Edition allows stretching clusters across multiple availability zones.
- D. VCF Enterprise Edition has the capability to use Tanzu Kubernetes services on vSphere.
- E. All VCF license editions have the capability of automated deployment and lifecycle management of user workloads

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

A customer would like to add capacity to run virtual machines with archiving software. Which workload domain can he used if NFS is the principal storage?

- A. VI Workload Domain
- B. Horizon Workload Domain
- C. Kubernetes Workload Domain
- D. Management Domain

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

An administrator adds permissions to a namespace in vSphere with Tanzu. Which prerequisite must be satisfied before a user or group can be assigned to a namespace?

- A. It must be assigned with Administrator role in vCenter Server
- B. It must be a member of vSphere SSO identity source
- C. It must be assigned with Administrator role on SDDC Manager level.
- D. It must be created in Kubernetes cluster.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 14

Which use case is valid for a Stretch Cluster design in a VMware Cloud Foundation Workload Domain?

- A. Hybrid Cloud Management
- B. Manual Workload Recovery
- C. Planned Maintenance
- D. Application Modernization

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 15

An administrator has been tasked with updating license keys in a VMware Cloud Foundation environment. These licenses include:

- * VMware vSphere
- * VMware vSAN
- * VMware vCenter Server
- * VMware NSX-T Data Center

Where must an administrator go in order to update the specified license keys?

- A. VMware vCenter > Administration > Licensing
- B. VMware vRealize Suite Lifecycle Manager > Locker
- C. SDDC Manager > Inventory
- D. SDDC Manager > Administration > Licensing

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 16

An administrator has been tasked with increasing the available capacity within an existing Cloud Foundation deployment to support the deployment of a production Workload Management cluster.

The VMware Cloud Foundation environment consists of a single workload called Production. The Production workload domain consists of a single vSAN Cluster called Production-01 that existing Virtual Machines. During the original deployment, even through automated firmware updates were not required, the Production workload domain was configured to use vSphere Lifecycle Images to automate its ongoing lifecycle management.

Four new hosts have been commissioned in SDDC Manager to support Workload Management. The new hosts are identically configured to the hosts that are currently deployed into the Production-01 cluster.

Which process must the administrator complete to enable Workload Management?

- A. Create a new vSAN Cluster within a new vSphere Lifecycle Manager Image-based workload domain.
- B. Create a new vSAN Cluster within the Production workload domain
- C. Create a new vSAN Cluster within a new vSphere Lifecycle Manager Baseline-based workload domain.
- D. Extend the Production-01 vSAN cluster with the additional four hosts.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 17

An administrator is creating network pools.

What must be considered for sizing the network pools?

- A. Number of virtual machines
- B. Number of pods
- C. Number of workload domains
- D. Number of users

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 18

Which step should be followed to restore SDDC Manager using the OVF tool?

- A. Install the OVF Tool on a system in the VI Workload domain.
- B. Retrieve the DNS name or IP address of a host in the management Domain
- C. Move the SDDC Manager VM into the VI Workload Resource Pool.
- D. Use the host's DNS name in the host password_vault.json, and this will display the root password

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

What is required when creating storage policies for vSphere with Tanzu?

- A. Verify that the storage policies are set and will be assigned to the Supervisor Cluster.
- B. Ensure that the reference datastore in the storage policy is shared between all ESXi hosts in the cluster
- C. Ensure that appropriate tags and attributes are added to the datastore
- D. Verify that the storage policies are set and will be assigned to the Supervisor Namespace.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 20

Where can NSX T be used in VMware Cloud Foundation?

- A. Only with consolidated architectures
- B. In all architectures
- C. Only with standard architectures
- D. in an external cluster

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 21

What is the minimum required number of hosts when deploying the VMware Cloud Foundation Management Domain?

- A. 5
- B. 3
- C. 4
- D. 6

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 22

Which two statements regarding MTU size should be considered prior to executing a deployment of VMware Cloud Foundation? (Choose two.)

- A. MTU of 9000 is a minimum for all non-management VLANs
- B. MTU of 1500 is recommended for all non-management VLANs
- C. MTU of 1500 is a minimum for TEP VLANs
- D. MTU of 1600 is a minimum for TFP VLANs
- E. MTU of 9000 is recommended for all non-management VLANs

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 23

A company has data centers in New York, Berlin, and Hong Kong and would like to make cross-region visibility possible. How can this goal be achieved?

- A. Leverage VMware Cloud Foundation Multi-Instance Federation.
- B. VMware Cloud Foundation cannot connect multiple instances, so data must be collected via API.
- C. Use VMware Cloud on AWS as the central hub for data exchange, and present data thru AWS.
- D. Install additional vRealize Operations nodes in each site, and federate the data via Remote Collectors.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 24

An administrator is preparing to enable the vSphere with Tanzu for workload management. Which selection must be made when automating the deployment of the NSX-T Edge Cluster using the SDDC Manager UI (user interface)?

- A. Select the Custom use case, and then select the small Edge Form Factor.
- B. Select the Workload Management use case
- C. Select the Custom use case, and then select the large Edge Form Factor
- D. Select the Workload Management use case, and then select the large Edge Form Factor

Answer: D ([LEAVE A REPLY](#))
